When fucking always use extra
Strong condoms and a water based lube.

1

Always use a new condom that is within its 'use by' date. Open carefully to avoid damaging the condom.

Hold the condom by the teat or closed end, squeezing out air (make room for cum).

Roll the condom right down the cock when it's hard and erect.

2

3

Use plenty of water based lube on the condom and up his arse. Check the condom is still okay while fucking.

Hold condom at base and slide it off, taking care that none of the contents are allowed to spill.

4

5

Tie a knot in the condom and dispose of it sensibly (in a bin, not down the loo).
