Prisons, HIV and AIDS:

Risks and Experiences in Custodial Care

Does HIV risk behaviour occur in prison?

Do prisoners inject drugs in prison?

Do prisoners have sex in prison?

What drugs are used in prison?

What level of HIV infection is there amongst prisoners?

Information about these and other questions is available in '**Prisons, HIV and AIDS: Risks and Experiences in Custodial Care**'. A new report now available from AVERT.

The report gives the results of a survey of 450 ex-prisoners, carried out by The Centre for Research on Drugs and Health Behaviour. The report also includes background information about the current response to HIV and AIDS in prisons, national and international evidence on HIV and AIDS, and makes a number of recommendations about future policy and practice.

Prisons, HIV and AIDS: Risks and Experiences in Custodial Care by Paul J Turnbull, Kate A Dolan and Gerry V Stimson is now available at a cost of £8.00 from:
