**KING'S**

**HEALTHCARE**

CAMBERWELL HEALTH AUTHORITY SERVICES

**ORAL AND DENTAL**

**SERVICES FOR**

**PEOPLE WITH HIV**

**HIV & GUM**

**DENTAL  
SERVICES**

## **Why are these services necessary?**

It is essential for everyone to receive regular advice and care of the mouth in order to

- **look and feel good**
- **prevent pain and infection**
- **enjoy an adequate and varied diet**

We know that people with HIV and AIDS are more likely to have oral (mouth) and periodontal (gum) problems.

It is therefore very important that you have regular checks and receive:

- 1. Advice on prevention of dental diseases.**
- 2. Monitoring of possible changes in the mouth together with early treatment.**
- 3. Regular scaling of the teeth by a dentist.**

## **So where can you go?**

Kings Healthcare (Camberwell Health Authority Services) has established services at both King's College Hospital Dental School and Myatts Field Community Dental Clinic.

These facilities will provide you with the advice and care you need.

At King's College Hospital Dental School we provide an oral screening service, specialist care for HIV associated oral problems and routine dental care.

In close association with King's College Hospital, The Community Clinic at Myatts Field also provides all forms of dental care within a Health Centre setting for those people who live within Camberwell or West Lambeth Health Authority boundaries. Home visits can be arranged through Myatts Field.

**For appointments  
phone:**

**1. King's College  
Hospital Dental  
School on  
071-326 3163**

and ask for a consultation  
with Mr. Birnbaum.
