AIDS™

Institute for
Scientific Information*

3501 Market Street ■ Philadelphia,
Pennsylvania 19104 U.S.A.

Would you like to cut hours, even days,
from your next reference search...without
missing anything significant from your
own -- or any related -- field?

Turn to FOCUS ON: AIDS™
Basic Research, Applications and Implications.

With Abstracts!

Dear Colleague,

I'm sure you've noticed, as I have, that it's growing more and more difficult to keep up with information on the subject of AIDS.

If you're studying the transmission of the HIV virus...substance abuse...AIDS-related diseases...lifestyles of high-risk populations...sex education in schools...the economics of medical treatment for AIDS patients...or the social, political and legal impact of these or any of dozens of other crucial topics, you face two big problems:

- You must remain absolutely current in your own field;
- You must be continually aware of work being done in related fields, since this often impacts your own.

But where do you find, and how can you possibly review, all of this diverse information?

FOCUS ON: AIDS
The Unique Multidisciplinary Current Awareness Tool

FOCUS ON: AIDS is a biweekly guide -- **available on diskette and in print** -- to the current international science and social sciences literature that deals with AIDS. It goes beyond individual disciplines -- even beyond science -- to bring you the most comprehensive and current information available anywhere.

In addition to covering research on such topics as the life cycle of the AIDS virus; the incidence and control of the disease; the pharmacology of AIDS drugs and vaccines; and the treatment of opportunistic infections...FOCUS ON: AIDS also fills you in on relevant public policy developments; health care management; and other social, economic, political and legal factors that deal with AIDS.

And FOCUS ON: AIDS gives you this breadth of information without sacrificing depth in any single area.

The result? With FOCUS ON: AIDS you will:

- Spend less time locating information -- and free more time for productive use of this information.
- Be continually aware of all the very latest information in your own -- and related -- fields.

(over, please)

Since this unique research tool is targeted specifically to the area of AIDS, it brings you everything -- from every discipline -- that addresses such questions as:

- What is the pathogenicity of HIV-2 as compared to HIV-1?
- How effective is education as a preventive measure against acquiring the AIDS virus?
- What are the statistical projections for AIDS-infected persons in third-world countries? How will these numbers affect the world population as a whole?
- How will the AIDS epidemic affect the clinical medical training of physicians? And in what ways has the fear of AIDS affected the way medical professionals deal with their AIDS-infected patients...or the way patients deal with the risk of contracting AIDS from the medical professionals themselves?

With all of this up-to-date information literally at your fingertips, you'll be able to:

- Discover productive new paths for your own research;
- Spot the potential scientific, economic, and political roadblocks you may have to face;
- Find people, within your field and outside it, with whom you can network;
- Quickly spot trends that can influence the types of research that are funded.

In a minute, I'll explain how you can try this unique new research tool free and entirely without risk. But first, let me tell you about its...

Convenient, Comprehensive Coverage

FOCUS ON: AIDS gives you quick access to bibliographic information selected from the current issues of thousands of science and social sciences journals, books and conference proceedings...as well as from the popular and gay press, and from major legal journals.

Abstracts -- A Powerful Feature

And if that weren't enough, FOCUS ON: AIDS also features published, English language abstracts for many of the articles and books it covers!

Abstracts save hours of your time because they enable you to determine the actual content of a specific article or chapter...before you order a reprint or attempt to locate the journal or book in which it is published.

FOCUS ON: AIDS -- ON DISKETTE With KeyWords PlusSM

With the diskette version of FOCUS ON: AIDS, you'll also benefit from a powerful, revolutionary search method designed to increase your retrieval of information on specific topics of interest -- KeyWords Plus.

KeyWords Plus is the exclusive ISI feature that enables you to perform thorough searches of the published literature. By employing KeyWords Plus -- additional search terms taken directly from an author's bibliography -- you'll retrieve more relevant articles pertaining to your search than you would if you used traditional title words.

In fact, KeyWords Plus can as much as double the amount of vital, relevant information you'll retrieve.

The Diskette Advantage

As a subscriber to FOCUS ON: AIDS on diskette, you'll receive a start-up kit with search and retrieval software for IBM and 100% compatibles, Apple Macintosh or NEC 9800 Series personal computers, along with an easy-to-follow reference guide, a tutorial, and sample data.

Then, every other week, we'll send you one or more diskettes with bibliographic information -- and abstracts -- on current articles, books and conference proceedings.

You'll be free to search for specific terms...browse article titles or disciplines -- at your own speed...create your own search profiles and store them for later use...print out findings...export search results to your personal database...automatically generate orders for articles from ISI's low-cost, high-speed document delivery service...and automatically generate author reprint requests.

FOCUS ON: AIDS -- IN PRINT Portable and Convenient

As a subscriber to the print version of FOCUS ON: AIDS, you'll receive -- every other week -- an 8-1/2" x 11" soft-bound issue with bibliographic information -- and abstracts -- on current articles, books and conference proceedings.

You can then take advantage of its clear, consistent format to browse or search the literature with ease.

With all of the information that FOCUS ON: AIDS in print provides, you might expect it to be a large, unwieldy product. In fact, FOCUS ON: AIDS in print is published in a portable format that fits easily into your briefcase. So you can carry it with you and read it wherever you go...whenever you like.

The Latest Research Advancements from ISI

I'm sure you can see the value of what FOCUS ON: AIDS has to offer. But if you're not already familiar with ISI, the organization that developed this unique new reference tool, you may be wondering how we can deliver on all these exciting promises. Let me give you a little background by way of assurance.

ISI has been breaking new ground in the development of creative research tools for more than 30 years.

ISI products, such as Current Contents® and the Science Citation Index®, have changed forever the way researchers access information, and today they are international standards for bibliographic research.

To support these substantive products, ISI maintains the most extensive multidisciplinary bibliographic database in the world. No library, no single online or CD ROM product comes anywhere close to it in scope. And this vast database forms the foundation for FOCUS ON: AIDS.

(over, please)

Special Risk-Free Charter Subscription!

I hope, by now, that you're as enthusiastic as we are about this unique new research tool. To make you feel even more positive, we've put together a totally risk-free offer that you can't afford to miss.

Act Now...And Receive a \$50 Discount

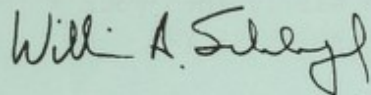

Order your one-year subscription to FOCUS ON: AIDS -- on diskette or in print -- and save \$50 off the normal rate. For one low price you'll get multidisciplinary information you won't find anywhere else at any price! When you subscribe, you're protected by this unconditional guarantee:

If, after one month, you're not completely satisfied, simply write "cancel" on the invoice and return it to us. You'll pay nothing, and the FOCUS ON: AIDS issues -- and the retrieval software, the tutorial and the reference guide for the diskette version -- are yours to keep...free.

I'm sure you'll agree that you can only gain by taking advantage of this outstanding, one-time, no-risk opportunity.

Please join us as a Charter Subscriber. A handy order form and postpaid return envelope are enclosed. Or, better yet, **call toll-free: 1-800-336-4474**. Outside the U.S. and Canada, **call 215-386-0100, extension 1483**. And ask for the operator number shown on the enclosed order form.

Sincerely,

William A. Schlegel
Chief Operating Officer

P.S. You're dealing with critical issues and have an urgent need to stay current in your field. Don't miss out on this comprehensive low-cost source of up-to-the-minute information on your own -- and related -- disciplines.

Don't miss a single issue. Send in your form, or phone today!
