TAKEM

men now...

CARE

AIDS: The facts

- **Lothian has the UK's worst HIV/AIDS problem. Already several thousand people are infected.**
- **HIV has begun to spread through the population - in Edinburgh 1 in 100 men and 1 in 250 women aged 15-45 now have the virus.**
- **We can all protect ourselves if we know how. No-one else needs to be infected.**

We encourage you to:

- **Know the basic facts.**
- **Work out what TAKING CARE means for you.**
- **Encourage others to TAKE CARE.**

AIDS is caused by a virus, HIV. Once you have HIV your body's defences can have trouble fighting off other diseases. At present there is no cure or vaccine for AIDS, although treatment is available to help people with HIV.

HIV is most often spread by:

- **having sexual intercourse**
- **sharing needles or syringes**

You can't tell by looking at someone if they have HIV. When people have HIV, they often look and feel healthy for years, however they are infectious.

What does TAKING CARE mean for you?

- Choosing not to have a sexual relationship?**
- Choosing not to have intercourse?**
- Using condoms to reduce the risk if you have intercourse?**
- Being faithful to a faithful partner?**
- Never sharing needles or syringes?**

AIDS CONCERNS US ALL

from HIV you CAN'T

If you are having intercourse, using a condom makes sense for lots of reasons.

Condoms can prevent...

- **Cervical Cancer**
- **Chlamydia**
- **Gonorrhoea**
- **HIV infection**
- **Syphilis**
- **Other sexually transmitted diseases**
- **& PREGNANCY**

...especially when used with a spermicide

You can get condoms **free** from Family Planning Clinics or the Brook Advisory Centre. No appointment is necessary, just drop in and ask for a **C card**. With the card, you can pick up free condoms.
