COUGH
SUPPRESSION
WITH
DECONGESTION

...**'Actifed'**

Compound Linctus

'Actifed' Compound Linctus is the cough suppressant with decongestive and antihistamine properties.

Each teaspoonful contains:

Triprolidine Hydrochloride, 1 mgm. This, the most potent, most rapid, and one of the safest of antihistamines, relieves irritation caused by allergens in the respiratory tract and promotes nasal decongestion, by reducing capillary permeability.

Pseudoephedrine Hydrochloride, 20 mgm. This powerful vasoconstrictor and bronchodilator decongests the entire mucous respiratory tract. Although its action is similar to that of ephedrine, it produces little, if any, central stimulation. The drug is very effective in reducing bronchospasm.

Codeine Phosphate, 7.5 mgm. A simple cough suppressant, which reduces "useless" cough and relieves irritation in the respiratory tract.

'ACTIFED' Compound Linctus is indicated for the symptomatic relief of:

COUGH

CONGESTION AND COUGH

BRONCHITIC COUGH

UNPRODUCTIVE COUGH

ALLERGY AND COUGH

COLD AND COUGH

DOSAGE Adults, and children over 12 years:

1 to 2 teaspoonfuls every 4 to 6 hours.

Children aged 2 to 12 years:

$\frac{1}{2}$ teaspoonful every 4 to 6 hours.

CAUTION Although pseudoephedrine causes virtually no pressor effect in persons with normal blood pressure, 'Actifed' Compound Linctus should be used with caution in patients with cardiovascular disorders.
