FOR TOPICAL APPLICATION

# CicatrIn

AMINO ACID ★ POWDER ★ ANTIBIOTIC

CICATRIN provides bacitracin and neomycin, the two antibiotics of choice for topical application, in combination with selected amino acids which are held to have a beneficial influence on tissue cell proliferation.

It is an established fact that the development of bacterial resistance to bacitracin and neomycin when used in combination is extremely rare.

The formula of CICATRIN also includes the naturally occurring amino acids, l-cystine, glycine and dl-threonine.

## PRESENTATION

CICATRIN Powder has been specially formulated to provide a powder of extremely small particle size which ensures thorough dispersion over the skin and tissue surface.

## INDICATIONS

**Casualty Treatments:** Abrasions, lacerations, burns.

**Genito-urinary Surgery:** Suprapubic wounds, as a dressing after circumcision.

**Obstetrics:** Perineal and vaginal tears.

**Chronic Wounds:** Trophic and varicose ulcers.

**Rectal Surgery:** Excision of rectum and hæmorrhoidectomy: fistula in ano and ischio-rectal abscess.

**Dermatology:** Impetigo contagiosa, other pyogenic skin infections.

**DIRECTIONS:** Apply twice daily, or as prescribed.

## CONTRA-INDICATIONS:

CICATRIN is not recommended as a treatment for fungal infections.

## FORMULA

Each gramme contains:—

Neomycin Sulphate - - - - 5 mg.

l-Cystine - - - - - 2 mg.

Glycine - - - - - 10 mg.

Zinc Bacitracin - - - - - 250 units

dl-Threonine - - - - - 1 mg.
