EFFERVESCENT UNIVERSAL SALINE.

This pleasant and refreshing Saline will be found exceedingly valuable in PURIFYING THE BLOOD AND COOLING THE SYSTEM, and thus preventing those unpleasant Eruptions and Pimples so common to many at the change of the seasons.

For the relief of HEAD-ACHE and all BILIOUS DISORDERS it will be found very beneficial, acting as a mild Aperient, and also on the liver and kidneys.

In all DYSPEPTIC AFFECTIONS it will give relief by removing acidity, dispelling wind, and thus preventing the disagreeable fulness experienced.

In FEBRILE COMPLAINTS it may be given with great advantage, allaying the fever and proving a MOST REFRESHING BEVERAGE, and for these reasons can be strongly recommended to all travellers visiting the tropics and in hot weather in this country.

DOSE.—A tea-spoonful to be taken in tepid water half an hour before breakfast.

FOR BILIOUS HEAD-ACHE—a dose may be taken during the attack. FOR DYSPEPSIA—the effervescence should be allowed to slightly subside before taking. In FEBRILE COMPLAINTS, and as a cooling beverage during hot weather, a small dose may be taken at occasional intervals.

A perfectly dry spoon should be used, and the bottle kept well stoppered when not in use.
