**CICFA.**

**C**URES, **I**NDIGESTION, **C**ONSTIPATION, **F**LATULENCE, **A**CIDITY

THE ONLY MEDICINE THAT

**CURES AND PREVENTS**

# Indigestion,

With Flatulence and Constipation.

A cure for Indigestion, if really a cure, must contain what is necessary to cause each and every organ that aids the process of digestion to do its work in a natural healthy manner. Purgatives often make you feel better for two or three days, but they do not cure.

**T**HREE-QUARTERS of all cases of INDIGESTION are **BOWEL** INDIGESTION, that is, bread, potatoes, and other starchy foods are not digested in the bowel as they should be; fermentation with gases and consequent Flatulence, Constipation, Pain, Distress, etc., follow. Cicfa is the only medicine which will digest the starchy food, and, therefore, CURE **BOWEL** INDIGESTION, while also digesting eggs, meat, and other albuminous foods which are digested in the Stomach, consequently Cicfa also cures **STOMACH** INDIGESTION. Cicfa, therefore, stands alone as the only medicine which digests every kind of food. You can easily prove it. Try them and your Indigestion will disappear, as well as your Flatulence, Constipation, Biliousness, etc. There can be no failure because Cicfa is the only remedy which simply takes the place of Nature, that is, which removes the cause of every symptom.

## "NERVES" and INDIGESTION.

Those who suffer from "Nerves" have almost always Nervous Dyspepsia. In those cases the little nerves which run to the surface of the lining of the Stomach become exceedingly sensitive, in fact, the nerves of the Stomach are almost as sensitive as those of the eye, and are so sensitive that it requires very little disturbance to cause severe pain.

When there is Indigestion in the Stomach, and the albuminous food ferments instead of being digested, there are gases and acidity. The stomach is not intended to contain gases, therefore, it promptly tries to get rid of the gases and spasmodically contracts, thus squeezing those sensitive little nerves, and causing dreadful pain. At other times the undigested food irritates them, and there is a dull, heavy, or gnawing pain. There is heart palpitation, and the whole nervous system instead of being nourished by the food that is eaten, is deranged, and more or less poisoned by absorption of the foul products of the undigested food.

Cicfa digests all the food so that the stomach is not called upon to do anything. Digested food is soothing to the stomach, while undigested food is irritating, therefore, after taking Cicfa those nerves are soothed instead of being irritated, and gradually they improve because they are also nourished. So also the nourishment is carried to the nerve centres, and while the distressing pain and misery from the Nervous Dyspepsia is removed, the nerve centres are being all strengthened and built up, and from this double excellent effect, the patient soon finds not merely relief, but absolute cure.

We have received many testimonials describing such astounding cures that we refrain from publishing them as they might appear untrue, yet we know they are genuine.

Bear in mind that Cicfa simply does the work for Nature until Nature is nourished, and also brought into the habit of doing her work, so that there is no longer any Indigestion, Constipation, Flatulence, or Acidity.

# EVERY KIND of Indigestion can be cured

BUT ONLY

BY TAKING

# CICFA

BECAUSE

## CICFA Removes the Cause.

**W**HEN Indigestion attacks, it generally persists, and does not disappear without treatment because the system is so rapidly weakened that the gastric juices become affected, and then the next food that is eaten is not digested, and that undigested food again helps to put the little glands, which make the gastric juice, still more out of order, and so they gradually become deranged, until they are incapable of digesting the ordinary food, and are not likely to recover until the proper medicine is taken.

### Indigestion Produces Discomfort and Pain.

When the food is not digested in the stomach and bowels, it becomes impure. It ferments, particularly in the bowel, because the starchy part of the food, that is the bread, potatoes, etc., is digested in the bowel, while the albuminous part, like eggs, meat, etc., is digested in the stomach. When fermentation begins, gases form, and there is flatulence; this causes pressure, distress, and serious pains, heart palpitation, and sudden feelings of weakness, cold hands and feet, heaviness of the head, pain and soreness at the back of the eyes; there is often tenderness over the stomach, and eructations of gas. There is acidity and bad breath, and coated tongue, the liver is soon out of order, and there is biliousness and constipation; sometimes the kidney action is disturbed, there is lack of appetite, sleeplessness, and yet often a drowsy feeling during the day, and no energy or desire for work. The pains in the stomach and bowels are sometimes most severe. There is frequently marked depression and a decline in the general health.

### Better Understand, instead of Misunderstanding Indigestion.

Most persons think that Indigestion occurs only in the stomach, and that the food is all digested in the stomach. Only a quarter of it is digested there, and the other three quarters is digested in the bowel. This fact makes a great difference in the treatment. Most people fancy that Pepsin is a cure for Indigestion. Pepsin has only one action, that is, it digests albumen, and as Indigestion always in a short time involves the bowels as well as the stomach, and also affects other internal organs, Pepsin is of little use, because it is not scientific treatment. A cure for Indigestion, if really a cure, must contain what is necessary to cause each and every organ that aids the process of digestion to do its work in a natural healthy manner.

# CICFA positively cannot fail to cure Indigestion both in the Stomach & Bowel Because they Remove the Cause.

**W**E say CICFA must cure, and the reason is "CICFA removes the cause," that is, CICFA removes the cause of all painful and disagreeable symptoms and conditions which are found connected with Indigestion, as well as Constipation, Flatulence, and Acidity.

When the food enters the Stomach, and the Stomach does not supply plenty of healthy gastric juice, the food ferments and creates the gases and acids which cause the symptoms already described. CICFA contains what will do all the digesting of a meal which must be done in the Stomach, that is, all the albuminous food like eggs and meat, therefore, there can be no fermentation, or rotting, or foul gases, or eructations, or spasmodic contracting of the Stomach, or pain, or heart palpitation, because CICFA has removed what has caused those symptoms.

Now we come to Bowel Indigestion. The food now passes from the Stomach into the Bowel, where all the starchy food must be digested. CICFA contains what will mix with the food and perfectly do all the digesting of the starchy food in the Bowel. It also causes the Liver to supply just the amount of bile that is needed. Its gentle tonic effect on the Bowel causes it to gradually pass the food downwards, and as the food is digested the little lacteals which are placed in the mucous membrane which lines the Bowel, suck up the digested food as nourishment. There are no gases because CICFA has digested all the starch, and there is nothing to ferment. When the starchy food is not digested it all rolls into little hard dry tough balls which lodge lower in the Bowel and will not pass farther along, thus Constipation results, and it is only when a large number of these accumulate that they begin to irritate the Bowel, which by a provision of Nature when irritated throws out a quantity of liquid so as to soften these hard masses and help their removal. Gases begin to form, and there is Diarrhœa, which is quickly over because the Bowel rapidly expels everything. The person feels better, but only for a day or two, as the Bowel gradually fills up again. All this is prevented by CICFA because it has digested the starch in the upper portion of the Bowel, therefore, none of those hard balls can form, therefore, there can be no Constipation, no fermentation or foul gases, no occasional diarrhœa, no upsetting of the Liver by absorption through the lacteals of fermented material, in fact, everyone of these symptoms is absolutely prevented by taking CICFA. The food is all digested so that there is no Acidity, no Flatulence, no Liver trouble, no bitter taste in the mouth, no teeth on edge, no spots before the eyes, no heart palpitation, no Constipation, no Diarrhœa, no headaches or drowsiness from impure blood, no starving of the system through lack of nourishment, because CICFA Removes the Cause, that is, removes what lies at the root of each of these symptoms. The Stomach and Bowels suddenly find the food digested within them, they take up the nourishment from it, and rapidly improve in tone and strength. The tenderness which is largely caused by the pressure of the gases rapidly disappears, because there are no gases any longer formed. The whole process of digestion is quickly made natural because CICFA does not purge or disturb in any way, but simply and quietly causes every organ to act just in the same natural fashion as in perfect health. Gradually Nature begins to help in digestion, and so the dose of CICFA can be reduced, and as nature grows stronger and stronger you can reduce the dose of CICFA until finally it is no longer needed, and you are absolutely cured.

There is no other preparation on the market like it. It is recognised by physicians as the scientific preparation for Constipation, Indigestion, Flatulence, and Acidity. Not only are we frequently informed by persons that their Doctors have permitted them to take CICFA, but we know that in many cases they are prescribed by physicians, being, of course, removed from the bottles to some kind of boxes.

If there is anything you do not understand, and you wish for a fuller and thoroughly scientific investigation, send to us for free booklet.

# CICFA Testimonials

Can be proved to be Genuine,

Because each has the name and address of the writer.

## Cured that Fulness after meals.

Dear Sirs,—I have much pleasure in speaking of your Cicfa. They have done me a wonderful lot of good. Before I took them I used to dread eating my food, but they quite cured me of all that fulness after meals. I shall be pleased to tell any of my friends about them. You can use this as you like. Thanking you for the good they have done me.

Ingwell, Moor Row, R.S.O., Cumberland.

Yours truly, (Mrs.) M. LENAHAN.

## A Novelist finds Cicfa the only cure.

Dear Sirs,—I feel impelled to write and thank you for so splendid and efficacious a medicine as Cicfa. I have long suffered from acute Indigestion, which is no doubt greatly aggravated by my sedentary occupation as a novelist. I have tried many remedies, but find Cicfa the only thing that will cure an attack of my complaint, and from which I always derive instant relief.

31, Gatton Road, Bristol.

Faithfully yours, FRED LUDLOW,

Author of "Tales and Sketches of Old and New Bristol."

## The best remedy I have ever taken for Indigestion with Heart Palpitation.

12, The Mount, Frome, Somerset.

Gentlemen,—I am very pleased to tell you I am quite cured of Indigestion now, and can truthfully state that Cicfa is the best remedy I have ever taken for Indigestion, having suffered from palpitation, pain round the heart, and sickness since the early part of this year. I was in a very weak state. I felt better for the first dose, and went on improving, and now I am very pleased to say I am in good health once more. I shall be very pleased to answer any questions at any time.

I remain, yours very respectfully

(Mrs.) W. L. DUNHAM.

## So marvellous a testimonial that every word of it should form a headline.

62, Woodward Street, West Bromwich.

Dear Sirs,—Both I and my wife have suffered severely from Indigestion for years. I grew worse and gradually weaker. No matter what I ate I had the same pains, which were chiefly at the back of the eyes, between the shoulders, behind my left shoulder blade, and through my chest. My wife's sufferings were also constant and severe. After taking Cicfa for two days I was very much better, and by the time the first box was finished I had no pain whatever. My wife recovered even more quickly, and we are both now in excellent health, and feel as if we had never suffered from Indigestion in the past. You may use this testimonial if you wish.

Truly yours, WM. ALDRIDGE.

## Indigestion with Flatulence and Pain around the Heart cured.

Dear Sirs,—I am writing to say that I have derived great benefit from the use of Cicfa. I have suffered for years with Indigestion and Flatulence which caused a great deal of pain around the heart, but thanks to your Cicfa I am now very much better, and as I wish to go on taking them I shall be glad if you will send me a couple of boxes, for which I enclose P.O.

Bankyffynnon, Golden Grove, Carmarthenshire.

Yours very gratefully (Miss) ANNIE DAVIES.

## Gastric Ulcer and Nervous Debility cured.

Dear Sir,—I feel I must write to you to let you know what a wonderful change your Cicfa has made in my wife during the past six months in which she has been taking them. She has been under two different doctors for treatment, but they did not seem to do her any good. She could not eat anything "to keep it down," and she lost about two stones in weight. The doctors said she was suffering from Gastric Ulcer and Nervous Debility. Well, I was recommended to try a 2/9 box of Cicfa, and I did, and I must say I am glad I tried them, for she is now rapidly recovering her former good health. Wishing every success to your Cicfa, which I will always gladly recommend.

108, Leahurst Road, Lee, Kent.

Believe me, Sir, I remain, Yours truly, CHAS. BLACKMAN.

To enable you to prove that every word we have stated is true, we will send you a FREE SAMPLE on receipt of this Coupon and 2d. to cover postage and packing.

DOSE.—One with meals three times daily. Severe cases may take two each meal.

CICFA is sold in neat little glass bottles at 1/1½ and 2/9. Large size contains three times as many as the small size. From Chemists and Stores, or from

The CAPSULOID CO. Ltd., 47, Holborn Viaduct, London, E.C.

Foreign Orders must be accompanied by postage, and remitted in the form of Money Order. Cross all Postal Orders and make payable to The Capsuloid Company Limited.
