CHERRY LAUREL

(*Prunus laurocerasus*. Family: *Rosaceae*)

The leaves contain a cyanogenetic glycoside, amygdalin, from which hydrocyanic acid is liberated by enzyme action on bruising or chewing. *Poisonous constituent*: cyanogenetic glycoside, amygdalin.

Treatment: immediate treatment of cyanide poisoning should be instituted before gastric lavage.

TO THE MEDICAL PROFESSION

Extil TABLETS

Trade Mark

relieve nasal and respiratory congestion

Each EXTIL TABLET contains :

Carbinoxamine maleate	6 mg
Pseudoephedrine hydrochloride	60 mg

The combination of the potent anti-allergic properties of carbinoxamine with the nasopharyngeal vasoconstrictor properties of pseudoephedrine provide symptomatic relief of nasal congestion in The Common Cold, Vasomotor Rhinitis, Allergic Rhinitis and Hay Fever. Furthermore the decongestant, bronchodilator action of pseudoephedrine dilates the bronchi and facilitates free breathing. Oral therapy with EXTIL TABLETS eliminates the need for topical therapy with nasal drops or sprays which, all too frequently, give rise to the risk of abuse and subsequent habituation.

Available in containers of 25 and 250 tablets
