AN IDEAL TONIC *for the Half-Healthy*

An ideal tonic should have the following properties :

1. It should improve circulatory efficiency and muscular tone.
2. It should increase brain efficiency yet check nervous over-stimulation.
3. It should enrich the blood and ensure optimum oxidising capacity.
4. It should correct any tendency to "acidosis" and furnish the essential minerals, often deficient in our modern dietaries.

*It is claimed that the above desiderata are met by the new tonic preparation,
"VITABENE"*
