## six points on Admune

- \* protective antibody levels in at least 90% of persons inoculated
- \* twice the peak antibody levels produced by any aqueous vaccine
- \* confers immunity which lasts for at least one year
- \* no risk of reaction if correctly administered—the dose is only  $\frac{1}{4}$  that of an aqueous vaccine
- \* confers immunity against current influenza A and B virus strains and against the B virus strain which recently appeared in the Far East
- \* packed in a disposable syringe

influenza virus vaccine (oily adjuvant polyvalent)

an Evans Medical product
