BLOTTING PAD

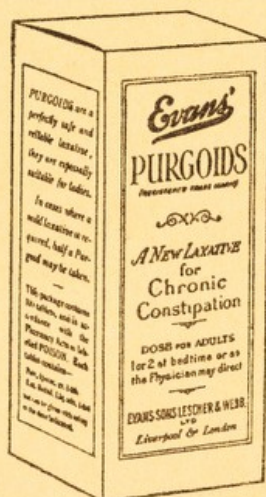

EVANS' PURGOIDS

A gentle and effective laxative, cathartic and cholagogue

PURGOIDS owe their unique laxative action to the correct balance of the formula which consists of Aloin, Phenolphthalein, Ipecacuanha, Belladonna, etc.

They promote peristalsis without causing griping or depression and they exert a distinct cathartic effect by increasing intestinal secretion.

The safety and comfort which attend their use render them of

particular value to the nursing mother, as they have no harmful effect upon the child.

In addition to their use in constipation of long standing, Purgoids are to be commended as a general aperient in temporary conditions and after operations.

Issued in bottles of 25 and 100 Tablets and in bulk for dispensing.

DOSE : One or two Purgoids. Half Strength supplied for Children.
