B L O T T E R

A d e x o l i n

Description: Each cc. of Adexolin Liquid is equal in vitamins A and D to 20 cc., each Adexolin Capsule (3m) to 10 cc., of medicinal cod-liver oil.

Special Features: Concentration permits maximum flexibility of dosage. Both preparations are standardised. Liquid is virtually tasteless and inodorous.

Indications: For infants, to promote normal development; to raise resistance to infections. For children and adults, to restore tone and resistance in debility; as a protective tonic in the colder months. In pregnancy, to maintain vitamin reserves.

O s t o c a l c i u m

Description: Ostocalcium Tablets combine, in handy form, the soluble and diffusible calcium sodium lactate (7½ grs. in each tablet) with 500 international units of vitamin D.

Special Features: The simultaneous ingestion of vitamin D ensures that physical absorption of the calcium is followed up by functional utilisation.

Indications: Capillary vasomotor disorders, chilblains, urticaria; allergic conditions; tetany; delayed union of fractures; haemorrhagia and post-operative conditions; adolescent albuminuria. Ostocalcium Tablets are also regularly prescribed during pregnancy and lactation.
