REVISED EDITION

GLAXO CORTISONE PREPARATIONS

CORTELAN TRADE MARK (*Cortisone acetate*)

DELTA-CORTELAN TRADE MARK (*Prednisone acetate*)

EF-CORTELAN TRADE MARK (*Hydrocortisone acetate or alcohol*)

Glaxo Laboratories have devoted considerable research and manufacturing resources to synthesising cortisone and its derivatives in Great Britain, and have had wide experience in meeting the demands for different presentations of these drugs. The Glaxo range embraces all those preparations proved to be of clinical value—it meets your needs precisely.

Hecogenin, derived from East African sisal waste, is utilised as the starting material for the process of synthesising Glaxo cortisone.

EF-CORTELAN

TRADE MARK

WITH NEOMYCIN EYE OINTMENT

Hydrocortisone acetate 1%

Neomycin sulphate 0.5%

in soft paraffin base.

3.5 gm. tube with ophthalmic nozzle

Face price 8/- (less usual professional discount)

Wide range of EF-CORTELAN SKIN PREPARATIONS

EF-CORTELAN SKIN LOTION

0.5 and 1% hydrocortisone alcohol in a water-miscible fluid base. Most conditions can be controlled by the lower strength. Both strengths are marketed in transparent plastic squeeze-bottles that enable the user to see when he is running short of lotion.

EF-CORTELAN SKIN OINTMENT No. 1 (non-greasy)

½% hydrocortisone alcohol and 1% and 2½% hydrocortisone acetate in a water-miscible base of zinc stearate, polyethylene and propylene glycols. For application to moist and weeping surfaces when a non-greasy base is preferred.

EF-CORTELAN SKIN OINTMENT No. 2 (greasy)

½% hydrocortisone alcohol and 1% and 2½% hydrocortisone acetate in a greasy base. For dry lesions if the non-greasy base is not sufficiently soothing.
