## Pixcyl and Psorox

Coal Tar has long been accepted as one of the most effective medicaments for use as a topical application in the treatment of Psoriasis.

The Genatosan tar fractions incorporated in Pixcyl, Psorox, Genisol and Sebigen, offer tar therapy without many of the disadvantages associated with crude coal tar.

Extensively screened against sensitization and in bases to suit each phase of the disorder, they offer the physician the three essential factors in his choice of an effective topical application that combine to give a suitable approach to Psoriasis.

### **Pixcyl, Psorox, Genisol and Sebigen**

*are all available on E.C.10.*
