**B<sub>12</sub>**

Glaxo research was responsible for the first British isolation of vitamin B<sub>12</sub>. That was in 1948 and, soon afterwards, CYTAMEN was introduced. Used today throughout the world against the macrocytic anaemias, this vitamin B<sub>12</sub> injection has now been joined by CYTACON—*oral* B<sub>12</sub> preparations that are helping doctors to explore the nutritional potentialities of the vitamin.

*by injection*

## CYTAMEN

pure crystalline vitamin B<sub>12</sub> in aqueous solution. Available in three potencies—20, 50 and 100 micrograms per cc.—providing a far more flexible and intensive treatment of pernicious and other macrocytic anaemias than was ever possible with liver extracts.

*1cc. ampoules in boxes of 6*

*by mouth*

## CYTACON

pure crystalline vitamin B<sub>12</sub> in liquid and tablet forms. Increasingly prescribed for under-weight children, and in cases of poor appetite and general debility. Liquid contains 25 micrograms B<sub>12</sub> per fluid drachm; tablets each provide 10 micrograms B<sub>12</sub>.

*Tablets: Bottles of 50 and 500*

*Liquid: Bottles of 6 fluid ounces*
