again

Neomycin and bacitracin, the antibiotics combined in Neobacrin Ointment, are both bactericidal . . . not merely bacteriostatic. Acting against both gram-positive and gram-negative organisms, but without toxicity and with only minimal risk of sensitisation, this combination controls the vast majority of infections likely to be encountered in the eye or the skin.

15 gm. tube [redacted] for dermatological use: 6/-\*  
3.5 gm. tube [redacted] for ophthalmic (or dermatological) use: 2/4\*
