AGAINST WINTER'S THREAT TO CHILDREN—

VITAMINS A, B, C, D
MALT EXTRACT
CALCIUM

The anticipated incidence of respiratory infections rises to a peak during the next three months. The time to take prophylactic measures—especially for children—is now. Ostomalt—the *four*-vitamin malt food-tonic—is valuable for building up general bodily resistance. This appetising preparation corrects the seasonal deficiencies of diets in protective elements, and so erects a powerful nutritional barrier to infection.
