There is Beauty in a hand free from Roughness

Snowfire

GLYCERINE

Jelly

Vanishing

Will keep your hands Lovely, Soft and Smooth. Ideal for Daytime, because it is so quickly absorbed by the Skin.

The following are a few occasions when Snowfire Glycerine Jelly will be found invaluable.

After Cooking. Preparing vegetables discolours your hands. Handling hot plates and utensils dries the skin making the hands rough. Snowfire Glycerine Jelly used every day will remedy both these troubles.

Housework is an enemy to beautiful hands, but you need never fear the tell-tale traces if you apply Snowfire Glycerine Jelly regularly.

Ironing. Hot irons tend to dry the natural oils of the skin, making the hands dry and rough. You will find Snowfire Glycerine Jelly instantly penetrates the pores, leaving the hands soft, cool and smooth, without a trace of grease or stickiness.

Darning Silk Hose does not always prove an agreeable task. If the hands are soft, smooth and free from roughness the darning is much more pleasant—quicker too. Don't forget to apply a little Snowfire Glycerine Jelly before handling silk hose—remember even a slight roughness of the hands is sufficient to pull the fine threads.

Sewing Dainty Delicate Fabrics needs soft smooth hands. Keep the hands soft by applying Snowfire Glycerine Jelly every time you have your hands in water.

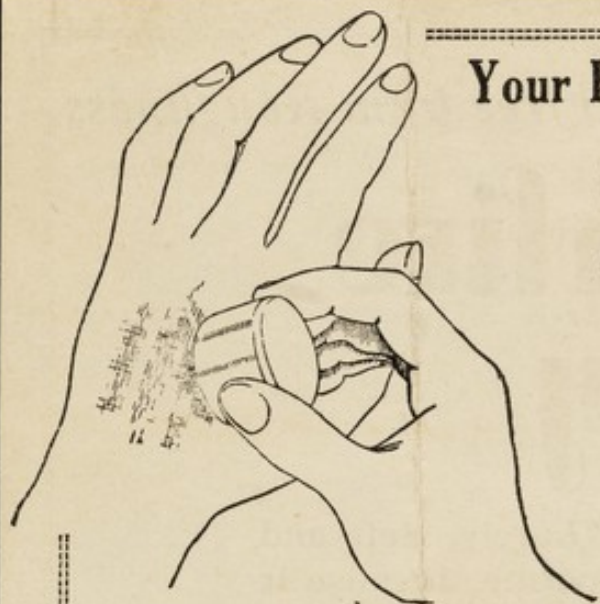

Knitting and Crotchet. These handicrafts specially require smooth hands for easy working, so Snowfire Glycerine Jelly will prove an invaluable aid for keeping your hands in "knitting form" if applied regularly.

Tennis Players will find Snowfire Glycerine Jelly invaluable in preventing hard skin forming inside the hand caused by continually handling the racquet. It is non-sticky—non-greasy.

All Chemists sell Snowfire Glycerine Jelly in 3 sizes :
3d., 6d., and 1/- tubes.

Made in England by F. W. HAMPSHIRE & CO., LTD., DERBY.

Your Hardworked Hands Need Care

Snowfire

Cures Chapped Hands.

**Frees them from roughness & redness.
Banishes all traces of hard work.**

FROSTY air plays havoc with the hands unless they are protected. Snowfire is a skin soothing emollient which penetrates the tissues, soothing away all roughness, making the tight drawn skin soft and supple again.

We particularly recommend Snowfire to the following:—

Housewives and Housemaids. There are many duties in the house which cause the hands to become coarsened. Washing, scrubbing, especially cleaning the doorstep on a cold day, washing crockery, and kitchen utensils during which duties the hands are continually damp—these are the most prolific causes of chapped hands. The housewife's standby as a cure for chapped hands is Snowfire. There is nothing else made that cures chapped hands as quickly and surely as Snowfire. Snowfire your hands at night, and your chaps are gone in the morning. Snowfire is splendid too for removing stains from the hands.

Ironworkers will find Snowfire, well rubbed into the hands, quickly soothes chaps and stops the skin cracking. At the same time the hands are prevented from becoming ditched and stained.

Quarry Workers whose hands get roughened and cracked by limestone, sandstone, etc., will prove Snowfire of great benefit if applied regularly each night, in soothing the hands and preventing the skin cracking.

Bricklayers will discover the regular use of Snowfire ideal for keeping their hands free from roughness and cracks.

Engineers and Motor Mechanics. Chapped, cracked and roughened hands are a great disadvantage to those working to fine limits. Snowfire will prevent chaps and cracks and keep the hands smooth and supple. It helps to get their hands clean too.

Laundry Workers who have their hands in and out of water all day will find in Snowfire just what is needed to keep their hands smooth and firm.

Farm Workers whose hands are exposed to wind and rain and rough work, should know how to protect them from chaps and cracks. Snowfire will do this.

Joiners' hands roughened by handling tools and wood, will own a friend in Snowfire.

Fishermen and Fishergirls with hands in and out of icy cold water many hours each day need Snowfire to free the hands of chaps and cracks. Snowfire keeps the hands smooth and helps to remove stains and discolouration.

Gardeners. The constant use of tools and contact with soil, coarsens the skin making the hands rough and hard. A regular daily application of Snowfire will keep the hands soft and supple and will free them from discolouration also.

Window Cleaners must have their hands frequently in and out of water, all weathers. Snowfire will prevent cracks and chaps and keep the hands soft and smooth.

Golfers should not be without Snowfire. It is invaluable for keeping the hands and feet in condition, preventing chaps, harshness and roughness.

Shaving. Snowfire is strongly recommended for use before shaving. Rub a little into the face and then lather in the usual way. The result will be a fine smooth and non-irritating shave.

Snowfire is sold by all Chemists, Drug Stores, etc., in Cartons, 3d. & 7½d.
