ALNWICK URBAN DISTRICT COUNCIL:

INTERIM ANNUAL REPORT FOR 1940.

Whilst the area of the Alnwick Urban District remains the same, the population is fluctuating owing to the addition of evacuees, and at times non-civilian, whilst many of the normal inhabitants have been removed from the district for various reasons. There has, however, been no illness in the district attributable to deficiencies in the sewage or water systems, whilst the general health of the district has been very good. Nine persons were admitted to the Fever Hospital during the year, five of these being from the Rural District and four from the Urban District. Of the cases from the Urban District three were Scarlet Fever and one was Diphtheria. Apart from Measles there were no epidemics during the year, and no exceptional administrative measures were taken or recommended. Live Births totalled 96 (49 males and 47 females). Still Births " 6 (5 males and 1 female). There were seven deaths in infants under one year of age (all legitimate). Deaths from all causes numbered 106.

B. TREVOR ROPER.

MEDICAL OFFICER OF HEALTH.

P.A.

ALNWICK URBAN DISTRICT COUNCIL.

Medical Officer's Interim Report for 1939.

The Area of the District remains the same as in 1938. The population has been fluctuating since the outbreak of war, owing to the addition to the population of a considerable number of evacuees, and for a time, some non-civilians. Despite these additions to the population, the general health of the District has been good, and there has been no illness attributable either to the Water Supply or Sewage.

No exceptional administrative measures were taken or recommended by the M.O.H. during the year. A certain number of cases of Scabies and Impetigo were imported into the District with the influx of evacuees, but these cases were dealt with at the Smallpox Hospital.

From November 1st. Measles and Whooping Cough became notifiable diseases.

B. Truor-Roper

Medical Officer of Health.

ALLWICK URBAN DISTRICT COUNCIL

Medical Officer's Report for 1932

The area of the District remains the same as in 1931. The population has been estimated since the outbreak of the war to be the same as the population of a considerable number of towns, and for a time, some considerable changes have taken place in the population, the present population of the District has been found, and there has been no change in the number of houses.

The number of deaths in the District for 1932 was 1,000, being the same as in 1931. A certain number of deaths were reported into the District which were not reported in 1931, but these cases were dealt with at the same level of efficiency. The number of deaths in the District for 1932 was 1,000, being the same as in 1931. A certain number of deaths were reported into the District which were not reported in 1931, but these cases were dealt with at the same level of efficiency.

From November 1st, 1932, the number of deaths in the District was 1,000, being the same as in 1931. A certain number of deaths were reported into the District which were not reported in 1931, but these cases were dealt with at the same level of efficiency.
