ALNWICK URBAN DISTRICT

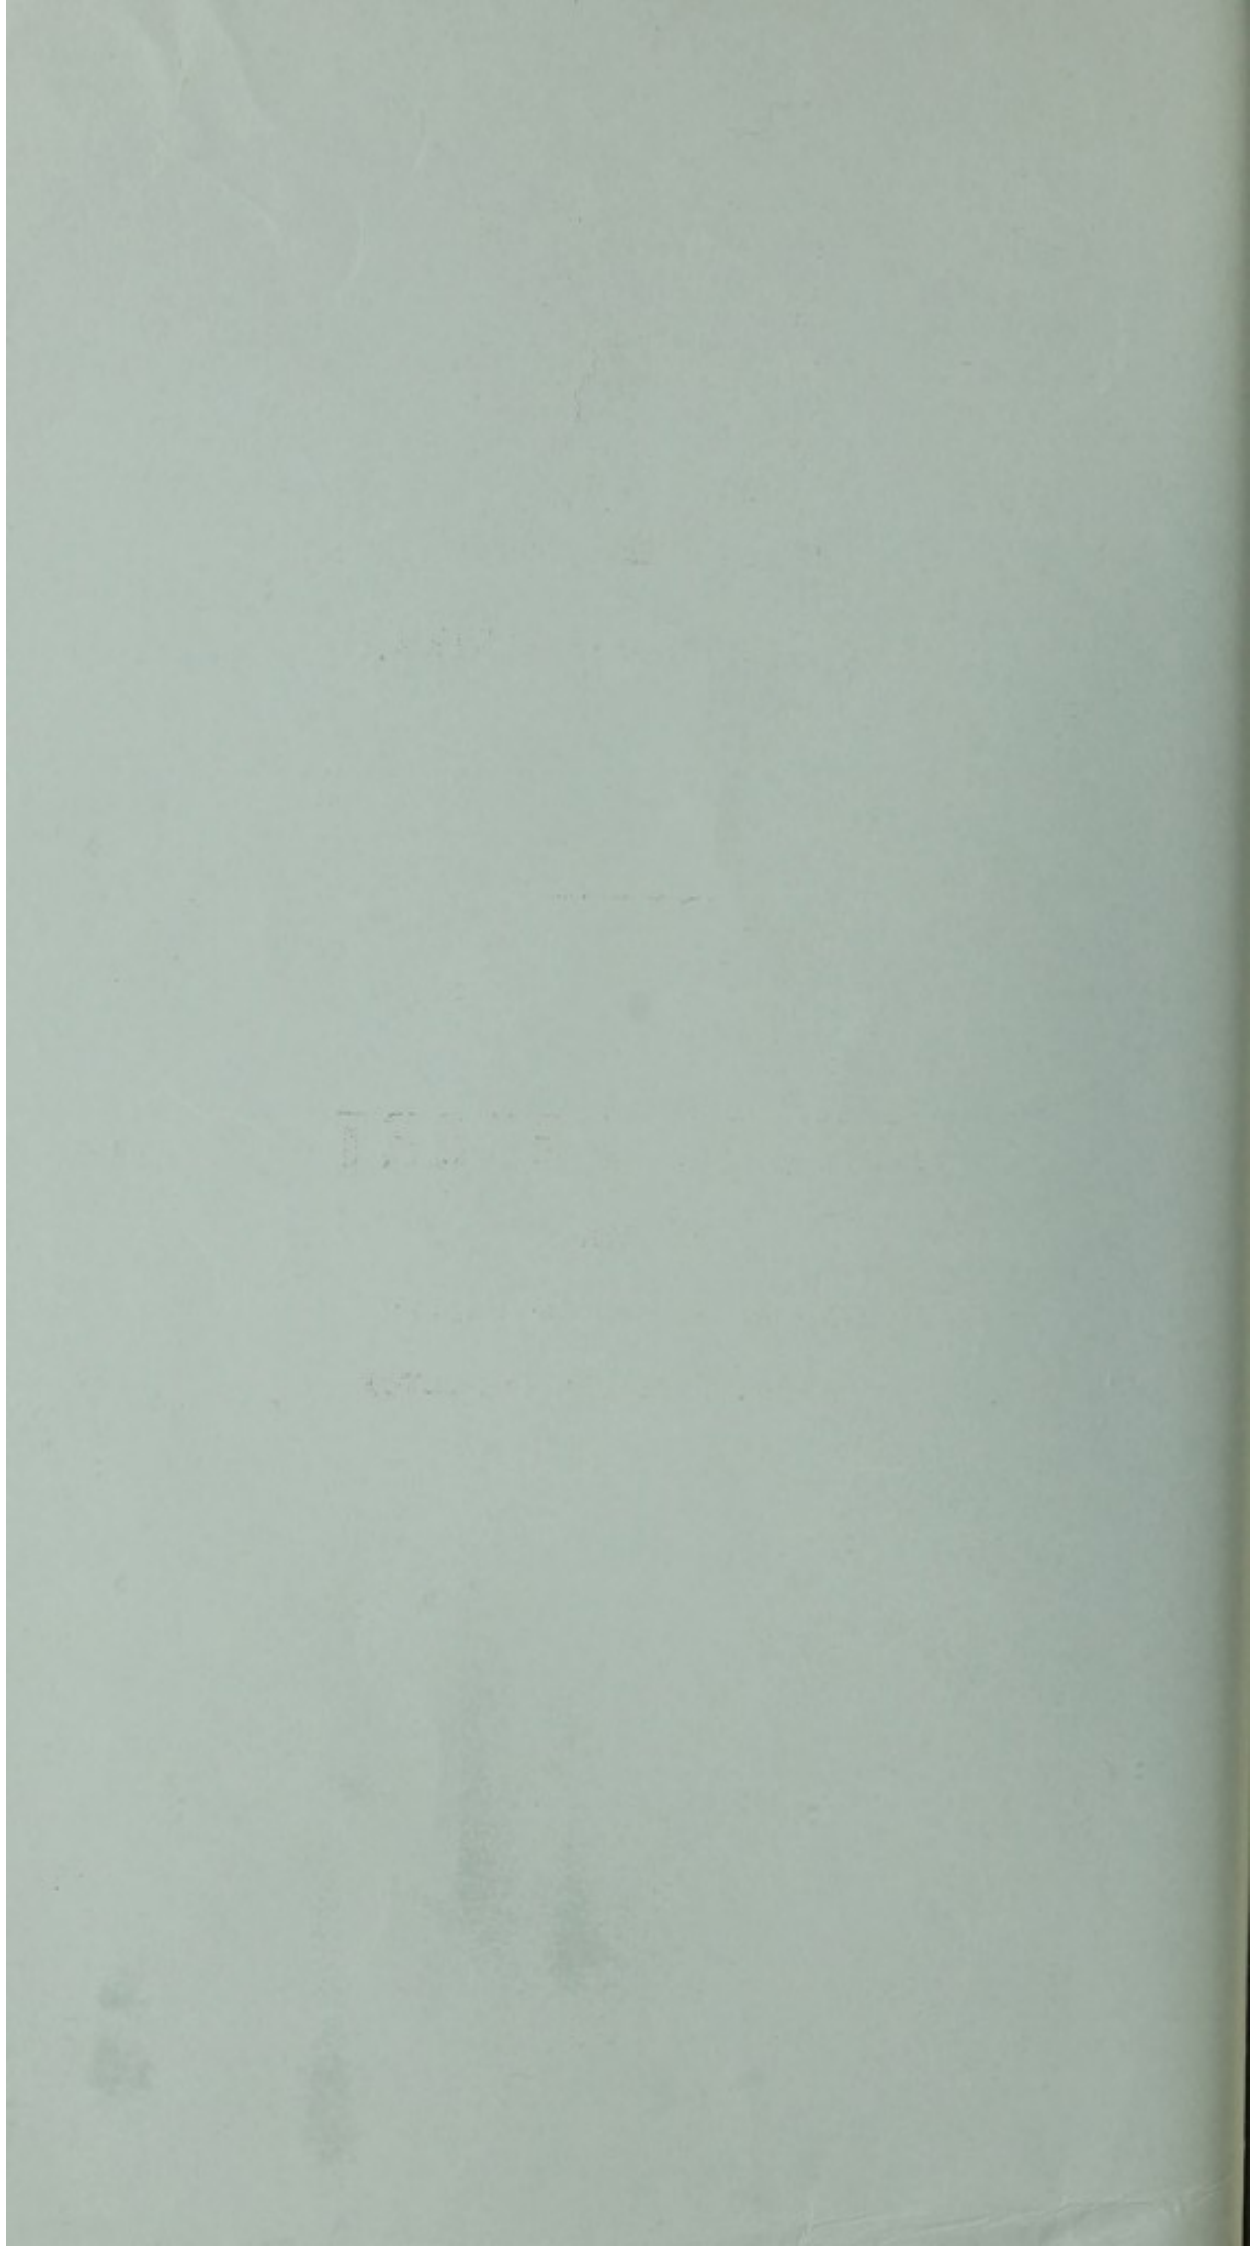

ANNUAL REPORT

OF THE

MEDICAL OFFICER OF HEALTH

AND PUBLIC HEALTH INSPECTOR

1966

ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH

ALNWICK URBAN DISTRICT

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present to you my annual report on the health and sanitary conditions of the District during the year 1966.

The report is presented in the customary form. First of all, the vital statistics for the District show little change from the previous year or two. The birth rate is 14.5 and the death rate is 10.5.

ANNUAL REPORT

OF THE

MEDICAL OFFICER OF HEALTH

AND

PUBLIC HEALTH INSPECTOR

1966

The death rate is lower than the national average and there is no significant change from the previous year. The still birth rate is 1.5 and the pattern of the causes of death has followed. Most of the deaths being due to degenerative diseases and vascular lesions of the nervous system. The most frequent cause was due to malignancy.

There were exceptional numbers of measles notified during the year and regrettably, there were three notifications of pneumonia, tuberculosis in the previous year, there was none. Measles notifications show that tuberculosis still lingers on and it is worthy of comment that two of the cases occurred in young adults. All possible precautions are taken when a new case is notified and a very satisfactory reduction of all contacts is undertaken. This is one of the most important measures to prevent further spread of the disease.

The immunisation and vaccination rate is satisfactory and it is very important that these rates be maintained.

ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH

1966

To the Chairman and Members of the Alnwick Urban District Council

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present to you my Annual Report on the health and sanitary conditions of the District during the year 1966.

The report is presented in its customary form. First of all, the vital statistics for the district show little change from the previous year or two. The differences that have occurred are not significant, as the total numbers involved are small.

The birth rate is near to the national average. Unfortunately, there was three infant deaths during 1966. In the previous year there was none. These deaths were due to severe congenital defects and are an example of the yearly fluctuations that can be expected.

The death rate likewise, is near to the national average and shows no significant change from the previous year. The well established pattern of the causes of death was followed. About half the deaths being due to cardio vascular causes and vascular lesions of the nervous system. The next largest cause was due to malignancy.

There were considerable numbers of measles notified during the year and regrettably, there were three notifications of pulmonary tuberculosis, whereas in the previous year, there was none. These notifications show that tuberculosis still lingers on and it is worthy of comment that two of the cases occurred in young adults. All possible precautions are taken when a new case is notified and a very extensive follow-up of all contacts is undertaken. This is one of the most important methods of preventing further spread of the disease.

The immunisation and vaccination rate in the district was satisfactory and it is very important that these levels are maintained.

The Public Health Inspector in his report itemises the various sanitary circumstances in the district.

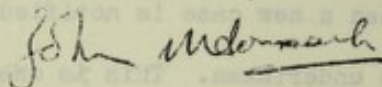

It is satisfactory to note the steady progress that is being made with housing. Although there were very few houses completed last year, a very considerable number were started and these will show in the next Annual Report. Each year shows a decrease in the number of unfit houses remaining in the district and it can't be long before the slum clearance programme is completed.

It is satisfactory to note that there has been an improvement in the cleanliness of food stores in the district. The Public Health Inspector however, stresses that there is still ground for improvement in this respect. The need for the highest standards of hygienic practice from those handling other people's food cannot be over stressed.

This will be my last Annual Report to the Council, as I am leaving the district to take up another appointment. I would like to thank all members of the Council most sincerely for their unfailing interest and support during the time I have been here. I would also like to express my grateful thanks and appreciation for the help I have received from my colleagues on the Alnwick Urban District Council staff. It is now six years since I first came to Alnwick and I will be leaving the district with the very happiest of memories.

I am,

Mr. Chairman, Ladies and Gentlemen,
Your obedient servant,

Medical Officer of Health

GENERAL STATISTICS

The area of the district was 4,778 acres.

The number of inhabited houses was 2,439 and the number of new houses completed during the year was 2.

The rateable value was £246,787 and the sum represented by a penny rate was £945.

The estimated mid-year population was 7,570 and this figure was taken when calculating the birth and death rate.

Improvement GrantsNumber of separate houses(a) Discretionary Grants

1. Applications submitted to Local Authority during the year	5
2. Applications rejected	-
3. Applications approved	5
4. Approximate average grant approved per house	£399
5. Total number of houses approved for grant since inception of scheme	129

(b) Standard Grants

<u>During the Year</u>	<u>Total to date</u>
------------------------	----------------------

1. Number of separate houses for which grants have been made	6	44
2. Number of houses so provided with		
(a) Bath or shower	4	33
(b) Wash-hand basin	4	35
(c) Hot water supply	4	30
(d) Water closet	6	39
(e) Food store	3	28

(b) GENERAL

The Clayport North West Area was completed with the erection of two three bedroom type houses. The tender of Messrs. R. Bowey & Son, Ltd., was accepted for the erection of 37 housing units on the Clayport South West Area. These units are to be built to the Parker Morris standards, and comprise:-

5 two bedroom maisonettes
3 three bedroom maisonettes
25 one bedroom flats
4 bed sitting rooms
32 garages are also to be constructed.

Good progress was made with the construction of roads and sewers on the Shepherd's Rest housing site, where 60 private houses are to be constructed by Messrs. R. Carse & Sons Ltd.

There were no private houses built during the year.

(c) REGISTERED COMMON LODGING HOUSES

There are none in the district.

(d) HOUSES ERECTEDHOUSES DEMOLISHED OR CLOSED

Year	By Private Persons	By Local Authority	By other Housing Authorities	Total	Demolished	Houses or Parts closed	Total

Total	92	181	4	277	134	39	173	

WATER SUPPLY

The district is served by the Newcastle and Gateshead Water Company, and cottages on Alnwick Moor by the Alnwick Freemen.

A plentiful and wholesome supply was maintained throughout the year.

The Freemen's supply and that of the High Supply of the Newcastle and Gateshead Water Company, are untreated. No samples were taken of the low supply (Coquet Water Board) before treatment.

RESULTS OF WATER SAMPLES (BACTERIOLOGICAL)

Source of Supply	Whether water treated or untreated	Satisfactory		Suspicious Class III	Unsatisfactory Class IV
		Class I	Class II		
Alnwick Low Supply (C.W.B.)	Treated	7	-	-	-
Alnwick High Supply	Untreated	11	-	-	-
Freemen's Supply	Untreated	2	-	-	-

The number of dwelling houses, and the number of the population supplied from public water mains are as follows:-

	Number of Dwelling Houses	Populations Supplied
(a) Direct to houses	2352	7398
(b) By means of standpipes	12	22

1. FOOD HYGIENE (GENERAL) REGULATIONS, 1960

All cafes and snack bars were inspected and the gradual improvement in the cleanliness of food stores continues.

It is essential however, that all persons engaged in the handling of open food should be scrupulously clean, both in person and in habits. I consider there is need for improvement in personal behaviour.

Dog prohibition notices were issued to all food shops and food traders co-operated magnificently in displaying these notices in prominent positions. The public would appear to have responded well, by keeping their dogs out of food shops.

Contraventions or deficiencies were brought to the notice of the food traders concerned and the following defects or deficiencies were remedied:-

Walls and ceilings redecorated	4
First aid equipment provided	2
Dustbins provided	2
Walls repaired and partly tiled	2
Refrigerator repaired	1
Wash-hand basin provided	1
Hot water provided	1
Soap, towels and nail brushes provided	1
Floor repaired.	1

38 visits were made to the 111 food premises.

There were no prosecutions during the year under the Regulations.

CATEGORIES OF TRADE PREMISES

	Number of Premises	Number fitted to comply with Reg. 16	Number to which Reg. 19 applies	Number fitted to comply with Reg. 19
Grocers, Self Service Stores General Dealers and Confectioners	36	34	10	10
Cafes, Snack Bars, School Kitchens, Boarding House, Hospital Kitchens	26	26	26	26
Public Houses, Hotels and Social Clubs	21	19	21	21
Butchers and Fishmongers	8	8	8	8
Fruiterers	6	6	-	-
Chemists	5	5	-	-
Fried Fish and Chips (Consumed on premises)	3	3	3	3
Bakeries	3	3	3	3
Off Licence Premises	2	2	-	-
Ice Cream Manufacturers	1	1	1	1
Totals	111	107	72	72

2. FOOD INSPECTION (OTHER THAN FRESH CARCASE MEAT AT SLAUGHTERHOUSES)

22 visits were made to food premises for the primary purpose of food inspection. The following were voluntarily surrendered and destroyed at the East Cawledge Park Refuse Tip:-

Sugar	247 lbs.	Cheese	54 lbs.
Flour	150 "	Lard	76 "
Cereals	102 "	Margarine	24 "
Biscuits, Rolls,		Part Hindquarter Beef	24 "
Sandwich Cakes	102 "	Canned meat and fish	105 "
Chocolate and		Canned vegetables	7 "
confectionery	48 "	Canned fruit	12 "
Syrup	80 "	Canned milk and milk	
Bacon and ham	86 "	products	4 "

3. MILK

Dealers licenses are granted by the Northumberland County Council as the food and drugs authority, and regular sampling was carried out by the County Public Health Inspector.

Results of Samples (Bacteriological)

Designation	Satisfactory	Unsatisfactory
Untreated	5	1
Treated	35	2

Two samples of treated milk failed to satisfy the phosphatase test. This was found to be due to a fault in the pasteurising plant - i.e. the flow diversion valve which was sticking and allowing milk which had not reached the required temperature to pass through. A new flow diversion valve was fitted.

Brucella Abortus - 2 samples were found to be negative for tuberculosis and brucella abortus.

There are no producers in the area selling raw milk.

4. THE LIQUID EGG (PASTEURISATION) REGULATIONS, 1963

There are no egg pasteurising plants in the district, and no samples of liquid egg were submitted to the Alpha-Amylase test.

SLAUGHTERHOUSES

There are two private slaughterhouses in the district. Both have been exceptionally well managed, and there has been no cause for complaint. 17 slaughtering licenses were issued to slaughtermen.

Refuse from the slaughterhouses is removed by the Council twice weekly at a fixed charge of 30/- per week.

Under the Meat Inspection (Amendment) Regulations, 1966, a local authority may control hours of slaughtering in private slaughterhouses. On account of the relatively small throughput, it was not found necessary to control hours of slaughtering from those already agreed upon.

The Regulations are designed to provide the further measures necessary to bring about the full inspection of all home killed meat before it leaves the slaughterhouse. To enable this to be done, arrangements have been made with the neighbouring authorities to cover holiday or sickness periods. Meat inspection was carried out during the holiday periods at Amble U.D.C., and the Amble U.D.C. inspector inspected meat at Alnwick.

Under the Meat Inspection Regulations a total sum of £98. 9. 3. was paid by the butchers for meat inspection.

All carcasses were inspected, and no tuberculosis or cysticercosis was found.

CARCASES AND OFFAL INSPECTED AND CONDEMNED IN WHOLE OR PART

	Cattle excluding Cows	Cows	Calves	Sheep and Lambs	Pigs
Number killed	413	6	11	1617	210
Number inspected	413	6	11	1617	210
<u>All diseases</u>					
Whole carcasses condemned	1	2	1	10	-
Part " "	3	2	-	16	-
Offal condemned	98	1	-	51	22
Percentage of number inspected affected with disease	24.7	83.3	9.1	4.7	10.9

Total weight of carcase meat and offal condemned - 2752 lbs.

DISEASES OF ANIMALS ACT 1960 - ANTHRAX ORDER

As a result of notification of Anthrax received, it was found that the infected cow, which had since died, produced milk which had been batched with the milk of the remainder of the herd. 28½ gallons of milk, the total amount of the "Evening" milk was, therefore, destroyed.

SEWERAGE AND SEWAGE DISPOSAL

The sewerage to the Shepherds Rest housing site was completed. This entailed the laying and jointing of 472 linear yards of 9" and 255 linear yards of 6" salt glazed earthenware pipes with appropriate manholes. There were no major works carried out to the existing sewers.

REMOVAL OF TRADE AND HOUSEHOLD REFUSE

Two Bedford side loading vehicles are used. The man power per vehicle being one driver and two loaders. Both drivers assist in loading. A third vehicle, used for general purposes, can be used for refuse removal in an emergency. House refuse is collected weekly from all dwellings other than a few isolated cottages on Alnwick Moor.

Trade refuse is collected weekly (twice weekly for defined trades in the summer months) from premises where traders have agreed to pay to the 'Trade Refuse Scheme'. The charge is based on the amount of refuse collected, the first bin being collected free of charge and a charge of 10/-d. per year per bin is made in excess of one. Trade refuse from small businesses where one bin is sufficient to meet requirements is collected free of charge.

Builders refuse is removed to the refuse tip by the builders themselves, at an agreed price.

57 traders including builders, contributed to the scheme, and a total sum of £191. 5. 6d. was collected during the year.

All refuse is tipped on the East Cawledge Park site, where one tip attendant is permanently employed.

No salvage is collected, and all waste paper is burnt at the tip.

OFFICES, SHOPS AND RAILWAY PREMISES ACT, 1963.

70% of all registered premises have received a general inspection since the Act came into operation.

Contraventions were brought to the notice of the employers concerned either by letter or by interview.

There was one accident reported. This concerned a manageress of a Public House who heard noises in the back yard of her premises at 3 a.m. and went out to investigate. She tripped over an old tin box causing lacerations to her leg, necessitating the insertion of 22 stitches.

There were no applications received and no exemptions granted in relation to (1) space (2) temperature (3) sanitary conveniences (4) running water.

The following is an analysis of contraventions found:-

Section 4 Cleanliness	8	Section 10 Washing facilities	13
" 6 Temperature	18	" 11 Supply of drinking water	2
" 7 ventilation	4	" 13 Sitting facilities	1
" 8 lighting	7	" 16 Floors, passages and stairs	7

TOTAL FEMALES			480	

Number of visits of all kinds to registered premises 72

RODENT CONTROL

The Prevention of Damage by Pests Act, 1949, imposes on a Local Authority the duty of keeping its district free from rats and mice, and for this purpose, a part time rodent operator is employed. Approximately 20/22 hours per week being spent on this work.

Treatments are given free of charge to all other than defined business premises, where a charge is based on time and materials.

There has been an increase in the number of treatments carried out, but this was primarily due to the increased amount of survey work carried out. In addition, there would appear to be a willingness on the part of ratepayers to report any rats seen.

The refuse tip has been treated frequently so as to prevent any migration of rats to nearby Industrial area. Inspections made of premises on Industrial Area revealed one isolated infestation.

Two sewer treatments were carried out but the extent of infestation was small - three manholes were found to be infested during the March treatment and one manhole only in the September treatment.

Properties other than Sewers	Type of Property	
	Non-Agricultural	Agricultural
1. Number of properties in district	3050	23

(11) Mice	12	1
3. (a) Total number of properties inspected for rats and/or mice for reasons other than notification	106	4
(b) Number infested by (1) Rats	3	1
(11) Mice	2	-

PIGEONS

To deal with the increasing number of pigeons which have built up in the centre of the town, permission was sought from the owner of a property in Fenkle Street to erect a trap in the loft. Windows were removed and barb wires inserted, and although the trap was installed in mid-December, immediate success was obtained and by the end of the month 25 pigeons were caught and humanely destroyed. It is hoped to eventually rid this area of the pigeon nuisance.

FACTORIES ACTS, 1961

1. Inspections

Premises	Number on Register	Number of		
		Inspections	Written Notices	Occupiers Prosecuted
