RURAL DISTRICT OF ANDOVER

PUBLIC HEALTH DEPARTMENT

To the Chairman and Members  
of the Andover Rural District Council:

October, 1958.

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present my first Annual Report as your Medical Officer of Health.

Since I did not take up the appointment until March this year, this report for 1957 records events which occurred during the tenure of office of my predecessor, Dr. F. H. M. Dummer.

The Registrar-General's estimate of the mid-year population is 19,540, a decrease of 2,190 compared with the figure for 1956.

The death rate of <sup>8.3</sup>15.1 per thousand population was considerably higher <sup>10.0</sup>than the national figure for England and Wales of 11.5, and the birth rate at 16.9 per thousand population was slightly higher than the national figure of 16.1.

The numbers of infectious diseases notified were higher than in the previous year - the increase being due to the predominance of measles.

The occurrence of a new Asian strain of Influenza A virus resulting in a pandemic of the disease caused some anxiety and considerable illness and inconvenience. Outbreaks were most marked in closed communities such as boarding schools and hospitals and new National Insurance claims for sickness benefit reached unusually high levels for the Autumn months of October and November. Fortunately - although the disease was by no means trivial and the case incidence was high, the mortality was not unduly so.

Perhaps the most significant national event in the field of environmental health was the accident at the Windscale Plant of the Atomic Energy Authority in October. Largely as a result of public concern and correspondence in the press, and also following the recommendation of the Fleck Committee subsequently appointed by the Government to consider aspects of health and safety in the Atomic Energy Authority, public attention was focussed on the potential dangers resulting from the ever increasing use of radio-active isotopes and other sources of radiation in modern life, and it was realised that the time had come to disseminate more widely a knowledge of the dangers and methods of control of radiation, in order that local authorities could understand the environmental hazards involved, and co-operate with other agencies in their control, and in the protection of the general population.

Whether we like it or not, this new technology has come to stay, and this country's economic position in the world will increasingly depend on further development of its potentialities.

I have to thank the Chief Public Health Inspector for his contribution to the report on the hygiene and sanitary circumstances of the District, and the Clerk for his report on housing matters. I also wish to thank the staff of the Public Health Department for their co-operation throughout the year.

I am, Mr. Chairman,

Ladies and Gentlemen,

Your obedient Servant,

  
Medical Officer of Health.

General Statistics

Area (in acres)	67,811	(67,811)
Registrar General's estimate of mid-year population	19,540	(21,730)
Number of inhabited houses	4,432	(4,439)
Rateable Value	£182,333	(£167,815)
Estimated sum represented by penny rate	£723.16s.8d.	(£788.10s.4d.)

The Registrar General's estimate of the population of this District at the end of June, 1957, was 19,540. The net gain for 1957 of births over deaths was 173.

The population trend of Andover Rural District is as follows:-

1949	15,020	1953	20,670
1950	14,900	1954	20,210
1951	17,590	1955	21,240
1952	19,690	1956	21,730
	1957	19,540	

-----

(The Birth and Death Rates are calculated per 1000 of the population. The Infantile Mortality Rate is calculated per 1000 live births.)

Neonatal Mortality

Andover Rural District England & Wales

6.6	16.5
-----	------

(The Birth and Death Rates are calculated per 1000 of the population.  
The Infantile Mortality Rate is calculated per 1000 live births.)

Vital Statistics

Births

(a) Live Birth Rate

304 live births were registered during 1957, 153 boys and 151 girls.

The live Birth Rate, corrected for age and sex distribution of the population by the Registrar General's comparability factor was 16.9 per thousand population. The figure for England and Wales in 1957 was 16.1 per thousand.

(b) Still-Births

Eight still-births occurred, giving a rate of 25.6 per thousand births.

The corresponding rate for England and Wales was 22.5.

The Death Rate

The total number of deaths registered in the Rural District during the year was 131, of which 77 were males and 54 females. This gives a local death rate, corrected by the Registrar-General's comparability factor for age and sex distribution of <sup>8.3</sup>15.1 per thousand population.

The crude death rate for England and Wales in 1957 was 11.5 per thousand.

As in recent years the chief causes of death were proportionately:-

(1) Diseases of the Heart and Circulatory System

A total of 44 deaths were recorded, being 33.6 per cent of the total.

No less than 20 of these were due to disease of the coronary arteries.

(2) Cancers of various types

Twenty deaths were due to cancer, 15.3 per cent. of the total, and of these, one was due to lung cancer.

- (3) Vascular lesions of the central nervous system accounted for 16 deaths, 12.2 per cent.
- (4) Respiratory Diseases were responsible for 16 deaths, another 12.2 per cent of the total number.
- One death also was recorded from pulmonary tuberculosis and one death resulted from influenza.
- No deaths resulted from the infectious diseases of childhood and no deaths were associated with childbirth.

These figures closely reflect proportionately the chief causes of national mortality and are what one would expect in an ageing population with all the material benefits of western civilisation and the welfare state.

The Infantile Mortality rate (i.e. the number of infant deaths recorded in the first year of life per thousand live births) was 19.7 per thousand and the neonatal mortality rate (i.e. the number of infant deaths in the first 4 weeks of life per thousand live births) was 6.6.

These figures compare favourably with the National rates which were 23.1 and 16.5 respectively, though too much significance should not be assigned to such comparisons since the difference in the size of the two populations at risk is so great.

-----

Infectious Diseases

Apart from measles and whooping cough, of which 288 and 63 cases respectively were notified during the year, the incidence of infectious diseases in the district was low.

There were 5 cases of scarlet fever, all of a mild nature.

One case of non-paralytic poliomyelitis occurred in a girl aged 13 years.

Other diseases notified were:-

1 case of meningococcal meningitis.

3 cases of puerperal pyrexia

1 case of dysentery.

2 cases of acute pneumonia.

No cases of diphtheria or food poisoning were recorded.

-----  
National Assistance Act, 1948 - Section 47

No formal action was taken under this Section during the year.  
-----

Immunisation and Vaccination

During the year, immunisation and vaccination against small-pox, diphtheria and whooping cough continued both in general practitioners surgerys and at County Council clinics. The efficacy of these protective procedures is now so well established that most parents readily accept them on behalf of their children. Nevertheless it is desirable to maintain a continuous immunity to diphtheria by giving re-inforcing injections to children of school age if the disease is to be kept under control. It still smoulders on in the country and during the year 1957, 6 deaths were provisionally assigned to this cause in England and Wales.

In the same way, vaccination against small-pox is very desirable for all infants, since in these days of air travel the risk of importation of the disease from abroad has greatly increased, and primary vaccination of infants is less likely to lead to complications than when it is delayed to later in life.

It is pleasing to record that some 67.1 per cent. of babies born in Andover Rural District during 1957 were vaccinated before their first birthday as compared with 59.9 per cent. in 1956.

Vaccination against poliomyelitis was continued, using the new British vaccine, and was made available to all those who had been registered in 1956, and was later extended to all children born between 1947 and 1956, a total of 172 children in the Rural District receiving two injections.

-----

Administration of Health Services

National Health Service Act, 1946.

The administration of these devolved services is carried out by the Andover and Kingsclere District Health Sub-Committee of the County Council.

The Committee has at its disposal a considerable amount of information on the health of the local districts and an important, if not spectacular side of the work, is the appointment of district nurses and the detailed knowledge of the work being undertaken in the respective districts.

Reports are submitted each meeting on infectious diseases, births and deaths, inspection of nurseries, immunisation and vaccination, midwifery and maternity services, home help services, nursing accommodation, and matters of health importance in which the three districts have a common interest.

Housing

I am grateful to the Clerk for the following report on housing progress during the year:-

Local Authority Housing

At the end of the year properties under the control of the Council were as follows:-

(31.12.56.)

Permanent Traditional Houses (pre-war)	160	160
Permanent Traditional Houses (post-war)	655	637
Prefabricated Temporary Bungalows	32	32
Converted ex-service hutments	35	50
	<u>882</u>	<u>879</u>

During the year under review, 18 houses were completed being 16 at Little London (Smannell Parish) and 2 at Upton (Hurstbourne Tarrant Parish).

The Council continued to maintain the policy of not entering into any large scale contracts for further house building on account of increased bank charges and revision of Government Subsidies and the ever increasing building costs. However, the Council have entered into a contract to provide 26 Old Persons' Single Bedroom Bungalows which will attract subsidy and also assist the need for providing small dwellings for the aged. In several instances it is hoped to transfer aged persons from too large accommodation to the new bungalows and thus release houses for families. These are being provided in the following Parishes:-

Abbotts Ann	6
Appleshaw	4
Chilbolton	6
Hurstbourne Tarrant	4
Kimpton	6

The considerably reduced number of new houses completed during the year has retarded the rehousing of families from hutted camp sites although steady progress was achieved and 15 families were transferred to permanent dwellings and the vacated huts closed down.

The Council appreciate the need to dispose of the majority of huts and priority is given to families in occupation of unsatisfactory huts when vacancies occur on the permanent housing estates.

The pre-war houses are being adapted to provide an independent supply of hot water by the installation of immersion heaters and for this facility a small charge is added to the weekly rent charge.

The provision of water closets and cesspit drainage has been made available on all pre-war sites (with the exception of one site where it is not possible to provide drainage until main drainage is laid in the village.) This facility is appreciated by the tenants.

Several transfers have been arranged between families overcrowded and others living in too large accommodation.

Rents have been maintained at their present level without increase since 1949 but increased costs of maintenance, services etc. have required the Council to investigate the financial aspect of housing and it has been decided that all rents will have to be increased with effect from the 1st April, 1958.

In such instances, where an increased rental would cause undue hardship, the Housing Committee will give sympathetic consideration to granting of rebates.

-----

Water Supplies

All stages of the water scheme from the Pill Heath reservoir were completed during the year, the villages of Kimpton, Amport, Monxton, Quarley and Grateley being added to those already served.

Preparations were made to serve the villages of Chilbolton and Wherwell from an independent source which would utilise the old Royal Air Force supply at West Down, Chilbolton. It is hoped that work on this scheme will commence early next year.

Particulars of properties supplied from water mains are as follows:-

	<u>No. of dwellings supplied from Mains</u>
Abbotts Ann	105
Amport	44
Appleshaw, part Fyfield, Kimpton.	276
Barton Stacey and Bullington	219
Clanville	15
East Cholderton	3
Faberstown	1
Goodworth and Upper Clatford	176
Grateley	46
Hatherden	36
Hurstbourne Tarrant	108
Longparish	103
Monxton	21
Penton Grafton	29
Penton Mewsey	19
Quarley	20
Tangley	6
Shipton Bellinger (Cholderton Water Co.)	208
Thruxton	53
Vernham Dean and Upton	130
Weyhill	87
Wildhern	23

Bacteriological Examination of all Water Supplies  
Private and Public

No. of samples taken	156
No. of samples reported satisfactory	103
No. of samples reported not entirely satisfactory	11
No. of samples reported unsatisfactory	42

Drainage and Sewerage

Work to the Shipton Bellinger sewage scheme unfortunately came to a standstill during the year, and no further extensions to the scheme were carried out, despite the majority of the private population of the village being unserved.

Disposal Works

The disposal works for the Shipton Bellinger sewage scheme are now complete and capable of dealing with the effluent of the whole village. Some difficulty was experienced in balancing out the effluent due to the heavy discharge of water from the laundry, however, steps have now been taken to remedy this and the plant is working satisfactorily.

Public Cleansing

As envisaged in last year's report, the tip at Appleshaw neared the end of its useful capacity. By the end of 1957, arrangements were well in hand to transfer all operations to the new site at West Down, Chilbolton.

A further Commer refuse vehicle was purchased to replace an outworn one, and the chassis of this latter vehicle was converted to a cesspit emptier. The Council are now able to undertake the emptying of Council Property cesspits in the Rural District. The usual weekly refuse collection was continued satisfactorily.

General Inspection of the Area

Inspection for Nuisances	58
Re-visits for this purpose	107
Drainage Tests	87
Rooms Disinfected	3
Dairy Inspections	5
Visits in connection with Infectious Disease enquiries	9
Petroleum Installations	27
Visits in connection with water supplies (including regional scheme)	290
Inspections of premises where offensive trades are carried on	31
Visits for the purpose of Rodent Control	338
Inspections of moveable dwellings	27

There are 44 moveable dwellings in the district and 2 licensed sites.

Shops

No statutory action was taken during the year.

Factories

Inspections for the purpose of provisions as to health and of sanitary

accommodation in the case of power factories.

<u>Premises</u>	<u>No.</u>	<u>No. of Inspections</u>
(i) Factories in which Sections 1,2,3,4 or 6 are to be enforced by Local Authority	8	5
(ii) Factories not included in (i) in which Section 7 is enforced by Local Authority	30	22
(iii) Other premises in which Section 7 is enforced by Local Authority (excluding outworkers premises)	Nil	Nil
<u>Total</u>	<u>38</u>	<u>27</u>

Cases in which defects were found - Nil.

Housing

Housing Repairs and Rents Act, 1954.

	<u>No. of applic- ations</u>	<u>No. of resultant dwellings</u>	<u>"Estimated Expense"</u>	<u>Amount of Grant</u>
Conversions	1	1	£1,600	£400
Improvements	49	71	£38,471	£18,468
Refusals	7	8	-	-
	57	80	£40,071	£18,868

Work in respect of 74 dwellings was completed.

Local Authority Housing

At the end of the year properties under the control of the Council were as follows:-

		(31.12.56.)
Permanent traditional houses (pre-war)	160	160
Permanent traditional houses (post-war)	655	637
Prefabricated temporary bungalows	32	32
Converted ex-service hutments	35	50
	<u>882</u>	<u>879</u>

Housing Inspections

- (1) (a) Total number of dwelling houses inspected for housing defects (Public Health and Housing Acts) 315
- (b) No. of inspections made for the purpose 812
- (2) (a) No. of dwelling houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation 20
- (3) No. of dwelling houses (exclusive of those referred to under the preceding sub-heading) found not to be in all respects reasonably fit for human habitation. 195
- (4) Inspections carried out in connection with Improvement Grants (including re-visits) 241

Informal Action

No. of defective dwelling houses rendered fit in  
consequence of informal action by the Local Authority 103  
or their officers

Statutory Action

(a) Proceedings under Sections 9, 10 and 16, Housing Act, 1936.

(1) No. of dwelling houses in respect of which notices were served requiring repairs Nil

(2) No. of dwelling houses which were rendered fit after service of formal notice.

(i) by owners Nil

(ii) by Local Authority in default of owners Nil

(b) Proceedings under Sections 11 and 13, Housing Act, 1936.

(1) No. of dwelling houses in respect of which Demolition Orders were made 1

(2) No. of dwelling houses demolished in pursuance of Demolition Orders or by formal action 2

(3) No. of representations made to the Local Authority with a view to:-

(a) the serving of notices requiring the execution of works Nil

(b) the making of Demolition or closing orders 20

(4) No. of houses in respect of which an undertaking was accepted under sub-section 2 of Section 11 of the Housing Act, 1936. 4

(c) Proceedings under Section 12 of the Housing Act, 1936.

(1) No. of separate tenements or underground rooms in respect of which Closing Orders were determined, the tenement or rooms having been rendered fit. Nil

(2) No. of separate tenements or underground rooms in respect of which Closing Orders were made Nil

Inspection and Supervision of Food

(a) Milk Supply

No. of Registered Distributors Nil

No. of Registered Distributors outside area selling milk within the area 8

There have been no fresh applications for licences in the year.

(b) Slaughterhouses

There were no licensed slaughterhouses in the district during 1957.

(c) Ice Cream - Retail Premises

Of the 33 premises registered for the sale and storage of pre-packed ice-cream, none has given cause for action to be taken in the past year, and all continued to be maintained at a satisfactory standard.

(d) Food Premises

(i) The number of food premises in the area is as follows:-

(.) Grocers and General Stores	39
Bakers	9
Butchers	3
Cafes	13
Licensed Public Houses and Inns	36

(ii) No. of food premises registered under Section 14 of the Food and Drugs Act, 1938.

Sale of pre-packed ice cream	36
Preparation and manufacture of sausages etc.	3

(e) Food Inspection

(i) No. of visits for the purpose of inspection of food premises (retail and preparation) 94

(ii) No. of visits in connection with milk and water sampling 197

(iii) The following foods were condemned during the year:-

(a) Miscellaneous Canned Food	45 tins
(b) Other Foods	2 lbs. Flour    10 lbs Fish Cakes
	1 lb. Currants, 5 lbs. assorted pastries
	1 Ham.

All food for which condemnation certificates are issued is buried.

(f) Adulteration

The Council is not a Food and Drugs Authority under the Food and Drugs Act, 1938.

(g) Food Poisoning Outbreaks

There were no recorded cases of food poisoning during the year.

-----

There were no licensed slaughterhouses in the district during 1937.

(c) Ice Cream - Retail Premises

Of the 35 premises registered for the sale and storage of pre-packed ice-cream, none has given cause for action to be taken in the past year, and all continued to be maintained at a satisfactory standard.

(d) Food Premises

(1) The number of food premises in the area is as follows:-

( ) Grocers and General Stores	39
Bakers	9
Butchers	3
Cafes	13
Licensed Public Houses and Inns	36

(2) No. of food premises registered under Section 14 of the Food

and Drugs Act, 1938.

Sale of pre-packed ice cream	36
Preparation and manufacture of sausages etc.	3

(e) Food Inspection

(1) No. of visits for the purpose of inspection of food premises (retail and preparation)

34

(2) No. of visits in connection with milk and water sampling

197

(3) The following foods were condemned during the year:-

(a) Miscellaneous Canned Food 45 tins

(b) Other Foods 2 lbs. Flour, 10 lbs. Flour, 1 lb. Cornmeal, 5 lbs. assorted pastries

1 tin.

All food for which condemnation or citation was issued is buried.

(f) Adulteration

The Council is not a Food and Drugs Authority under the Food and Drugs Act, 1938.

(g) Food Poisoning Outbreaks

There were no reported cases of food poisoning during the year.
