ASHBY-DE-LA-ZOUCH RURAL DISTRICT COUNCIL.

ANNUAL REPORT  
of the  
MEDICAL OFFICER OF HEALTH  
for the year 1945.

Public Health Staff.

- (1) Medical Officer of Health - A.McM.W.Segerdal, M.D., D.P.H.  
(2) Surveyor & Sanitary Inspector - John P.Cook, Cert.R.S.I.,  
M.S.I.A.  
(3) Additional Sanitary Inspector - E.Stansfield, Cert.R.S.I.,  
M.S.I.A.

To the Chairman and Members of the Ashby-de-la-Zouch  
Rural District Council.

Gentlemen,

I beg to present my Annual Report on the sanitary state of your district for the year ending 31st December 1945, and I wish to express my thanks to Mr.J.P.Cook for his assistance, as many of the figures are taken from his annual summary.

SECTION A.(1) Statistics and Social Conditions.

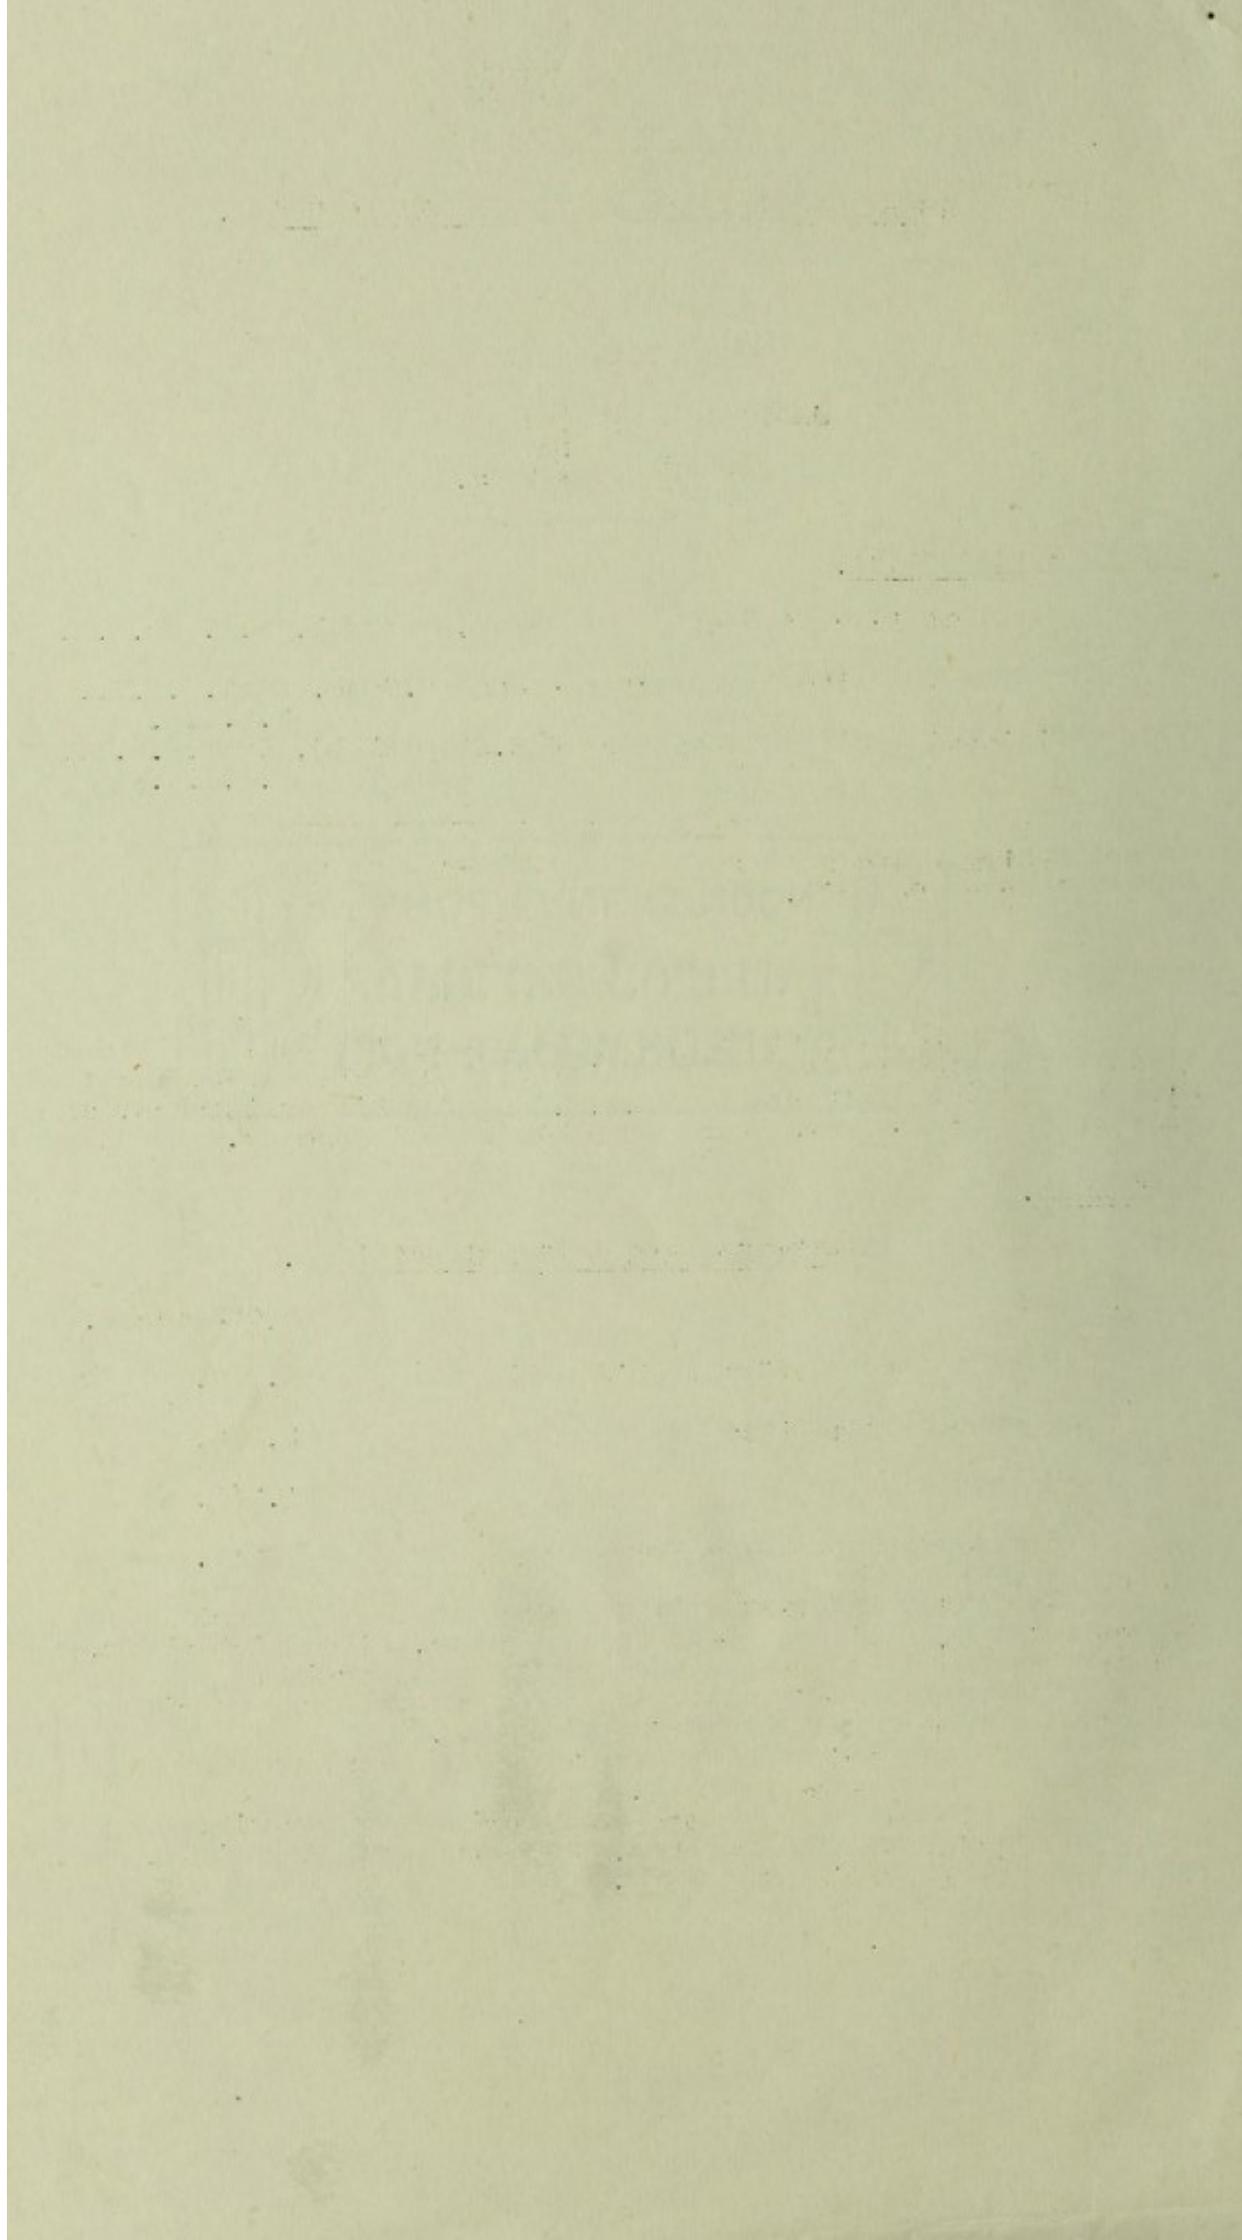

Area	28,073 acres.
Resident Population (R.G's estimate)	13,110.
Number of Inhabited Houses	3,732.
Rateable Value	£51,215.
Sum represented by a Penny Rate	£214.

The chief industries in the area are:- (1) Agriculture, (2) Coalmining, (3) Open-cast Coal Working, (4) Brickmaking, (5) Stoneware and Pipemaking and (6) Stone Quarrying.

No particular industry was noted as having a specially injurious effect on health during the year.

There are Prisoner of War Camps (Italian) at Staunton Harold and Stretton-en-le-Field.

Two hostels used by evacuees during the war viz: Heather Hall for Scabies and The Beeches, Ravenstone for Eneurisis, etc., were closed down during the year.

<u>Diseases.</u>	<u>Male.</u>	<u>Female.</u>	<u>Total.</u>
Brought Forward	58	61	119
Road Traffic Accidents	1		1
Other Violent Causes	5	2	7
All other Causes	6	4	10
	<u>70</u>	<u>67</u>	<u>137</u>

Chief Causes of Death in 1945 were:-

(1) Heart Disease 31, (2) Cancer 26, (3) Intra Cranial Vascular Lesions 14, (4) Nephritis 9, (5) Pneumonia 7, (6) Other Violent Causes 7, (7) Premature Birth 6, (8) Other Digestive Diseases 6 and (9) Bronchitis 5.

## SECTION B.

### General Provision of Health Services for the Area.

#### Laboratory Facilities.

Chemical and Bacteriological Examinations are provided for in the County Council Laboratory, 8, St. Martin's, Leicester. The following examinations were carried out during 1945:-

Milk Examinations (Bacteriological)	223
Sputa for Tubercule Bacilli	25
Sewage and Water Analyses	21
Swabs for Diphtheria	10
Milk for Phosphatase Test	10
Blood for Wasserman Test	6
Total	<u>295</u>

Emergency Public Health Laboratory, Isolation Hospital, Groby Road, Leicester. Various examinations such as blood and faeces for Typhoid and Dysentery are carried out here. Material for Immunisation can be obtained from here.

General Hospitals. Leicester Royal Infirmary, Burton Infirmary, Ashby Cottage Hospital, County P.A. Institution and Loughborough Hospital.

Infectious Diseases. Hospitals are provided by the Combined Leicestershire Hospitals Committee and are situated at Markfield (76 beds) Hinckley (23 beds) Blaby (17 beds) and Melton (32 beds). Smallpox. Smallpox Hospitals are provided by the County Council at Syston (15 beds) and Snarestone (23 beds), Snarestone Smallpox Hospital is situated in your area.

#### Tuberculosis.

The County Sanatorium at Markfield is well equipped for the diagnosis and treatment of Tuberculosis (150 beds) Operations on cases of Pulmonary Tuberculosis are performed at Leicester City Isolation Hospital. A number of institutions including the following are available for the treatment of cases from the County:-

- (1) City General Hospital, Leicester.
- (2) Harlow Wood Orthopaedic Hospital, Mansfield, Notts.
- (3) Warwickshire Orthopaedic Hospital, Coleshill.

#### Maternity.

Ashby Cottage Hospital, Fairhaven Nursing Home, Shellbrook, Ashby and Glencoe Nursing Home, Coalville are all conveniently situated for midwifery cases from your area. Burton Infirmary, Loughborough General Hospital and Leicester Royal Infirmary are available for cases requiring institutional treatment.

Children. Children are also admitted to Ashby Cottage Hospital and Leicester Royal Infirmary. Orthopaedic cases are also admitted to Warwickshire Orthopaedic Hospital, Coleshill.

Other. Delicate and illnourished children 3 to 5 years are admitted to the Childrens' Convalescent Home at Woodhouse Eaves. Cases of Scabies are sent to Melton P.A. Institution.

Treatment Centres and Clinics.

There are none actually held in your district. An Infant Welfare Clinic is held every Thursday afternoon at the Baptist Schoolroom, Ashby-de-la-Zouch. At the Health Centre, Bridge Road, Coalville an Antenatal Clinic and a Tuberculosis Dispensary are held regularly. A School and Dental Clinic is also conducted here. Venereal Diseases Clinics are held at Leicester Royal Infirmary, Burton Infirmary and Loughborough General Hospital. Cases of Scabies are treated at Swadlincote Urban District Council Treatment Centre.

Ambulance Facilities.

Cases of Infectious Diseases are removed by ambulances maintained for the purpose by the Combined Leicestershire Hospitals Committee. Colliery accidents are transported by ambulances provided and maintained for this purpose by the Leicestershire Coal Owners Association and South Derbyshire and Leicestershire Coal Owners Association. Ambulances provided by the St. John Ambulance Association are available for Civilian cases and are stationed at Coalville and Church Gresley. An ambulance run by the Ashby-de-la-Zouch Urban District Council is available for Civilian cases in the parishes adjacent to the Ashby-de-la-Zouch Urban District.

Nursing in the Homes.

General District Nurses are provided in most of the parishes or combined parishes by local voluntary effort under the supervision of Leicestershire County Nursing Association. Many of the District Nurses undertake midwifery.

Health Visiting.

This is provided by the County Council and the work of health visitor, school nurse and tuberculosis visitor is combined in a single appointment. This work is very ably carried out in your area by three health visitors, Miss Seabrook, Miss Porter and Miss Anderson whose willing co-operation is always available to the district Medical Officer of Health. In a diphtheria immunisation campaign, the help of the health visitor is particularly valuable.

Section 1

The first section of the Act is devoted to the general principles and purposes of the law. It states that the law is intended to provide a framework for the regulation of the industry and to ensure that the interests of the public are protected.

Section 2

Section 2 defines the key terms used in the Act. It includes definitions for 'the Board', 'the Commission', 'the Director', and 'the Registrar'. It also defines the various types of licenses and permits that are issued under the Act.

Section 3

Section 3 sets out the powers and duties of the Board. It states that the Board is responsible for the general supervision and control of the industry. It has the power to make regulations, to issue licenses, and to take disciplinary action against licensees. It also has the power to refer matters to the Commission for investigation and report.

Section 4

Section 4 deals with the powers of the Commission. It states that the Commission is responsible for the investigation and reporting on matters referred to it by the Board. It has the power to call for evidence, to examine witnesses, and to make recommendations to the Board. It also has the power to conduct inquiries into the conduct of licensees.

Section 5

Section 5 sets out the powers of the Director. It states that the Director is responsible for the day-to-day administration of the Act. He has the power to issue licenses, to issue orders, and to take disciplinary action against licensees. He also has the power to refer matters to the Commission for investigation and report.

Section 6

Section 6 deals with the powers of the Registrar. It states that the Registrar is responsible for the registration of licensees. He has the power to issue registration certificates, to issue orders, and to take disciplinary action against licensees. He also has the power to refer matters to the Commission for investigation and report.

SECTION C.

SANITARY CIRCUMSTANCES OF THE DISTRICT.

1. WATER SUPPLY.

(a) The piped water supply in the district has been satisfactory in quality and quantity. Wells in agricultural parishes are fairly good.

(b) Piped supplies - results of samples taken for analysis:-

RAW WATER.				TREATED WATER GOING INTO SUPPLY.			
BACTERIOLOGICAL		CHEMICAL.		BACTERIOLOGICAL		CHEMICAL.

2. SEWAGE DISPOSAL.

No. of cesspools constructed during the year .. .....4.

No. of cesspools abolished during the year .. .....0.

Total number in district on December 31st, 1945.....212.

There were no extensions of sewers, new works or improvements carried out during the year.

Post War Proposals.

	£.
Appleby Magna, Snaresstone & Snaresstone Road, Measham	28,500
Peckington. (Independent Scheme)	8,900
Normanton-le-Heath	2,800
Coleorton, Worthington and part of Swannington including extensions.	49,500
Osgathorpe (Sewage pumped to U.D.C. works)	6,800
Heather	10,500
Sweptstone	14,800
Ravenstone sewage disposal works. Reconstruction and extension.	3,000
Acresford (draining to Netherseale)	2,650
Leicester Road and Bosworth Road, Measham. Relaying of old sewers.	3,100

3. CLOSET ACCOMMODATION.

Total number in district on December 31st, 1945.

(a) Privies.....1132.      (b) Pail Closets...1104      (c) W.C's...1651.

No. of closets converted to water carriage system during year:-

(a) Privies.....7      (b) Pails.....6.

No. of Privies (Middens) converted to pail closets during year.17.

4. PUBLIC CLEANSING.

House refuse is removed by direct labour. The Council have three Karrier Bantam Refuse Collecting Vehicles, each with a 350 gallon night soil tank.

The dry refuse is taken to tips and the wet to agricultural land. Earth closets, ashpits and cesspools are emptied by the Councils' workmen.

5. SALVAGE.

Salvage is collected by the Local Authority as often as can be arranged, subject to the demands of Public Cleansing which is given priority.

During the year the undermentioned materials have been collected and sold:-

	Tons.	owts.	qrs	value	£.	s.	d.

1. INTRODUCTION

The purpose of this study is to investigate the effects of the proposed system on the performance of the system. The study is divided into two parts: a theoretical analysis and an experimental evaluation. The theoretical analysis is based on the principles of system design and the experimental evaluation is based on the results of a series of experiments.

2. THEORETICAL ANALYSIS

The theoretical analysis is based on the principles of system design. It is divided into two parts: a general analysis and a specific analysis. The general analysis is based on the principles of system design and the specific analysis is based on the results of a series of experiments. The general analysis is based on the principles of system design and the specific analysis is based on the results of a series of experiments.

3. EXPERIMENTAL EVALUATION

The experimental evaluation is based on the results of a series of experiments. It is divided into two parts: a general evaluation and a specific evaluation. The general evaluation is based on the principles of system design and the specific evaluation is based on the results of a series of experiments. The general evaluation is based on the principles of system design and the specific evaluation is based on the results of a series of experiments.

4. CONCLUSIONS

The conclusions of this study are based on the results of the theoretical analysis and the experimental evaluation. The results of the theoretical analysis and the experimental evaluation show that the proposed system has a significant effect on the performance of the system.

5. REFERENCES

The references of this study are based on the results of the theoretical analysis and the experimental evaluation. The results of the theoretical analysis and the experimental evaluation show that the proposed system has a significant effect on the performance of the system.

6. SANITARY INSPECTIONS OF THE AREA.

Total number of Complaints received.....139.

Total number of defects or nuisances discovered.....124.

Nuisances detected (District Inspections).....316.

INSPECTIONS MADE:-

	First Inspections.	Revisits.
Animal Keeping.	6	7

TABLE 1. SUMMARY OF DATA

Year	1950	1951	1952	1953	1954	1955	1956	1957	1958	1959	1960
Production (1000 tons)	100	110	120	130	140	150	160	170	180	190	200
Consumption (1000 tons)	100	110	120	130	140	150	160	170	180	190	200
Stock (1000 tons)	0	0	0	0	0	0	0	0	0	0	0

TABLE 2. SUMMARY OF DATA

Year	1950	1951	1952	1953	1954	1955	1956	1957	1958	1959	1960
Production (1000 tons)	100	110	120	130	140	150	160	170	180	190	200
Consumption (1000 tons)	100	110	120	130	140	150	160	170	180	190	200
Stock (1000 tons)	0	0	0	0	0	0	0	0	0	0	0

In the event of unexpected changes in production or consumption, the stockpile should be adjusted accordingly. The stockpile should be maintained at a level sufficient to meet the requirements of the industry for a period of 3 to 6 months.

The following table shows the estimated requirements for the various grades of steel for the years 1950 through 1960. The requirements are based on the production and consumption data shown in the preceding tables.

Year	1950	1951	1952	1953	1954	1955	1956	1957	1958	1959	1960
Grade A (1000 tons)	100	110	120	130	140	150	160	170	180	190	200
Grade B (1000 tons)	100	110	120	130	140	150	160	170	180	190	200
Grade C (1000 tons)	100	110	120	130	140	150	160	170	180	190	200

The following table shows the estimated requirements for the various grades of steel for the years 1950 through 1960. The requirements are based on the production and consumption data shown in the preceding tables.

MEAT AND OTHER FOODS.

No. of regional slaughter houses in area ..... Nil.  
 No. of animals slaughtered in do. .... Nil.  
 No. of animals examined in do. .... Nil.  
 No. of animals slaughtered elsewhere..... Unknown  
 No. of animals examined elsewhere..... 4.  
 No. of inspections of meat at time of slaughter..... 4.

Tuberculosis continued.

New Cases notified in 1945.

Pulmonary.           6                   Non-Pulmonary       2           Total 8

Deaths.

<u>Pulmonary.</u>		<u>Non-Pulmonary.</u>	
<u>Males.</u>	<u>Females.</u>	<u>Males.</u>	<u>Females.</u>
<u>2</u>	<u>2</u>	<u>0</u>	<u>0</u>

Total 4.

Measles. This was prevalent over the area in the winter and spring, 119 cases being notified in all, the chief parishes affected being Swannington, Ravenstone, Coleorton, Worthington and Heather. There were no deaths.

Diphtheria. One mild case in an immunised child. No death.  
Total number immunised to December 31st, 1945.

<u>Under 1</u>	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5 - 9</u>	<u>10 - 14</u>	<u>Total</u>
<u>1945.</u>	<u>1944.</u>	<u>1943</u>	<u>1942</u>	<u>1941</u>	<u>1936 -1940.</u>	<u>1931 -1935</u>	<u>under 15.</u>
0	39	72	88	99	370	199	867.

Total number immunised during 1945.

<u>Under 5 years</u>	<u>44</u>
<u>5 - 15</u>	<u>12</u>
<u>Total</u>	<u>56.</u>

Whooping Cough. There were 20 cases notified during the year. No deaths.

Acute Pneumonia. 28 cases were notified with 4 deaths.

Scarlet Fever. There were 17 cases. All were mild with no deaths.

Typhoid Fever. One case in a woman at Coleorton occurred during a small epidemic in the county. She recovered completely but unfortunately developed the carrier state and is under supervision and having repeated tests.

Dysentery. One case of mild dysentery was notified. There have probably been many very mild cases which have not received medical attention.

Erysipelas. There were 5 cases notified and no deaths.

I remain, Gentlemen,

Your obedient Servant,

A.McM.W.Segerdal,

Medical Officer of Health.
