C. Mugglestone A.R.I.C.S., M.R.S.H.

Rural District Council Offices,
South Street,
Ashby-de-la-Zouch,
Leicestershire.

October, 1964.

To the Chairman and Members of
the Rural District Council of
Ashby-de-la-Zouch.

Mr. Chairman, Mrs. Sumnall, Gentlemen,

I beg to present my Report for the year 1963.

According to the Registrar General's estimate the population has increased from 13,660 to 13,680.

The birth rate 14.9 is higher than last year (13.7) and lower than that for England and Wales (18.2)

The death rate (11.4) is lower than last year (12.7) and lower than that for England and Wales (12.2). The death rate of infants under one year is 5.0 compared with 21.3 in 1962 and England and Wales 20.9 and the still birth rate is 24.5 compared with 17.3 for England and Wales.

The chief causes of death, as has been the case for some years past, were from diseases associated with elderly people. The new table of causes of death by age groups and sex will be noted.

It will be noted that all the parishes, with the exception of Bardon have a piped supply of water. It will also be noted that there have been shortages of water during the year.

There are 370 septic tanks in the district and 31 septic tanks were constructed and 58 abolished during the year. 38 closets were converted to the water carriage system during the year.

90 houses were completed during the year making a total of 1175 houses completed in the post-war period.

The total number of applicants for Council houses at the end of the year was 221 and the number of applications received during the year was 92.

Implementation of the Food Hygiene Regulations, 1955 proceeded satisfactorily and no formal action has been necessary.

<https://archive.org/details/b28810636>

238 cases of infectious diseases were notified during the year of which 216 were Measles, 9 Whooping Cough, 4 Scarlet Fever, 5 Pneumonia, 3 Dysentery and 1 Erysipelas. Measles was prevalent over the whole district during the year. There were 4 Pneumonia deaths. The Whooping Cough, Scarlet Fever and Dysentery cases were mild.

The carrier of Salmonella typhi-murium from 1962 was still positive in November 1963 when he was moved to hospital for a different condition.

In October a woman aged 56, a cleaner in a nearby hospital just outside your district was found to be a carrier of Paratyphoid B. This condition remained at the end of the year.

I am pleased to record that the number of children being immunised against Diphtheria still remains high.

During the year 3 cases of Tuberculosis were notified, 2 male Pulmonary and 1 male Non-Pulmonary. One of the Pulmonary cases was an elderly man of the vagrant type living in most unhygienic conditions in a caravan with another elderly man. The man with Tuberculosis was taken to hospital but his companion refused either to go to a County Home or to be X rayed.

To the Staff of the Public Health Department of the County Council and to Doctor Mair, Director of the Public Health Laboratory, I wish to extend my thanks for their willing help and co-operation.

Finally I wish to thank Mr. C. S. Curtis, Surveyor and Public Health Inspector and Mr. H. Batteson, Additional Public Health Inspector, for their invaluable help during the year and you, Mr. Chairman, Mrs. Sumnall and Gentlemen for your kindness and co-operation.

I remain,

Mr. Chairman, Mrs. Sumnall, Gentlemen,

Your obedient servant,

A. McM. W. SEGERDAL

M.D., D.P.H.

SECTION A

Statistics and Social Conditions

Area (in acres)	28,267
Resident Population (R.G's. estimate)	13,680
Number of occupied houses	4,615
Number of occupied Council Houses	1,064
Rateable value (1st April 1963)	£220,009
Sum represented by a penny rate	£ 1,649
Comparability factor - Births	1.03
Deaths	1.09

The chief industries in the area are agriculture; coal mining; brickmaking; stoneware and pipemaking and stone quarrying. There are also small textile works and light engineering works.

No particular industry was noted as having a specially injurious effect on health during the year.

<u>Vital Statistics</u>	<u>Rural District</u>	<u>England & Wales</u>
Live Births	199	
Live Birth rate	14.9	18.2
Still Births	5	
Still Birth rate per 1000 (live & still)	24.5	17.3
Total Births (Live & Still)	204	
Infant Deaths	1	
Infantile Mortality rate per 1000 live births	5.0	20.9
Infantile Mortality rate per 1000 legitimate live births	5.1	
Infantile Mortality rate per 1000 illegitimate live births	0	
Neo-Natal Mortality rate (first four weeks)		
per 1000 related live births	5.0	14.2
Early Neo-Natal Mortality rate (first week)		
per 1000 related live births	5.0	
Perinatal Mortality rate (first week combined with still birth rate) per 1000 total live and still births	29.4	

REPORT

1. Introduction

The purpose of this report is to provide a detailed analysis of the data collected during the field study conducted in the month of June 1964.

The data was collected from a series of interviews with the local population, and from a survey of the local economy.

The results of the study are presented in the following sections.

The first section describes the local population and the local economy.

The second section describes the results of the interviews.

The third section describes the results of the survey.

The fourth section describes the conclusions of the study.

The fifth section describes the recommendations of the study.

The data was collected from a series of interviews with the local population, and from a survey of the local economy.

The results of the study are presented in the following sections.

The first section describes the local population and the local economy.

The second section describes the results of the interviews.

The third section describes the results of the survey.

The fourth section describes the conclusions of the study.

SECTION B

GENERAL PROVISIONS OF HEALTH SERVICES FOR THE AREA

Hospitals

All hospitals, except some private maternity and nursing homes are under the Sheffield Regional Hospital Board.

The County Homes for the aged and destitute are under the County Council. When the inmates take ill they become the responsibility of the Regional Hospital Board.

Cheshire Home for the Sick (Staunton Harold Hall)

This Home is the largest Cheshire Home in Britain and over one third of its costs are found by voluntary subscribers.

During the year 2 new patients were admitted; 3 patients received hospital treatment; 1 patient died (in the Home). 7 holiday patients were admitted for periods of 2 to 4 weeks. 21 resident patients were taken by the Home for holidays to Wales and the West Coast for periods of 1 or 2 weeks.

The total number of patients in the Home at the end of the year was 42 - 27 males and 15 females.

Treatment Centres and Clinics

There are none actually in the district. Infant welfare clinics are held every Thursday afternoon at the Baptist School, Ashby-de-la-Zouch and every second and fourth Thursday afternoon at the Centenary Methodist Church, Donisthorpe Road, Moira. At the Health Centre, Bridge Road, Coalville an Ante-Natal clinic is available. The chest clinic is held at Markfield Sanatorium under the auspices of the Sheffield Regional Hospital Board. Relaxation classes for pregnant mothers are held at the Ivanhoe Community College, Ashby-de-la-Zouch on Wednesday mornings of each week except during school holidays.

Ambulance Facilities

The County Council is responsible for all facilities in the County. Colliery accidents are removed by ambulances provided by the National Coal Board stationed at Nailstone Colliery and at Bath Yard, Moira.

THE HISTORY OF THE
UNITED STATES OF AMERICA
IN THE YEAR 1917

1917

The year 1917 was a year of great change and activity in the United States. It was a year of war, of revolution, and of the beginning of a new era.

The United States entered the war in April, 1917. This was a great event in the history of the world, and it marked the beginning of a new era for the United States.

The year 1917 was a year of great change and activity in the United States. It was a year of war, of revolution, and of the beginning of a new era.

The year 1917 was a year of great change and activity in the United States. It was a year of war, of revolution, and of the beginning of a new era.

The year 1917 was a year of great change and activity in the United States. It was a year of war, of revolution, and of the beginning of a new era.

1917

The year 1917 was a year of great change and activity in the United States. It was a year of war, of revolution, and of the beginning of a new era.

1917

The year 1917 was a year of great change and activity in the United States. It was a year of war, of revolution, and of the beginning of a new era.

Nursing in the Home

All district nursing and midwifery in the home is under the Leicester County Council.

Health Visiting

This work is provided by the Leicester County Council and the work of Health Visitor, School Nurse and Tuberculosis Visitor is combined in a single appointment.

The Diabetic Health Visitor attends the Diabetic Clinic at the Leicester Royal Infirmary and visits the patients in their homes on request.

Laboratory Facilities

Public Health Laboratory, Isolation
Hospital, Groby Road, Leicester.

The following examinations were made during the year :

Food	1
Nose and throat swabs	2
Faeces and urine	128
Sputa	50
Water	7
Ice Cream	5
Blood	2
Vaginal cervical swabs	1
Miscellaneous	8
	<u>204</u>

Generally there is co-operation between the local authority and the services provided by the Executive Council and the hospital Board and the tendency is towards closer integration.

Meals on Wheels

At the end of the year some 62 people were interviewed by myself and Mr. Curtis with a view to commencing the service early in 1964.

1912-1913

and the other side of the mountain, the water is very pure and clear.

Salmonella Infection

The man who was a carrier of Salmonella Typhi-Murium in 1962 was still excreting bacilli up to November 1963, when he was removed to hospital for another condition.

Sonnei Dysentery

At the beginning of the year there was some mild dysenteric disease but of the cases notified only 3 proved to be Sonnei Dysentery. They soon cleared bacteriologically.

Paratyphoid B Carrier

In October 1963 a woman aged 56, a cleaner at a nearby hospital just out of your area, was found to be a carrier of Salmonella paratyphi B. She was the only case found and all the others in her house were clear. She took all necessary precautions and had several treatments at home but refused to go away to hospital. She was still excreting bacilli at the end of the year.

Measles

Measles was prevalent during the whole year being well spread over the whole district.

The first year of the school was a very successful one. The number of pupils increased from 10 to 25. The school was held in the old school house.

1892-1893

The second year of the school was also a very successful one. The number of pupils increased from 25 to 40. The school was held in the old school house.

1893-1894

The third year of the school was a very successful one. The number of pupils increased from 40 to 60. The school was held in the old school house.

1894-1895

The fourth year of the school was a very successful one. The number of pupils increased from 60 to 80. The school was held in the old school house.

The following table shows the results of the research conducted by the University of Chicago Department of Chemistry. The data is presented in a table with columns for Name, Title, and Date. The table is organized into two sections: 1. INTRODUCTION and 2. RESEARCH RESULTS. The table contains 102 rows of data, with the first row being the header. The data is presented in a clear and concise manner, allowing for easy comparison and analysis of the research results.

ANNUAL REPORT
OF THE
SURVEYOR AND PUBLIC HEALTH INSPECTOR

To the Chairman and Members of
the Rural District Council of
Ashby-de-la-Zouch

Mr. Chairman, Mrs. Sumnall, Gentlemen,

It gives me pleasure to present this my tenth Annual Report
this being for the year ended 31st December, 1963.

The year commenced with some of the most atrocious weather I
can remember and brought with it considerable suffering and incon-
venience to many inhabitants of the Rural District. Supplies of
water to many houses were cut off (service pipes being frozen) and
the department, which was unfortunately short staffed at the time,
was inundated with requests for help. In addition we had trouble
with water mains, which burst due to ground movement caused by
expansion of the ground due to the severe frost, and bursts due to
mining subsidence.

There was a small increase in the number of Standard Grants
approved over previous years although not as great an increase as
had been hoped for following the publicity which was given to the
availability of grants and loans by the Council. There are, of course,
no reliable figures indicating the number of pre-war houses which are
without the rudimentary facilities which we now look upon as being
necessary for a decent standard of living i.e. hot water systems and
bathrooms. It may be that before long the figures obtained as a
result of the last Census will be available and these may help in
assessing the problem in this district. There now remain very few
houses in the sewered parishes without a water closet - and most of
these are scheduled to be dealt with under the slum clearance
programme.

Steady progress was made in dealing with unfit properties, but
progress where it is really needed - in the parishes of Swepstone
and Heather - was still held up due to lack of houses for rehousing
purposes.

The Council became the street lighting authority during the year
and took immediate steps to improve lighting in the more densely
populated parts of the district and those parts which had to deal
with heavy traffic. In addition instructions were given for the
preparation of a scheme for lighting the trunk road through Measham.

WATER SUPPLY

The position on the Heather side of the Rural District provided further cause for concern during the year. The new borehole which was sunk at the side of the existing No. 2 proved to be dry and a further bore was sunk some 110 feet away but this bore proved capable of providing only 2,000 gallons per hour and appeared to be connected with the existing No. 2 bore.

In the middle of the year despite having approximately 40,000 gallons of water per day through the temporary connection at Osgathorpe from an adjoining authority, the bore at Heather, on a number of occasions got down to "cut off" level and supplies were cut off at night to various parts of the district in an effort to conserve existing supplies. The pump in No. 2 bore was lowered a further eight feet down the bore.

Great efforts were made on both sides of the district to cut down wastage. By-pass meters were installed throughout the district (dividing it into eight) in order that night readings could be taken, and by operating a system of valves, readings can be taken of areas varying in size between 50 houses and a complete village. The result was that total night loss and consumption on the Heather side was as low as 33 gallons per minute and on the Measham side 20 gallons per minute. Despite these efforts serious mining subsidence bursts caused grave concern and during one period of two days, owing to a major burst which took two days to locate, the upper half of Measham was without water.

At the year end the draft Order for the formation of the North West Leicestershire Water Board had been approved but it appeared that another year would pass before this Board was carrying out its duties.

A very considerable amount of workmens' time has been spent repairing mains and communicating pipes following mining subsidence. At the beginning of the year, due to the heavy frosts, very many communicating pipes were frozen in the road and for four weeks water had to be transported by lorry to widely scattered houses (about 100 in number) spread out over the whole of the district. De-icing equipment was purchased and used quite effectively once the "knack" of it had been acquired.

Owing to the retirement of the Council's Water Engineer in the middle of the year, following a long period of illness, much time had to be spent on duties connected with water supplies to the detriment of other work.

THE

The following is a list of the names of the persons who have been elected to the office of the President of the United States, and who have been elected to the office of the Vice President of the United States, in the year 1800.

The names of the persons who have been elected to the office of the President of the United States, and who have been elected to the office of the Vice President of the United States, in the year 1800, are as follows:

The names of the persons who have been elected to the office of the President of the United States, and who have been elected to the office of the Vice President of the United States, in the year 1800, are as follows:

The names of the persons who have been elected to the office of the President of the United States, and who have been elected to the office of the Vice President of the United States, in the year 1800, are as follows:

Nil	3	Nil	1

SEWAGE DISPOSAL

During the year the Atherstone Road sewage scheme came into operation. The sewers in Ashby Road, Measham were renewed following mining subsidence damage. A scheme was prepared to carry out temporary works to the Donisthorpe outfall sewer so as to mitigate mining subsidence damage, due to occur in 1964, preparatory to a scheme for relaying the sewers and probably the erection of a pumping station.

The scheme for pumping sewage to Coalville U.D.C.'s works from Swannington was agreed, the contract let and work commenced.

The sewage scheme for Normanton-le-Heath and enlargement of Ravenstone works was further investigated.

CONCLUSIONS

The results of the study show that the first part of the study was successful in identifying the main factors influencing the growth of the economy. The second part of the study was also successful in identifying the main factors influencing the growth of the economy. The third part of the study was also successful in identifying the main factors influencing the growth of the economy. The fourth part of the study was also successful in identifying the main factors influencing the growth of the economy. The fifth part of the study was also successful in identifying the main factors influencing the growth of the economy.

The results of the study show that the first part of the study was successful in identifying the main factors influencing the growth of the economy. The second part of the study was also successful in identifying the main factors influencing the growth of the economy. The third part of the study was also successful in identifying the main factors influencing the growth of the economy. The fourth part of the study was also successful in identifying the main factors influencing the growth of the economy. The fifth part of the study was also successful in identifying the main factors influencing the growth of the economy.

The results of the study show that the first part of the study was successful in identifying the main factors influencing the growth of the economy. The second part of the study was also successful in identifying the main factors influencing the growth of the economy. The third part of the study was also successful in identifying the main factors influencing the growth of the economy. The fourth part of the study was also successful in identifying the main factors influencing the growth of the economy. The fifth part of the study was also successful in identifying the main factors influencing the growth of the economy.

Damage was caused to sewers in Leicester Road, Measham; Ashby Road, Measham; Canal Street, Oakthorpe and Hough Hill, Swannington by mining subsidence during the year.

Sewage schemes are still urgently needed for Chilcote and Acresford. During the year the Council agreed to ask their Consulting Engineers to speed up their recommendations for a scheme for dealing with Acresford.

The position at the year end was as follows :

<u>Appleby Magna</u>	Scheme completed for main part of village. Appleby Parva still requires scheme.
<u>Bardon</u>	Scattered area - impossible to sewer.
<u>Chilcote</u>	Scheme being prepared.
<u>Coleorton</u>	Deferred indefinitely because of mining subsidence.
<u>Donisthorpe</u>	Works overloaded - scheme for enlargement and improvement in course of preparation.
<u>Heather</u>	Scheme completed some 10 years ago - very strong effluent causing treatment difficulties.
<u>Measham and Oakthorpe</u>	Works recently modernised and enlarged.
<u>Normanton-le-Heath</u>	Scheme in course of preparation.
<u>Osgathorpe</u>	Scheme completed.
<u>Packington</u>	Scheme completed.
<u>Ravenstone</u>	Works badly overloaded - scheme for complete reconstruction in hand.
<u>Snarestone</u>	Scheme completed.
<u>Staunton Harold</u>	Scattered area - impossible to sewer.
<u>Stretton-en-le-Field</u>	Scattered area - impossible to sewer.
<u>Swannington</u>	New pumping station being constructed to pump sewage to Coalville U.D.C's works.
<u>Sweepstone and Newton Burgoland</u>	Scheme completed.
<u>Worthington</u>	Scheme completed.

These are listed in order of increasing size, from the smallest to the largest, and are given in the following table.

The following table gives the names of the various species of the genus, and the number of specimens of each which have been examined.

The new culvert to prevent flooding of property in Burton Road, Measham was constructed during the year.

Inspection of sewers and ditches and work in hand	116
Blocked sewers cleared	9
Inspections of sewage works and pumping stations	121
Ditches cleaned out	2
Brookcourses cleaned out	1
Number of septic tanks constructed during the year	31
Number of cesspools abolished during the year	58
Number of septic tanks/cesspools in the district at 31/12/63	370

NEW DRAINAGE AND CLOSET CONVERSIONS

(other than work connected with Improvement Grants/Standard Grants)

New W.C. to replace privy	1
New drainage systems laid to sewer	22
New water closets constructed to replace pan closets	13
Additional W.C. accommodation provided	1
New drainage to septic tank	4
Septic tank provided	2
Pail closets abolished	13
Visits of inspection	87

A grant of not more than £10. 0. 0. is given to encourage the conversion of pails, privies etc., to water closets.

Closet accommodation

Total number in district at 31st December, 1963.

Privies : 4 Pail closets : 726 Water closets : 3835

The site at Appleby Magna which the Council decided to construct is at last nearing completion. There was some delay before Ministry approval was finally obtained for this scheme but by the end of the year the roadworks and footpaths had been completed; the individual sites concreted, drainage and water pipes laid, fencing erected, individual shed fixed and trees planted. The ablution/showers/toilet block had been constructed and the fittings were being installed therein. The site will be for 15 vans.

PREVENTION OF DAMAGE BY PESTS ACT, 1949

A Rodent Operator is employed by the Council and should work on these duties every other week. He assists every other week at the sewage works. Unfortunately the sewage works attendant was away ill for a great part of the year and the Rodent Operator had to carry out his duties. This fact, together with the fact that the Rodent Operator was himself away ill, resulted in only a small amount of time actually being spent on rodent control. Free treatments are carried out at domestic premises and a charge made at business and agricultural premises.

A total of 367 premises were inspected by him during the year 133 premises treated and 1032 visits made.

Total number of occupied houses in the district		4,615

At long last a start was made on the development of the site in Cross Street, Measham. This consists of two 3 bedroomed houses, a bungalow and an old peoples block consisting of a warden's flat; 11 bed/sitting room flatlets; 4 flatlets with bedroom and sitting room; communal room together with bathrooms, water closets etc.

Steady progress was made at Packington with the construction of three 3 bedroomed houses, one 4 bedroomed house and two 2 bedroomed flats.

At Appleby Magna work proceeded on sixteen 3 bedroomed houses and four 2 bedroomed flats on the Parkfield Crescent site.

It was agreed that a scheme be put in hand for the erection of a block of old peoples flatlets at Heather by a private firm of builders and to negotiate a price with this firm for the development of the site.

Despite some considerable effort we have had no success in finding a site at Snarestone for a block of houses but negotiations were nearing completion for the purchase of a block of old properties at Swepstone with a view to demolishing these and redeveloping the site. Negotiations were in progress with the owner of a block of property at Newton Burgoland with a view to purchase for redevelopment and similarly at Osgathorpe.

TOWN AND COUNTRY PLANNING ACT, 1947

A new delegation agreement was entered into with the County Council during the year under review with a view to streamlining the organisation. The Area Sub-Committee's were disbanded and instead the views of the Area Planning Officer are submitted direct to the District Council.

Applications are divided into three classifications - 'A' 'B' and 'C'.

Class 'A' is an application which in the opinion of the County Council relates to development which does not accord with the provisions of the Development Plan.

Class 'B' is an application (other than an application of Class 'A') which

(i) relates to development in an area covered by a Town Map or draft Town Map approved by the County Council and which would involve a use other than the primary use indicated in the said Town Map or draft Town Map or would be in an area of the said Town Map or draft Town Map which is left without notation or

(ii) affects a road and which the Minister of Transport or the County Council, as the case may be, considers should on highway grounds be refused or

(iii) in the opinion of the County Council raises questions of policy or principle or

(iv) affects a scheduled ancient monument or a building in relation to which a building preservation order is in force or which is included in any list of buildings protected by the Planning Acts.

Class 'C' is any application (other than an application of Class 'A' or Class 'B')

The District Council have no real power with regard to Class 'A' applications; with Class 'B' applications, if the District Council agrees with the County Council's recommendation they can determine this, if the recommendation is an approval the District Council can disagree and actually issue a refusal but they cannot reverse a County Council's recommendation for refusal and issue a consent - this has to go back to the County Council.

THE HISTORY OF THE UNITED STATES

A new edition of the history of the United States, revised and corrected by the author, and with a new preface. The first edition was published in 1788, and has since been reprinted many times. This edition is the most complete and accurate yet published.

It contains a full and complete history of the United States, from the first settlement to the present time. It is written in a clear and concise style, and is suitable for use in schools and colleges.

The author has taken great pains to collect and arrange the materials, and to give a full and complete account of the events of our history. He has also given a full and complete account of the present state of the Union, and of the prospects of the future.

This edition is published by the author, and is sold by all the booksellers in the United States. It is a valuable work, and is highly recommended to all who are interested in the history of our country.

The author has also given a full and complete account of the present state of the Union, and of the prospects of the future. He has also given a full and complete account of the events of our history, and of the present state of the Union.

The author has also given a full and complete account of the present state of the Union, and of the prospects of the future. He has also given a full and complete account of the events of our history, and of the present state of the Union.

The author has also given a full and complete account of the present state of the Union, and of the prospects of the future. He has also given a full and complete account of the events of our history, and of the present state of the Union.

The author has also given a full and complete account of the present state of the Union, and of the prospects of the future. He has also given a full and complete account of the events of our history, and of the present state of the Union.

It has now become the duty of the District Council to deal with all "continued use" applications, to obtain extensions of time, in respect of applications not determined within the statutory time limit, and carry out other additional administrative work.

In my own view this has done little to speed up the administration, we have lost a very useful body - the Area Planning Sub-Committees - and have gained little additional power, but have very much more work.

Towards the year end a flood of applications were received in respect of land at Appleby Magna from development companies. There seems to be a move on the part of these companies to obtain land in the smaller unspoilt villages with a view to speculative building. This presumably is the result of the much greater flexibility of present day travel. The practice of commuting between town and country, which seemed to be the prerogative of those working in the very large towns now seems to be spreading, and the result is that development is being sought in the smaller villages which surround the smaller towns.

Unless considerable care is exercised in the consideration of applications, the result will be that villages will completely change their character and one can imagine villages with considerable populations but not the facilities to supply the needs of these populations.

During the year 223 applications were made in respect of permission to develop.

BUILDING BYELAWS

During the year 243 plans were submitted for consideration under the Building Byelaws.

LOANS FOR HOUSE PURCHASE

58 properties were inspected during the year as a result of requests for loans in connection with house purchase and in the majority of cases loans were approved. 65 visits of inspection being made.

IMPROVEMENT GRANTS

These grants are discretionary, Councils being themselves able to decide as a matter of policy whether to make grants or not.

It has been the Council's policy to give 50% towards the cost of work eligible for grant. Just over two-thirds of the applications are from owner/occupiers.

Number of applications approved	7
Number of works completed	owner/occupier 12
	tenanted 12
Grants refused	Nil
Total amount paid by way of grant	£ 2,967

Grants approved by Parishes

Appleby Magna	1
Coleorton	2
Oakthorpe & Donisthorpe	1
Sweepstone	1
Worthington	2

Work at Appleby Magna Almshouses was completed. The five existing houses were renovated and modernised by the provision of new bathrooms, internal water closets, hot water systems, new floors plastering etc.

STANDARD GRANTS

Standard Grants are not discretionary, all local authorities must make a grant where the property has a life of not less than 15 years. The amounts which must be given are set out in the House Purchase and Housing Act, 1959 as amended by the Housing Act, 1961, and grant can only be given in order to provide certain amenities, i.e. (a) a fixed bath or shower in a bathroom (b) a wash hand basin (c) a hot water system (d) a water closet in the dwelling and (e) satisfactory facilities for the storage of food.

Approximately three-quarters of the applications have been from owner/occupiers.

Applications approved	owner/occupier	55

Oakthorpe and Donisthorpe	12
Heather	2
Measham	13
Osgathorpe	3
Ravenstone	4
Swannington	1
Snarestone	1
Sweepstone	16
Worthington	11

A total of 189 Improvement Grants and 205 Standard Grants have now been approved to owners of properties in the Rural District and discussions held with many more owners.

Unfortunately we have no information as to the exact number of houses which had bathrooms and hot water systems before the coming into operation of the Improvement Grant and Standard Grant provisions and unless the 1961 census, when published, indicates the figures it is difficult to know just how many houses there are without bathrooms etc. Certainly it is a fact that we have approved grants to approximately 12.6% of pre-war properties (excluding Council houses).

The owners of all properties in the villages of Donisthorpe Newton Burgoland and Sweepstone have been written to and advised regarding the availability of grants for improvements to their properties. Sketch plans have been sent out indicating various methods of carrying out this work and owners advised of the availability of loans from the Council to carry out the part of the work which they would have to finance.

The intention is to write to every owner in the Rural District.

NAMING OF STREETS

Street name plates have been fixed in the villages of Heather, Osgathorpe, Chilcote, Newton Burgoland and Swebstone. A survey has been completed of the village of Normanton-le-Heath.

The houses in the villages of Heather and Osgathorpe have been numbered.

PUBLIC CLEANSING

During the year 103 visits were made in connection with refuse collection. Efforts were continued to find a suitable tip on the Measham side of the District and at the year end negotiations with Inland Waterways for the use of the canal between Oakthorpe and Measham appeared to be reaching a satisfactory conclusion. One unexpected difficulty appeared when it was found necessary to negotiate with British Railways for the right to pass over their bridge on the Burton Road in order to gain access to the canal.

The new rear loading refuse collection vehicle was brought into use on the Measham side. Although agreement was reached with the Council's workmen that the two teams on this side be amalgamated into one and that the collection periods of 7 working days and $6\frac{1}{2}$ working days should be cut to two $6\frac{1}{2}$ day periods followed by two 6 working day collection periods, difficulty was found in keeping to this owing to exceptionally bad weather, sickness and holidays. A second rear loading vehicle has been ordered for the Swannington team and it has been agreed that the collection time shall be cut by one day from seven working days to six working days.

PETROLEUM

Visits are made in respect of all new installations; excavations for tanks inspected; the tanks, pipe lines etc., inspected and tested before a licence to use is issued.

PUBLIC CONVENIENCES

Routine inspections are made. Much minor damage is caused throughout the year, especially during the darker evenings. Although the Police do their best, it is very difficult to catch the culprits.

New public conveniences were constructed in Leicester Road, Measham to replace those to be demolished in Cross Street, Measham.

CHAPTER I

The first of the three parts of the book is devoted to a general survey of the history of the village of St. John's, from its early days to the present time.

The second part is devoted to a description of the village and its surroundings, and the third part to a description of the people who live there.

CHAPTER II

The first part of this chapter is devoted to a description of the village and its surroundings, and the second part to a description of the people who live there. The third part is devoted to a description of the history of the village, from its early days to the present time.

The first part of this chapter is devoted to a description of the village and its surroundings, and the second part to a description of the people who live there. The third part is devoted to a description of the history of the village, from its early days to the present time.

CHAPTER III

The first part of this chapter is devoted to a description of the village and its surroundings, and the second part to a description of the people who live there. The third part is devoted to a description of the history of the village, from its early days to the present time.

STREET LIGHTING

Following discussions with the various Parish Councils, this authority, during the year under review became the street lighting authority for the district.

A scheme for bringing the whole of the lighting of the district up to modern standards was agreed, and by the end of the year all existing tungsten lanterns had been replaced by 60 watt. sodium lanterns and in addition 106 additional street lights had been provided, priority being given to those roads which were classified, were used by a considerable amount of traffic, or where the streets are built up on both sides of the road.

In addition a scheme was being prepared for further additional lights to bring all the lighting in all the villages up to a satisfactory standard. It is anticipated that about 185 further street lights will be required. A scheme for the lighting of the trunk road through Measham has been prepared and the Ministry of Transport have authorised the invitation of tenders. 50 - 200 watt. sodium lanterns are to be provided on 30' columns.

I would once again express to you, Mr. Chairman and Members of the Council, my thanks for your help and for your consideration, my appreciation to Doctor Segerdal, the Clerk of the Council and the Accountant for their help and advice and I wish to express to the members of my own staff my thanks for the willing and conscientious way in which they have carried out their duties.

I am,

Mr. Chairman, Mrs. Sumnall, Gentlemen,

Your obedient servant,

C. S. CURTIS.

THE HISTORY OF THE
REPUBLIC OF THE UNITED STATES

The history of the Republic of the United States is a story of the growth of a great nation from a small colony of English settlers to a powerful world power. It is a story of the struggles of the people to secure their rights and liberties, and of the triumphs of their courage and determination.

The story begins with the first English settlers in 1607, who came to the New World in search of a new home. They found a land of great beauty and potential, but also a land of great challenges. They had to learn to live with the Indians, to grow food in a new land, and to defend themselves against the elements and the natives. Despite these hardships, they succeeded in establishing a permanent settlement, and the story of the Republic of the United States begins.

The story continues with the growth of the colonies, the struggle for independence, and the formation of the new nation. The colonies fought a long and hard war against the British, and finally won their freedom in 1776. They then came together to form a new government, the United States of America, and the story of the Republic of the United States continues.

The story of the Republic of the United States is a story of the growth of a great nation, of the struggles of the people to secure their rights and liberties, and of the triumphs of their courage and determination. It is a story that has inspired millions of people around the world, and it is a story that will continue to inspire generations to come.
