Rural District Council Offices,  
South Street,  
Ashby-de-la-Zouch,  
Leicester,  
LE6 5BU.  
September, 1971.

To the Chairman and Members of  
the Rural District Council of  
Ashby-de-la-Zouch.

Mr. Chairman, Ladies and Gentlemen,

I beg to present the Report of the Medical Officer of Health concerning the sanitary circumstances, sanitary administration and vital statistics of the district for the year 1970. This has been prepared, so far as possible, according to the lines indicated in Circular 1/71, dated 1st January, 1971, from the Department of Health and Social Security.

It is a pleasure to acknowledge the help received from the members of the staff of the Public Health Department, and to record my appreciation of the courtesy and consideration shown to me by all the members of your staff with whom I have had contact and, not least, by all the members of the Council.

I have the honour to remain,

Your obedient servant,

ANDREW HAMILTON.

Medical Officer of Health.

Private Residence.

Health Research Council Office,  
South Street,  
Asbury-de-la-June,  
London,  
W.C.2.  
September, 1947.

To the Chairman and Members of  
the Health Research Council of  
Asbury-de-la-June.

Mr. Chairman, Ladies and Gentlemen,

I beg to present the Report of the Medical Officer of  
Health concerning the sanitary arrangements, sanitary administration  
and vital statistics of the district for the year 1946. This has  
been prepared, so far as possible, according to the forms indicated  
in Circular 1/47, dated 1st January, 1947, from the Department of  
Health and Social Security.

It is a pleasure to acknowledge the help received from the  
members of the staff of the Public Health Department, and to record  
my appreciation of the courtesy and co-operation shown to me by  
all the members of your staff with whom I have had contact and, not  
least, by all the members of the Council.

I have the honour to remain,

Yours obedient servant,

ARTHUR HARRISON.

Medical Officer of Health.

#### Births.

The birth rate at 16.9 is higher than that for the country as a whole, (16). About one seventh of the births registered took place at home within the district and the percentage of illegitimate live births at 6 was lower than the figure for England and Wales at 8.

#### Deaths.

The death rate at 11.6 is just below the national rate, (11.7), and much below last year's rate of 14.2. Two fifths of the deaths occurred outside the district and 66 were of persons over 75 years.

#### Infantile Mortality.

Two babies under 1 year died, one at home and one in hospital, the deaths being due to an upper respiratory infection and congenital abnormality respectively. The infantile mortality rate at 9 was just half that for England and Wales and as a matter of fact all the rates, (with one exception), relating to infant deaths were well below the corresponding rates for the whole country.

The deaths during 1 year died, one at home and one in hospital, the deaths being due to an acute respiratory infection and pneumonia respectively. The infantile mortality rate as a whole was just half that for England and Wales and as a result of fact all the rates, (with one exception), relating to infant deaths were well

#### Infantile Mortality

over 15 years.

The death rate as 11.5 is just below the national rate (11.7), and much below last year's rate of 14.7. Two thirds of the deaths occurred outside the district and 66 were of persons

#### Deaths

The birth rate at 16.7 is higher than that for the country as a whole (16). About one seventh of the births registered took place at home within the district and the percentage of illegitimate live births at 6 was lower than the figure for England and Wales at

## MEALS ON WHEELS.

The usual visiting of applicants for the Meals on Wheels service continued, in the course of which 30 visits were paid and 23 applications were approved. Towards the end of the year the Council agreed to recommend that as from 1st November, 1970, the subsidy per meal be increased from 1/6d to 2/6d, bringing the total cost of the meal up to 3/6d, one shilling being collected from each recipient, your Council contributing 1/3d and the County Council a like amount.

Consideration was given to the possibility of extending the service to the villages of Appleby Magna, Heather, Newton Burgoland, Swepstone, Snarestone and Osgathorpe, and, as a first step, the names of persons who might qualify were sought. As a result 42 additional visits were paid and the following recommendations made:-

<u>Village.</u>	<u>Yes.</u>	<u>No.</u>
Appleby Magna.	5	7
Heather.	8	6
Newton Burgoland.	4	4
Swepstone.	2	-
Snarestone.	-	-
Osgathorpe.	-	5

There is, therefore, some evidence of need in some parishes, and the next step will be to ascertain what arrangements can be made for the preparation of the meals and their subsequent distribution.

Due acknowledgement is made of the good work done by those who have helped so much in carrying out the schemes already in operation.

## CHIROPODY.

The need for the provision of a Chiropody service for aged persons at Measham and Swannington was raised near the year end and it was decided to explore the possibilities although the difficulties with regard to premises and qualified personnel were recognised. The matter was being pursued at the end of the year.

The usual visiting of applicants for the Whales in Wharf service continued, in the course of which 30 visits were paid and 23 applications were approved. Towards the end of the year the Council agreed to recommend that on 1st November, 1910, the subsidy per visit be increased from 1/6d to 2/6d, bringing the total cost of the visit up to 5/6d, one shilling being collected from each recipient, your Council contributing 1/6d and the County Council a like amount.

Consideration was given to the possibility of extending the service to the villages of Appleton Magna, Heston, Heston Magna, Heston, Heston and Gillingham, and, as a first step, the names of persons who might qualify were sought. As a result 45 additional visits were paid and the following recommendations made:-

Village	Year	No.
Appleton Magna	2	7
Heston	6	6
Heston Magna	4	4
Heston	2	-
Heston	-	-
Gillingham	-	5

There is, therefore, some evidence of need in some parishes, and the next step will be to ascertain what arrangements can be made for the provision of the whale and their subsequent distribution.

The recommendation is made of the good work done by those who have helped so much in carrying out the scheme already in operation.

## CHILPOBY.

The need for the provision of a Chilpooby service for persons at Monahan and Burnington was first met the year and it was decided to explore the possibilities although the difficulties with regard to provision and qualified personnel were recognized. The matter was being pursued at the end of the year.

NATIONAL ASSISTANCE ACTS, 1948 and 1951.

No formal action was necessary under these Acts, but some enquiry into and supervision of border-line cases was necessary.

To the Chairman and Members of  
the Rural Industries Council of  
Anglo-Siam Ltd.

Mr. Chairman, Ladies and Gentlemen,

I have pleasure in again presenting my Annual Report for your consideration. The year has been one of steady progress; there have been the usual problems due to rising costs, although not quite to the extent of previous years. We have endeavored to speed up house improvement, particularly with the aid of standard and improvement grants, and we have taken every opportunity to press claims for property to take advantage of these. This is the first year during which it has not been possible to report the completion of at least one Council house, but it is a fact that a number of small sites in various villages will be developed during the coming year, detailed plans being prepared by your permanent architect at the present time. It is at least pleasant to know that we have made a start in getting our own house in order by the preparation of schemes to subdivide all the pre-war Council houses and that work has been completed on a small number of these.

As long ago the scheme for providing houses in the village of Cheltenham has been prepared in some detail and the new village the abolition of the pan-closets situated immediately outside the back doors of the Council houses in this village. The only other "built up" area in the District with plots immediately at the rear of the property - Arbury - will now be free of these, squares having been laid, the property cleared and only the delivery of the plots is now wanted.

NATIONAL ASSISTANCE ACTS, 1945 and 1951

No formal action was necessary after these Acts, but some enquiry into and supervision of border-line cases was necessary.

ANNUAL REPORT  
OF THE  
SURVEYOR AND PUBLIC HEALTH INSPECTOR.

To the Chairman and Members of  
the Rural District Council of  
Ashby-de-la-Zouch.

Mr. Chairman, Ladies and Gentlemen,

I have pleasure in again presenting my Annual Report for your consideration. The year has been one of steady progress; there have been the usual problems due to mining subsidence, although not quite to the extent of previous years. We have endeavoured to speed up house improvement, particularly with the aid of standard and improvement grants, and we have taken every opportunity to press owners of property to take advantage of these. This is the first year during which it has not been possible to report the completion of at least some Council houses, but it is a fact that a number of small sites in various villages will be developed during the coming year, detailed plans being prepared by your consultant architects at the present time. It is at least pleasant to know that we have made a start on putting our own house in order by the preparation of schemes to modernise all the pre-war Council houses and that work has been completed on a small number of these.

At long last the scheme for providing sewers in the village of Coleorton has been prepared in some detail and one can envisage the abolition of the pan closets situated immediately outside the back doors of 44 Council houses in this village. The only other "built up" area in the district with pails immediately at the rear of the property - Acresford - will soon be free of these, sewers having been laid, the pumping station erected and only the delivery of the pumps is now awaited.

ANNUAL REPORT  
OF THE  
COMMISSIONER AND PUBLIC HEALTH DEPARTMENT

To the Chairman and Members of  
the Rural District Council of  
Abingdon-on-Thames.

Mr. Chairman, Ladies and Gentlemen,

I have pleasure in again presenting my Annual Report for your consideration. The year has been one of steady progress; there have been the usual problems due to existing conditions, although not quite to the extent of previous years. We have endeavored to speed up house improvements, particularly with the aid of financial and technical assistance, and we have taken every opportunity to make use of property to our advantage. Of course, this is the first year during which it has not been possible to report the completion of at least some Council houses, but it is a fact that a number of small sites in various villages will be developed during the coming year, detailed plans being prepared by your consultant architect at the present time. It is not least pleasant to know that we have made a start in putting our own house in order by the preparation of schemes to modernize all the pre-war Council houses and that work has been completed on a small number of these.

As I have said the scheme for providing houses in the village of Colchester has been prepared in some detail and we can envisage the abolition of the gas works situated immediately outside the main house at St. Andrew's house in this village. The only other "built up" area in the district with gas immediately at the rear of the property - Anston - will soon be free of these works, having been built, the pumping station situated just off the delivery of the pump is now finished.

Routine inspection has continued of food shops of all descriptions, the premises being generally of a good standard although we are having some difficulties with one cafe. A pamphlet was distributed to all occupiers of food premises - "Thought for Food". This was produced as a guide to all persons concerned with food premises and food handling, and set out briefly the rules which must be kept in mind to ensure that food is stored, prepared and offered for sale under satisfactory conditions.

Private house construction, for some reason, never appears to have been carried on to the extent which one would wish; the number of houses completed during a year varying from 21 in 1955 to a high point of 123 in 1966. The numbers completed each year over this period of 16 years being respectively :

1955 - 21., 1956 - 43., 1957 - 23., 1958 - 30., 1959 - 38.,  
 1960 - 26., 1961 - 29., 1962 - 64., 1963 - 68., 1964 - 83.,  
 1965 - 44., 1966 - 123., 1967 - 107., 1968 - 93., 1969 - 84.,  
 1970 - 83.

Unfortunately there is little hope of any great improvement in these figures because of the planning policy with regard to the development of the villages in the Rural District.

Routine inspection has continued at food shops of all descriptions, the process being generally of a good standard although we are having some difficulties with the sale of "Thought for Food". This was produced as a guide to all persons concerned with food production and food handling, and not out of the blue which must be kept in mind to ensure that food is stored, prepared and offered for sale under satisfactory conditions.

Private house construction, for some reason, never appears to have been carried on to the extent which one would wish; the number of houses completed during a year varying from 21 in 1955 to a high point of 127 in 1966. The numbers completed each year over this period of 12 years being respectively:

1955 - 21	1956 - 43	1957 - 23	1958 - 30	1959 - 30
1960 - 26	1961 - 29	1962 - 64	1963 - 68	1964 - 87
1965 - 44	1966 - 123	1967 - 107	1968 - 93	1969 - 84
1970 - 83				

Unfortunately there is little hope of any great improvement in these figures because of the planning policy with regard to the development of the villages in the Rural District.

## Extensions of public water supplies :

1. 593 yards of 12" and 1,270 yards of 8" trunk main between Willesley and Measham required as part of the improvements to the Measham, Appleby and Twycross areas.
2. Housing development :
  - (a) 1,090 yards of 4" main - Atherstone Road, Measham, for Messrs. Pat Pateman & Son Ltd.
  - (b) 200 yards of 4" main - Industrial Estate, Measham by R. Emery Ltd.
  - (c) 135 yards of 4" main - off Newton Road, Heather for Messrs. A.H. Wilson & Son (Contractors) Ltd.
3. The new reservoir at Willesley was brought into service.

Extension of public water supply :

1. 200 yards of 12" and 1,270 yards of 8" main between  
Willesley and Messian required as part of the improvement  
to the Messian, Appleby and Tynemouth areas.

2. Housing development :

(a) 1,000 yards of 4" main - Ashurst Road, Messian, for  
Messian. For Messian & Son Ltd.

(b) 200 yards of 4" main - Industrial Estate, Messian by N.  
Messian Ltd.

(c) 115 yards of 4" main - off Newton Road, Messian for Messian.  
A.H. Wilson & Son (Contractors) Ltd.

3. The new reservoir at Willesley was brought into service.

## SEWAGE DISPOSAL.

The position at the year end was as follows :

### Appleby Magna.

Sewer extensions in progress in the Appleby Parva and Bowley's Lane areas to complete the sewerage of the whole village.

### Acresford.

Sewers and pumping main laid; pumping station erected - pumping equipment awaited.

### Bardon.

Scattered area - impossible to sewer.

### Chilcote.

No progress was made during the year despite considerable effort to secure voluntary removal of farm effluent from existing old sewer. Until the farm drainage systems can be altered so that farm effluent itself is dealt with on the individual farms no progress can be made with a scheme for dealing with effluent from dwelling houses by means of a biological treatment plant, because of the disastrous effect farm effluent would have on the standard of effluent from this plant.

### Coleorton.

A scheme has been prepared in some detail for the sewerage of the whole village and this has been considered and approved by the Council.

### Donisthorpe.

The works have now been completely reconstructed, and deal with effluent from part of Ashby Woulds Urban District Council in addition to the village of Donisthorpe. These works are producing a very good effluent.

REMARKS

The position at the year end was as follows:

Applying Water.

Good extension in progress in the  
Applying Water and Sewage's line areas  
to complete the covering of the whole  
village.

Applying Sewage.

Good extension in progress in the  
Applying Sewage's line areas  
to complete the covering of the whole  
village.

Applying Gas.

Good extension in progress in the  
Applying Gas's line areas  
to complete the covering of the whole  
village.

Applying Electricity.

No progress was made during the year  
despite considerable effort to secure  
voluntary removal of their effluent from  
existing old sewer. Until the late  
autumn, progress can be made so that  
their effluent itself is dealt with on  
the individual farms no progress can be  
made with a scheme for dealing with  
effluent from dwelling houses by means  
of a biological treatment plant, because  
of the alternative effort farm effluent  
would have on the standard of effluent  
from this plant.

Collection.

A scheme has been prepared in some detail  
for the collection of the whole village and  
this has been considered and approved by  
the Council.

Sanitation.

The works have now been completely  
reconstructed, and deal with effluent  
from part of Ashby Water Urban District  
Council in addition to the village of  
Donisthorpe. These works are producing  
a very good effluent.

Heather.

These works are overloaded. The Council considered a scheme for the enlargement of the works and an alternative scheme for pumping sewage to the Ibstock works in Market Bosworth Rural District. The pumping scheme has been agreed in principle and the existing works at Heather will be abandoned once the new scheme has been brought into operation.

Measham and Oakthorpe.

The preparation of a scheme for the enlargement of the Measham works has been held up because of the delay in the preparation of a village plan. The works are overloaded.

Normanton-le-Heath.

New sewers have been laid in this village, the pumping main laid to Ravenstone works; the pumping station completed - (pumping equipment is awaited).

Osgathorpe.

Sewage pumped to Coalville Urban District Council. A small sewer extension has been carried out to serve property in Main Street.

Packington.

The sewage is pumped to Ashby-de-la-Zouch Urban District Council.

Ravenstone.

The reconstruction and enlargement of the sewage works has been almost completed - these works have been designed so that the contents of pail closets can be dealt with at these works instead of being deposited in dumps in various parts of the Rural district.

Snarestone.

These works deal with the effluent from Appleby Magna, Snarestone, Newton Burgoland and Swebstone and are, at the present time, being enlarged.

Swannington.

The sewage is pumped to Coalville Urban District Council.

Worthington.

Works overloaded. An outline scheme for the enlargement of these works has been prepared. The works will deal with the effluent from the Coleorton scheme when this has been carried out.

Inspection of sewers and ditches and work in hand.	207
Blocked sewers cleaned.	19
Inspection of sewage works and pumping stations.	244
Ditches cleaned out.	2
Number of septic tanks constructed during the year.	21
Number of septic tanks abolished during the year.	-
Number of septic tanks/cesspools at 31st December, 1970.	501
Sewers laid or repaired.	2

### NEW DRAINAGE AND CLOSET CONVERSIONS.

(other than work connected with Improvement Grants/  
Standard Grants).

New drainage systems laid to sewer.	2
New water closets constructed to replace pan closets.	3
Pail closets abolished.	3
Septic tanks provided.	1
Visits of inspection.	21

A grant of £30. 0. 0d., or half the cost, whichever is the lower, is given towards closet conversion.

### Closet Accommodation.

Total number in district at 31st December, 1970 :

Privies : Nil.      Pail Closets : 295      Water Closets : 4,885

#### ANIMAL BOARDING ESTABLISHMENT ACT, 1963.

There are five licensed premises in the district. 28 visits of inspection were made.

#### CARAVAN SITES AND MOVEABLE DWELLINGS.

Again there has been little movement of residents to or from this site and the site remains, in all but name, a small housing site.

Towards the end of the year it was found necessary to increase the charges from 5/- per day to 6/- per day for daily tenancies, and from 25/- per week to 30/- per week for weekly tenancies. This is the first increase since the site was constructed.

Electricity is supplied to each van and is paid for by meter.

Some difficulty was experienced in dealing with persons occupying vans on the verges of one length of road.

A total of 28 visits were made. The total number of licensed sites in the district is 27.

#### PREVENTION OF DAMAGE BY PESTS ACT, 1949.

The early months of this year saw a continuation of the co-ordination of rodent control measures between the Urban and Rural areas, and steps were taken to encourage farmers to carry out rodent control measures on their farms. Measures were also taken to establish permanent baiting sites on Authority's tips or allotments, and to arouse a similar interest in the treatment of fringe properties on the outskirts of villages. These measures have met with some success.

As far as it can be ascertained there has been no indication of Warfarin resistant rats.

## ANIMAL BOARDING ESTABLISHMENT ACT, 1961

That the five licensed premises in the district, 25  
visits of inspection were made.

## CANARY BIRDS AND MOVABLE BUILDINGS

Again there has been little movement of buildings to or  
from this side and no new premises, in all but one, a small  
household site.

Towards the end of the year it was found necessary to  
increase the charges from 2/- per day to 3/- per day for dogs  
transferred, and from 15/- per week to 20/- per week for weekly  
transfers. This is the first increase since the site was  
constructed.

Electricity is supplied to each site and is paid for by  
meter.

Some difficulty was experienced in dealing with persons  
occupying vans on the verges of one length of road.

A total of 25 visits were made. The total number of  
licensed sites in the district is 25.

## REVISION OF LAMPS BY FIRST ACT, 1961

The early months of this year saw a continuation of the  
co-ordination of rodent control measures between the Urban and  
Rural areas, and steps were taken to encourage farmers to carry  
out rodent control measures on their farms. Measures were also  
taken to establish permanent baiting sites on highways, along  
or adjacent, and to provide a similar interest in the treatment  
of large properties on the outskirts of villages. These  
measures have not with some success.

As far as it can be ascertained there has been no  
indication of further resistant rats.

Infestations dealt with : 272  
Inspections by Rodent Operator : 2,067

OFFICES, SHOPS AND RAILWAY PREMISES ACT,  
1963.

The administration of the Act was maintained throughout the year at this Authority and some 142 inspections were made with at least one general inspection to each premise. No accidents were notified as is required by Section 48 of the Act, but steps were taken to bring this requirement to the notice of the occupiers whenever a visit was made to their premises. Since the offices and shops in this area are small in size, as a general rule, and have few employees, it is quite possible that no accidents have occurred which should be reported to the Local Authority.

The enforcement of the Offices, Shops and Railway Premises (Hoists and Lifts) Regulations, 1969, has posed no problems since there are only two lifts within the meaning of the Regulation in the District. One of these is an electrically operated lift in a food premise, whilst the other is at the offices of the National Coal Board which they do not require and which they have deliberately made inoperable.

Information daily with :  
Inspection by Robert Operator : 5,001

CHIEF, SHORT AND RAILWAY PHILADELPHIA  
1901

The establishment of the Act was maintained throughout the year at this Authority and some 115 inspections were made with at least one general inspection to each division. In accidents were notified as is required by Section 45 of the Act, but steps were taken to bring this requirement to the notice of the companies whenever a visit was made to their premises. Since the office had made in this year one small in fact, as a general rule, and have for engineers, it is quite possible that no accidents have occurred which should be reported to the local Authority.

The enforcement of the Rules, Short and Railway Prudential (Hobbs and Lister) Regulations, 1901, has been as perfect since there are only two little within the meaning of the regulations in the District. One of these is an electrically operated lift in a local house, which the other is at the office of the National Road Board which has no regulations and which they have deliberately made inspection.

Wisham.	Wisham Lane.	4 - two-bedroom flats.
Wisham.	Wisham Street.	4 - one-bedroom flats.

The Council resolved to carry out modernisation of all pre-war Council houses and the houses in Leicester Road, Measham, were modernised as a pilot scheme. The old bathrooms, entered directly from the kitchen, were abolished, the kitchen enlarged, plastered and provided with modern fitments, a bathroom was provided upstairs together with an internal water closet.

At the year end the Council had considered schemes for the whole of the remaining pre-war houses and instructed the Council's architects to proceed with the preparation of detailed plans, specifications, etc.

#### BUILDING REGULATIONS

During the year 194 applications were submitted for consideration under the Building Regulations.

#### TOWN AND COUNTRY PLANNING ACT, 1947

Applications for planning permission have again risen than the previous year - 267 applications being dealt with.

#### LOANS FOR HOUSE PURCHASE

35 properties were inspected during the year as a result of requests for loans and in the majority of cases loans were approved. 47 visits of inspection were made.

### IMPROVEMENT GRANTS.

These grants are discretionary, Councils themselves being able to decide, as a matter of policy, whether to make grants or not, but, if they refuse a grant application or give less than 50% of the amount eligible, they must give reasons in writing to the applicant.

It has been the Council's policy to give 50% towards the cost of work eligible for grant. Almost all of the applications are from owner/occupiers.

## General.

A total of 302 Improvement Grants and 457 Standard Grants have now been approved to the owners of properties in the Rural district, and detailed discussions held with many owners who have been informed that grants will be recommended to the Council. We have now had a full year's experience of the working of the Housing Act, 1969, which, amongst other things, increases the amount payable by way of Improvement Grant from £400 to £1,000, and which allows substantial items of repair to rank for grant. In actual fact, grants made by the Council during the year have fallen between these two figures.

A Local Authority may now give Improvement Grant where two houses are converted into one, provided that they are satisfied that neither house is, by itself, capable of improvement, or that the conversion of two into one would make a real contribution to the particular needs of the district by providing larger houses. Each case must be considered on its merits. In the past Standard Grants could only be given where the house would be provided with a bath in a bathroom, but, if it is not reasonably practicable to do this, grant can now be given where the bath is provided in some other part of the dwelling, provided that this is not a bedroom.

The greatest difficulty has arisen not, as was expected, in trying to decide which items should count as repairs eligible for grant, but, rather, whether or not the cost of total repair, modernising, extension and improvement approaches the cost of a new dwelling offering comparable accommodation. Grant applications now seem to refer to dwellings where much more extensive works are being carried out than formerly.

A total of 905 Improvement Grants and 171 Standard Grants have now been approved to the owners of properties in the Rural District, and detailed discussions held with many owners who have been informed that Grants will be recommended to the Council. We have now had a full year's experience of the working of the Housing Act, 1936, which, amongst other things, introduced the amount payable by way of Improvement Grant from £40 to £1,000, and which allows substantial items of repairs to rank for Grants. In actual fact, Grants made by the Council during the year have fallen between these two figures.

A Local Authority may now give Improvement Grants where two houses are converted into one, provided that they are satisfied that neither house is, by itself, capable of improvement, or that the conversion of the two into one would make a more convenient and economical use of the district by providing larger houses. Such cases must be considered on their merits. In the past Standard Grants could only be given where the house would be provided with a bath in a bathroom, but it is not necessarily impracticable to do this, Grant can now be given where the bath is provided in some other part of the dwelling, provided that this is not a bedroom.

The greatest difficulty has arisen not, as was expected, in trying to decide which items should count as repairs eligible for Grant, but, rather, whether or not the cost of such repairs, modernising, extension and improvement constitutes the cost of a new dwelling offering comparable accommodation. Grant applications now seem to refer to dwellings where such more extensive works are being carried out than formerly.

Food Hygiene (Markets, Stalls and Delivery Vehicles) Regulations,  
1966.

---

Stallholders complying with Regulations	:	11
Stallholders exempted from Regulations	:	Nil
Delivery vehicles complying with Regulations	:	8
Delivery vehicles exempted from Regulations	:	Nil

Visits were made to all the food premises in the district throughout the year in an effort to raise the standard of food hygiene practice. Progress in this field is slow since it is often the case that people obtain situations in the food trade or take over a food business without any previous training and do not always realise the possibilities of contamination of food. When contamination of food by organisms which may contain disease can only be seen under a microscope it is difficult to impress upon the persons concerned the real source of the danger, and the need for subsequent scrupulous cleanliness in the handling and preparation of food in all circumstances.

The Meat (Sterilisation) Regulations, 1969.

Visits have been made throughout the year to the Knacker's yard in this district in connection with the above Regulations concerning unsound meat for the consumption by animals.

MEAT INSPECTION - CARCASSES INSPECTED  
AND CONDEMNED.

100% meat inspection is carried out at both of the slaughterhouses in the district and the number of animals slaughtered has remained approximately the same as last year.

The periodical visits made by the Veterinary Surgeon of the Ministry of Agriculture, Fisheries and Food have been increased to quarterly instead of half yearly. The purpose of the visits is to inspect the standard of hygiene at the actual slaughterhouse. The responsibility for this rests with the Local Authority and in my opinion the visits are a complete waste of time and money.

# Food Hygiene (Meat, Dairies and Delivery Vehicles) Regulations, 1939.

11	Establishments complying with Regulations
517	Establishments exempted from Regulations
5	Delivery vehicles complying with Regulations
511	Delivery vehicles exempted from Regulations

Visits were made to all the food premises in the district throughout the year in an effort to raise the standard of food hygiene practice. Progress in this field is slow since it is often the case that people obtain attention in the food trade by taking over a food business without any previous training and do not always realize the possibilities of contamination of food. When contamination of food by organisms which may contain disease can only be seen under a microscope it is difficult to impress upon the person concerned the real source of the danger, and the need for subsequent rigorous cleanliness in the handling and preparation of food in all circumstances.

## The Meat (Inspection) Regulations, 1939.

Visits have been made throughout the year to the butcher's yard in this district in connection with the above Regulations concerning measures for the prevention of infection.

## MEAT INSPECTION - CARCASS INSPECTION AND COUNTERS

100% meat inspection is carried out at both of the slaughterhouses in the district and the number of animals slaughtered has remained approximately the same as last year. The portico visit made by the Veterinary Surgeon of the Ministry of Agriculture, Fisheries and Food have been increased to quarterly instead of half yearly. The purpose of the visit is to suggest the standard of hygiene at the actual slaughterhouse. The responsibility for this rests with the local Authority and in my opinion the visits are a complete waste of time and money.

## REFUSE COLLECTION AND DISPOSAL.

The refuse tips in the villages of Colcorton and Measham continued to be used throughout the year. No tipping of household refuse was carried out at the tip at Donisthorpe.

During demonstrations of mechanical equipment at the proposed Lount tip it was found that coal outcrops at, or near, the surface and that one seam is exposed where surface workings have been carried out in the past. This gave rise to considerable concern because of fire danger, and, following discussion with representatives of the Opencast Coal Executive, it was agreed by a sub-committee of the Public Health Committee set up to deal with all matters relating to this tip that an application be made for planning permission to work three seams and extract about 25,000 tons of coal from the site. It was also agreed that a nominated contractor apply for a license to extract the coal. At the year end it was not clear whether or not a license would be granted because of the fear of the National Coal Board Deep Mine organisation that water from this site might gain access to deep mine workings.

The County Council work study team submitted a scheme for consideration by this Council with a view to improving, and possibly making cheaper, the refuse collection service. This, however, has not, as yet, been considered by the sub-committee set up to deal with this matter.

When the work of reconstructing the sewage works at Ravenstone has been completed all night soil will be disposed of at these works, and we should be able to discontinue the present practice of dumping night soil on the lagoons constructed at one refuse tip and at the Swannington old sewage works site.

Visits of inspection : 366

## REPORT COLLECTION AND DISCUSSION

The return type in the village of Golestan and Hoshan continued to be used throughout the year. The signing of house-  
hold returns was carried out at the city of Golestan.

During the investigation of mechanical equipment at the proposed house tip it was found that coal outcrop at, or near, the surface and that each is exposed where surface workings have been carried out in the past. This gives rise to considerable amounts of loose material, and, following discussion with representatives of the Golestan Coal District it was agreed by a sub-committee of the Public Health Committee and up to deal with all matters relating to this tip that an application be made for planning permission to work these areas and extend about 25,000 tons of coal from the site. It was also agreed that a restricted contractor apply for a license to extract the coal. At the year end it was not clear whether or not a license would be granted because of the fact of the National Coal Board being the owner. It was then agreed from this date that the matter be kept under review.

The Golestan Council were asked to consider a scheme for construction by this Council with a view to removing, and possibly selling, the refuse collected from the tip. This, however, has not as yet been considered by the sub-committee and up to deal with this matter.

When the work of removing the refuse from the tip has been completed all night work will be stopped at those works, and as should be able to eliminate the present practice of working night shift on the tip. The committee at one return tip and at the Golestan tip and the Golestan tip.

Visits of inspection : 1966

### STREET LIGHTING.

The Council have given instructions for estimates to be prepared of the cost of improving the existing footway lighting to County Council standards with a view to all lighting being taken over by the County Council. This is obviously going to be expensive - the work will have to be paid for out of revenue and, without doubt, the cost have to be spread over a number of years. Plans showing the existing lighting systems in three villages have been sent to the County Council in order to obtain that Authority's views on the amount of additional work they would require carrying out before they would adopt the lighting system in those villages.

The fact that there are two different lighting authorities in the majority of our villages has continued to lead to some confusion in connection with maintenance and responsibility.

I wish to repeat my thanks to you, Mr. Chairman and other members of the Council, for the help you have given and the consideration shown to myself and my staff during the year under review; and to thank the Clerk of the Council and other officers for their help and advice during the year.

I am, Mr. Chairman, Ladies and Gentlemen,

Your obedient servant,

C.S. CURTIS.

SPRINT LIGHTING.

The Council have given instructions for estimates to be prepared of the cost of replacing the existing lighting system to County Council standards with a view to all lighting being taken over by the County Council. This is obviously going to be expensive - the work will have to be paid for out of revenue and, without doubt, the cost will have to be spread over a number of years. Plans showing the existing lighting system in three villages have been sent to the County Council in order to obtain their authority's view on the amount of additional work they would require carrying out before they would adopt the lighting system in those villages.

The fact that there are two different lighting authorities in the majority of our villages has continued to lead to some confusion in connection with maintenance and responsibility.

I wish to request my thanks to you, Mr. Chairman and other members of the Council, for the help you have given and the consideration shown in regard to my report during the year under review, and to thank the Clerk of the Council and other officers for their help and advice during the year.

I am, Mr. Chairman, ladies and gentlemen,

Yours obedient servant,

W. J. B. B. B.
