Rural District Council Offices,
South Street,
Ashby-de-la-Zouch,
Leicester,
LE6 5BU.

September, 1972.

To the Chairman and Members of
the Rural District Council of
Ashby-de-la-Zouch.

Mr. Chairman, Ladies and Gentlemen,

I beg to present the Report of the Medical Officer of Health concerning the sanitary circumstances, sanitary administration and vital statistics of the district for the year 1971. This has been prepared, so far as possible, according to the lines indicated in Circular 1/72, dated 3rd January, 1972 from the Department of Health and Social Security.

It is a pleasure to acknowledge the help received from the members of the staff of the Public Health Department, and to record my appreciation of the courtesy and consideration shown to me by all the members of your staff with whom I have had contact and, not least, by all the members of the Council.

I have the honour to remain,

Your obedient servant,

ANDREW HAMILTON

Medical Officer of Health.

Private Residence:

Telephone No:

"Barony",
15, Neville Drive,
Coalville,
Leicester. LE6 3DX.

September 1972

To the Chairman and Members of
the United States Council of
Oceanography

Mr. Chairman, Ladies and Gentlemen:

I have the honor to acknowledge the receipt of the letter of the
United States Council of Oceanography dated 19 July 1972, regarding
the report of the British Institute of Oceanography dated 19 July 1972,
concerning the results of the survey of the ocean floor in the
Atlantic Ocean off the coast of the United States.

It is a pleasure to acknowledge the help received from
the members of the staff of the British Institute of Oceanography, and to
express my appreciation of the accuracy and completeness of the
report. I am sure that the results of your study will be of great
value to the United States Council of Oceanography.

I have the honor to remain,

Very respectfully,

ANTHONY R. B. B. B.

Member, United States Council of Oceanography

Births.

Only 28 of the 244 births registered occurred at home. The birth rate at 17.1 compares with that for England and Wales at 16, and with last year's rate for the district at 16.9.

The illegitimate live births per cent of total births was 4, that for the country as a whole was 8 and for the district last year 6.

Deaths.

168 deaths of people resident in the area took place, 72 of them in other districts and most of these in hospital. The death rate at 12.2 is slightly above the national rate.

10.5	11.4	10.9

Crude death rate per 1,000
 population
 Adjusted death rate per 1,000
 population
 Ratio of local adjusted death rate
 to national rate

Deaths

Only 18 of the 144 deaths registered occurred at home. The
 death rate at 17.1 compares with that for England and Wales at 16,
 and with last year's rate for the district at 16.5.
 The 114 deaths have been put out of total deaths was 4,
 that for the country as a whole was 8 and for the district was 10.

Deaths

105 deaths of people resident in the area took place, 75 of
 whom in other districts and most of these in hospitals. The death
 rate at 12.5 is slightly above the national rate.

Infantile Mortality.

Last year we had a particularly low infantile mortality rate, but this year it is, at 20, just above that for England and Wales, (18).

5 babies died before reaching their first birthday - all of them in hospital and 3 of them actually less than 4 weeks of age.

Population.

The estimated population has increased from 14,120 to 14,680 - a rise of 560.

Social Services.

The Social Services Department of the Leicestershire County Council came into existence on 1st April, 1971. An area office was set up at Park House, 43, London Road, Coalville to serve Coalville Urban District, Ashby-de-la-Zouch Urban District, Ashby Woulds Urban District, Ashby-de-la-Zouch Rural District and part of Market Bosworth Rural District - under the supervision of an Area Director.

This Department has responsibility for all the services previously administered by the Children's Department, together with the welfare services of the Health and Welfare Department, which include the welfare of the mentally ill and the mentally handicapped, the physically handicapped and the elderly, the provision of a Home Help service and the supervision of play-groups and child-minders.

Meals on Wheels.

This service continued satisfactorily, largely due to the work done by the organisers in the way of distribution. Thanks are due to them and to the firm cooking the meals. 23 visits, involving 26 persons, were paid during the year in connection with applications for the service, and most of these were supported, although quite frequently there existed a waiting list. No extension of the present scheme has been made.

Chiropody.

A chiropody service for the aged was instituted at Measham during the year, and efforts were being continued to provide a similar service in Swannington.

Introduction

It is a pleasure to have you here today. The purpose of this meeting is to discuss the progress of the project and to hear your views on the proposed plan. I am sure that your input will be most valuable.

Background

The following information was obtained from the records of the project.

Objectives

The main objective of the project is to develop a comprehensive plan for the future. This will involve a detailed study of the current situation and a consultation with all the relevant parties. The plan should take into account the needs of the community and the resources available.

This document has been prepared for the purpose of providing information to the public. It is not intended to be a final decision. The views expressed here are those of the committee and do not necessarily represent the views of the government.

Conclusions

The committee has concluded that the proposed plan is a reasonable one. It takes into account the needs of the community and the resources available. It is recommended that the plan be approved and implemented.

Appendix

A list of the members of the committee is given in the appendix. The committee was formed in 1990 and has since been working on the project.

National Assistance Acts, 1948 and 1951.

No formal action was found to be necessary under the above Acts, but one particularly difficult case was dealt with informally, the patient most intimately involved agreeing to enter hospital voluntarily. Even then, the problem was not completely solved, but some improvement was certainly effected.

Occasional enquiries have been made in other cases to which our attention has been drawn in a variety of ways.

Coleorton Area Sewerage and Sewage Disposal Scheme.

An enquiry into the above scheme for the village of Coleorton, including parts of the parishes of Swannington, Ravenstone and Worthington, was held on 13th October, 1971.

Your Consulting Engineers outlined the proposed scheme in detail, supported by your Surveyor and Chief Public Health Inspector. The evidence which I would have given would have further supported the case as outlined, stressing the undesirability of the present arrangements - pail closets, cesspools and septic tanks and would have stated that although we have had no evidence that specific diseases had been caused locally by these conditions the whole arrangement was bad and constituted a potential hazard to the public health. The Inspector accepted the proof of evidence submitted by me and did not call on me to give oral evidence.

Food Hygiene.

There is an increasing emphasis on the need for clean food and, on the part of the public, an increasing awareness of the steps which should be taken to ensure that food and drink intended for human consumption should be wholesome and safe.

In spite of this, however, it must be admitted that there is still a good deal of ignorance on the subject, both on the part of the public generally and on the part of the food handlers as well.

To reduce the risks of contamination a high standard of personal hygiene should be practised and to this end Codes of Practice referable to Licensed Premises, Cafes, Canteens, Bakehouses and Restaurant kitchens, Food Shops, Fried Fish Shops and Meat Shops - the whole under the title "Thought for Food" - were compiled by one of your Public Health Officers and were supplied to employers in the trades or activities mentioned for the information of themselves and their employees.

In addition, in collaboration with the other three adjoining Authorities and with the ready support and co-operation of the editor of the local weekly newspaper, the Coalville and Ashby Times published what amounted to a food hygiene supplement, running to several columns, the material being supplied by your Medical Officer of Health and attracting a number of advertisements with a food hygiene bearing.

It is difficult to assess with any degree of accuracy the effect of efforts of this kind but nevertheless it is considered to be well worth while to continue this particular kind of health education.

To reduce the risk of contamination, it is recommended that the following steps be followed: 1. The use of personal protective equipment (PPE) should be mandatory for all personnel involved in the process. 2. The use of dedicated equipment and facilities for the process. 3. The use of dedicated personnel for the process. 4. The use of dedicated storage areas for the process. 5. The use of dedicated disposal methods for the process. 6. The use of dedicated cleaning procedures for the process. 7. The use of dedicated decontamination procedures for the process. 8. The use of dedicated monitoring procedures for the process. 9. The use of dedicated reporting procedures for the process. 10. The use of dedicated communication procedures for the process.

In addition, it is recommended that the following steps be followed: 1. The use of dedicated personnel for the process. 2. The use of dedicated storage areas for the process. 3. The use of dedicated disposal methods for the process. 4. The use of dedicated cleaning procedures for the process. 5. The use of dedicated decontamination procedures for the process. 6. The use of dedicated monitoring procedures for the process. 7. The use of dedicated reporting procedures for the process. 8. The use of dedicated communication procedures for the process. 9. The use of dedicated training procedures for the process. 10. The use of dedicated documentation procedures for the process.

It is difficult to assess the impact of these measures on the overall risk of contamination. However, it is clear that the implementation of these measures is essential for the safe and effective management of the process. The following steps should be followed: 1. The use of dedicated personnel for the process. 2. The use of dedicated storage areas for the process. 3. The use of dedicated disposal methods for the process. 4. The use of dedicated cleaning procedures for the process. 5. The use of dedicated decontamination procedures for the process. 6. The use of dedicated monitoring procedures for the process. 7. The use of dedicated reporting procedures for the process. 8. The use of dedicated communication procedures for the process. 9. The use of dedicated training procedures for the process. 10. The use of dedicated documentation procedures for the process.

Everyone is well aware of the increase in international travel in the way of business and holidays. A certain amount of work has devolved on your Public Health department in following up travellers who have returned to this district from countries in which they might have been in contact with cholera, typhoid fever or smallpox. They are usually kept under observation for a period which would cover the incubation period of the particular disease and are also requested to contact their own doctor without delay if they should feel off colour.

It is worth mentioning that vaccination against smallpox need not now be recommended as a routine procedure in early childhood, but that travellers to and from areas of the world where smallpox is endemic should be protected by recent vaccination.

Twenty is still some of the business in the
in the way of business and industry. I don't know of any
involved in your Public Health Department in following up
who have returned to this district from overseas in which they
might have been in contact with cholera, typhoid fever or malaria.
They are usually kept under observation for a period when they
leave the incubation period of the infectious disease and are also
prevented in contact with the domestic contact delay if they remain
local off color.

It is worth mentioning that vaccination against cholera was
not recommended as a routine procedure in any of the
but that travelers to and from areas of the world where
is endemic should be protected by prompt vaccination.

ANNUAL REPORT
OF THE
SURVEYOR AND CHIEF PUBLIC HEALTH INSPECTOR.

To the Chairman and Members of
the Rural District Council of
Ashby-de-la-Zouch.

Mr. Chairman, Ladies and Gentlemen,

I wish to present for your consideration my Annual Report for the year 1971.

During the year schemes were approved for the laying of sewers in all those parts of the Rural District which lack these facilities at the present time, with the exception of Bardon which is a scattered area with a resident population of less than 60.

The major scheme is, of course, the Coleorton one, in fact this is the most expensive scheme the Council have at any time carried out; but when completed will mean, to all intents and purposes, the elimination of pail closets.

The modernised works at Ravenstone and Donisthorpe are now giving effluent results well below River Board standard.

Mining subsidence gave some cause for concern and it was necessary to lay relief sewers following subsidence damage in Main Street, Swannington and Bosworth Road, Measham.

A reasonably high standard of hygiene has been obtained in the various food shops but it was unfortunately necessary to take legal proceedings in respect of one cafe where persuasion failed to secure satisfactory results.

ANNUAL REPORT

OF THE

SURVEYOR AND CHIEF ENGINEER

OF THE CHAIRMAN AND MEMBERS OF
THE RAILROAD COMMISSION
OF THE STATE OF NEW YORK

Mr. Chairman, Members and Gentlemen,

I wish to present for your consideration my annual report for
the year 1911.

During the year various bills were introduced for the purpose of
in all those parts of the State which have been
at the present time with the exception of those which are a
area with a resident population of less than 50.

The major portion of the work of the Commission has been
this is the most extensive work the Commission has at the present
out; but when completed will result in a complete and
elimination of all obstacles.

The modernized work at the Commission and the State has been
giving efficient results with the New York State.

During the year various bills have been introduced for the purpose
necessity to the State Commission for the purpose of this
Street, Transportation and Revenue Bill, 1911.

A reasonably high standard of efficiency has been achieved in the
various lines of work but it was unfortunately necessary to take legal
proceedings in respect of one of the bills introduced, and in some
satisfactory results.

Particulars of water supplies to dwelling houses :

Internal Mains Water Supply		Mains water from External standpipes		Well water supply	
No. of dwelling houses	Population	No. of dwelling houses	Population	No. of dwelling houses	Population

Extension of public water supplies :

1. Improvements to distribution supplies Measham to Appleby Magna,
7 yards 4" pipe and 1,749 yards 8" pipe.

2. Housing development :

Atherstone Road, Measham (for Messrs. Pat Pateman & Son),
290 yards 4" pipe.

Homecroft Drive, Packington (for Messrs. A.H. Wilson,
(Contractors) Ltd.), 55 yards 3" pipe.

Extension of public water supply :

1. Improvements to distribution system to supply water
to yards 4" pipe and 1.75 yard 8" pipe.

2. Sewing development :

1. Extension Road, Houston (for sewer, 2nd Street to 3rd),
1.75 yard 4" pipe.

2. Extension Road, Houston (for sewer, 4th Street to
5th Street), 1.75 yard 4" pipe.

SEWAGE DISPOSAL.

The position at the year end was as follows :

Appleby Magna.

Sewer extensions at Appleby Parva and Bowley's Lane completed.

Acresford.

Sewerage scheme completed - effluent pumped to Donisthorpe.

Bardon.

Scattered area - impossible to sewer.

Chilcote.

Scheme agreed by Council, details in course of preparation.

Coleorton.

Scheme agreed by Ministry and tender documents, etc. being prepared.

Donisthorpe.

The works deal with effluent from part of Ashby Woulds Urban District Council in addition to the village of Donisthorpe. The works are producing a very good effluent.

Heather.

These works are overloaded. Scheme agreed for abandonment of works, sewage to be pumped to Ibstock works, (Market Bosworth Rural District Council).

Measham and Oakthorpe.

Works overloaded. Scheme in course of preparation for enlargement of works to deal with a population of 5,000.

Normanton-le-Heath.

Sewerage scheme completed - sewage pumped to Ravenstone.

INDEX

The position at the time was as follows:

ANIMAL BOARDING ESTABLISHMENT ACT, 1963.

There are 5 licensed premises and 22 inspections have been carried out.

Premises were found to be generally satisfactory and minor matters requiring attention were put right on request.

CARAVAN SITES AND MOVEABLE DWELLINGS.

A number of complaints were received in respect of itinerants who parked on verges of roads and were a nuisance to residents. It is very difficult to know how to deal with these people. The police were as helpful as possible by moving the itinerants on, but this only causes them to be a nuisance elsewhere. Resentment is caused not because they simply camp on the verges but because of the unsightliness of the materials they collect and the rubbish and filth they leave behind for someone else to clean up.

The caravan site at Appleby Magna continued to be fully occupied and we had to turn away a number of applicants.

Charges remain at 30p for daily tenancies and £1.50p for weekly tenancies. Electricity is paid for by meter.

A total of 27 visits were made. The total number of licensed sites in the district is 27.

PREVENTION OF DAMAGE BY PESTS ACT, 1949.

The co-ordination of rodent control measures between Urban and Rural districts were continued throughout the year as part of a County wide scheme. Special emphasis was made through the National Farmers' Union and by letter from this Authority regarding the form of control that should be carried out by farmers in their buildings and fields. Arrangements were also made to step up the treatment of lay-byes throughout the Rural District.

The Council's rodent operator has been fully engaged during the year and different types of poisons have been used when it was thought necessary to maintain efficient measures of rodent extermination.

THE PROBLEM OF THE FUTURE OF THE BRITISH EMPIRE

There are two main questions which arise in connection with the future of the British Empire. The first is the question of the future of the British Empire as a whole, and the second is the question of the future of the British Empire in the various parts of the world.

The first question is the question of the future of the British Empire as a whole. This question arises because the British Empire is the largest empire in the world, and it is the only empire which has remained intact since the beginning of the nineteenth century.

THE PROBLEM OF THE FUTURE OF THE BRITISH EMPIRE

The second question is the question of the future of the British Empire in the various parts of the world. This question arises because the British Empire is the largest empire in the world, and it is the only empire which has remained intact since the beginning of the nineteenth century. The second question is the question of the future of the British Empire in the various parts of the world. This question arises because the British Empire is the largest empire in the world, and it is the only empire which has remained intact since the beginning of the nineteenth century.

The second question is the question of the future of the British Empire in the various parts of the world. This question arises because the British Empire is the largest empire in the world, and it is the only empire which has remained intact since the beginning of the nineteenth century.

The second question is the question of the future of the British Empire in the various parts of the world. This question arises because the British Empire is the largest empire in the world, and it is the only empire which has remained intact since the beginning of the nineteenth century.

The second question is the question of the future of the British Empire in the various parts of the world. This question arises because the British Empire is the largest empire in the world, and it is the only empire which has remained intact since the beginning of the nineteenth century.

THE PROBLEM OF THE FUTURE OF THE BRITISH EMPIRE

The second question is the question of the future of the British Empire in the various parts of the world. This question arises because the British Empire is the largest empire in the world, and it is the only empire which has remained intact since the beginning of the nineteenth century. The second question is the question of the future of the British Empire in the various parts of the world. This question arises because the British Empire is the largest empire in the world, and it is the only empire which has remained intact since the beginning of the nineteenth century.

The second question is the question of the future of the British Empire in the various parts of the world. The second question is the question of the future of the British Empire in the various parts of the world. This question arises because the British Empire is the largest empire in the world, and it is the only empire which has remained intact since the beginning of the nineteenth century.

Number of infestations dealt with : 254
Number of inspections by rodent
operator : 1,751

OFFICES, SHOPS AND RAILWAY PREMISES ACT,
1963.

Routine inspections were carried out to all premises registered under the Act within this Authority and the number of visits were 173.

Two accidents were reported during the year, one occurring in a warehouse and one during the delivery of stationery at an office. Enquiries were made into the causes of both accidents and it was found that no contravention of the Act had occurred, and the causes were due mainly to unfortunate circumstances in each case. Advice was given in an endeavour to prevent a re-occurrence of such an event.

A leaflet - "Safe use of food slicing machines" - appears to have been well received and such information helps to give the right kind of approach to the need for guards and proper training in the use of these machines. There was some mild opposition to the installation of guards during the early days of the Act, but all the persons using this type of machine now accept them as a matter of course. This may be due to the fact that all new machines are fitted with guards and that the information given helped to point out the dangers of using these machines without the necessary guards.

The mechanical handling of goods in this district is carried out mainly in two warehouses where they use fork lift trucks and conveyor belts. The machines are adequately guarded and information has been given in the care required when using these machines.

Number of interrogations daily 100
Number of interrogations by subject
Specialist 100

WYCHES, LINTS AND MILLER, 1941

Business interrogations were carried out in all positions
of the station. The fact which this illustrates and the nature of
the work was 100.

The interrogations were reported during the night and morning
in a notebook and during the delivery of the report at 10
o'clock. The interrogations were made into the form of both morning
and afternoon reports. It was found that no comparison of the two was
made. The business was made only to determine the circumstances in each
case. After was given in an interview to present a comparison
of such an event.

A further - "This was an old style interrogation" - subjects
as have been well treated and who have been helped to give the
right kind of answers to the most difficult and proper questions
in the use of these methods. There was also some attention to
the treatment of guards during the early days of the war. It
was the purpose being to give a more complete and complete view of
the situation. This was to make the fact that all the information
was given with regard to the situation. The information given helped to
the history of many these methods which the business was.

The method of handling of guards in this district is similar
to that in the business which was the fact that the
method was. The method was also made and information
has been given in the early treatment of these methods.

Total number of occupied council houses in the district.	...	1302
Total number of occupied houses in the district.	...	5264

Tenders were accepted for the erection of dwellings and flats and at the year end work had started at Dyson's Close, Measham (28 dwellings), and Narrow Lane, Donisthorpe (32 dwellings). In addition preparations had been made for a start at Main Street, Normanton-le-Heath, (8 dwellings). The remaining part of the contract, the Jenny's Lane, Ravenstone site (4 dwellings), and Main Street, Sweptstone (4 dwellings), to be started in 1972, as were 8 dwellings at Appleby Magna.

Council houses which became vacant, (52), were not re-let as it was felt that as many empty houses as possible should be available for temporary re-housing of tenants during modernisation of the pre-war houses.

Prices were obtained for the modernisation of 281 pre-war council houses with a view to a start on the work in the Spring of 1972. The contract calls for the whole of the work to be completed in a period of a little over a year.

1955	...	Total number of post-war houses registered by local authority.
1957	...	Total number of post-war houses completed by private enterprise.
1958	...	Total number of dwellings for council houses at end of year.

BUILDING REGULATIONS.

During the year 310 applications were submitted for consideration under the Building Regulations.

TOWN AND COUNTRY PLANNING ACT, 1947.

Applications for planning permission were again higher than the previous year - 283 applications being dealt with.

LOANS FOR HOUSE PURCHASE.

56 properties were inspected during the year as a result of requests for loans and in the majority of cases loans were approved. 66 visits of inspection were made.

THE BUILDING ACT, 1934

The Building Act, 1934, is a consolidation of the Building Acts, 1925 and 1929, and is intended to provide a comprehensive code of law for the regulation of building operations in England and Wales. The Act is divided into three main parts: Part I, which deals with the general principles of building regulation; Part II, which deals with the specific requirements for building operations; and Part III, which deals with the enforcement of the Act. The Act is intended to be a permanent code of law, and is not subject to amendment by Parliament.

THE BUILDING ACT, 1934

Enacted the year 1934, the Building Act, 1934, is a consolidation of the Building Acts, 1925 and 1929, and is intended to provide a comprehensive code of law for the regulation of building operations in England and Wales.

TOWN AND COUNTRY PLANNING ACT, 1932

Enacted the year 1932, the Town and Country Planning Act, 1932, is a consolidation of the Town and Country Planning Acts, 1925 and 1929, and is intended to provide a comprehensive code of law for the regulation of town and country planning in England and Wales.

THE BUILDING ACT, 1934

The Building Act, 1934, is a consolidation of the Building Acts, 1925 and 1929, and is intended to provide a comprehensive code of law for the regulation of building operations in England and Wales. The Act is divided into three main parts: Part I, which deals with the general principles of building regulation; Part II, which deals with the specific requirements for building operations; and Part III, which deals with the enforcement of the Act.

IMPROVEMENT GRANTS.

These grants are discretionary, councils themselves being able to decide, as a matter of policy, whether to make grants or not, but, if they refuse a grant application or give less than 50% of the amount eligible, they must give reasons in writing to the applicant.

It has been the council's policy to give 50% towards the cost of work eligible for grant. Almost all of the applications are from owner/occupiers.

RECOMMENDATIONS

These findings are summarized, in brief, as follows: (1) The existing conditions are such that the proposed project is necessary and feasible. (2) The proposed project will result in the improvement of the existing conditions. (3) The proposed project will result in the improvement of the existing conditions.

It has been the purpose of this report to present the findings of the study and to recommend the proposed project. The results of the study are as follows:

1. The proposed project is necessary and feasible.	2. The proposed project will result in the improvement of the existing conditions.
3. The proposed project will result in the improvement of the existing conditions.	4. The proposed project will result in the improvement of the existing conditions.

General.

A total of 330 Improvement Grants and 490 Standard Grants have now been approved to the owners of properties in the Rural District, and detailed discussions held with many owners who have been informed that grants will be recommended to the Council.

There is no doubt that costs have risen sharply during the past year and actual amounts paid by way of Improvement Grants are now invariably in the region of the maximum allowable - £1,000. It is, of course, a fact that it becomes increasingly more difficult to find cottages to renovate and where these are found greater expenditure is required to modernise them, in addition to which the standards which owner/occupiers aspire to are much higher than previously and it is found that the majority now include central heating as a "must".

Regular routine inspections have been made to the premises in which food is prepared, stored and sold, to ensure compliance with the above Regulations. The number of inspections were 308.

Minor items are dealt with at the time of the visit but, where a contravention of the Regulations takes place, informal notices are sent with a view to getting the persons concerned to carry out the necessary works or institute certain hygienic practices.

Legal proceedings were taken against Mr. H.R. Statham of Hill Top Cafe, 112, High Street, Measham for contravention of the Food Hygiene (General) Regulations, 1960. These were mainly concerned with the dirty and unhygienic condition of the premises; the facilities used for the preparation and cooking of food; and the deplorable standard of the sanitary accommodation. As a result of this action Mr. Statham was fined £150, plus £10 costs. These premises were closed at the time of the action.

Food Hygiene (Market Stalls & Delivery Vehicles) Regulations, 1966.

Inspections were made of food vehicles whether they originate within this Rural District or are from districts outside, but retail within this area. Some 54 inspections were made and any points which arose from these resulted in informal notices being sent to the owners of the vehicles.

The Meat (Sterilisation) Regulations, 1969.

6 inspections have been made to the Knacker's yard in the district and particular attention has been given to the requirements of the above Regulations in connection with the sterilisation and disposal of unsound meat for animals.

In September a circular was received from the Ministry of Agriculture, Fisheries and Food with relation to the tightening up of the Regulations in that all meat and offal which has not been produced in an hygienic manner should be considered unfit for the purpose of these Regulations and transported from the slaughterhouses in locked containers. Steps were taken to ensure that these arrangements were implemented.

Meat Inspection - Carcases Inspected and Condemned.

Inspections of all animals slaughtered at both slaughterhouses in the district was carried out and the numbers are slightly lower than the previous year. The visits by the Ministry of Agriculture, Fisheries and Food Veterinary Officer have continued throughout the year, though it is difficult to see what purpose they serve since the enforcement of the appropriate legislation is the responsibility of the Local Authority.

REFUSE COLLECTION AND DISPOSAL.

The Measham canal refuse tip was filled during the year and had to be closed. All refuse collected from the southern and western part of the district was deposited at the Donisthorpe tip. Work of extracting coal from 10 acres of the proposed Lount tip was commenced following receipt of the necessary planning permission and licence from the Opencast Coal Executive.

Work Study was carried out on the refuse collection service by a team from the County Council. The scheme was brought into use in the middle of the year and as a result there was an improvement in the service and the workmen were afforded the opportunity to earn additional pay, but it is likely that the costs will be higher than previously.

A scheme was also prepared in connection with the pail emptying and cesspool emptying service. All night soil is now disposed of at the Ravenstone Sewage Works.

Visits of inspection : 317

STREET LIGHTING.

The Council decided that street lighting be improved along those lengths of road where both the County Council and ourselves were the lighting authority in order that complete lengths of road be the responsibility of one authority only. Accordingly prices were obtained for improvements to the systems along Swannington Road and Wash Lane, Ravenstone, New Street, Measham, Measham Road, Oakthorpe and Ashby Road and Measham Road, Donisthorpe. At the year end the work of improvement was well advanced and the County Council will become the lighting authority for the whole of these roads.

During the year the County Council proceeded with the provision of Solar switches to replace time switches to lanterns which are under their control.

Visits of inspection : 63, plus survey.

REPORT ON THE PROGRESS OF THE WORK

The Board of Directors has been very active during the past year and has made considerable progress in the various departments. The Board has been particularly active in the financial department, and has been successful in securing the necessary funds for the various projects. The Board has also been active in the personnel department, and has been successful in securing the necessary personnel for the various projects.

The Board has also been active in the technical department, and has been successful in securing the necessary technical assistance for the various projects. The Board has also been active in the administrative department, and has been successful in securing the necessary administrative assistance for the various projects. The Board has also been active in the legal department, and has been successful in securing the necessary legal assistance for the various projects.

A report on the progress of the work will be presented to the Board at its next meeting. The Board will also be asked to approve the budget for the next year. The Board will also be asked to approve the appointment of the various officers and directors for the next year.

REPORT ON THE PROGRESS OF THE WORK

The Board of Directors has been very active during the past year and has made considerable progress in the various departments. The Board has been particularly active in the financial department, and has been successful in securing the necessary funds for the various projects. The Board has also been active in the personnel department, and has been successful in securing the necessary personnel for the various projects.

The Board has also been active in the technical department, and has been successful in securing the necessary technical assistance for the various projects. The Board has also been active in the administrative department, and has been successful in securing the necessary administrative assistance for the various projects. The Board has also been active in the legal department, and has been successful in securing the necessary legal assistance for the various projects.

REPORT ON THE PROGRESS OF THE WORK

The Board of Directors has been very active during the past year and has made considerable progress in the various departments. The Board has been particularly active in the financial department, and has been successful in securing the necessary funds for the various projects. The Board has also been active in the personnel department, and has been successful in securing the necessary personnel for the various projects.

PUBLIC CONVENIENCES.

A considerable amount of damage continued to occur at the public conveniences in Donisthorpe. It was almost impossible to keep windows intact and experiments were made with a very thick reinforced plastic for this purpose. Maintaining a lighting supply was even more difficult, lamps, glasses and bulbs being smashed as quickly as they were replaced.

I wish to again thank you, Mr. Chairman and members of the Council for your kindness and help during the year and thank the Clerk, Medical Officer of Health, Accountant and Housing Manager for their help and constructive advice and the members of my staff for their loyal and energetic efforts.

I am,

Mr. Chairman, Ladies and Gentlemen,

Your obedient servant,

C.S. CURTIS.

REPORT OF THE

A considerable amount of business was transacted at the
meeting held on the 10th inst. It was a most interesting
and profitable one and the members were well satisfied with
the results. The following is a list of the business transacted
at the meeting: 1. The report of the Treasurer was read and
approved. 2. The report of the Secretary was read and approved.
3. The report of the Committee on the proposed amendments to the
constitution was read and approved. 4. The report of the
Committee on the proposed amendments to the by-laws was read and
approved. 5. The report of the Committee on the proposed
amendments to the rules of procedure was read and approved.

I wish to again thank you, Mr. Chairman, for the
kindness and hospitality shown to me and my family during
my visit to your home. I am sure that you and your family
will all be well and happy. I am sure that you will all
be well and happy. I am sure that you will all be well and
happy. I am sure that you will all be well and happy.

I am,
Mr. Chairman, yours and family's,
Very respectfully,
O. S. KELLEY.

I N D E X.
