URBAN DISTRICT COUNCIL.

Annual Report
OF THE
Medical Officer of Health
1922

To the Chairman and Members of the Council.

GENTLEMEN,

Following the instructions of the Minister of Health, the report for the year is of a short character. Essential details are given regarding the health and environment of the population, but details that do not vary from year to year are again omitted.

VITAL STATISTICS.

For the County Council three Tables (A, B, and C) are prepared, the contents of which are included in this report. They contain all the essential facts bearing on the health and sanitary condition of the district. As usual I have included other Tables enlarging these details for the purpose of comparison.

Population.—The total population for the year is given as 23,220 by the Registrar General against 22,990 for 1921, an increase of 230. The increase for the previous year was 890. A glance at Table I., Column 2, will show the variations for the previous five years.

Birth Rate.—The rate for the year, 21.4, is again considerably less than the previous year, and less than 1920 by 10 per 1,000 of the population. The actual figures are for 1922: 497 births (252 males and 245 females); for 1921: 604 births; and for 1920: 698. Column 3, Table I. shows the figures for the past six years.

Illegitimate births were 10, against 14 for 1921.

The Births Notification Act works remarkably well, and in conjunction with the local Registrar we are able to keep an accurate account of this work. I have appended a list of the births notified each month and classified. Of course the figures do not quite correspond with the registered totals owing to period allowed for registration.

BIRTHS NOTIFIED FOR THE YEAR 1922.

	<i>Total.</i>	<i>Living.</i>	<i>Still-</i> <i>births.</i>	<i>Illegitimate.</i>		<i>Notified by</i>

Mortality.—In Tables III. and IV. I have classified the deaths during the year as returned to me week by week by the local Registrar. The cause and age incidence is shown in Table III. for all ages, and in Table IV. Infant Mortality. Table IIIa. is a copy of the corrected return made by the Registrar General. The number of deaths registered in the district was 274. To this must be added the death of 46 persons usually resident in the district but dying outside. Against this there is a deduction of 4 deaths of non-

residents, who died within our district. The net number of deaths is therefore 316, giving a rate of 13·6 per 1,000 compared with 10·4 for 1921, and 13·3 for 1920. Table I. (Columns 12 and 13) shows the figures for the past six years.

The prevalence of Influenza during the first quarter of the year accounts very largely for the increase in the number of deaths over the year 1921. Whereas in the year under report there were 17 deaths from Influenza, 48 from Pneumonia, and 17 from Bronchitis, a total of 93, compared with a similar total of 43 for 1921, a difference of 50.

Table V. I have again added to show comparisons of our mortality from Infectious Diseases.

Infant Mortality.—The number of infant deaths for the year is 56 (actually registered). This, compared with 60 for the previous year, gives a higher death-rate, owing to the diminished number of births. The rate is 112, against 99·3 for 1921. The number dying from congenital causes, prematurity and debility, is excessively high, 34 out of a total of 56.

Mortality of Children under 5 Years.—In addition to the 56 dying during the first year of life, 29 others died before reaching the fifth year, giving a total of 85 deaths during that period of life. The total for 1921 was 84, and for 1920 was 111.

Maternity and Child Welfare.—The Health Visitor's report, is appended, showing the work of this Department for the year. No additional services have been undertaken owing to the expense and awaiting the full County scheme.

Infectious Diseases.—Table B of the County Schedule gives all particulars of the incidence of these diseases according to age, and Table II. repeats this while classifying the Ward incidence.

Tuberculosis.—This class of disease comes under the control of the County Tuberculosis Committee, with whose officers we are in close association. Weekly reports of all notifications are sent to the County Medical Officer of Health, and a duplicate to the Chief Tuberculosis Officer for the area. Sanitary investigations are promptly made on notifications of this disease by the medical practitioners, and the usual steps taken for the remedy of defects.

During the year 33 cases were notified. Of these 23 were of the respiratory type, and 10 of the other forms of Tuberculosis.

Sanitary Circumstances of the District.—No changes have taken place during the year regarding Water Supply, Drainage, and Sewerage.

Closet Accommodation.—No steps have, as yet, been taken to convert our pail closets to fresh W.C.'s, owing, as I have pointed out before, to water supply and sewerage difficulties. All new property, however, will have fresh W.C.'s. The figures regarding the number of different types of closets are contained in Table C, and in the Sanitary Inspector's report.

Sanitary Inspection.—Attached to this report is the Sanitary Inspector's report, all the facts of which are, however, contained in Table C.

Schools.—These are under the County Education Committee. They are, on the whole, in a satisfactory condition regarding sanitation and water supply. The closets are W.C.'s, with intermittent flushing, and the water supply is from our own sources. The accommodation is fully utilised still, and the district is waiting still for the County Education Authority to increase the accommodation by the building of the Central School arranged for.

Closure of the Schools during the first quarter of the year for three weeks was adopted owing to the prevalence of Influenza.

HOUSING.

(1). The supervision and administration connected to the question of the Housing of the people within the district has again engaged the attention of the Council during the year, although, perhaps not quite to the same extent as the previous year, owing to the Municipal Housing Scheme being well advanced.

The obstacles which presented themselves during the war, in the way of non-erection of new houses, lack of carrying out repairs, high cost of material, shortage of labour, coupled with the ever present risk of subsidence, and consequent damage to existing houses, do not seem to have sufficiently disappeared, so as to induce private enterprise to embark on any large scale with new property.

As regards existing property where defects are reported, I think the speed at which repairs are carried out could, without undue hardship, be

accelerated, seeing that the cost of material has fallen considerably, and that the shortage of labour is now a thing of the past.

The time has not yet arrived for carrying out the recommendations contained in the report on the Survey of Housing Needs, respecting insanitary houses, and nothing has been done save the remedying of minor defects in this class of property.

The dwelling houses in the district now number 4,147, of which 3,965 are of the working class type.

This allows an average of 5·6 persons per house.

(2). *Population.*—In the year 1911 the population consisted of 21,543 persons, and at mid-year, 1914, these figures had been increased to 22,687. During the war period, 1914 to 1918, the population gradually declined, and at the end of 1918 the figures were 20,457, or a reduction of 2,230 persons. After this time the population steadily increased, and at the end of 1921 this loss had been restored, together with an additional 303 persons, making a population for the district in 1921 of 22,990 persons.

For the year 1922 the Registrar General estimates a population of 23,220 persons, thus this is a further increase of 230 over the figures for 1921, and 1,677 above the census of 1911.

No development of new industry or addition to existing industries has taken place during the year, which would interfere with the population in any way.

(3). (a) *Extent of Shortage of Houses.*—The position under this heading has been steadily improved during the year by the addition to the district of forty-eight new houses. The Council's Housing Scheme is credited with forty out of this number, the remaining eight having been built by private owners. From these figures it will be observed that there is ample scope for extended activities on the part of private enterprise, as conditions become more normal, and this will be necessary before we can expect to deal with the insanitary and unfit houses, 200 of which were reported to you in 1919 as being unfit for human habitation.

During the year under review two dwelling houses have been demolished leaving a net increase of 46 houses for the year, and taking the average of 5·6 per house, we find that 257 persons have been provided with accommodation, whilst the estimated increase in population is 230.

(b) *Measures Taken to Meet the Shortage.*—Consideration was given to this question in 1919, when two schemes providing for 200 houses were submitted to you and approved. Since that time the first scheme providing for 80 houses has been completed. The second scheme, however, has been left in abeyance till such time you think it desirable to proceed with.

II. *Overcrowding*: (1) *Extent.*—We have had no cases reported under this heading during the year, and although there may be isolated cases which do not come under our notice, I believe that in the majority of the houses with large numbers of persons, there is the average air space for the occupants residing therein.

(2) *Causes.*—The causes are fairly well known to you. While there may be excess of lodgers in some premises, by far the greater number of these houses contain their own family with grown up sons and daughters who prefer to stay in the home, even after marriage.

(3) *Measures Taken.*—When this class of nuisance does come under observation of the Health Department, the premises are visited and inspected by your Sanitary Officers. Instructions are given as to the best methods to adopt in order to secure a better distribution of the occupants, and, if necessary, the removal of excess persons.

III. *Fitness of Houses.*—(1) (a) Taking the house to house inspections as a basis for the information under this heading, the records show the general fitness and sanitary condition to be up to the average.

(b) The character of defects usually consist of cracked walls, defective roofs, floors, windows and plasterwork.

(2) Action taken as regards unfit houses under (a) Public Health Acts, (b) The Housing Acts: Notice of Defects served on owners.

IV. *Unhealthy Areas. Housing Act, 1890, Part I. and II.*—(1) The situation under this heading remains the same as last year, and while some of these areas require dealing with as early as possible, it has not been practicable up to the present time to apply the provisions of the above Acts.

Although the housing scheme provided an additional forty houses during the year, these were occupied as soon as they were passed for occupation, and there are no empty houses at the present time.

(2) The same applies with reference to my report of the housing needs in 1919.

(3) We have only received the ordinary type of complaint during the year, that is, cracked walls, defective roofs, spouts and floors.

V. *Bye-laws relating to Houses, Houses-let-in-lodgings, &c.*—No alteration or revision of the bye-laws controlling the above classes of premises has taken place as yet.

General and Miscellaneous.—Improvements have been carried out in portions of Downall Green Road, Rectory Road, Low Bank Road, Whitledge Green and adjoining the Grammar School by flagging of the footpaths, which, in addition to draining away the surface water, greatly minimises the treading of sludge into the adjoining houses, which must add to the comfort of the tenants.

The details regarding Housing statistics are fully given in Table C, under heading 9, and this also includes some important sanitary requirements of the district.

In conclusion, my thanks are due to my colleagues in the Sanitary Department, and to the Clerk and his Staff, for their help, as well as to the Surveyor's Staff.

I remain,

Yours obediently,

HY. WINSTANLEY,

Medical Officer of Health.

HEALTH VISITOR'S REPORT.

HEALTH DEPARTMENT,

COUNCIL OFFICES,

February, 1923.

To the Medical Officer of Health.

SIR,

I beg to submit to you the following for the year 1922 :—

<i>Births Notified</i>	.. Live births, 507 ; Still-births, 22. Total, 529.
<i>Illegitimate Births</i>	.. Live births, 8 ; Still-births, 1. Total 9. Notified by doctors, 25. Notified by midwives, 504.
<i>Home Visits</i> First visits to infants, 452. Re-visits under 1 year of age, 1,742. Re-visits over 1 year and under 5 years of age, 914.
<i>Other Visits</i> Visits to school children, 39. Re-visits to school children, 198. Special visits <i>re</i> sanitary condition and other matters, 90. Still-births visited, 18.
<i>Ophthalmia Neonatorum</i>	Notified, 1 ; Visits for treatment, 10. Eyes are now in a satisfactory condition.

Workshops visited where women only are employed, 7.

Sanitary defects were reported to the Sanitary Inspector.

<i>Infant Mortality Investigations</i>	56 + 1 dying in Billinge Hospital. Legitimate infants, 54 ; Illegitimate infants, 2.
--	---

<i>Ages.</i>	<i>Methods of Feeding.</i>
4 less than 1 day.	15 no feeding.
13 „ 1 week.	23 wholly breast fed.
13 „ 1 month.	12 mixed feeding.
6 „ 1 month.	6 wholly artificially fed.
20 over 1 month and less than 1 year.

—	—

INFANT WELFARE CENTRE.

No. of times Centre was opened	43
No. of attendances	1893 1914
New infants joining	139
Average No. of attendances	39.8

In addition to the usual work of the Clinic, a Lecture is given every fortnight to the mothers, on subjects relating to the welfare of the infant and child, for which a separate class room is now in use.

I should like to thank the Ladies' Committee and all voluntary workers for help given during the past year.

During the year 239 garments have been supplied to the mothers in addition to the 71 parcels of clothing and toys, distributed at the Mothers Tea Party, held on 25th January, 1923.

From the funds of the Clinic 11 grants were made for travelling expenses and other requirements to children attending hospital.

Supplies of Food.

Free milk, 774lb., costing £72 7s. 6d.
 Sold, cost price, 4,793lb. value, £454 15s. 8d.
 Free "Virol" was given in necessitous cases.

I am, Sir,

Yours obediently,

L. CRAGG,

Health Visitor.

SANITARY INSPECTOR'S REPORT.

HEALTH DEPARTMENT,

COUNCIL OFFICES,

ASHTON-IN-MAKERFIELD.

March, 1923.

To the Medical Officer of Health.

SIR,

I beg to submit the following report showing the work dealt with during the year ending 31st December, 1922 :—

Houses and premises inspected and visited <i>re</i> nuisances and complaints	2160
Nuisances discovered	1460
„ abated.. .. .	885
Notices issued (preliminary)	327
„ (statutory)	126
Re-visits to nuisances	2348
Other visits made	1358
Nuisances remaining on books, 31st December, 1922 ..	575

DESCRIPTION OF NUISANCES DEALT WITH.

Defective and damp walls	88
„ roofs and spouts	292

Action taken—Drain Testing, Flushing, &c.</p>	<p>Chemical and bacterial. Satisfactory. No developments. Nil. As required.</p>

TABLE C.—Continued.

Action taken with regard to the Pollution of Streams.	Nil.
Canal Boats: Number Inspected.	Nil. Number of Infringements of Acts? Nil.
What is the condition of the Bakehouses?	Good. Number, 30.
What is the condition of the Slaughter-houses?	Good; only used occasionally. No. Registered, 1. No. Licenced, Nil. Has a Public Abattoir been provided? No.
What is the condition of Lodging-houses?	Number, Nil. Are they Registered? None.
What is the condition of Workshops and Work-places?	Good.
What is the Sanitary condition of the Schools?	Satisfactory, on the whole.
Dairies, Cowsheds, and Milkshops—Are they periodically inspected? Have Regulations been made under the Order of the L.G.B.? Give date. Amount of air space in cubic feet required for each cow.	Yes. What is their condition? Fair. Yes. 15-8-07. Are they enforced? Yes. (a) Where cows are habitually grazed, Nil. Where cows are <i>not</i> habitually grazed, 800 cubic feet. Total No. of Cowkeepers, 41. No. on Register, 41. No. of Inspections during year, 94.
Cowkeepers.	Total No. of Dairymen or Milk Purveyors, 6; No. on Register, 6 (other than Cowkeepers).
Dairymen or Purveyors of Milk (other than Cowkeepers).	Veterinary Surgeon can be obtained if considered necessary. Nil.
Any arrangements for veterinary inspection of dairy cows? Give particulars. Action taken (if any) as to tuberculous milk.	

TABLE C.—Continued.

<p>Inspection of Food— Action taken in respect of places where food is prepared. Any food poisoning? Action taken. Amount of food condemned or surrendered as unfit for human consumption— (a) Tuberculous carcasses and parts. (b) Diseased, unsound, or unwholesome meat (<i>other than (a) above</i>). (c) Other foodstuffs. No. of Legal Proceedings and result</p>	<p>Places inspected at intervals. Nil. State approximately the weight of carcasses and of parts— (a) Part of carcass (150lbs.). (b) One liver, and 82lbs. of other meat. (c) Nil. Nil.</p>
<p>Sale of Food and Drugs Acts and Milk and Cream Regulations— Action taken by Local Authority (if any).</p>	<p>Samples taken by Police.</p>
<p>Notices Served—Nuisances.</p>	<p>No. of Notices served: Informal, 327; Statutory, 126. No. of Nuisances abated, 885. No. of Legal Proceedings taken and result, Nil.</p>
<p>Closets and Ashpits.</p>	<p>Privy Middens: No. of Middens, Nil; No. of Closets attached to these Middens, Nil. No. of Pail Closets, 3,746. No. of Dry Ashpits (<i>including Middens</i>), 2,948. No. of Fresh Water Closets, 601. No. of Portable Receptacles for refuse, 231. No. of Waste Water Closets, 25. No. of Privy Closets converted during 1922: To Fresh W.C.'s, Nil; to Waste W.C.'s, Nil; to Pails, etc., Nil. No. of Pail Closets converted to: Fresh W.C.'s, 2; Waste W.C.'s, Nil. No. of Waste W.C.'s converted to Fresh W.C.'s, Nil. Does Council contribute towards the cost of conversion? No. If so, how much? Nil. What kind of closet accommodation is being provided for <i>new</i> property? Fresh W.C.'s.</p>

TABLE C.—Continued.

Smoke Nuisance. Has the Authority adopted—	No. of observations, Nil. No. of Legal Proceedings taken and result, Nil. What is the limit allowed for the emission of black smoke per hour? Nil. “The Infectious Disease (Prevention) Act, 1890,” Yes. “The Public Health Acts Amendment Act, 1907,” Yes. “The Public Health Acts Amendment Act, 1890,” Yes. Any other adoptive Act, Nil.
---	--

8.—PUBLIC HEALTH STAFF.

Medical Officer of Health, Hy. Winstanley. Salary (including Bonus) as M.O.H., 31-12-1922, £ 200
 Is he a whole-time Officer? *70*
 Sanitary Inspector, David Gamble. Salary (including Bonus) as Inspector, 31-12-1922, £333.
 Is he a whole-time Officer? Yes. If not, what other appointments does he hold? None.
 Assistant Sanitary Inspector, Thomas Whitter. Salary (including Bonus), 31-12-1922, £253.
 Any other Public Health Officers, such as Health Visitors and Special Nurses; if any, give names, salaries, qualifications, and offices held: Health Visitor, Lily Cragg, C.M.B., Trained Nurse, Health Certificate, and Maternity and Child Welfare Certificate. *Salary 2000*

9.—HOUSING.

No. of new houses erected during the year:—

(a) By private enterprise	8
(b) As part of Municipal Housing Scheme	40
No. of houses in course of erection under Council's Building Scheme	—

Unfit Dwelling-houses:—

Inspection—(1) Total number of dwelling-houses inspected for housing defects (under Public Health or Housing Acts)	1,617
(2) No. of dwelling-houses which were inspected under the Housing (Inspection of District) Regulations, 1910..	157
Have the particulars of these inspections been fully recorded as specified in the Regulations?	Yes.
(3) No. of dwelling-houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation.	—
(4) No. of dwelling-houses (exclusive of those referred to under (3) found not to be in all respects reasonably fit for human habitation	361

TABLE C.—Continued.

<i>Remedy of Defects without Service of formal Notices—</i>		
No. of defective dwelling-houses rendered fit in consequence of informal action by the Local Authority or their Officers		162
<i>Action under Statutory Powers—</i>		
A.—Proceedings under Section 28 of the Housing, Town Planning, &c., Act, 1919—
