LIBRARY

Since this report was compiled a revised figure of 0.97 has been received from the General Register Office for the area comparability factor for deaths.

The Standard Death Rate given on page 3 should therefore read 9.89 instead of 10.0.

AYLESBURY RURAL DISTRICT COUNCIL

AL4424(13) AYLESBURY

Bucks

Public Health Department,
Council Offices,
43 Buckingham Street,
Aylesbury, Bucks.

August, 1951.

TO THE CHAIRMAN AND MEMBERS OF THE
RURAL DISTRICT COUNCIL OF AYLESBURY

MR. CHAIRMAN, LADIES AND GENTLEMEN,

I have the honour to present the Annual Report for the year 1950 on the health and vital statistics of the Aylesbury Rural District, together with the details of inspections and the work of the Sanitary Inspectors throughout the area.

The No. I (Northants) Mass Radiography Unit administered by the Oxford Regional Hospital Board provided facilities during a selected period from June to August for the X-Ray examination of all residents in the area who wished to take advantage of the scheme.

The Unit made arrangements with local factories and offices for employees to attend during working hours. The final report of this survey, the details of which include the population of the Borough and persons living in the Rural District surrounding Aylesbury, is incorporated in this report.

Hospital services in the District are administered by the Oxford Regional Hospital Board, which reserved a block at the Isolation Hospital, Aylesbury, during the year, consisting of fifteen beds, for the treatment of pulmonary tuberculosis.

A smaller number of infectious disease cases were notified during the year compared with 1949, this being due to the number of measles cases notified, namely 29, compared with 134 for the previous year.

Of the three cases of typhoid, two were notified from the R.A.F. Hospital, Halton, being R.A.F. personnel; the other was a seaman who contracted the disease on a voyage from India and was visiting his parents in the District. He was treated at the Isolation Hospital, completely recovered, and was cleared of infection.

The majority of the dysentery notifications were from St. John's Mental Hospital. There was no outbreak in the district nor was there a case of food poisoning notified.

3149

Of the six cases of anterior poliomyelitis four were children. All recovered but are still under orthopaedic care with some residual paralysis.

It was not found necessary to remove any case to hospital during the year under Section 47 of the National Assistance Act, 1948.

The difficulty of providing an adequate number of dwelling houses for the inhabitants of the District still presents a major health problem. Despite the endeavours of the Council in the provision of new houses and the continued agitation to extend the programme, there is still a large number of sub-standard dwellings which, unfortunately, have to be utilised.

My thanks are due to you Mr. Chairman and all Members of the Council for your assistance throughout the year. I also wish to express my appreciation for the work of the Staff, particularly those of the Public Health Department who have helped in compiling this report.

I have the honour to be

Your obedient Servant,

JOHN T. C. SIMS-ROBERTS. M.B., Ch.B.,
M.R.C.S., L.R.C.P.,
D.P.H.

STATISTICS AND SOCIAL CONDITIONS OF THE AREA

GENERAL PROVISION OF HEALTH SERVICES

Hospitals

Hospital accommodation for the District is provided by the Royal Bucks and Tindal General Hospitals. Infectious disease cases are admitted to the Aylesbury Isolation Hospital.

These three hospitals are administered by the Aylesbury and District Hospital Management Committee.

Cases are admitted to the Stoke Mandeville Hospital or the Radcliffe Infirmary, Oxford, if bed space is unavailable. Similarly, infectious disease cases are admitted to infectious disease hospitals within the Oxford region when there is no accommodation locally.

Pathological Specimens

The majority of specimens for examination are submitted to the Pathology Laboratory, Stoke Mandeville Hospital. The services of the Public Health Laboratories at Luton and Oxford are utilised whenever necessary.

Ambulance Services

The ambulance services in the area are the responsibility of the Bucks County Council. Five ambulances are stationed in the Borough of Aylesbury for the use of the town and surrounding district. Included in this number is a sitting-case ambulance and a vehicle garaged at the Isolation Hospital for transporting infectious disease cases.

Maternity and Child Welfare

This service is controlled by the Bucks County Council. Infant Welfare Clinics are held at Aylesbury, Brill, Long Crendon, Waddesdon, Quainton, Cuddington, Haddenham, Wendover, Whitchurch and Worminghall.

Diphtheria and Whooping Cough Immunisation

The Bucks County Council, being the Local Health Authority as defined by the National Health Service Act, 1946, administer this service.

Treatment of Venereal Disease

A venereal disease clinic is held regularly at the Royal Bucks Hospital, Aylesbury, where free treatment is given. This clinic is administered by the Aylesbury and District Hospital Management Committee.

KEY to Classification of Occupations used in above List

2. Agricultural
4. Makers of coal gas, coke and by-products
5. Makers of bricks, tiles and pottery
6. Workers in chemical processes
7. Metal workers
8. Workers in precious metals and electro plate
9. Electrical apparatus makers and fitters, and electricians
11. Workers in skins and leather and makers of leather and leather substitute goods (not boots or shoes)
13. Makers of textile goods and articles of dress (including boots and shoes)
14. Makers of foods, drinks and tobacco
15. Workers in wood and furniture
16. Makers of and workers in paper and cardboard, bookbinders, etc.
17. Printers and photographers
18. Builders, bricklayers, stone and slate workers, contractors
19. Painters and decorators
20. Workers in rubber, bone, celluloid and other materials
21. Workers in mixed or undefined materials (not elsewhere enumerated)
22. Persons employed in transport and communication
23. Commercial, finance and insurance occupations (excluding clerks)
24. Persons employed in public administration and defence (excluding professional, clerical staff and typists)
25. Professional occupations (excluding clerical staff)
26. Persons professionally engaged in entertainment and sport
27. Persons engaged in personal service
28. Clerks, draughtsmen, typists
29. Warehousemen, storekeepers and packers
30. Stationary engine drivers, dynamo and motor attendants
31. Other and undefined workers (including housewives)
32. Schoolchildren

AYLESBURY RURAL DISTRICT COUNCIL

Public Health Department,
Council Offices,
43, Buckingham Street,
AYLESBURY, Bucks.

TO THE CHAIRMAN AND MEMBERS OF THE
AYLESBURY RURAL DISTRICT COUNCIL

MR. CHAIRMAN, LADIES AND GENTLEMEN,

I have the honour to report on the work of the Inspectors' branch of the Department for the year 1950, and wish to record my appreciation of the work of the staff throughout the year.

Water Supply

As the schedule included in this report shows, a supply from the Bucks Water Board's mains is available generally in all Parishes, and continued activities were pursued by informal and statutory procedure to ensure that individual and groups of houses without satisfactory supplies were connected to the Board's mains; in one instance it was necessary to arrange for an extension of the main.

Sewerage Schemes

Stoke Mandeville

The deferred sewerage scheme for Stoke Mandeville was in course of construction during the year, and 24 houses had been connected to the section discharging to Aylesbury Borough sewers.

Stone

The construction of the greater part of the sewers, which was held in abeyance at the outbreak of war, was completed during the year, and the work of connecting house drains has been actively pursued.

Cuddington - Sewer Extension, Dadbrook Road

drawings and other details were prepared for an extension of the sewer to provide for the drainage of 22 existing Council houses at present drained to cesspools, and for the new development scheme proposed for 38 new Council houses.

York Buildings Wendover

A lateral sewer was constructed to provide for the drainage of 30 terrace type cottages; 17 water closets had been erected and work was in progress at the year end for providing similar sanitary accommodation for the remainder of the cottages.

Sewerage (Continued)

Long Crendon

The sewer in Bicester Road was extended for a distance of 183 yards, thus providing for the drainage of 13 houses, 3 of which were connected before the year end.

Public Cleansing

The continued shortage of workmen makes it difficult at times to maintain satisfactory schedules for the collection of house refuse. As the result of an intensive investigation over a period of several months, changes were made and a considerable improvement was effected. Details of a scheme for expanding the service to give a more frequent collection were submitted to and approved by the Council. The necessary preparations to implement this had been made at the year end.

All house refuse is taken to the two disposal sites and disposed of by "Controlled Tip" methods.

Twelve parishes have sewerage schemes, and in the other parishes cesspools and septic tanks are emptied by the Council's five cesspool emptiers.

The contents of 1150 pails is also collected weekly by these machines, this service being extended to the parish of Chearsley and the unsewered part of Long Crendon.

The difficulty in finding suitable sites for the disposal of cesspool sewage becomes more acute each year, and in many instances the absence of a local site involves long and costly haulage.

Housing Repairs

The continuing difficulties regarding building labour and materials and high costs limit the amount of repair and maintenance work which can be effected. Notwithstanding this, it was possible to maintain some progress. On 21st May, 1950 a tornado struck parts of the parishes of Wendover, Halton and Aston Clinton, causing considerable damage to property. This was given priority attention and Building Licences were promptly issued where required.

It was necessary to take legal proceedings in two instances to secure compliance with Statutory Notices.

One prosecution was also taken for offences under the Civil Building Control Regulations and a conviction was secured.

Educational

Three students from Nigeria studying Local Government were with the department for a period, collecting information relating to office and outside administration. They visited

Educational (Continued)

various parts of the district to see sewage disposal works, the arrangements for collection and disposal of house refuse, and other Public Health activities.

They expressed interest in the amicable relationships between the technical staff and members of the public when negotiations were in progress for securing compliance with the requirements of the Public Health and other Acts, the Council's Byelaws, etc.
