## TO THE CHAIRMAN AND MEMBERS OF THE BRECONSHIRE EDUCATION COMMITTEE

---

Mr. Chairman, Ladies and Gentlemen—

I have the honour to present to you the **Fifty-third Annual Report of the School Medical Services in the County, during the year ending 31st December, 1963.**

The health of Breconshire's school population is very satisfactory indeed.

During the year, 1,151 children attending Primary Schools were medically examined, and 1,596 children who were attending County Grammar and County Secondary Schools.

Of these 2,747 children, only 1 child attending a Primary School was found to be unsatisfactory medically.

**Handicapped Pupils—Special Schools**—In parts VI and VII appended to this report will be found full details of handicapped children in the County, including those for whom places have been found in Special Schools.

**Penoyre Open Air Residential School for Delicate Pupils**—During the year 1 delicate child was admitted to this school and 2 pupils were discharged. On the 31st December, 1963, 4 Breconshire pupils were still resident at the school.

When it is recalled that Breconshire has 18 places "earmarked" at this school for its own pupils, it is gratifying to know that most of these places are not filled or are not wanted, because the children are healthy.

Against this however, is the fact that because the school is not filled to capacity with delicate children, the cost per pupil week for each child actually there, is extremely high.

**Education Act, 1944, Section 57.**—During the year two children were referred by the School Medical Services Sub-Committee to the Local Health Authority under Section 57 of the Education Act, 1944, as being unsuitable for education in school.

**School Closures**—No schools were closed on account of infectious disease during the year.

**Educational Psychologist**—Mr. John H. Davies, B.Sc. (Special), D.E.P. (Birmingham), commenced duty as the County Educational Psychologist on 2nd September, 1963.

**Speech Therapist.**—Miss G. A. Samuel, L.C.S.T., commenced duty as your County Speech Therapist on 1st October, 1963, and holds regular fixed clinics in the County and also visits children in their homes when required.

I stated in a previous annual report that these two appointments should be made and I more than welcome these officers to Breconshire. For many years now, I have had to rely partly on the co-operation and generosity of colleagues in the neighbouring authorities of Merthyr Tydfil, Hereford, Swansea and Carmarthenshire for expert assessment and treatment of the Breconshire handicapped pupil. Now that these officers have been appointed, a fully integrated School Psychological Service can be developed in Breconshire.

This introduction would be incomplete without reference to the co-operation and ready assistance afforded by the Chief Education Officer and his teaching and administrative staff, and the loyal and conscientious service rendered by the medical, nursing and clerical staff of the School Health Service.

I have the honour to be,

Mr. Chairman, Ladies and Gentlemen,

Your obedient servant,

R. G. EVANS,

Principal School Medical Officer.

## ORTHOPTIC TREATMENT.

The Orthoptist employed at the Brecon Hospital continues to treat children referred to her by Mr. Hoare from his School Clinics and this work has increased to such an extent that the Orthoptist now attends at the Hospital more often than the one session per week originally allotted for this work when the scheme first commenced in 1960. This arrangement for orthoptic treatment for our children works very satisfactorily.

Orthoptists are also employed at Merthyr General Hospital, Swansea General Hospital and the Royal Gwent Hospital, Newport, and these facilities can also be used by Breconshire children if required.

## ORTHOPÆDIC SCHEME.

Mrs. N. G. Neat, the County Orthopædic Nurse, holds regular Orthopædic Clinics throughout the County.

A number of children were seen by the Orthopædic Surgeon, Mr. Roy Treasure, F.R.C.S., at the monthly clinics held at Brecon Hospital, when your Orthopædic Nurse attends to assist the Specialist by arrangement with the Regional Hospital Board.

By arrangement with the Regional Hospital Board, Mr. Treasure held Orthopædic Clinics at the Brecon Clinic on 4 occasions during 1963.

The details of school-children seen at these clinics are given below. These figures do not include children of under-school age who were seen.

## REPORT OF THE SCHOOL DENTAL SERVICE, 1963 BY THE PRINCIPAL SCHOOL DENTAL OFFICER,

MR. J. H. SUTCLIFFE, L.D.S.

I have the honour to present to you a report on the School Dental Service for the year ending 31st December, 1963.

There has been no change in the staff of two dental officers and the vacancy for a third dental officer remains unfilled.

One of your two dental surgery assistants, Miss G. M. Mills, resigned in April and Miss D. Jones was appointed to fill the vacancy.

Regular fixed clinics have been held at Brecon, Brynmawr, Builth Wells, Cefn Coed, Crickhowell and Ystradgynlais and additional sessions held following routine inspection of adjacent schools.

The clinics at Hay and Tirabad have been visited for treatment, following routine school inspections. The minor clinic at Maesydderwen School has been visited for four fixed sessions per month and additional sessions held to suit requirements.

The new clinic at Cefn Coed is now under construction and new equipment of modern design will be installed in due course. The old premises at Ysgol-y-Graig have been unsatisfactory for many years as the equipment was out of date and treatment had to be carried out in a room which was used for many other purposes, chiropody, orthopaedic, infant welfare, etc. The old dental engine (drill) can still be used to advantage at Maesydderwen School and the dental chair will be of some use in the medical inspection room at Gwernyfed School.

The extreme weather conditions of January and February seriously interfered with the programme of work during these months. Snow bound road made it difficult and sometimes impossible to visit the distant clinics and on several occasions one arrived at the clinic to find that there was no water supply owing to frozen pipes. Brecon clinic was without water for nearly three weeks.

During the year 4,876 children (including 294 specials) were inspected and 3471 or 72% were found to require treatment. The percentage of children requiring treatment was the same in 1962.

One eleventh of your officers' time was made available to the treatment of expectant and nursing mothers and pre-school age children.

I would like to express my appreciation of the co-operation and assistance received from Head Teachers and their staffs. I also take the opportunity of thanking the Committee for permitting me to attend the annual conference of the British Dental Association.

## **DENTAL TREATMENT.**

In addition to the figures in Part IV, 5 dentures were repaired.

## **POLIOMYELITIS VACCINATION.**

This is a service provided under Section 26 of the National Health Service Act. I would, however, like to express my appreciation to the Head Teachers of schools in the County for their co-operation in allowing pupils to attend at the Clinics for vaccination.

During the year the age range of persons eligible for vaccination remained at 6 months to 40 years, and open sessions were held at the various centres in the County. In addition a certain amount of vaccination was carried out by general practitioners on their own patients.

In April, 1961, the Ministry recommended that a fourth dose should be given to school children between the ages of 4 years and 12 years and this policy was continued in Breconshire during 1963.

I give below the figures of children between 4 years and 15 years of age who had been vaccinated by the end of the year:—

No. of children born between 1948 and 1959 inclusive who had received two injections of Salk Vaccine or 3 doses of Oral Vaccine up to the end of 1963	... 8995
---	----------

Of these children, number who had received three injections by the end of 1963 (or two injections and one oral dose)	... 8500
--	----------

Of these children, number (born between 1949 and 1959) who had received four injections by the end of 1963 (or three injections and one oral dose)	... 6593
--	----------

In addition, the issue of oral vaccine (Sabin) was commenced by the Ministry in 1962 and this was brought into use in our clinics, where patients now have the option of either Salk vaccine injections or Sabin oral vaccine which is taken with sugar or syrup. The primary course of oral vaccine consists of three doses given at monthly intervals whereas the primary course of Salk vaccine consists of 2 injections at an interval of three weeks; this is followed at an interval of 7 months by a third re-inforcing injection.

## **B.C.G. VACCINATION AND TUBERCULOSIS.**

In 1959 proposals were submitted by the County Council to the Welsh Board of Health for the extension of the Council's original scheme, which was approved in 1954. The extension of the scheme provides for the skin testing or re-skin testing annually of all pupils over the age of 13 years and for vaccination or re-vaccination, if necessary. This extended scheme was carried out by your Medical Officers in 1963, and details of the work are given in Part VIII of this report. Details of the X-ray examinations resulting from these skin tests are shown in Part IX.

## **T.B. SERIAL TESTING IN SCHOOLS.**

In addition to the annual skin testing and B.C.G. vaccination of children over 13 years of age in schools, a scheme was introduced in Breconshire in 1961 whereby school children of all ages are skin tested annually and positive reactors X-rayed.

Annual tuberculin testing of all school children provides accurate and reliable information regarding the number of children infected from natural sources during any period of twelve months.

The annual conversion rate of non-reactor children will serve as a reliable index of the prevailing risk of infection in the community. When the conversion rate is found to be abnormally high in any class, school or district it indicates that viable tubercle bacilli are being disseminated freely and that intensive case-finding investigations should be applied, including possibly the mass radiography service.

A teacher disseminating viable tubercle bacilli would also be detected early and the spread of infection would be stopped.

Investigations should also be carried out among the home contacts of the converters in an attempt to discover the source of the infection.

Serial tuberculin testing therefore provides a method of detecting sources of infection which otherwise would not have been discovered until later.

Details of this work carried out in 1963 are shown in Table IX and the resulting X-Ray examinations are given in Table XI.

### **School Psychological Service.**

Mr. John H. Davies, B.Sc. (Special), D.E.P. (B'ham) commenced as County Educational Psychologist at the beginning of the Autumn Term, 1963. During that term he was engaged in carrying out a preliminary survey of the County to ascertain the extent of the psychological problems with which he had to deal. It is anticipated that in the school report for the year 1964, and, subsequently, there will be interesting information available about this service.

### **School Speech Therapy Service.**

Miss G. A. Samuel, L.C.S.T., commenced as County Speech Therapist during the Autumn term 1963. Arrangements were made for her to hold fixed clinics in the County and next year figures of the children seen and treatment undertaken will be reported fully.
