WELSH BUARD OF DEALTH. 22 JUN 1954 A.

RURAL DISTRICT HAY COUNCIL REPORT of the MEDICAL OFFICER OF HEALTH

for the year 1953.

. .

Officials. Medical Officer of Health.....T.C.R.George, M.R.C.S., L.R.C.P., D.P.H.

Sanitary Inspector.....G.G.Evans, M.R.San.I., M.S.I.A.

#### Hay Rural District Council

#### Report of the Medical Officer of Health

## 1953.

"Mr. Chairman and Gentlemen, I beg to present my annual report on the Rural District during the year 1953.

In the preparation of this report I have endeavoured to deal briefly with all matters within my responsibility regarding public health and preventive medicine and I have included all the subjects specifically requested by the Welsh Board of Health in Circular 1/54 (Wales).

SECTION 1. GENERAL AND VITAL STATISTICS.

Statistical summary for the year 1953.

Live Births.	Malos.	Females.	Total.	Rate per 1000 pop
Legitimate Illegitimate	18 0	27 1	45 1	
Di anarian Pranara	18	28	46	11.8
Still Births.	2	0	2	0.54
Deaths from all causes.	24	24	48	12.8

Deaths under one year.

Deaths from special causes:

Area. The Rural District of Hay, which has an area of 39,153 acres forms part of the County of Breconshire. This district is situated in the northern part of the County and is agricultural in nature with farming as the predominant occupation of the residents. There are no large towns in the district, but in the district are two large hospitals, the Mental Hospital at Talgarth and the South Wales Sanatorium at Bronllys.

Population. 

1943. 1944. 1945. 1946. 1947. 1948. 1949. 1950. 1951. 1952. 1953. 3832. 3535. 3390. 3269. 3327. 3654. 3655. 3745.3657. 3647. 3711.

The above figures are the Registar General's estimated figures for the various years.

The number of inhabited houses in the district was 960 giving an average number of 3.8 persons per house.

| BirthsMalesFemalesTotalRate194017345112.2194125386314.3194223204310.7194328275514.6194429336217.4194532346618.8194617244112.5194726285416.2194832346618.8194617346116.2194832275917.6194927346116.7195032205213.9195130225213.9195130225214.2195222222143195318284611.8 | 2/. <u>Ha</u>  | y Rural Distri   | let Council.   |  |   |
|---|--|--|--|--|---|
| $\begin{array}{cccccccccccccccccccccccccccccccccccc$  | Births   | Males  | Females  | Total  | Rate  |
| England and Wales. 1953 15.5  | 1941<br>1942<br>1943<br>1944<br>1945<br>1946<br>1946<br>1947<br>1948<br>1949<br>1950<br>1951<br>1952<br>1953 | 25<br>23<br>28<br>29<br>32<br>17<br>26<br>32<br>27<br>32<br>30<br>22<br>18 | 38<br>20<br>27<br>33<br>34<br>24<br>28<br>27<br>34<br>28<br>27<br>34<br>20<br>22<br>22<br>21<br>28 | 63<br>43<br>55<br>62<br>66<br>41<br>54<br>59<br>61<br>52<br>52<br>52<br>43<br>46 | 14 3<br>107<br>14.6<br>17.4<br>18.8<br>12.5<br>16.2<br>17.6<br>16.7<br>13.9<br>14.2<br>11.7<br>11.8 |

It will be observed that the birthrate for the year under review was lower than the average for the whole of England and Wales.

Deaths. After taking into account the outwardly and inwardly transferable deaths the net number of deaths registered amongst residents in the district is shown below :-

|  | A STATE OF A |
|--|---|
| $\begin{array}{cccccccccccccccccccccccccccccccccccc$ | 11.1<br>9.2<br>9.4<br>9.8<br>10.9<br>14.0<br>14.0<br>8.4<br>7.6<br>13.6<br>10.7<br>9.3<br>9.3<br>12.8           |

The death-rate for 1953 was therefore higher than the average for the whole of England and Wales and was also higher than the birthrate.

| $\begin{array}{cccccccccccccccccccccccccccccccccccc$ |
|--|
|  |

The still-birth rate was therefore higher than the average for the whole of England and Wales.

#### Hay Rural District Council.

Infantile Mortality. This is the number of deaths occurring in children of under one year of age. The rate is calculated per 1000 live births.

| 010010 400140014   | Males       | Females  | Total  | Rate  |
|--|-------------|--|--|---|
| 1941<br>1942<br>1943<br>1944<br>1945<br>1946<br>1946<br>1947<br>1948 |             | 4<br>1<br>0<br>0<br>0<br>1<br>0<br>1<br>0<br>2 | 4<br>3<br>2<br>2<br>2<br>0<br>2<br>2<br>0<br>2<br>2<br>2<br>2<br>2<br>2<br>2<br>2<br>2<br>2<br>2<br>2<br>2 | 78<br>47<br>46<br>36<br>0<br>36<br>48<br>36<br>48<br>36<br>67 |
| 1950<br>1951<br>1952   | 4<br>2<br>0 | 1<br>1<br>0<br>1                               | 2<br>5<br>3<br>0<br>1  | 96.1<br>57<br>0<br>21.8                                       |

The infantile mortality rate was therefore lower than the average for the whole of England and Wales. This one death occurred in a child of under 4 weeks old.

| Analysis of Causes of Deaths.  |                       | Females 24.<br>Females                       |

| Other accidents  | 2                     | 0.   |

The deaths are classified under the headings given in the new abridged list of Causes of deaths.

Illegitimacy. The number of illegitimate births registered as belonging to residents in the district during 1953 amounted to one.

Maternal Mortality. There were no deaths during the year which could be attributed to childbirth.

SECTION 2. GENERAL PROVISIONS OF HEALTH SERVICES.

Public Health Officers. There was no change in the public health officers during the year, Mr. G.G. Evans remained as your Sanitary Inspector.

Laboratory Facilities. During the year laboratory facilities were available at Cardiff, Newport, Carmarthen, Swansea, Aberystwyth and Brecon. All water samples were sent to the Public Health Laboratory at Hereford, whilst any investigation required in the control of infectious disease were performed by the Public Health Laboratory at Cardiff. All the milk sampling was done by the Public Health Laboratory at Hereford.

#### Hay Rural District Council.

Ambulance Facilities. As a result of the National Health Service Act, 1946, the County Council were responsible for the provision of an ambulance service and made use of the existing St. John's ambulance for general use while ambulances from Merthyr Isolation Hospital conveyed patients suffering from infectious disease to hospital.

Home Nursing. Under the National Health Service Act, 1946, the County Council were responsible for the provision of home nursing facilities. The nurses previously partly employed by various district nursing associations were whole time employees of the County Council.

Treatment Centres and Clinics. Maternity and Child Welfare Clinics, administered by the County Council, are held regularly at Hay and Talgarth. Ante natal clinics and facilities for the treatment of minor ailments, immunisation, dental, orthopaedic and eye defects are also available.

<u>Hospitals.</u> The hospital needs of the residents of the district for all diseases apart from infectious disease, are provided for by the Brecon War Memorial Hospital. A certain number of cases are also admitted into Hereford Hospital. Merthyr Isolation Hospital and Hereford Isolation Hospital receive cases of infectious disease.

For the treatment of cases of smallpox arangements have been made by the Welsh Board of Health for beds to be available at the Penrhys Hospital, Rhondda.

Disinfection. In the main, the methods used for any required disinfection have been fumigation and spraying.

#### SECTION 3. MATERNITY AND CHILD WELFARE.

These services are administered by the County Council and include clinics for maternity and child welfare, immunisation, dental, orthopaedic and eye treatment and for expectant mothers. Provision is also made for the provision of free and cheap rate milk and medicinal foods. The supervision of midwives, child life protection and the care of premature and illegitimate infants is also the responsibility of the County Council.

#### SECTION 4. SANITARY CIRCUMSTANCES.

I am indebted to your Sanitary Inspector for the reports on water supplies, sewerage and workings of the Factories Acts which are included in this section of the report.

Water Supplies. Water has been satisfactory in quantity during the year for those dwellings below the Ordnance contour of 500 feet, but most unsatisfactory for the majority of the dwellings above this height. The wet season helped considerably in the maintenance of the supplies.

The scheme previously submitted by a consulting Engineer was considered during the year but real progress scems very slow.

In the district there are 18 water supplies serving six dwellings or more by pipes either into the dwellings or to standpipes. Of these 18 supplies, 6 are owned by the Council. There are 170 supplies serving 5 dwellings or less and 60 of these are piped supplies, the remaining 110 being either pumps or springs.

#### Hay Rural District Council

Details of the water supply for each parish is given below :-

1.Aberllynfi. The quantity of water in this parish has been satisfactory during the year. The Council own the houses in this parish have water pipes inside the house. One sample of water was sent for bacteriological examination, and this was unsatisfactory.

2. Bronllys. There are two public supplies in this parish. One of these is owned by the Welsh Regional Hospital Board and this supplies the sanatorium and all dwelling houses on the estate. The other supply is owned by the Council and water is drawn from springs under the Minfield bank and is not treated. This supply is augmented from the Talgarth Supply during periods of drought. Ninety nine dwellings are served from this supply. There are thirteen other supplies in this parish, all privately owned. No samples of water were sent for analysis during the year. Three samples were taken from private supplies and these were satisfactory.

3. Glynfach and the Usk Valley Portion of Tregoyd and Velindre.

There are ten private supplies in this area, three are piped into four dwellings, none are treated, and the other seven are simply running springs near the small-holdings. It would not be difficult in this area to find sufficient water to give each dwelling a piped supply. The distances to be piped would be considerable but this should not dony the public a wholesome supply of water.

No samples of water were submitted during the year.

4.Hay Rural. Seventeen houses in this parish are served with a piped supply from the Council's supply at Llanigon. This water is not treated. There are 21 other supplies in the parish and of these 7 aro piped. One dwelling has to obtain water from a source 100 yards away. Improvements as approved by the Welsh Board of Health wore carried out during the year. Two samples were sent for analysis, all were satisfactory.

5. Llanolicu. There are 15 dwellings in this parish, 10 in the Wye Valley and 5 in the Usk Valley and all have a piped supply laid on but are served from 9 different sources.

No samples woro sent for analysis during the year.

6. Llanigon. The village of Llanigon is served by a public water supply owned by the Council, Springs are collected to a service reservoir but the water is not treated. These sources supply 16 dwellings with water laid on and 10 dwellings from a stand-pipe. There are 7 other supplies in the parish and 5 of these are piped. Eleven are supplied with wator from a considerable distance, 7 over 150 yards, 2 over 200 yards and 2 take a supply from open streams.

Four samples were examined during the year, three were satisfactory and ono suspicious.

Sixteen dwellings in this parish situated over the 500 feet contour are badly in need of water for domostic use and the attention of the Council is drawn to this.

7. Llyswon. Of the 56 dwellings in this parish, 38 have water laid on, 14 are served by standpipes and 4 are served by pumps. Thirty three dwollings are supplied by the Council and this water is not treated. No samples were submitted for analysis during the year.

8. Pipton. There are 11 private supplies in this parish and of these 7 are piped supplies serving some 12 dwellings. No water is treated. The other dwellings are served by individual pumps. One pump serving two cottages is without water for two or three months in a dry year and the tenants then carry water some 350 yards. No samples were submitted for analysis.

9. Talgarth (Wye Valley Section). There are three public supplies in this section, one owned by the Regional Hospital Board and two by the Council. The larger of the Council's supplies served 329 dwellings with water laid on and 32 from stand-pipes, several months of the year this supply augments the village of Bronllys. One portion of this supply 1 received as an overflow from the Mental Hospital, is sand filtered and chlorinated and the second portion is from springs collected in the Llanelieu parish. These springs are collected to a common service reserveir which, in times of drought, may be connected to the brook and on such occasions this water is chlorinated.

During 1953 supplies had to be restricted, during the night, for a portion of the last two quarters of the year. The Hospital staff are getting concerned about the supply of water and have notified your officials that they may have to restrict further and in view of these conditions it is sincerely hoped that quicker progress will be made in the very near future with the Llanbwehllyn Scheme.

During the year samples were taken from the Llanelicu Brook and reservoir, the brook water was most unsatisfactory, and the springs showed a faecal content of 5.

Samples were also taken from the Hospital source and this raw water was of a similar character as that of Llanelieu Brook, but after sand filtration and chlorination it was fit for human consumption. As in some other parishes, dwellings above the 500 ft. contour are badly supplied with water

There are 45 other supplies, of which 12 are piped in this parish and all are subject to pollution.

7 samples from private supplies were examined, 5 were satisfactory and 2 were doubtful.

10. Talgarth (Usk Valley Section) There is no public supply in this

area. There are 24 dwelling houses in this area of which 3 have private piped supplies whilst the other 21 are supplied by running springs.6 samples were taken during the year, and all were satisfactory.

<u>11.Tregovd and Velindre.(Wye Valley Section).</u> Of the 118 dwellings in this parish 100 have water laid on and 6 are served by stand-pipes. All the supplies are owned by private individuals.One individual supplies water to 32 dwellings and another supplies 30 dwellings.The smallholdings above 500 feet are here again badly supplied and the main supplies in this parish are insufficient in times of drought whilst the quality is not satisfactory.Negotiations to purchase continued during the year.

One sample was submitted for bacteriological examination during the year and was unsatisfactory. One private supply sample was taken and this was satisfactory.

In conclusion it is obvious from the above description that all the water supplies should have urgent and serious consideration. They are subject to pollution and the very number - 171 - different sources make it impossible to give them individual attention as frequently as public health demands. The major water scheme received consideration during the year

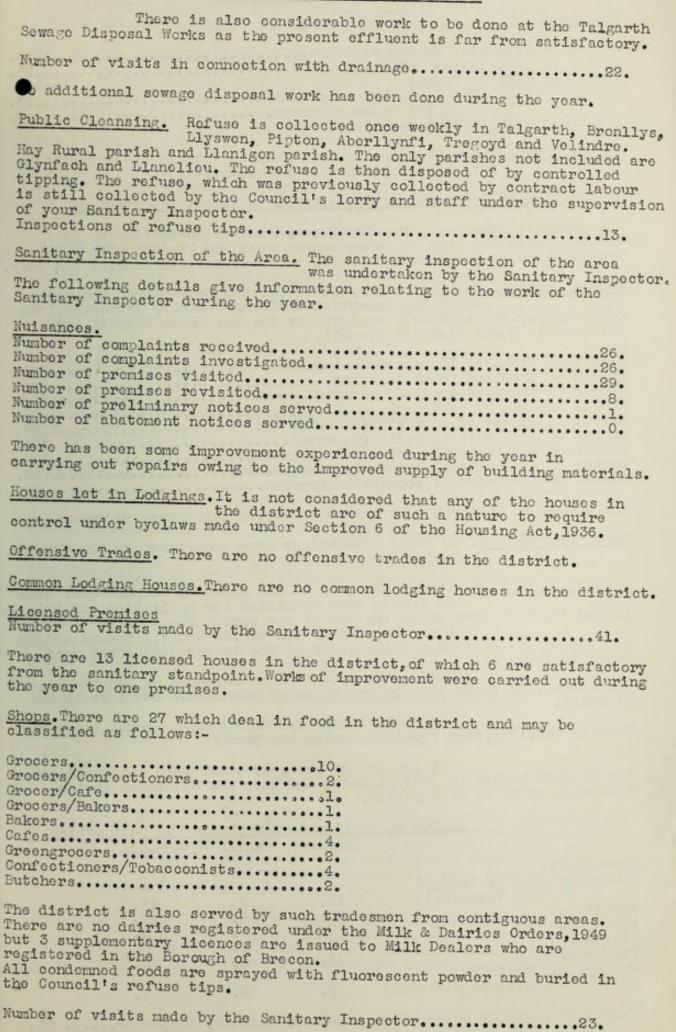

The major water scheme received consideration during the year but progress appears slow. In the meantime only two farmers took advantage of the Ministry of Agriculture grant to install private supplies.

Drainage and Sewerage. New sowers and sewage disposal works are required for the villages of Three Cocks, Bronllys, Llanigon, Llyswen, Velindre and Glasbury.

The Trefecca settling tanks could with advantage be enlarged, and this work has been agreed by the Council.

In Bronllys there is no treatment plant, the sewage running over fields. This in my opinion should be improved.

## May Rural District Council

Consideration should be given to the erection of dwellings for Old People and those applicants who require one or two bedrooms.

SECTION 6. INSPECTION AND SUPERVISION OF FOOD.

Milk. On 1st October 1949, the Milk and Dairies Act, 1944, came into operation. Under this Act the licensing of producers, and the supervision of milk producers became the responsibility of the Ministry of Agriculture and Fisheries. The Council is now left only with the licensing and control of distributors.

The result of these samples was sent to the Milk Sub-Committee of the Ministry of Agriculture in Brecon.

Meat. There is no slaughterhouse in the district.All meat is supplied from the Ministry of Food's Slaughtering Point at Brecon. 12 lbs. of meat were condemned in the district as being unfit for human consumption.

### Other Foods.

Food Prenaration Rooms (including Bakehouses)

Number of inspections made ..... 17.

Ice-Cream premises. Particular attention was paid to these owing to the epidemic of typhoid fever at Abcrystwyth. Numerous visits of inspection were made by the Sanitary Inspector.

No manufacture of ice-crean is carried out in the district, there being 10 retailers. No samples of ice-crean were examined during the year.

Fish and Fried Fish Shops.

#### SECTION 7. PREVALENCE AND CONTROL OF INFECTIOUS DISEASE.

The following number of cases of notifiable infectious disease were reported to me during the year.

#### 

The fees paid by the Council for the notifications of infectious disease are now, under the new Health Act, refunded by the County Council, provided that copies of the notifications are received by that . authority. All the above cases were nursed at home. As will be seen the district was comparatively free from infectious disease during the year.

Venereal Disease. The County Council has an agreement with the General and Eye Hospital, Swansea, for the treatment of such cases. The tracing of contacts and the following up of defaulters is the responsibility of the County Council.

9/-

Tuberculosis

The following details show the position as regards tuberculosis in 1950 and recent years;

4. Number of cases left on register at end of year ...... 38.

The number of cases left on register at end of year can be classified as follows; -

| Disease  | of | lungs         |  |
|----------|----|---------------|--|
|          |    | peritoneur    |  |
|          |    | peritoneun 1. |  |
|          |    |               |  |
|          |    |               |  |
|          |    | glands        |  |
| The 10 4 |    | 30.           |  |

The 10 fresh cases during the year are;-

Diseaso of lungs..... 6: joints..... 2. glands..... 2.

Two of these cases were transfers into the district.

The number of cases notified during recent years is shown below; -

1942.1943.1944.1945.1946.1947.1948. 1949.1950.1951. 1952. 1953.

5. 6. 5. 8. 4. 5. 6. 4. 4. 10. 10. 10.

Diptheria Immunisation. As a result of the new Health Act, the County Council were responsible for the imunisation of children against diptheria and details for tho district will be found in the annual report of the County Medical Officer.

Facilities for immunisation are now available at the ordinary Maternity and Child Wolfare Clinics and also at the schools during the school medical inspections.

of diptheria continues to fall. The object of the immunisation campaign, however, remains the same, to secure the immunisation of not less than 75% of babies before their first birthday. During the first half of 1953, however, it is disturbing to note that only 31% of the estimated number of children reaching the age of one year during this period received this protection. It must be remembered that diptheria still kills and that elimination of the disease is conditional upon the maintenance of an adequate level of immunisation. If parents leave their children unprotected there It is pleasing to see that the incidence of immunisation. If parents leave their children unprotected there may be a return of diptheria outbreaks, and there have been several sharp rominders of this possibility during the year under review.

> Yours faithfully, T.C.R.George. Medical Officer of Health.
