LLANDRINDOD WELLS URBAN DISTRICT COUNCIL

Town Hall,

Llandrindod Wells.

November, 1965

To the Chairman and Members,

I have pleasure in submitting for your consideration the Report of the Sanitary Conditions and Vital Statistics of the Urban District for the year 1964.

This Report is prepared in accordance with the instructions issued by the Welsh Board of Health, Circular 1/65 (Wales) and presents briefly the scope and activities of the Health Department.

Yours faithfully,

A handwritten signature in blue ink, appearing to read "J. G. Jenkins", written over a horizontal line.

Medical Officer of Health.

LLANFAIRPWLLGWYBGI LOCAL BOARD OF HEALTH

Local Board of Health,

Llanfairpwllgwybgi.

November, 1905.

To the Chairman and Members,

I have pleasure in submitting for your consideration the

Report of the Sanitary Conditions and Vital Statistics of the

Urban District for the year 1904.

This Report is prepared in accordance with the instructions

issued by the Welsh Board of Health, Circular No. 1 (1904) and

provisions relating to the scope and contents of the Health Department.

Yours faithfully,

LLANDRINDOD WELLS URBAN DISTRICT COUNCIL

REPORT OF THE MEDICAL OFFICER OF HEALTH FOR THE YEAR 1964

SECTION A.

STATISTICS AND SOCIAL CONDITIONS OF THE AREA

Area of District	1509 acres
Registrar General's Estimate of Resident Population - Mid. 1964	3160 persons
Ditto - Mid. 1963	3280 persons
Number of Inhabited Houses at the end of the year (including flats)	1203
(Increase during the year 7)		
Rateable Value - 31st December, 1964	£112515
Product of Penny Rate	£442. 5. 9.

NATURAL AND SOCIAL CONDITIONS

The year 1964 brought little variation in the health and livelihood of the townspeople. The town as a health, holiday and tourist resort still retains its popularity.

There is a gradual increase in the number of people who retire to the town at the end of their working life comprising professional people and farmers. An increase in moderate priced new houses would be of advantage to the town to satisfy this demand.

The townspeople were fully employed throughout the year and unemployment of employable men and women was negligible. There is a large amount of part time employment of married women and old age pensioners.

The efforts of your Council to stop the loss of people to the larger areas of population brought no results so far as industrial or other employment of the young people is concerned.

The population of the town varies very little in numbers from the past years and there was no excessive mortality or epidemics and the health of the townspeople was generally good.

Climatological Conditions. The climatological conditions of 1964 were as detailed in the following tabulation which includes comparisons with previous years:-

	<u>1964</u>	<u>1963</u>	<u>1962</u>	<u>1961</u>
Total rainfall (inches)	31.58	35.15	36.3	42.67
Highest maximum temperature	77°F	79°F	76°F	85°F
Average maximum temperature	53.9°F	51.7°F	53°F	55.6°F
Lowest minimum temperature	7°F	1°F	2°F	14°F
Average minimum temperature	40.2°F	38.8°F	39.5°F	40.6°F
Sunshine Hours	1071.7	1125.3	1263.2	1293.4

The winter period at the opening of the year was mostly dry, cold and dull. Snow fell in the middle of February and caused certain transport difficulties. The summer months were changeable. May, June and August were the best of the months. The autumn was dry and mild.

Weather conditions could not be said to have any adverse affect on the health of the townspeople.

Occupations. There was no appreciable change in the occupations of the townspeople to that indicated in previous reports. There are a large number of comutors from the surrounding villages and hamlets who are engaged in the Hotels, Offices and Shops. The majority travel by private car, public transport being both inadequate and limited in the number of services.

The holiday and tourist trade of the town had a successful summer season and on occasions the holiday maker failed to obtain accommodation.

TABLE 1

VITAL STATISTICS OF THE DISTRICT DURING 1964

	<u>TOTAL</u>	<u>Male</u>	<u>Female</u>
Live Births (Legitimate)	49	23	26
(Illegitimate)	7	3	4
	<u>56</u>	<u>26</u>	<u>30</u>
Still Births (Legitimate)	1	1	Nil
(Illegitimate)	Nil	Nil	Nil
	<u>1</u>	<u>1</u>	<u>Nil</u>

LIVE BIRTHS

Number	56
Rate per 1000 population	17.7
Rate per 1000 population - 1963	12.8
Illegitimate live births per cent of total live births	14.2

STILL BIRTHS.

Number	1
Rate per 1000 total live and still births	17.5
Total live and still births	57
Infant deaths (deaths under 1 year)	1 F. Leg.

Infant mortality rates:-

Total infant deaths per 1000 total live births	17.8
Illegitimate infant deaths per 1000 illegitimate live births	Nil
Legitimate infant deaths per 1000 legitimate live births	20.4

Neo-Natal mortality rate (deaths under 4 weeks per 1000 total live births)	Nil
--	-----

Early Neo-Natal mortality rate (deaths under 1 week per 1000 total live births)	Nil
---	-----

Peri-Natal mortality rate (still births and deaths under 1 week combined per 1000 total live and still births)	Nil
--	-----

Maternal mortality (including abortion):-

Number of deaths	Nil
Rate per 1000 total live and still births	Nil

DEATHS.

	<u>Total</u>	<u>Males</u>	<u>Females</u>
Number of deaths	57	23	34

The death rate per 1000 of the estimated resident population was 18.03

Death Rate for previous years:-

1963 -	18.6
1962 -	15.7
1961 -	14.9
1960 -	14.9
1959 -	14.5
1958 -	13.55
1957 -	11.76
1956 -	15.4
1955 -	15.33
Annual Average - 14.96	

TABLE 2STATISTICS OF CAUSES OF DEATH

<u>CAUSES OF DEATH</u>	<u>M.</u>	<u>F.</u>
All Causes	23	34
1. Tuberculosis Respiratory	Nil	Nil

SECTION B.GENERAL PROVISIONS OF HEALTH SERVICES IN THE AREA1. Public Officers:-

Medical Officer of Health (Part-time)

Dr. J. Emrys Jenkins, M.A., B.M., B.Ch.,
Chalfont, South Crescent,
LLANDRINDOD WELLS.

Telephone No. 2000.

Public Health Inspector (Part-time)

R.J. Morris, Esq., A.R.I.C.S., M.R.San.I.,
Town Hall, Temple Street,
Llandrindod Wells.

Telephone No. 2222

2. Laboratory Facilities

The examination and analysis of water, sewage effluents and stream contamination are carried out by the Public Analyst of the County Laboratory, Carmarthen - Analyst: H.J. Evans & Partners.

3. HEALTH SERVICES. The following services are carried out by the Radnorshire County Council under the National Health Service Act, 1946. The County Council services are efficiently and well organised.

- (i) Maternity and Child Welfare.
- (ii) Clinics.
- (iii) Dental care for expectant mothers and nursing mothers and young children together with school Dental Services.
- (iv) Midwives Service, delegated to the Radnorshire County Nursing Association.
- (v) Health Visiting delegated to the Radnorshire County Nursing Association.
- (vi) Vaccination and immunisation of children under five and of school age is carried out by Registered Medical Practitioners of the parents' choice or by the County Medical Officer.

(The vaccination of adults is carried out by Registered Medical Practitioners).

- (vii) Ambulance Service.
- (viii) Prevention of illness, Care and After Care of persons suffering from tuberculosis, mental illness or defectiveness and other types of illness is organised under the aegis of the County Health Committee.
- (ix) Domiciliary Health Services.
- (x) Home Nursing delegated to the Radnorshire County Nursing Association.
- (xi) Health Education is carried out by the Radnorshire County Council.
- (xii) Mental Health.
- (xiii) Chiropody Service.

4. HOME SAFETY ACT, 1961. Circulars were issued to all householders on safety in the home.

SANITARY CIRCUMSTANCES OF THE AREA

WATER SUPPLY.

The purification and clarification of the water, as taken from the River Ithon, was satisfactory throughout the year. Quality was good and quantity sufficient.

The main source of supply remained the River Ithon and purification as previously reported.

Chlorination has been maintained to give a free chlorine content of between 0.2 and 0.5 p.p.m. after 30 minutes contact. Tabulated list of Analyst's Reports are given in Table 3.

Statistics in respect of the Water Supply are detailed below:-

Estimated population supplied from public water mains in Urban District ..	3300
Estimated population not supplied from public water mains	20
Number of dwelling houses or flats supplied direct into premises	1197
Number of dwelling houses and farms supplied by means of stand pipes	Nil
Estimated population supplied by stand pipes	Nil
Number of premises (farms) with own piped supplies	5
Number of premises (farms) with no piped supplies	Nil
Premises supplied from mains and outside Urban District	22
Estimated population so supplied	84

TABLE 3.

Bacteriological analysis for the year 1964 carried out by H.J. Evans & Partners, Public Analysts Bank Lane, Carmarthen.

Tabulation of Analysts' Reports on samples of water taken from house services, direct off supply main; water supplied from River Ithon.

Date of samples	No. of organisms 48 hrs. @ 22°C	Coli present in c.cs.					REMARKS
		100	50	25	20	10	
11.4.64	10	Nil					Bacteriological condition highly satisfactory
20.6.64	45	9					Some contamination possibly purely local origin
26.6.64	14	Nil					Excellent Bacteriological quality
17.7.64	24	Nil					Excellent Bacteriological quality
30.7.64	150	16					Bacteriologically unsatisfactory
17.8.64	14	Nil					Bacteriologically satisfactory
12.9.64	12	Nil					Bacteriologically satisfactory
12.9.64	20	Nil					River Pumping Station - Bacteriologically satisfactory
12.9.64	24	Nil					The Hillyers, Tremont Road Bacteriologically satisfactory

It will be noted that at the end of July the sample was reported as being unsatisfactory. Investigations were carried out to trace the source of contamination which was eventually traced to the opening of a sluice valve between old filter beds and Llanfawr Reservoir.

Chemical Analysis No samples for chemical analysis were dispatched during the year.

Waterworks Improvement

The Consulting Engineer appointed to submit a scheme for the improvement of the River Intake Pumping Station submitted his outline scheme in January of the year. The Report recommended the construction of sedimentation tanks and other works of improvement at an estimated cost of £50,420.

The Engineer's Report was forwarded to the Ministry of Housing and Local Government for the observations of the Engineering Department.

At the April meeting of your Finance and General Purposes Committee you decided to proceed with the scheme and to make application to the Radnorshire County Council for a contribution towards the expenditure. Arising from discussion with the Wye River Authority variations were eventually made in the scheme and in the September a scheme estimated to cost £62,400 was submitted to the Ministry and application made for loan consent to borrow this amount.

In the November an Engineer of the Ministry of Housing and Local Government visited the town to investigate the proposals for the modernisation of the Pumping Station.

At the end of the year the approval of the application to borrow was awaited from the Ministry.

Contamination by Lead No direct action has been taken in connection with contamination by lead. There are five known water service pipes to properties which are in lead tube. Sodium carbonate (Soda Ash) is added to the water before filtration for pH control.

TABLE 4.

Water Consumption - (All consumers and trades)

Year	Water pumped to service reservoirs	Estimated population served	Estimated consumption per head per day	Trade consumption metered supplies	Bulk Supplies
1964	68,220,000	3,384	55.2	11,523,000	82,000
1963	74,460,000	3,425	59.6	10,255,000	84,000
1962	68,460,000	3,400	55.0	11,371,000	76,000
1961	70,830,000	3,407	56.9	8,828,000	79,000
(Includes population outside U.D.)					
1960	74,260,000	3,345	60.82	12,154,000	59,000
1959	58,650,000	3,434	46.8	13,977,000	6,000
1958	60,270,000	3,351	49.2	13,258,000	111,000
1957	61,340,000	3,261	51.5	11,963,000	
1956	71,640,000	3,280	58.9	14,290,000	
1955	75,110,000	3,310	62.1	15,145,000	
1954	70,630,000	3,280	58.0	12,684,000	

The tabulation shows a decrease on the 1963 figures of 6,240,000 gallons. The consumption is still high as compared with the national average.

No extensions to mains were carried out.

SWIMMING POOL. The swimming pool operated by the Council was maintained to a satisfactory standard.

The water supply to the pool of 133,000 gallons capacity is taken from the domestic water supply and the pool replenished as necessary. The water is treated by straining and filtration, sterilization being by injection of chlorine. Alkali as sodium carbonate is added as necessary.

The circulation of the pool water is over a period of 10 to 12 hours and from the opening of the pool at 1st June to closing at end of September the filtration plant was kept in continual operation.

Twice daily tests were made with comparator for free chloring and alkalinity. The reports on samples taken for bacteriological analysis are as under:-

Dates of samples	Organisms per c.c. 48 hrs. @ 22°C	Coliform organisms per 100 c.cs.	Faecal Coli per 100 c.cs.
26.6.64	25	Nil	Nil
17.7.64	2	Nil	Nil
30.7.64	13	Nil	Nil
17.8.64	28	Nil	Nil
29.8.64	210	6	Nil

OBSERVATIONS: The bacteriological condition of this water was generally satisfactory.

DRAINAGE AND SEWERS.

1. Drainage No difficulties were experienced on the sewage systems during the year.

2. Sewage Disposal The modernised disposal works was completed by the winter of the year and put into operation.

Rivers and Streams Inspection of rivers and streams in the Urban District were carried out. No action on pollution was necessary.

Public Cleansing (i) The collection and disposal of household refuse has continued on the same principle as other years. No variation in collection of domestic properties once each week and twice each week from certain trade and hotel premises has been necessary.

The difficulties arising at the Incinerator Site due to accumulation of tins, glass and clinker became more aggravated and during the year you approached the neighbouring rural and urban authorities on the possibility of joining together to organise a suitably sited tip where modern equipment could be used for soiling over and controlled tipping properly carried out.

The result of this enquiry brought no satisfactory results. You then advertised in the local press inviting farmers who had low lying ground suitable for reclaiming to come forward. No satisfactory arrangement arose from this investigation.

Enquiries were sent out for the hire of tin balers and disposal of coloured glass with no positive results.

(ii) The collection and sale of salvaged materials comprising waste paper, broken glass, bottles and scrap iron and tins has continued.

During the year you disposed of:-

30 tons 5 cwts. of waste paper
13 tons 5 cwts. of cullett
14 tons 7 cwts. of scrap iron

Common Lodging Houses There are no common lodging houses in the Urban District.

FOOD.

Food Hygiene The enforcement of the food hygiene regulations was carried out by inspection and circulation of posters supplied by the Ministry of Food.

Special inspections were made of the kitchens and food preparation establishments of the four large hotels.

No prosecutions were found necessary.

TABLE 5.

INSPECTION AND SUPERVISION OF FOOD

Milk

Non-Residential designated pasteurised retailers and designated traders	- 2
Residential designated ditto ditto	- 1
Residential registered dairymen designated retailers	- 1
Non-Residential designated retailers	- 1
Wholesale producers in Urban District	- 4
Visits to cowsheds during the year	- Nil
Visits to dairies during the year	- 1
Samples of milk tested during the year	- Nil
Action taken by Council in respect of unclean milk during the year	- Nil

NUMBER REGISTERED UNDER SECTION 16 OF
FOOD AND DRUGS ACT

Ice Cream	-	18
Cooked Meats	-	3
No ice cream is manufactured at a local premises.		
Number of inspections of Registered Food Premises	-	3
Number of inspections of Bakehouses	-	6
Complaints received in respect of foods	-	Nil
Number of inspections of food preparation establishments	-	20
Action taken in respect of food storage (informal)	-	Nil

TABLE 6.

Foods surrendered or condemned and destroyed

Various canned foods	-	278 tins
Hams, bacon, sausages and cooked pork	-	73 lbs.
Meat Pastries etc.	-	1 doz.
Fish	-	Nil
Beef	-	133 lbs.

Condemned food, unless salvagable, is destroyed at the incinerator.

Arising out of the Aberdeen Typhoid outbreak 15 tins of suspected corn beef were found at local shops. No tins of the suspected Tongue were found and no tins of the corn beef suspected of salmonella bacillus infection.

Liquid Egg (Pasteurisation) Regulations 1963 There are no egg pasteurisation plant in the Urban District.

Food Poisoning Outbreaks

No cases of food poisoning occurred during the year.

Slaughter of Animals and Meat Inspection

One slaughterhouse was continued in use during the year.

100% post mortem inspection has been carried out.

The charges made to the slaughterhouse proprietors for inspection and stamping were laid down as follows:-

Cattle	-	2/6d.
Pigs	-	9d.
Sheep & calves	-	6d.

At the end of the year agreement was made with the slaughterhouse proprietor to pay the costs incurred by the Council in 100% inspection.

Licences to Slaughter Animals

(1) To slaughter cattle, sheep and pigs - 6
