P E M B R O K E R U R A L D I S T R I C T .ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH
FOR THE YEAR 1950.

To the Chairman and Members of the Council,

I beg to submit the Annual Report for the year 1950.

V I T A L S T A T I S T I C SResident Population, (Registrar General's Estimate) 1950
.....6,000.....

England & Wales

Birth Rate	17 per 1,000 pop.	15.8
Death Rate	9.3 per 1,000 pop.	11.6
Infantile Mortality Rate	17.8 per 1,000 live births	29.8

The birth-rate is higher, and the infantile mortality rate and the death-rate are lower than that for the Country in general.

62.5% of the deaths were of persons over 70 years of age, including 26.8% over the age of 80 years.

Causes of Death

	M.	F.
Meningococcal infections	1	-

Still Births: NIL

Illegitimate births: 3 or 5.3% of total births.

1911
MICHIGAN

NOTIFICATIONS OF INFECTIOUS DISEASES

Scarlet Fever	5	Whooping Cough	1	Measles	6
Pneumonia	1	Act. Poliomyelitis	4		

The four cases of Poliomyelitis were widely scattered. One boy had obviously been infected before his arrival at a Scout's Camp in the area. He and another child made a good recovery; but the other two cases died, one a few hours after admission to Hospital, the other, in 1951, after many months in Hospital, almost continuously in an "iron lung". These cases were all admitted to the West Wales Isolation Hospital, Tumble, which is now the nearest Isolation Hospital.

TUBERCULOSIS

Three cases of Tuberculosis were notified, of which two were respiratory. One of these was admitted to Hospital. There were no deaths from Tuberculosis.

NATIONAL HEALTH SERVICE ACT, 1946

LOCAL HEALTH SERVICES PART III

VACCINATION

This is carried out by the local doctors, who are paid by the County Council for notification of either successful vaccination, or failure after the second attempt. Records were received of 13 Primary Vaccinations, and 2 Secondary Vaccinations.

IMMUNISATION

This is also carried out by the local doctors, payment being made by the County Council on receipt of the record cards by your Medical Officer of Health.

During 1950 the number of children immunised was only 4 all of whom were under 5 years of age.

Immunisation, and particularly re-inforcing injections for older children, was postponed during the latter part of the year, because of the epidemic of Poliomyelitis which occurred then.

It is very regrettable that the number of children immunised should be so small. If immunisation ceases, diphtheria will undoubtedly return, and it is therefore most important that the number of children immunised should be kept as high as possible.

Other arrangements under this Act are made by the County Council.

NATIONAL ASSISTANCE ACT, 1948

REMOVAL TO SUITABLE PREMISES OF PERSONS IN NEED OF CARE AND ATTENTION.

No action was necessary in this respect.
