ANNUAL REPORT

OF THE

DISTRICT
MEDICAL OFFICER OF HEALTH

AND THE

PUBLIC HEALTH INSPECTOR

1964

WELSH BOARD OF HEALTH.
RECEIVED
10 DEC 1965
P.

Rembridge Rural District Council

ANNUAL
REPORT
OF THE
DISTRICT
MEDICAL OFFICER OF HEALTH
AND THE
PUBLIC HEALTH INSPECTOR

P E M B R O K E R U R A L D I S T R I C T

ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH FOR THE

YEAR 1964

To the Chairman and Members of the Council,

Mr. Chairman, Mrs. Wisbey and Gentlemen,

I have pleasure in presenting to you my Annual Report of the health of the district for the year 1964.

Housing

The number of applicants for re-housing in the rural district has never been high, but there will be a greater problem now that there has been an increase in industry in the area. There have been quite a number of sub-standard cottages throughout the district but gradually these are either being improved by means of a grant or demolished.

Infectious Disease

There was no serious outbreak of infectious disease during the year but three new cases of respiratory tuberculosis were notified. It is known that brucellosis occurs in the district as a fair amount of raw milk is sold in the area, and it is hoped that the Council will agree to the necessary increase in Public Health staff to do this work in addition to the work resulting from recent additional legislation.

Offices, Shops and Railway
Premises Act, 1963.

This Act came into force on the 1st May and this means a good deal of extra work for the Public Health Inspector, but this is all part of the work necessary to see that conditions are suitable for healthy living, which is so vital a part of the work of a Public Health Inspector.

I should like to take this opportunity to thank

THE HONORABLE RURAL DISTRICT

ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH FOR THE

YEAR 1904

To the Chairman and Members of the Council,

Mr. Chairman, Mrs. Wilsby and Gentlemen,

I have pleasure in presenting to you my Annual Report of the health of the district for the year 1904.

Infectious Diseases

There was no serious outbreak of infectious disease during the year but there were cases of respiratory tuberculosis were notified. It is known that bronchitis is in the district as a fair amount of new milk is sold in the area and it is hoped that the Council will agree to the necessary increase in Public Health Acts to do this work in addition to the work resulting from recent additional legislation.

Offices, Shops and Railway
Premises Act, 1903.

This Act came into force on the 1st May and this means a good deal of extra work for the Public Health Inspector, but this is all part of the work necessary to see that conditions are suitable for healthy living, which is so vital a part of the work of a Public Health Officer. I should like to take this opportunity to thank

Maternal Deaths	nil	nil		
Maternal Mortality Rate (per 1,000 Live and Still Births)	nil	nil	1.12	0.25
Deaths	84	69		
Death Rate (per 1,000 pop.)	13.59	11.05	13.30	11.3

Infant Mortality

The Infant Mortality Rate is higher this year as there were six deaths of infants under the age of one year. Five of these were premature births, including two sets of twins, and, as will be seen from the following tabel, all but one of the infants weighed under 3 lbs. 3 ozs. at birth.

<u>Age at Death</u>	<u>Birth Weight</u>	<u>Cause</u>
1. 12 hours } twins	3 lbs. 2½ ozs.	Prematurity
2. 8 " }	2 lbs. 15 ozs.	"
3. 5 days		Acute meningitis
4. 2 hours } twins	2 lbs. 4 ozs.	Prematurity
5. 2 " }	1 lb. 15 ozs.	"
6. 1 " }	5 lbs. 4 ozs.	Prematurity and congenital mal- formation

Deaths (General)

There is a slight increase in the death rate this year but it is only slightly higher than the rate for the County. Of the deaths from malignant disease only one was due to cancer of the lung. This occurred in a man aged 60 years who was known to have been a heavy smoker of cigarettes. 38 of the total number of deaths were due to heart disease. Approximately 69% of the total number of deaths occurred in persons aged over 70 years and, of these, approximately 50% occurred in persons aged over 80 years.

NOTIFICATIONS OF INFECTIOUS DISEASES

The following infectious diseases were notified to us during the year:-

Scarlet Fever	15
Respiratory Tuberculosis	3
Whooping Cough	6
Measles	28
Erysipelas	1

TUBERCULOSIS

One death from respiratory tuberculosis occurred this year in a woman aged 41 years, and three new cases were notified. One of these was a woman aged 37 and the others were school-children aged 12 and 14 years.

PREVENTION OF TUBERCULOSIS

B.C.G. Vaccination B.C.G. Vaccination of contacts and school-leavers continues to be carried out in the district. During the year 1964,

102 school-leavers were skin-tested and 82 of these required vaccination. 3 contacts were also skin-tested and 1 vaccinated. Dr. Llewelyn Davies, the Chest Physician, also vaccinates contacts at the Chest Clinic.

MASS RADIOGRAPHY SERVICE

The Mobile Unit of the Mass Radiography Service paid 12 visits to the Borough of Pembroke during the year. 573 people took the opportunity to have their chests X-rayed and this figure would include residents in the neighbouring rural areas, although separate figures are not available.

NATIONAL HEALTH SERVICE ACT, 1946.

LOCAL HEALTH SERVICES

Vaccination against smallpox and immunisation against diphtheria, whooping cough and tetanus are carried out by the local practitioners and at the clinics. The local practitioners are paid by the County Council for records received each quarter by your Medical Officer. During 1964 the following records were received:-

Vaccinations Primary	51	Re-vaccinations	28
Diphtheria Immunisations	99	Re-inforcing injections	63
Whooping Cough Immunisations	96	Tetanus Immunisations	99

No action was necessary under this section.

REPORT OF THE PUBLIC HEALTH INSPECTOR FOR THE YEAR 1964

WATER SUPPLY

General Report

The newly formed Pembrokeshire Water Board carried out a number of improvements to the mains supplies in various parts of the district as follows.

St. Mary Out Liberty.

As the result of a booster pump being installed, the supply to this parish is now entirely from the trunk main supplying Tenby Borough and as far as is known there were no shortages.

Manorbier

The Park Springs supply was brought into operation and served the south eastern area, and as a result of reducing the demand on the pumps at Stephens Green, the pressure in other parts of the district was increased.

Penally

The Board decided to extend the 6" main from Lydstep to Penally.

Cosheston

A booster pump was installed on this section bringing about a much needed improvement to the supply.

Maidenwells. Hundleton

The capacity of the submersible pump at Stackpole was increased, thereby affording adequate pressures throughout the line to Maidenwells.

Hundleton

The original source of supply from the local springs was abandoned and the village is now supplied entirely from the Wogaston Reservoir.

Greenhill Reservoir

The scheme to supply industrial water to the Regent Refinery at Rhoscrowther was completed, together with the open reservoir at Greenhill, Pwllcrochan.

REPORT OF THE PUBLIC HEALTH INSPECTOR FOR THE YEAR 1924

WATER SUPPLY

General Report

The newly formed Rochester Water Board carried out a number of improvements to the water supply in various parts of the district as follows.

St. Mary's District

As the result of a booster pump being installed, the supply to this portion is now entirely from the main main supplying Tarryborough and as far as is known there were no shortages.

Westerham

The Fair Springs supply was brought into operation and served the south eastern area, and as a result of reducing the demand on the pump at Westham Green, the pressure in other parts of the district was increased.

Penally

The board decided to extend the 6" main from Tarryborough to Penally.

Constitution

A booster pump was installed on this section bringing about a much needed improvement to the supply.

Waldenham, Huddersfield

The capacity of the waterworks pump at Waldenham was increased, thereby affording adequate pressure throughout the line to Waldenham.

Huddersfield

The original source of supply from the local springs was increased and the village is now supplied entirely from the Western Reservoir.

Greenfield Reservoir

The scheme to supply industrial water to the Power Station at Greenfield was completed, together with the open reservoir at Greenfield, Huddersfield.

REPORT

Annual Report 1954-55

Samples

Thirty-seven samples of water were taken during the year and of this total thirty-four samples were taken from the public mains water supply and all were satisfactory.

Two samples were taken from a private farm supply which also served a dairy and as a result of the supply being found polluted, the supply was abandoned and mains water brought to the premises.

A sample from a private supply to a pair of cottages was found to be satisfactory.

At the end of the year the electrical equipment for the previous plant was installed, and the whole scheme for all intents and purposes was completed.

Waterworks

The electrical supply to the pumping station was completed at the end of December, and from then the works were then operational and virtually complete.

Waterworks

Progress on this scheme, which commenced during October, proceeded fairly satisfactorily, though work commenced had shown no work to have been done.

Waterworks

At the end of the year the scheme had been almost completed together with all of the disposal works. In view of new private housing development, the Council also decided, under Section 12 of the Public Health Act, 1936, to extend the original sewer to the new development.

Waterworks

Waterworks

The final plans for the scheme were approved by the Council and submitted to the Ministry of Housing and Local Government, and other interested bodies.

Analysis

Thirty-seven samples of water were taken during the year and of this total thirty-four samples were taken from the public mains water supply and all were satisfactory.

Two samples were taken from a private farm supply which also served a dairy and as a result of the supply being found polluted, the supply was discontinued and mains water brought to the premises.

A sample from a private supply to a pair of cottages was found to be satisfactory.

Schemes in Progress

Angle Village

This scheme was completed during the year and the twelve council houses, public convenience, caravan site and two private properties were connected to the sewerage system. Statutory notices, in respect of all other properties, were served requiring conversion of earth closets to water closets, and connection of existing W.C's to the sewer.

Lamphey Village

At the end of the year the electrical equipment for the pumping plant was installed, and the whole scheme to all intents and purposes was completed.

Rhoscrowther Village

The electricity supply to the pumping station was connected at the end of December, and here again the works were then operational and virtually complete.

Castlemartin Village

Progress on this scheme, which commenced during October, proceeded fairly satisfactorily, though rock excavation had slowed up work to some extent.

St. Florence Village

At the end of the year the sewers had been almost completed together with 80% of the disposal works. In view of new private housing development, the Council also decided, under Section 12 of the Public Health Act, 1961, to extend the original sewer so as to serve these properties.

Schemes under consideration

Cosheston Village

The final plans for this scheme were approved by the Council and submitted to the Ministry of Housing and Local Government, and other interested bodies.

Scheme in Progress

Local Villages

This scheme was completed during the year and the twelve council houses, public conveniences, carmen site and two private properties were connected to the sewerage system. Statutory notices, in respect of all other properties, were served requiring conversion of drains close to water closets, and connection of existing W.C.'s to the sewer.

Local Villages

At the end of the year the electrical equipment for the pumping plant was installed, and the whole scheme for all houses and purposes was completed.

Intermediate Villages

The electricity supply to the pumping station was connected at the end of December, and here again the works were then operational and virtually completed.

Outer Villages

Progress on this scheme, which commenced during October, proceeded fairly satisfactorily, though rock excavation had slowed up work to some extent.

St. Francis Village

At the end of the year the sewers had been almost completed together with 80% of the disposal works. In view of new private housing developments, the Council also decided, under Section 15 of the Public Health Act, 1961, to extend the original sewer as far as to serve these properties.

Scheme under consideration

Outer Villages

The final plans for this scheme were approved by the Council and submitted to the Ministry of Housing and Local Government, and other interested bodies.

St. Twynnel's Village

As with Cosheston the final plans were forwarded to the various interested parties during November.

Lawrenny Village

Preparatory investigations were carried out but some delay was encountered due to the failure to agree on apportionment of costs in respect of a contemplated large scale private development at Lawrenny Ferry.

Hundleton Village

During the year investigations and inspections took place to select a suitable site for a disposal works.

St. Mary Out Liberty

Subject to minor amendments the Ministry of Housing and Local Government approved in principle this scheme and asked for the full detailed plans.

Maidenwells, Hundleton

The Council decided to commence joint consultations with the Pembroke Borough Council to sewer some thirty-one properties, twelve of which are situate within the Rural District.

Stackpole Village

Preliminaries began early in the year, and a suitable site was soon found for the treatment works, and final details of the scheme prepared.

Redberth Village

It was decided to reconsider a scheme previously prepared for this locality.

Frankleston Area: Penally

Branders Park Area: Carew

Consideration was given to the provision of public sewerage in respect of these areas, and preliminary investigations were commenced by the Council.

St. Lawrence Village

As with Cochrane the final plans were forwarded to the various interested parties during November.

Lawrence Village

Preparatory investigations were carried out but some delay was encountered due to the failure to agree on appointment of costs in respect of a contemplated large scale private development at Lawrence Ferry.

Lawrence Village

During the past investigations and inspections took place to assess a suitable site for a disposal works.

St. Mary's Village

Subject to minor amendments the Ministry of Housing and Local Government approved in principle this scheme and asked for the full detailed plans.

St. Mary's Village

The Council decided to commence joint consultation with the Lincoln Borough Council to secure some thirty-one properties, twelve of which are situated within the Rural District.

St. Mary's Village

Preliminary began early in the year, and a suitable site was soon found for the treatment works, and final details of the scheme prepared.

St. Mary's Village

It was decided to reconsider a scheme previously prepared for this locality.

St. Mary's Village

St. Mary's Village

Consideration was given to the provision of public services in respect of these areas and preliminary investigations were commenced by the Council.

Maintenance of Sewage Disposal Works

During the year provision was made to include for a new cesspool emptier in the estimates for 1965/66, and the regular sampling of effluents from all works, copies of the reports to be automatically forwarded to the Medical Officer of Health, South West Wales River Board and Consulting Engineers.

It also became apparent that extra staff would be required as additional sewage disposal works came into operation and this was accepted by the Council.

HOUSING

Council Houses

In accordance with Ministerial advice and after considerable discussion, there was unprecedented progress during the year. A special meeting was held during January to plan the Council's future housing programme, and it was decided to inspect and report on all suitable sites within the district.

In March, this report was presented to the Council and embraced some twelve potential housing sites.

During July a further special meeting prepared a three year Council Housing Programme detailed as follows:

Parish, etc.	Dwellings under construction or in tenders approved or submitted for approval.	Three year programme of dwellings proposed to be erected in addition to the numbers stated in column (b)
(a)	(b)	(c)
Angle	14	20
Carew: Milton: Summers Villas	1	-

During the year provision was made to include for a new cesspool together in the estimates for 1955/56, and the regular sampling of effluents from all works, copies of the reports to be automatically forwarded to the Medical Officer of Health, South West Wales River Board and Consulting Engineers.

It also became apparent that extra staff would be required as additional sewage disposal works came into operation and this was accepted by the Council.

Housing

Council House

In accordance with Ministerial advice and after considerable discussion, there was unopposed progress during the year. A special meeting was held during January to plan the Council's future housing programme, and it was decided to inspect and report on all suitable sites within the district.

In March, this report was presented to the Council and endorsed some twelve potential housing sites.

During July a further special meeting prepared a three year Council Housing Program described as follows:

Three year programme of development to be provided for the number of houses	Proposals under consideration or submitted for approval	Houses, etc.

Housing for the elderly

After much discussion and following a joint meeting of the various local authorities in Pembrokeshire at Haverfordwest during November 1963, the Council decided not to provide communal facilities for the elderly, and that the minimum accommodation would be a two bedroomed bungalows. The reasons for this decision were as follows:-

1. The comparative costs of providing a one bedroom bungalow and a two bedroom bungalow would be very small having regard to the additional accommodation.
2. Most old folk are reluctant to leave their cottages, and in the absence of a known demand, it was felt that it would be unwise to provide new homes which would be unsuited to young couples recently married.
3. There is an accepted resistance by old people in rural areas to move from their villages to reside in communal homes or special housing projects where warden facilities are to be provided. There is also opposition from old people to move into such accommodation even if provided within their own villages, although an increasing number are showing an interest in Council bungalows and are in fact being allocated a fair share of all new and vacant dwellings. It is anticipated that this trend will continue and an even greater proportion of new housing will in future be allocated to the elderly.

Housing layouts

One of the major disappointments, resulting in a set back, was the Ministry of Housing and Local Government's insistence on certain sites being developed on a segregated layout basis. The Council, being mindful of the problems of straying farm animals on such sites in rural areas, and in fact already manifested at Rhoscrowther, was unable to reach a decision regarding the 9.133 acres at Hundleton which it had hoped to develop primarily for industrial workers.

It was made known that the Highway Authority are not prepared to adopt estate roads provided with cattle grids, and the Council were unfortunately caught between two stools. It is to be hoped therefore that an early solution can be found to this problem which may become more evident as time passes and result in delays to housing projects in the district.

The number of Council Houses completed during the year was twenty-eight, and the total number of Council Houses in the district is 330, of which three have been sold to the Tenants.

Housing for the elderly

After much discussion and following a joint meeting of the various local authorities in the district at Harrogate during November 1963, the Council decided not to provide council housing for the elderly, and that the minimum accommodation would be a two bedroom house. The reasons for this decision were as follows:-

1. The comparative costs of providing a one bedroom bungalow and a two bedroom bungalow would be very small having regard to the additional accommodation.
2. Most old folk are reluctant to leave their cottages, and in the absence of a house, it was felt that it would be unwise to provide new houses which would be wanted by young couples recently married.
3. There is an accepted practice by old people in rural areas to move from their villages to reside in council houses or special housing projects where welfare facilities are to be provided. There is also opposition from old people to move into such accommodation even if provided within their own villages, although an increasing number are showing an interest in Council bungalows and are in fact being allocated a fair share of all new and vacant dwellings. It is anticipated that this trend will continue and an even greater proportion of new housing will in future be allocated to the elderly.

Housing for the young

One of the major disappointments, resulting in a net loss, was the Ministry of Housing and Local Government's insistence on certain sites being developed on a negotiated layout basis. The Council, being mindful of the problems of creating large areas on such sites in rural areas, and in fact already manifested at Harrogate, was unable to reach a decision regarding the 9.133 acres at Hambleton which it had hoped to develop primarily for industrial workers.

It was made known that the Highway Authority are not prepared to adopt estate roads provided with cattle grids, and the Council were unfortunately caught between two stools. It is to be hoped therefore that an early solution can be found to this problem which may become more evident as the process and result in delays to housing projects in the district.

The number of Council Houses completed during the year was twenty eight, and the total number of Council Houses in the district is 330 of which three have been sold to the tenants.

Schemes completed from 1963 programme

At the commencement of the year the following schemes were under construction, and all were completed before the end of the year:-

Hundleton	-	4 Bungalows.
Lamphey	-	10 Bungalows.
Cosheston	-	4 Bungalows.

New Schemes commenced or completed during the year

Angle Village

At the end of the year three small sites were being developed and a total of fourteen bungalows were under construction.

Penally Village

Work commenced on the site works towards the end of the year. The scheme incorporated five houses with garages and six flats for the elderly.

Lamphey Village

Four one-bedroomed bungalows were commenced and were near completion at the end of the year.

Cosheston

Four two-bedroomed bungalows were completed on an extension to the existing site at Woodfield Grove, and a further six two-bedroomed bungalows and twelve garages were commenced, thereby completing the development of land already owned by the Council.

Hundleton

Four two-bedroomed bungalows were completed on the River View Estate, completing the development of land already owned by the Council on this site.

Jameston

Six one-bedroomed bungalows were commenced during the year, and were at an advanced stage of construction in December.

Schemes completed from 1961 to 1962

At the commencement of the year the following schemes were under construction, and all were completed before the end of the year:-

Huddleton	-	4 Bungalows.
Laphey	-	10 Bungalows.
Cotherton	-	4 Bungalows.

New Schemes commenced or completed during the year

Apple Village

At the end of the year three small sites were being developed and a total of fourteen bungalows were under construction.

Beehive Village

Work commenced on the site works towards the end of the year. The scheme incorporated five houses with garages and six flats for the elderly.

Laphey Village

Four one-bedroomed bungalows were commenced and were nearly completed at the end of the year.

Cotherton

Four two-bedroomed bungalows were completed on an extension to existing site at Woodfield Grove, and a further six two-bedroomed bungalows and twelve garages were commenced, thereby completing the development of land already owned by the Council.

Huddleton

Four two-bedroomed bungalows were completed on the River View Estate, completing the development of land already owned by the Council on this site.

Laphey

Six one-bedroomed bungalows were commenced during the year, and were at an advanced stage of construction in December.

Rhoscrowther

Work on twelve three-bedroomed bungalows on this site progressed satisfactorily with three pairs of bungalows completed at the end of the year. These dwellings were provided to accommodate industrial workers at the nearby refinery, and tanker terminals.

Housing Improvement Grants

A total of twelve applications were received for Discretionary Grants and a further three in respect of Standard Grants. Altogether seventeen dwellings were so modernised, eleven with Discretionary Grants and six with Standard Grants.

Unfit Houses

A total of fourteen unfit houses were closed during the year.

INSPECTION OF DWELLING HOUSES DURING THE YEAR

Total number of dwelling houses inspected for housing defects (under Public Health or Housing Acts).	39
Number of dwelling houses inspected and recorded under the Housing (Consolidated) Regulations 1925 & 1932 included in previous column.	-
Number of dwelling houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation.	14
Number of dwelling houses found not to be in all respects reasonably fit for human habitation (exclusive of those in previous column).	8
Number of defective dwelling houses rendered fit in consequence of informal action by the local authority or their officers.	16

Prospectus

Work on twelve three-bedroom bungalows on this site progressed satisfactorily with three pairs of bungalows completed at the end of the year. These dwellings were provided to accommodate industrial workers at the nearby refinery, and Lashan Chemicals.

Housing Improvement Grants

A total of twelve applications were received for Discretionary Grants and a further three in respect of Standard Grants. Altogether seventeen dwellings were so modernised, eleven with Discretionary Grants and six with Standard Grants.

Wart House

A total of fourteen Wart House were closed during the year.

INSPECTION OF DWELLING HOUSES DURING THE YEAR

Total number of dwelling houses inspected for housing defects (under Public Health or Housing Acts).

Number of dwelling houses inspected and recorded under the Housing (Consolidated) Regulations 1925 & 1933 included in previous column.

Number of dwelling houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation.

Number of dwelling houses found not to be in all respects reasonably fit for human habitation (exclusive of those in previous column).

Number of defective dwelling houses referred to in correspondence of informal action by the local authority or their officers.

Private Development

As will be seen in the following statistics, private housing continued to rise thereby injecting new life into a number of villages. Favourable progress in modernising existing cottages is also recorded.

HOUSING STATISTICS

ACTION UNDER STATUTORY POWERS DURING YEAR

Housing Act, 1936, Sections 9, 10 & 11

- Number of dwelling houses in respect of which notices were served requiring repairs.
- Number of dwelling houses rendered fit after service of formal notices (by Owners).

Public Health Acts

- II Number of dwelling houses in respect of which notices were served requiring defects to be remedied.
- Number of dwelling houses in which defects were remedied after service of formal notices.

Housing Act, 1936, Sections 12 & 13

- Number of dwelling houses in respect of which demolition orders were made.
- Number of dwelling houses demolished in pursuance of demolition orders.

Housing Act, 1936, Section 15

- IA Number of separate tenements or underground rooms in respect of which closing orders were made.

HOUSING ACT, 1936, PART IV - OVERCROWDING

- Number of dwelling houses overcrowded at end of year. Not known
- " Number of families dwelling therein.
- " Number of persons dwelling therein.
- " Number of new cases of overcrowding reported during year.
- Number of cases of overcrowding relieved during year.
- Number of persons concerned in such cases.

SLAUGHTERHOUSES

The Meat Inspection Regulations, 1963

Strict compliance in accordance with the above regulations was effected throughout the year and 100% inspection was made at the private slaughterhouse within the district.

	<u>Cattle excluding Cows</u>	<u>Cows</u>	<u>Calves</u>	<u>Sheep & Lambs</u>	<u>Pigs</u>	<u>Horses</u>
Number killed	94	1	2	438	119	-
<u>All diseases except Tuberculosis and Cysticercosis</u>						
Whole carcasses condemned	-	-	-	-	-	-
Carcasses of which some part or organ was condemned	21	-	-	17	-	-
Tuberculosis only	-	-	-	-	1	-
Cysticercosis	-	-	-	-	-	-

REFUSE COLLECTION AND DISPOSAL

As in previous years there was a continued rise in the volume of refuse collected. Litter again presented a problem during the summer, particularly near beaches, and although a number of paper sack litter containers were provided they were totally inadequate even when emptied thrice weekly.

It became obvious that the enormous pressures caused by the many thousands of holidaymakers would necessitate an additional collection vehicle for the following summer months, and that many more litter holders would be required not only near beaches, but also in villages and hamlets.

RODENT CONTROL

This self-supporting service continued to expand and treatments were regularly carried out on housing sites, sewers and refuse tips. As in previous years, a large proportion of farms in the district renewed their contracts with the Council.

WASTE COLLECTION AND DISPOSAL

As in previous years there was a continued rise in the volume of refuse collected. Litter again presented a problem during the summer, particularly near beaches, and although a number of paper sack litter containers were provided they were totally inadequate even when supplied twice weekly.

It became obvious that the enormous pressure caused by the many thousands of holiday-makers would necessitate an additional collection vehicle for the following summer months, and that many more litter holders would be required not only near beaches, but also in villages and suburbs.

ROBBERY CONTROL

This anti-robbing service continued to expand and treatments were tentatively carried out on housing estates, sewers and refuse tips. As in previous years, a large proportion of claims in the district renewed their contracts with the Council.

CARAVANS AND TENTS

Once again the most serious public health problem was caused by the annual influx of caravanners and campers, and it became apparent that steps must be taken to exercise greater control over the establishment of tented camping sites. Before the end of the year operators were invited to submit applications for licences.

Altogether a total of twenty-seven caravan sites were operating under licence, catering for a total of 1,550 caravans.

CLEANSING OF BEACHES

The Council considered the nuisance caused by the pollution of beaches by oil and decided to engage the services of a company experienced in this work. As a trial experiment, the beach at West Angle Bay was cleansed and the following report presented to the Council.- "... The first phase of the operation involved raking into heaps and then removing some three lorry loads of oily seaweed. Secondly all heavily oiled large stones were pulled from the upper edge of the beach and left in a position where they would be more subject to the cleansing effect of the tide at highwater. Thirdly, the shingle, pebble and stones, which form in a narrow strip just above the normal spring tide highwater mark, were sprayed with Polyclens just prior to the high tide on the Sunday evening.

Unfortunately the wind dropped completely and the cleansing of the stones was not as complete as had been hoped, due to the tide not reaching the whole area sprayed. Nevertheless, the operation was considered successful and the public are known to be most appreciative of the Council's efforts. Even one month after the work had been carried out, there is little evidence of further pollution, which tends to suggest that there is reasonable hope that the normal pattern of pollution is accumulative, and whilst all oil can never be completely removed, cleaning of the beaches once or twice each year prior to the summer season may be very successful.

In particular it is suggested that if all the seaweed brought in by the early spring tides could be removed from the beaches and the shingle sprayed with chemicals, and then a further cleansing during June, the beaches may remain clean throughout the season. The reason for this is because of the belief that much of the oil pollution is brought in with the seaweed.

In conclusion, further study of the problem is required, particularly in conjunction with the two oil companies within the district, as it is felt that it may be more economical for the Council to carry out beach cleaning by direct labour as a matter of routine, particularly if some form of assistance were forthcoming from the companies."

CLEANING OF BEACHES

The reason for this is because of the belief that much of the oil pollution is brought in with the seaweed.

In conclusion, further study of the problem is required, particularly in conjunction with the two oil companies within the district, as it is felt that it may be more economical for the Council to carry out beach cleaning by direct labour as a matter of routine, particularly if some form of assistance were forthcoming from the companies."

MILK SUPPLIES

Brucella Abortus

Nineteen samples of milk were taken during the year, none of which were found positive after culture. However, although the vast majority of inhabitants are supplied with pasteurised milk, in view of the probable incidence in herds of Brucella Abortus and the fact that considerable quantities of raw milk are sold to holiday makers in particular, it was realised that systematic sampling would in future be required in order to protect the public.

Liquid Egg (Pasteurisation) Regulations, 1963

There are no egg pasteurisation plants within the district.

Offices, Shops and Railway Premises Act, 1964

Application forms for registration were sent in respect of all premises to which the above act applies.

MILK SUPPLIES

Brucella Abortus

Minutest samples of milk were taken during the year, none of which were found positive after culture. However, although the vast majority of inhabitants are supplied with pasteurized milk, in view of the probable incidence in herds of Brucella Abortus and the fact that considerable quantities of raw milk are sold to holiday makers in particular, it was realized that systematic sampling would in future be required in order to protect the public.

Island Milk (Pasteurization) Regulations, 1963

There are no egg pasteurization plants within the district.

Ordinance, Shops and Railway Premises Act, 1947

Application forms for registration were sent in respect of all premises to which the above act applies.

CLEAN AIR ACT, 1956

Industrial Development

The Regent Oil Refinery at Rhoscrowther was completed and production commenced during the summer. Unfortunately due to a number of circumstances, the plant emitted black smoke on many occasions, resulting in complaints. A number of visits were made to ascertain the steps being taken by the company to abate the nuisance and the Alkali Inspector also frequently paid routine visits to give advice on the matter, but at the end of the year the nuisance persisted.

It was however decided to convene joint meetings of the public health inspectors of the several authorities bordering Milford Haven and the first meeting took place at the offices of the Milford Haven Port Health Authority.

Subsequently the Council decided to provide monitoring and recording apparatus in various parts of the district to obtain information on the existing pollution of the atmosphere from both industrial and domestic sources in collaboration with the D.S.I.R. at the Warren Spring Laboratory at Stevenage.

Central Electricity Generating Board

A meeting was arranged to discuss with the Board the measures to be taken to avoid atmospheric pollution when the Power Station, at Pwllcrochan was in operation.

Street Lighting

Following the adoption of Street Lighting powers for the whole of the district, a comprehensive programme was prepared and a number of villages were provided with street lighting for the first time.

J. E. CRIDDLE.

PUBLIC HEALTH INSPECTOR.

CLEAN AIR ACT, 1954

Industrial Development

The Regent Oil Refinery at Rhosonowhar was completed and production commenced during the summer. Unfortunately due to a number of circumstances, the plant emitted black smoke on many occasions, resulting in complaints. A number of visits were made to assist in the steps being taken by the company to abate the nuisance and the Area Inspector also frequently paid routine visits to give advice on the matter, but at the end of the year the nuisance persisted.

It was however decided to convene joint meetings of the public health inspectors of the several authorities bordering Milford Haven and the first meeting took place at the offices of the Milford Haven Port Health Authority.

Subsequently the Council decided to provide monitoring and recording apparatus in various parts of the district to obtain information on the existing pollution of the atmosphere from both industrial and domestic sources in collaboration with the D.S.I.R. at the Warren Spring Laboratory at Stevenage.

Central Electricity Generating Board

A meeting was arranged to discuss with the Board the measures to be taken to avoid atmospheric pollution when the lower section of the power station was in operation.

Street Lighting

Following the adoption of Street Lighting powers for the whole of the district, a comprehensive programme was prepared and a number of villages were provided with street lighting for the first time.

J. E. CRIDDLE.

PUBLIC HEALTH INSPECTOR.
