1972

ANNUAL
REPORT

OF THE

DISTRICT

MEDICAL OFFICER OF HEALTH

AND THE

PUBLIC HEALTH INSPECTOR~~S~~

Pembroke Rural District Council

ANNUAL
REPORT

OF THE

DISTRICT

MEDICAL OFFICER OF HEALTH

AND THE

PUBLIC HEALTH INSPECTORS

PEMBROKE RURAL DISTRICT COUNCIL.

ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH FOR THE
YEAR 1972.

To the Chairman and Members of the Council,

Mr. Chairman, Ladies and Gentlemen,

I have pleasure in presenting to you the Annual Report on the health of your district for the year 1972.

HOUSING.

The total number of houses built in the rural district during the year was 77; 11 of these were council dwellings and the remaining 66 were private houses and flats. The standard of the houses in the district is good and a total of 57 discretionary and 4 standard grants were approved by the Council in 1972. In addition to the houses which were completed, other council dwellings were under construction and a number of older council properties were modernised. Other schemes for the construction of council bungalows and flats in various parts of your district, were in the planning stage at the end of the year. There was a total of 150 applicants on the housing waiting list at the end of the year.

The Housing Finance Act became law in October 1972, instituting a system of rent rebates for tenants whose income fell below a certain level.

INFECTIOUS DISEASES.

Only a small number of infectious diseases were notified to me from your district during the year. These included 11 cases of measles, which occurred towards the end of the year - an outbreak of which started in October; no complications were reported among the children who contracted the disease. Summer gastro-enteritis was again prevalent throughout the whole of the rural district during the holiday season and made its appearance at the end of May. This illness was generally mild in character and was not confined to your area but occurred in all parts of the county. A small number of cases of influenza (English type) were reported during the winter months, with one death.

MILK SUPPLIES.

I am pleased to report that during 1972, the majority of producer/retailers of milk had joined the Brucellosis Incentive Scheme and by the end of the year a total of 13 retailers were accredited by the Ministry of Agriculture Fisheries and Food. Sampling of milk from all herds has been carried out and it was not necessary to issue any new Pasteurisation Orders because of brucellosis infected herds during the year.

ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH FOR THE

YEAR 1972

To the Chairman and Members of the Council,

Mr. Chairman, Ladies and Gentlemen,

I have pleasure in presenting to you the Annual Report on the health of your district for the year 1972.

HOUSING

The total number of houses built in the rural district during the year was 77; 11 of these were council dwellings and the remaining 66 were private houses and flats. The standard of the houses in the district is good and a total of 27 alterations and 4 standard grants were approved by the Council in 1972. In addition to the houses which were completed, other council dwellings were under construction and a number of other council properties were completed. Other schemes for the construction of council houses and flats in various parts of your district were in the planning stage at the end of the year. There was a total of 150 applicants on the housing waiting list at the end of the year.

The Housing Finance Act passed in October 1972, instituting a system of rent rebates for tenants whose income fell below a certain level.

DISTRICT DISEASES

Only a small number of infectious diseases were notified to me from your district during the year. These included 11 cases of measles, which occurred towards the end of the year - an outbreak of which started in October; no notifications were reported among the children who contacted the disease. Great gastro-enteritis was again prevalent throughout the year of the rural district during the holiday season and made its appearance at the end of May. This illness was generally mild in character and was not confined to your area but occurred in all parts of the county. A small number of cases of influenza (British type) were reported during the winter months, with one death.

MILK SUPPLIES

I am pleased to report that during 1972, the majority of producers of milk had joined the British Milk Producers' Federation and by the end of the year a total of 17 producers were accredited by the Ministry of Agriculture, Fisheries and Food. Sampling of milk from all herds has been carried out and it was not necessary to issue any new Pasteurisation Orders because of bacterial infested herds during the year.

CARAVANNING AND CAMPING.

This form of holiday continues to increase in popularity and a number of visits were made by your Public Health Inspector and myself to the caravan and tent sites during the year. A special concession is given at the height of the season to caravan site operators for the accommodation of touring caravans; this prevents unauthorised parking at roadsides and lay-bys. Standards at established sites are generally good and improved facilities are being provided annually for the visitors.

I should like to take this opportunity of thanking the Members of the Council and its Officers for their courtesy and co-operation during the year.

I have the honour to be,

Your obedient servant,

M Lawlor

INFANT DEATHS.

Three infants under 1 year of age died in hospital during the year; details are as follows :-

- 1) 4 hours. Female child. Cerebral haemorrhage.
- 2) Under 1wk. Male child. Gastro-enteritis.
- 3) 2 months. Female child. Broncho-pneumonia.

DEATHS (General).

Again this year, heart disease accounted for the highest number of deaths - 34, with malignant conditions claiming 16 deaths; 2 male patients and 1 female patient died from cancer of the lung.

Approximately 20.7% of the total deaths occurred in persons aged between 70 and 80 years and approximately 33% in persons aged over 80 years.

<u>Causes of Death.</u>	<u>Male.</u>	<u>Female.</u>

NOTIFICATIONS OF INFECTIOUS DISEASES

The following cases of infectious diseases were notified to the local health officer during the year 1945 :-

- 11 Measles
- 1 Respiratory Tract Infection
- 2 Food Poisoning
- 1 Scarlet Fever

TUBERCULOSIS.

I am pleased to report that there were no deaths from tuberculosis this year and only one new case of respiratory tuberculosis was notified - a male patient in the 55-64 years age group.

Prevention of Tuberculosis. B.C.G. Vaccination: The usual autumn visit was made to the two secondary schools in your area, when a total of 188 13 year old pupils received vaccination. Contacts continue to be investigated and vaccinated if necessary at the chest clinics held regularly at South Pembrokeshire Hospital and at Haverfordwest.

NATIONAL HEALTH SERVICE ACT 1946.

Local Health Services: The monthly infant welfare clinic, staffed by a health visitor and medical officer, continued to be held at Pembroke during the year, where immunisations and vaccinations were carried out. School sessions were held for school entrants to receive booster doses in the Spring and Summer terms and also Rubella vaccinations were offered to 13 year old girls in the Secondary Schools.

The following details refer to all schoolchildren (under the age of 16 years) who received vaccinations and immunisations in the County during 1972 :-

Triple immunisations:	1,457
Booster Diph./Tet. doses:	1,213
Whooping cough immunisations:	1,457
Tetanus immunisations:	1,650
Booster tetanus doses:	1,455
Poliomyelitis vaccs:	1,515
Booster polio. doses:	1,174
B.C.G. vaccinations:	1,081
Measles vaccinations:	640
Rubella vaccinations:	480.

NATIONAL ASSISTANCE ACTS, 1948 & 1951.

Section 47: Removal to suitable premises of persons in need of care and attention.

No action was necessary under the above Section in your district during 1972.

I am pleased to report that there were no deaths from tuberculosis this year and only one new case of respiratory tuberculosis was notified - a male patient in the 25-34 years age group.

Prevention of Tuberculosis, B.C.G. Vaccination: The usual autumn visit was made to the two secondary schools in your area, when a total of 188 12 year old pupils received vaccination. Contacts continue to be investigated and vaccinated if necessary at the chest clinics held regularly at South Fehrschke's Hospital and at Haverfordwest.

NATIONAL HEALTH SERVICE ACT 1946.

Local Health Services: The monthly infant welfare clinic, staffed by a health visitor and medical officer, continued to be held at Pembrokeshire during the year, where immunisations and vaccinations were carried out. School sessions were held for school entrants to receive booster doses in the Spring and Summer terms and also Rubella vaccinations were offered to 12 year old girls in the Secondary Schools.

The following details refer to all schoolchildren (under the age of 16 years) who received vaccinations and immunisations in the County during 1975 :-

Triple immunisations:	1,457

REPORT OF THE PUBLIC HEALTH INSPECTOR AND SURVEYOR

FOR THE YEAR 1972

SEWERAGE

Schemes completed prior to 1972

Milton/Carew Cheriton	Carew
Manorbier/Jameston	Penally
Lydstep	Lamphey
Angle	St. Florence
Rhoscrowther	Castlemartin
Stackpole	Cosheston
Broadfield/Twycross/New Hedges	Hundleton
St. Twynells	

Schemes under consideration:

Carew/Branders Park/Lawrenny/Redberth

Although details of this scheme have been completed since 1971, authority to proceed has been withheld, probably due to the scheme being required eventually to be integrated with the Regional Sewerage Scheme.

Regional Sewerage Scheme

Further investigation continued, and discussions extended to include both Pembroke Borough Council and Narberth Rural District Council. The Catchment area was also extended to include Pembroke Borough, other surrounding villages within the Rural District, as well as the village of Saundersfoot.

As a result of a further hydrographic Survey, it was recommended that the most advantageous location for the submarine pipe line was situate at Manorbier.

However, local opposition to this proposal resulted in several meetings in the village when the Council's Consulting Engineers explained the scheme. Before the end of the year, a number of written objections were lodged at the Department of the Environment, and it was becoming apparent that the scheme would require a public enquiry to determine the issue.

SEWERAGE TREATMENT WORKS

Sampling

As in previous years, regular sampling continued as standard practice, and all results were reported to the Council and the South West Wales River Authority.

Out of a total of 24 samples, 22 of these satisfied Royal Commission Standards.

St. Twynells Sewage Treatment Works

Negotiations were carried on with the Pembrokeshire Water Board in an endeavour to overcome possible objections, resulting from the abstraction of water downstream at Stembridge.

REPORT OF THE PUBLIC HEALTH INSPECTOR AND SURVEYOR

FOR THE YEAR 1977

SEWERAGE

Schemes completed prior to 1977

Garow	Milton/Garow
Genally	Manorfield/Jackson
Lampay	Lydney
St. Florence	Anglo
Castlemartin	Rhoscowther
Cocheston	St. Gwynnells
Hundleton	Broadfield/Tyvorova/New Hedges

Schemes under consideration:

Garow/Hundred Park/Lawrenny/Bodorth

Although details of this scheme have been completed since 1971, authority to proceed has been withheld, probably due to the scheme being required eventually to be integrated with the Regional Sewerage Scheme.

Regional Sewerage Scheme

Further investigation continued, and discussions extended to include both Pembrokeshire Council and Northern Rural District Council. The Council area was also extended to include Pembrokeshire Borough, other surrounding villages within the Rural District, as well as the village of Sandarsfoot.

As a result of a further hydrographic survey, it was recommended that the most advantageous location for the submarine pipe line was at Sandarsfoot.

However, local opposition to this proposal resulted in several meetings in the village when the Council's Consulting Engineers explained the scheme. Before the end of the year, a number of written objections were lodged at the Department of the Environment, and it was becoming apparent that the scheme would require a public enquiry to determine the issue.

SEWERAGE TREATMENT WORKS

Sampling

As in previous years, regular sampling continued as standard practice, and all results were reported to the Council and the South West Wales River Authority.

Out of a total of 24 samples, 22 of these satisfied BGV1 Compendium standards.

St. Gwynnells Sewerage Treatment Works

Negotiations were carried on with the Pembrokeshire Water Board in an endeavour to overcome possible objections, resulting from the abstraction of water downstream at Sandarsfoot.

HOUSING

Council Housing Stock at the end of 1972

Four bedroom houses.	9
Three bedroom houses and bungalows.	293
Two bedroom houses and bungalows.	133
One bedroom flats and bungalows.	<u>20</u>
TOTAL	<u>455</u>

Schemes under Construction

Angle Site No. 13

The remaining six houses were completed, although some remaining siteworks were still outstanding.

Stackpole Village Sites Nos. 2 and 3

For the second year in succession, progress has been most unsatisfactory and only three bungalows were completed out of a total of 25.

Lamphey Village Park View Scheme No. 58

Two old people's bungalows were completed.

Schemes under Consideration

Kesteven Court, Carew

(Eight two-bedroom and four three-bedroom bungalows)

There was no progress whatsoever on the above project, although a revised tender was approved subject to the approval of the Welsh Office.

The Rise, Redberth

(Two two-bedroom bungalows)

Again there was no progress, although by the end of the year, it seemed likely that a start would be made in 1973.

St. Twynnells

Planning permission was awaited for a site at St. Twynnells.

HOUSING

Council Housing Stock at the end of 1975

WATER

Schemes completed

Orielton Mountain/Bowett Hill

WATER SAMPLES

As in previous years, the bulk of the samples were taken by the Pembrokeshire Water Board.

Details of all samples are as follows:-

233 Samples were taken for bacteriological examination, of which, 3 were initially unsatisfactory.

Repeat sampling however, revealed satisfactory results.

STREAMS

No samples were taken.

MILK SUPPLIES

Routine Bucella sampling continued to be undertaken by the County Weights and Measures Department, along with the normal work of the Department, thus avoiding unnecessary duplication of effort.

Herds so affected were immediately controlled by Pasteurisation Orders.

Number of Milk samples taken	<u>102</u>
Number Ring test Positive	<u>Nil</u>
Pasteurisation Order in Force at the end of the year.	<u>1</u>

Accredited Herds

Good progress continued throughout the year, and the total of herds now accredited is thirteen.

An increasing number of herds are also undergoing screening tests.

Number Ring test Positive	Nil
Pasteurisation Order in force at the end of the year.	1

Accredited Herds

Good progress continued throughout the year, and the total of herds now accredited is thirteen.
An increasing number of herds are also undergoing serotyping tests.

PUBLIC CONVENIENCES

Once again, the year has been notable by the absence of vandalism, and this, it is believed, is due in no small part, to the Council's policy of providing free facilities.

Conveniences under Construction

Lawrenny Ferry

This convenience was completed shortly before the end of the Summer, and is situated in an area that is becoming increasingly popular with both holidaymakers and local residents.

St. Florence Village

Although not completed, it was confidently expected to be open to the public well in advance of the 1973 Summer season.

Conveniences under Consideration

Barafundle

Broadhaven

Freshwater East

No works of construction commenced on any of these public conveniences, but at the end of the year, it appeared that tenders would be invited for Barafundle and Broadhaven during 1973.

It appeared unlikely that the new larger public convenience at Freshwater East would be built until the result of the public enquiry into the re-development of the area.

CARAVANNING AND CAMPING

For the third year running, the staff of the Wales Tourism Council at Kilgetty worked extremely hard in helping to place campers on sites within the district.

Site owners also co-operated by telephoning daily and thereby enabling the staff to maintain a day-to-day assessment of availability of pitches.

Although no actual statistics are available, there are indications that the Spring Bank Holiday is becoming more popular with holiday-makers.

PUBLIC CONVENIENCES

Once again, the year has been notable by the absence of vandalism, and this, it is believed, is due in no small part to the Council's policy of providing free facilities.

Conveniences under Construction

Laurton Ferry

This convenience was completed shortly before the end of the summer, and is situated in an area that is becoming increasingly popular with both holidaymakers and local residents.

St. Florence Village

Although not completed, it was confidently expected to be open to the public well in advance of the 1975 summer season.

Conveniences under Construction

Barrowdale

Broadhaven

Freshwater East

No works of construction commenced on any of these public conveniences, but at the end of the year, it appeared that tenders would be invited for Barrowdale and Broadhaven during 1975.

It appeared unlikely that the new larger public conveniences at Freshwater East would be built until the result of the public enquiry into the re-development of the area.

CARAVANING AND CAMPING

For the third year running, the staff of the Wales Tourist Council at Ridgety worked extremely hard in helping to place campers on sites within the district.

Site owners also co-operated by telephoning daily and thereby enabling the staff to maintain a day-to-day assessment of availability of pitches.

Although no actual statistics are available, there are indications that the Spring Bank Holiday is becoming more popular with holidaymakers.

REFUSE COLLECTION AND DISPOSAL

The service was again well able to cope with the increased pressure during the summer months, and controlled tipping continued at the Council's tip at Pincheston.

The litter collection service was extended during the summer and the results were noticeable. A number of voluntary organisations helped to clean popular beaches and it is anticipated that this trend will continue.

Unfortunately, no progress was made during discussions with neighbouring authorities to provide a pulverisation plant to serve the south and east of the County, although a detailed study was carried out by L.A.M.S.A.C.

For the first time the Council introduced a beach litter collection service and this operated throughout the six summer months.

There is no doubt that the service was effective and was much appreciated by residents and holidaymakers alike.

In addition to litter, oily seaweed was also collected and removed to the Council's tip.

REFUSE COLLECTION AND DISPOSAL

The service was again well able to cope with the increased pressure during the summer months, and controlled tipping continued at the Council's tip at Pinchaston.

The litter collection service was extended during the summer and the results were noticeable. A number of voluntary organisations helped to clean popular beaches and it is anticipated that this trend will continue.

Unfortunately, no progress was made during discussions with neighbouring authorities to provide a privatisation plant to serve the south and east of the County, although a detailed study was carried out by L.A.M.S.A.C.

For the first time the Council introduced a beach litter collection service and this operated throughout the six summer months.

There is no doubt that the service was effective and was much appreciated by residents and holidaymakers alike.

In addition to litter, oily sewage was also collected and removed to the Council's tip.

AIR POLLUTION

The Pembroke Power Station which commenced operation at the end of September 1970, has now completed the commissioning stage and is in full operation.

Cosheston Station was closed down in February and transferred to Lawrenny as the results continued to be affected from Ammonia coming from a depot at Carew Cheriton.

As in other years the incidence of pollution gives no cause for alarm the results showing no increase.

Furthermore the level of pollution is very low in comparison with those of a similar rural area and a typical industrial area as shown in the tabulated results.

AIR POLLUTION

The Pembroke Power Station which commenced operation at the end of September 1970, has now completed the commissioning stage and is in full operation.

Coston Station was closed down in February and transferred to Laverny as the results continued to be affected from ammonia coming from a depot at Carsey Station.

As in other years the incidence of pollution gives no cause for alarm the results showing no increase.

Furthermore the level of pollution is very low in comparison with those of a similar rural area and a typical industrial area as shown in the tabulated results.

OIL POLLUTION

Once again, westward facing beaches were subjected to a continual pollution from oil and oily waste discharged at sea, making normal usage of these beaches by the public difficult, particularly on the high tide line and on pebbly beaches.

Unfortunately, there can be no practical solution, unless it be by prevention, which would need to be preceded by international public outcry.

Spillages continue unabated in the Milford Haven Waterway, though an ever-efficient control service prevented serious contamination of amenity beaches and foreshore.

Details of harbour spillages are as follows:-

Ships	- 43
Jetty	- 8
Other Locations	- 8
Unattached pollution	- 7
Attributable	- 3
Unattributable	- 4

OIL POLLUTION

Once again, westward facing beaches were subjected to a continual pollution from oil and oily waste discharged at sea, making normal usage of these beaches by the public difficult, particularly on the high tide line and on pebbly beaches.

Unfortunately, there can be no practical solution, unless it be by prevention, which would need to be preceded by international public outcry.

Splashes continue unabated in the Milford Haven Waterway, though an over-efficient control service prevented serious contamination of nearby beaches and towns.

Details of harbour splashes are as follows:-

Ships	- 43
Jetty	- 8
Other locations	- 8
Unattached pollution	- 7
Attributable	- 3
Unattributable	- 4
