WRENTHAM TOWN COUNCIL.
SANITARY, REWAGE, AND FARM
COMMITTEE.

[illegible]

THE CHAIR.
It having been stated that Alderman Samsel, the chairman of the Committee, was unable to be present owing to indisposition, the Mayor was elected to the

Dr. Evans, the medical officer, presented his report for this year ended 31st December last, in which he stated that the number of births had been—Madras, 1408; Pondicherry, 214; total 622; giving an annual birth-rate of 34.59 per thousand inhabitants. To birth-

rate for the previous year was 32-12. The number of deaths recorded was 186. Adding the deaths of 23 Finnish persons who died in the Stockholm, and the deaths of seven persons who died in the Finska Hospital, and subtracting the deaths of eight persons who died in the Stockholm, the number of deaths

death rate was 12.53 per thousand, as against 25.72 in the previous year. This was the lowest annual death rate in record. The death rates for the five previous years were—1939, 17.99; 1940, 21.97; 1941, 17.23; 1942, 21.47; 1943, 20.72. The following is a summary

Age at which death took place—	No.
Under 1 year of age	43
Over 1 year and under 5 years	35
5 years and under 10 years	9
10 years and under 15 years	12
15 years and over	12

This proportion of deaths of children under five years of age to the total number of deaths was almost 40 per cent. This mortality must be considered rather heavy, but the deaths were not due to food or sanitation.

measures, they were finally able to the wasting disease of children. There were 100,000 deaths in the borough in 1900, which went down to 10,000 in 1910. The system of drainage, the water supply, and other improved sanitary arrangements were being carried out in the last months of the century.

Thymus shrubs had taken place from aquatic to terrestrial habitats.

the study reflects. This can be measured logarithmically. The percentage of deaths from infectious diseases was 68 per cent of the total death rate, and remembering that the town was the center of a district with a population of about 80,000, nearly all of whom were there for purposes of trade, those figures make

for themselves, and indicated that the railway arrangements of the burroughs were well suited for As to sufficient distance 120 notifications had been received, and a hundred cases were admitted to the auxiliary hospital. During the latter portion of the year several hundred cases were notified at the burroughs.

the hospital suffered from this complaint. It was throughout of a mild type and was found only on the foreleg. A careful and systematic inspection of property had been made in those parts of the house, where the working-class were housed, and in first-

Swainmont, *Proteridion*. The Mount-pool property was composed heretofore with way of a dwelling, then its owner, although, and that of Swainmont had been placed in a military condition. In United-States the Swainmont

During the last twelve months nine samples of food, taken at intervals of six to eight days, were analyzed for the detection of milk and cream of various kinds. The results are given in Table 1.

and submitted to the Peirce Analysis. Our sample of smelt was found to be adulterated and the mackerel was guaranteed and found. The sample of flounder was also found to be adulterated, but owing to a policy of law enforcement was not attacked, though a moral victory.

The registered common lodging-house had been regularly visited and there was a marked improvement in their discipline. In one or two cases it had been necessary to call attention to the immunity of a large

...one of my kind and was still unknown. He particularly desired to call the attention of the authority to the very great want of a good lodging-house, conducted in modern times, which still he was sure must be appeared to anyone who had the opportunity of seeing how the slightly lodged was put up in

Washbasin as compared with other towns, where public bathing houses were provided. Unimproved bathing houses will continue to give trouble and inconvenience, and waste of proper hot clothing, and total absence of incinerators and exhumation had been discovered in numerous cities held at midlife. Twelve cities had

The Deacons and workshops in the borough had been suspended during the past 12 months and had taken place in six of the worst, and in all these instances were attended.

standing persons, which were attended to almost immediately.

The proceeds, perhaps, and donors had had special attention paid to them by Mr. C. Moore, inasmuch as any of the mass of bankrupts means hereby provided in its borough could be traced.

The town break had given rise to several complaints to the publisher which had been allowed to take its toll supply. He was pleased to say that the magazines were bound to be ordered in in a very satisfactory manner, and that not more of letters would be ground to the milk supply.

plan. On May 14, we found that the Cobden Mill Co. was pouring waste water in the brook which caused a harmful growth. That, he was glad to say, had not appeared again. In December the pollution from the coal dust was very noticeable, and he was pleased that the Authority was doing their utmost to prevent it.

Its had made periodical visits to the Borough Farm. The average yields, together with the average temperature at Five Fields, appeared as work well. The frequent and frequent frosts tended to keep the

mean twice each year. Finding that pigs run faster than frequently than in any previous year. From various tests and examinations of the farm, he concludes that the animals had been satisfactory, and it was not to be considered as having the average depend of so many and at the same time as

The record for this post, as measured by the main gauge at the lighted end, was 31.92 in. The highest fall took place in January and the lowest in February, the former being 4.33, and the latter 7 inches. The stream said above that post it would be well by alluvium.

The MFA said it must be gratifying to those who think that the military scale of the town must have contributed to the low death rate, which compared favorably with that of any year since the invasion, admission that there is a health crisis.

Adelman Theory is preparing the adoption of the report, and the Medical Council must be convinced upon that document and local report. There were no or very points that had struck him, and one was the creation of a medical hygiene house, a point which

Mr. Chavira is mending, said the Medical Officer, was quite right to lay stress upon the water supply.

[illegible]

Mr. Proulx thought it was time some notice should be taken of the measures which some of the Company's main clients of the quantity of water people had from this stand point. It should be brought to the notice of the Company.

The Marins said the severe weather had undoubtedly had a good deal to do with it, but there had been a close for practically a fortnight.

Mr. Paine requested that a resolution should be passed in general terms, and proposed the following:—That the great inconvenience caused to navigators by the scarcity of water having been brought to the

Mr. Peters attended.

The Tewa Class agreed the summer for a little information, and said whatever they did should be in the year of a summer.

Mr. C. Moore reported having served notice for the

[illegible]

1. Warm Water, water temperature 71°; Uppland River, total number of cases, 11. The whole of the 10th patients to the hospital, numbering 25, were during week. There had been no deaths in the morning during the month from infectious diseases. The number of

The report was adopted, on the motion of Mr. Paine, seconded by Mr. Williamson.

LEWISVILLE.
Several persons have been arrested in this town for various offenses. A man named John Smith was arrested for stealing a horse. Another man, James Brown, was arrested for selling stolen goods. A woman named Mary Jones was arrested for harboring a thief. The police are keeping a close watch on these individuals.

IT. ASAPH.
