VITAL STATISTICS

Population.

July, 1961.

The Registrar General's estimate of the population for the mid-year 1960 is 17,900 and the vital statistics in the report are based on this figure.

To the Mayor, Aldermen and Burgesses
of the Borough of Bacup.

Mr. Mayor, Ladies and Gentlemen,

In accordance with my statutory duty as your Medical Officer of Health, I have the honour to present the Annual Report for the year 1960 for your consideration.

The contents of the report have been compiled in accordance with the Ministry of Health Circular 1/61 dated 31st January, 1961.

Clearance of houses unfit for human habitation is the main public health problem of the Borough with its high proportion of back-to-backs, and will be for years to come. During the year 29 Official Representations were made in respect of 20 houses in Clearance Areas and 9 individual unfit.

SECTION II

In addition 50 prefabricated Arcon houses were declared to be unfit.

In all 58 houses were demolished during the year and 137 people rehoused.

To enable the improvement of sub-standard houses to be carried out by the provision of modern amenities such as bathrooms, internal W.C's, food stores, etc., 42 Improvement Grants were made and although many houses in this category are back-to-back, healthier housing is created thereby and improved ventilation effected.

The epidemic of measles continued into 1960 and 316 notifications were received.

The complications of this disease can still be serious and it will, no doubt, not be long before a vaccine for protection against it is developed.

provision of Local Health Authority Services are the responsibility of the Lancashire County Council through the Divisional Health Committee No. 13, on which this Council is represented.

I have the honour to be,
Mr. Mayor, Ladies and Gentlemen,
Your obedient servant,

A. NELSON PICKLES.

Medical Officer of Health.

Health Department,
Staphylin Hall,
BAGUR,
Lancashire.

July, 1961.

To the Mayor, Aldermen and Burgesses
of the Borough of Bury.

Mr. Mayor, Ladies and Gentlemen,

In accordance with my statutory duty as your Medical Officer of Health, I have the honour to present the Annual Report for the year 1960 for your consideration.

The contents of the report have been compiled in accordance with the Ministry of Health Circular 1/61 dated 11st January, 1961.

Clearance of houses unfit for human habitation is the main public health problem of the Borough with its high proportion of back-to-backs, and will be for years to come. During the year 29 Official Notifications were made in respect of 20 houses in Clearance Areas and 9 individual unfit.

In addition 50 prefabricated Arcon houses were declared to be unfit.

In all 58 houses were demolished during the year and 137 people rehoused.

To enable the improvement of sub-standard houses to be carried out by the provision of modern amenities such as bathrooms, internal W.C.s, food stores, etc., 42 Improvement Grants were made and although many houses in this category are back-to-back, healthier housing is created thereby and improved ventilation effected.

The epidemic of measles continued into 1960 and 316 notifications were received.

The complication of this disease can still be serious and it will, no doubt, not be long before a vaccine for protection against it is developed.

I have the honour to be,
Mr. Mayor, Ladies and Gentlemen,
Your obedient servant,

A. MURPHY FRANKS,

Medical Officer of Health.

SECTION I

VITAL STATISTICS

Population.

The Registrar General's estimate of the resident population for the mid-year 1960 is 17,900 and the vital statistics in the report are based on this figure.

Births.

The adjusted Birth Rate i.e. the figure arrived at if the age and sex constitution of the population of the district was in the same proportion as the rest of England and Wales is 15.8 per 1,000 population (the figure is 19.7 for England and Wales).

The adjusted Death Rate is 15.1 compared with 11.5 for England and Wales.

SECTION II

INFECTIOUS DISEASES

Other than cases of Tuberculosis the notification of infectious diseases for 1960 were limited to Measles 316, Scarlet Fever 14, Whooping Cough 35, Dysentery 2 and Acute Pneumonia 3.

SECTION III

GENERAL HEALTH SERVICES

The provision of Local Health Authority Services are the responsibility of the Lancashire County Council through the Divisional Health Committee No. 13, on which this Council is represented.

SECTION I

VITAL STATISTICS

Population.

The Registrar General's estimate of the resident population for the mid-year 1960 is 17,900 and the vital statistics in the report are based on this figure.

Births.

The adjusted Birth Rate i.e. the figure arrived at if the age and sex composition of the population of the district was in the same proportion as the rest of England and Wales is 19.8 per 1,000 population (the figure is 19.7 for England and Wales).

The adjusted Death Rate is 15.1 compared with 11.5 for England and Wales.

SECTION II

INFECTIOUS DISEASES

Other than cases of Tuberculosis the notification of infectious diseases for 1960 were limited to Measles 116, Scarlet Fever 11, Whooping Cough 15, Typhus 2 and Acute Inflammation 3.

SECTION III

GENERAL HEALTH SERVICES

The provision of Local Health Authority Services are the responsibility of the Llanelli County Council through the Divisional Health Committee No. 15, on which this Council is represented.

APPENDIX A

VITAL STATISTICS AND CAUSES OF DEATH

TABLE I

SUMMARY OF STATISTICS - 1960.

Area (Acres)				6,121
Population (Estimated mid-1960)				17,900
Population (Census 1951)				18,374
Number of Inhabited Houses (1931)				5,964
Number of Inhabited Houses (1960)				6,775
Rateable Value				£158,356
Sum represented by a penny rate				£617
	Male	Female	Total	
LIVE BIRTHS				
Legitimate	123	141	264	
Illegitimate	8	8	16	Birth Rate (Crude) per 1,000 estimated population ... 15.6 (18.8)

Public Health Department,

Stubbylee Hall,

BACUP.

July, 1961.

To the Mayor, Aldermen and Burgesses
of the Borough of Bacup.

Mr. Mayor, Ladies and Gentlemen,

I have pleasure in submitting the report on the sanitary inspection and environmental conditions within the Borough during the year 1960.

Further progress was made during the year with regard to the demolition and clearance of houses found unfit for habitation and it is pleasing to note that the whole of the properties situated within the Aked Street, Venture Street, Warburton Buildings and Rochdale Road Clearance Areas were demolished during the year under review and considerable progress made with the Scarr Street Clearance Area.

Additional representations were made in respect of the Burnley Road and Farrar Street Clearance Area and progress was made in respect of the demolition of the temporary prefabricated houses. Further schemes are in the process of being dealt with in respect of Knowle Street and Plantation Street, Bacup.

Many other areas still require to be dealt with and the demolition of unfit houses still remains a major problem in this field.

There was no outbreak of food poisoning notified during the year but every effort was made to maintain a high standard of cleanliness and care by food handlers, and the need for every precaution cannot be too strongly emphasized.

Strict supervision of all the meat produced within the town was again maintained and all animals slaughtered were inspected. Tuberculosis found on post-mortem examination of cattle again showed a considerable decrease and it would appear that this one time common disease in cattle is now under control to a very large degree.

May I again take the opportunity of thanking the staff of the Health Department for their loyal and willing service, and express my thanks to the Medical Officer of Health for his advice and guidance, and my appreciation of the support and interest shown by the Chairman and Members of the Health Committee throughout the year.

I am, Mr. Mayor, Ladies and Gentlemen,
Your obedient servant,

R. HAWORTH.

Chief Public Health Inspector.

Public Health Department,

Stapley Hall,

BACUP.

July, 1961.

To the Mayor, Aldermen and Burgesses
of the Borough of Baccup.

Mr. Mayor, Ladies and Gentlemen,

I have pleasure in submitting the report on the sanitary inspection and environmental conditions within the Borough during the year 1960.

Further progress was made during the year with regard to the demolition and clearance of houses found unfit for habitation and it is pleasing to note that the whole of the properties situated within the Aired Street, Victoria Street, Warburton Buildings and Rochdale Road Clearance Areas were demolished during the year under review and considerable progress made with the Aired Street Clearance Area.

Additional representations were made in respect of the Burnley Road and Farnley Street Clearance Area and progress was made in respect of the demolition of the temporary protected houses. Further schemes are in the process of being dealt with in respect of Knowle Street and Plantation Street, Baccup.

Many other areas still require to be dealt with and the demolition of built houses still remains a major problem in this field.

There was no outbreak of food poisoning notified during the year but every effort was made to maintain a high standard of cleanliness and care by food handlers, and the need for every precaution cannot be too strongly emphasized.

Strict supervision of all the meat produced within the town was again maintained and all animals slaughtered were inspected. Tuberculosis found on post-mortem examination of cattle again showed a considerable decrease and it would appear that this can also be traced in cattle is now under control to a very large degree.

May I again take the opportunity of thanking the staff of the Health Department for their loyal and willing service, and express my thanks to the Medical Officer of Health for his advice and guidance, and my appreciation of the support and interest shown by the Chairman and Members of the Health Committee throughout the year.

I am, Mr. Mayor, Ladies and Gentlemen,
Your obedient servant,

R. KENNEDY.

Chief Public Health Inspector.

SECTION IV

ENVIRONMENTAL HEALTH SERVICES

Social Conditions

Chief Occupations. The shoe and slipper trade and cotton weaving and spinning provide the chief industry in the town which is mainly industrial in character. There is some light engineering, stone quarrying and coal mining which also gives employment to a number of people in the district and in addition a number of mills which manufacture felted materials.

The country is hilly and there are many scattered hill farms with small dairy herds.

(A) SANITARY INSPECTION OF AREA

Water Supply

The main supply of water to the town is satisfactory, being provided by the Borough of Bacup Water Undertaking and a large percentage of the domestic properties enjoy a supply of water which is wholly sufficient and excellent in quality.

The whole of the water supplied by this undertaking is filtered and chlorinated and is collected from the upland surface gathering ground and stored in three main reservoirs at Cragg, Cowpe and Sheephouse.

Thirteen samples of the town's water were taken during the year and submitted for bacteriological examination and thirteen proved satisfactory.

Ten samples were submitted for chemical analysis and ten proved satisfactory.

The number of dwellinghouses supplied from the public mains is 6666.

Rivers and Streams

The Mersey River Board is the controlling authority for the main river in the Borough and the Local Authority is responsible for the streams and the portion of the Irwell which joins on to the main river.

The River Irwell is used in connection with the local industries and widely used for trade effluents.

Public Cleansing

The household refuse collection is maintained on a weekly basis from all houses in the town, and approximately 7,000 dustbins are emptied weekly by the three side loading freighters each manned by a driver and four loaders.

Refuse disposal is carried out by controlled tipping at the two tips at Sharneyford and Blackwood and the Council have in operation a salvage scheme.

Street cleansing is carried out under the supervision of the Borough Surveyor and gully emptying is done by modern mechanical means.

One hundred and six pail closets are emptied each week.

SECTION IV

ENVIRONMENTAL HEALTH SERVICES

Social Conditions

Chief Occupations. The shoe and slipper trade and cotton weaving and spinning provide the chief industry in the town which is mainly industrial in character. There is some light engineering, stone quarrying and coal mining which also gives employment to a number of people in the district and in addition a number of mills which manufacture felted materials.

The country is hilly and there are many scattered hill farms with small dairy herds.

(A) SANITARY INSPECTION OF AREA

Water Supply

The main supply of water to the town is satisfactory, being provided by the Borough of Bangor Water Undertaking and a large percentage of the domestic properties enjoy a supply of water which is wholly sufficient and excellent in quality.

The whole of the water supplied by this undertaking is filtered and chlorinated and is collected from the upland moorland gathering ground and stored in three main reservoirs at Cragg, Gorge and Sheephouse.

Thirteen samples of the town's water were taken during the year and submitted for bacteriological examination and thirteen proved satisfactory.

Ten samples were submitted for chemical analysis and ten proved satisfactory.

The number of dwellings supplied from the public mains is 6666.

Rivers and Streams

The Mersey River Board is the controlling authority for the water river in the Borough and the local authority is responsible for the streams and the portion of the river which joins on to the main river.

The River Irwell is used in connection with the local industries and is widely used for trade effluents.

Public Cleansing

The household refuse collection is maintained on a weekly basis from all houses in the town, and approximately 7,000 dustbins are emptied weekly by the three side loading lorries each manned by a driver and four loaders.

Refuse disposal is carried out by controlled tipping at the two tips at Barmston and Barmston and the Council have in operation a salvage scheme.

Street cleansing is carried out under the supervision of the Borough Surveyor and fully equipped in some by modern mechanical means.

One hundred and six gull bins are emptied each week.

Closet Accommodation

The closet accommodation in the Borough consists mainly of fresh water closets, there being approximately 4,705 of these, and gradual abolition of the waste water closets is encouraged by the grants made by the Health Committee in respect of conversions. Details of the closets other than fresh water closets are given in Table IX, Appendix C.

Many of the back-to-back type houses have joint W.C. accommodation and this type of house would be greatly improved if separate indoor sanitary accommodation could be provided.

Eradication of Bed Bugs

Hydrogen Cyanide is used in connection with the disinfection of household goods when transfers are made from infested property to Council houses, and others are treated with D.D.T. Solution and Spray.

These methods proved effective, particularly if a follow up spraying was performed and the advice given to tenants was acted upon.

Atmospheric Pollution

Little trouble was experienced during the year by atmospheric pollution from smoke.

Many of the local industries are using electrically driven machinery to a great extent and it would seem that this is already having its effect on the amount of atmospheric pollution by smoke from steam raising plants. Much still remains to be done with regard to the atmospheric pollution caused by domestic chimneys and smokeless fuels and improvement in the design of domestic fireplaces, will no doubt, aid progress in this direction.

Rag Flock

One licence was issued in respect of premises where Rag Flock is stored.

The firm storing Rag Flock submitted many samples on their own account with satisfactory results.

Rodent Control

This work is carried out in accordance with the recommendations of the Ministry of Agriculture and Fisheries and the Council's sewers were treated on two occasions.

During the first treatment carried out in May, 78 manholes were treated and 3 showed a prebait take, and as a result 110 poison baits were laid.

The second maintenance treatment carried out in October, necessitated the treatment of 16 manholes and 1 showed a prebait take.

In addition to this 25 business premises, 96 dwellinghouses and 5 local authority properties were treated.

Swimming Baths

The Council own and administer the Public Baths which are situated in the centre of the town.

The new modern filtration and chlorination plant which was installed

Closet Accommodation

The closet accommodation in the Borough consists mainly of fresh water closets, there being approximately 4,700 of these, and gradual abolition of the water closets is encouraged by the grants made by the Health Committee in respect of conversions. Details of the closets other than fresh water closets are given in Table IX, Appendix C.

Many of the back-to-back type houses have joint W.C. accommodation and this type of house would be greatly improved if separate indoor sanitary accommodation could be provided.

Registration of Bad Dogs

Hydrogen Cyanide is used in connection with the disinfection of household goods when transfers are made from infested property to Council houses, and others are treated with D.D.T. Solution and Spray.

These methods proved effective, particularly if a follow up spray was performed and the advice given to tenants was acted upon.

Atmospheric Pollution

Little trouble was experienced during the year by atmospheric pollution from smoke.

Many of the local industries are using electrically driven machinery to a great extent and it would seem that this is already having its effect on the amount of atmospheric pollution by smoke from steam raising plants. Much still remains to be done with regard to the atmospheric pollution caused by domestic chimneys and road vehicles and improvement in the design of domestic fireplaces, will no doubt, aid progress in this direction.

Rag Picking

One licence was issued in respect of premises where Rag Picking is carried on.

The Rag Picking Rag Picking submitted many samples on their own account with satisfactory results.

Robert Control

This work is carried out in accordance with the recommendations of the Ministry of Agriculture and Fisheries and the Council's powers were treated on two occasions.

During the first treatment carried out in May, 75 premises were treated and 5 showed a positive result, and as a result 110 potato plants were laid.

The second treatment was carried out in October, necessitating the treatment of 15 premises and 1 showed a positive result.

In addition to this 55 premises premises, 35 dwellings and 5 local authority premises were treated.

Salmonella Bacteria

The Council can and administer the Public Baths which are situated in the centre of the town.

The new modern filtration and chlorination plant which was installed

during 1950 has led to greatly improved conditions from a public health point of view, and the public, no doubt, have now excellent conditions for bathing.

Factories

The sanitary accommodation in most of the factories within the district is reasonable in standard, as more firms are realising the necessity of modern conveniences and recognise this as one of the necessities for attracting labour.

Table X, Appendix C gives a summary of the inspections made and details of the results.

Sanitary Inspection of the Area

Many of the owners of small cottage property still complain bitterly that the rents received do not allow for the increased cost of building materials and labour, and the efforts required to enforce statutory notices and informal notices requiring repairs, remains a major problem in the department.

The statement in Table VIII, Appendix C, shows the number and nature of the inspections made.

(B) HOUSING

The hilly nature of the district has led in the past to the building of many back-to-back, back-to-land and basement dwellings, and the prevalence of such a large proportion of these types of houses, which today, cannot generally speaking be regarded as of a satisfactory standard has created a difficult problem. This problem is one which requires constant attention and whilst every endeavour is made to keep the old houses weatherproof and in a reasonable state of repair, the work done is often not sufficient to render the old houses in all respects fit for habitation. In addition, the lack of amenities in numerous back-to-back houses is a matter of serious concern.

The Council proceeded with the building of new houses, 15 being completed by the Local Authority and more houses will shortly be ready for occupation.

It is difficult to assess the extent of overcrowding in the Borough in the absence of a proper survey, but it is known that some overcrowding exists.

Table XI, Appendix C, gives details of the new houses provided and also the action taken with regard to unfit dwellinghouses.

The Health Committee saw fit to make Closing Orders in respect of houses which were unfit for habitation and are, therefore, getting rid of the worst living conditions in the Borough. In addition, more Clearance Areas are at present under consideration.

(C) INSPECTION AND SUPERVISION

Milk Supply

The responsibility for the supervision of farms and the production of milk having passed to the Ministry of Agriculture and Fisheries, the main duty of the Local Authority was in connection with distributors of milk and the registration of milk distributors, dairies or milk shops.

During 1950 has led to greatly improved conditions from a public health point of view, and the public, no doubt, have now excellent conditions for housing.

The sanitary accommodation in most of the factories within the district is reasonable in standard, as new firms are realising the necessity of modern conveniences and recognise this as one of the necessities for attracting labour.

Table X, Appendix C gives a summary of the inspections made and details of the results.

Sanitary inspection of the area

Many of the owners of small cottage property still complain bitterly that the rents received do not allow for the increased cost of building materials and labour, and the effort required to enforce statutory notices and informal notices regarding repairs, remains a major problem in the department.

The statement in Table VIII, Appendix C, shows the number and nature of the inspections made.

(B) HOUSING

The main nature of the district has led in the past to the building of many back-to-back, back-to-land and basement dwellings, and the prevalence of such a large proportion of these types of houses, which today, cannot generally speaking be regarded as of a satisfactory standard has created a difficult problem. This problem is one which requires constant attention and whilst every endeavour is made to keep the old houses weatherproof and in a reasonable state of repair, the work done is often not sufficient to render the old houses in all respects fit for habitation. In addition, the lack of amenities in numerous back-to-back houses is a matter of serious concern.

The Council proceeded with the building of new houses, it being completed by the Local Authority and some houses will shortly be ready for occupation.

It is difficult to assess the extent of overcrowding in the Borough in the absence of a proper survey, but it is known that some overcrowding exists.

Table XI, Appendix C, gives details of the new houses provided and also the action taken with regard to unfit dwellings.

The Health Committee has been asked to make Housing Orders in respect of houses which were unfit for habitation and are, therefore, getting rid of the worst living conditions in the Borough. In addition, some Council Areas are at present under consideration.

(C) INSPECTION AND SUPERVISION

Milk Supply

The responsibility for the supervision of farms and the production of milk having passed to the Ministry of Agriculture and Fisheries, the main duty of the Local Authority was in connection with distributors of milk and the regulation of milk distributors, dairies or milk shops.

Food Hygiene

Routine visits were made during year to the premises in the Borough where ice cream is sold by retail only.

The bulk of the ice cream which is sold in the town is manufactured by persons who have premises outside the Borough, and little difficulty was experienced with this commodity. Much of the ice cream is now prepacked.

Details of the food condemned and surrendered are given in Table XIII, Appendix C.

Slaughterhouses

The Local Authority granted licences in respect of three slaughterhouses within the Borough during 1960 and the three slaughterhouses now appear to be operating satisfactorily.

Meat Inspection

The operation of the three slaughterhouses above-mentioned thrust a heavy burden on the Health Committee and the staff of the Health Department as it is felt that 100% of the animals slaughtered should be inspected and in addition the Committee feel that this inspection must be carried out at the time of slaughter, in order to be effective.

Every endeavour, therefore, has been made to do this, and details of the animals slaughtered and the offals and meat condemned will be found in Table XIV.

(D) GENERAL

Petroleum Acts and (Carbide of Calcium) Order.

The licensing of petroleum stores is a duty carried out by the Health Committee and 45 licences are at present in operation for the storage of petroleum spirit or mixture.

One person is licenced to keep carbide of calcium.

Hackney Carriages and Driving Licences

During the year 13 Hackney Carriage Licences were issued and 9 licences to drive Hackney Carriages.

Game Dealers Licences

Two licences to deal in game were renewed and issued.

Old Metal Dealers

Two licences were issued to dealers in old metal.
