Health Department,
Stubbylee Hall,
BACUP,
Lancs.

October, 1963.

To the Mayor, Aldermen and Burgesses
of the Borough of Bacup.

Mr. Mayor, Ladies and Gentlemen,

In accordance with my statutory duty as your Medical Officer of Health, I have the honour to present the Annual Report for the year 1962.

The contents of the report have been compiled in accordance with the Ministry of Health circular 1/63 dated 30th January, 1963.

The main Public Health problem of the Borough lies in the clearance of houses unfit for human habitation. The latter consist of back-to-back, back-to-land and cellar dwellings. During the year Official Representations were made in respect of 54 houses in Clearance Areas, and 3 in respect of individual unfit houses. In all 54 houses were demolished, 3 closing orders made, and 112 persons rehoused.

Improvement of substandard houses continues to be made, and 45 Improvement Grants were allowed.

As regards Infectious Diseases, the pattern has changed considerably in recent years. Only one case of Dysentery was notified but many cases of intestinal infections go unrecorded. The Food Hygiene Regulations must be firmly applied to those food establishments which do not appreciate their responsibilities to the public. The ultimate remedy is in the hands of the customer.

In all, in spite of periods of shortage of staff, a useful year's work has been carried out by the Health Department.

I have the honour to be,

Mr. Mayor, Ladies and Gentlemen,

Your obedient servant,

A. NELSON PICKLES.

Medical Officer of Health.

Health Department,
Staphyle Hall,
BATH,
Dorset.

October, 1963.

To the Mayor, Aldermen and Burgesses
of the Town of Bath.

Mr. Mayor, Ladies and Gentlemen,

In accordance with my statutory duty as your Medical Officer of Health, I have the honour to present the Annual Report for the year 1962.

The contents of the report have been compiled in accordance with the Ministry of Health Circular V/63 dated 30th January, 1963.

The main Public Health problem of the Borough lies in the clearance of houses with low human habitation. The latter consists of back-to-back, back-to-back and other dwellings. During the year Official Inspectors were made in respect of 54 houses in Claverton, and 3 in respect of individual white houses. In all 54 houses were demolished, 3 closing orders made, and 112 persons rehoused.

Improvement of substandard houses continues to be made, and 15 improvements grants were allowed.

As regards Infectious Diseases, the pattern has changed considerably in recent years. Only one case of Dysentery was notified but many cases of infectious infections go unrecorded. The Food Hygiene Regulations must be strictly applied to food and drink establishments which do not appreciate their responsibilities to the public. The ultimate remedy is in the hands of the consumer.

In all, in spite of periods of shortage of staff, a useful year's work has been carried out by the Health Department.

I have the honour to be,

Mr. Mayor, Ladies and Gentlemen,

Yours obedient servant,

A. NELSON THOMAS.

Medical Officer of Health.

SECTION I

VITAL STATISTICS

Population

The Registrar General's estimate of the resident population for the mid-year 1962 is 17,240 and the vital statistics in the report are based on this figure.

Births

The adjusted Birth Rate i.e. the figure arrived at if the age and sex constitution of the population of the district was in the same proportion as the rest of England and Wales, is 17.2 per 1,000 population (the figure is 18.1 for England and Wales).

The adjusted Death Rate is 16.7 compared with 11.9 for England and Wales.

SECTION II

INFECTIOUS DISEASES

Other than cases of Tuberculosis the notification of infectious diseases for 1962 were limited to Measles 52, Scarlet Fever 2, and Dysentery 1.

SECTION III

GENERAL HEALTH SERVICES

The provision of Local Health Authority Services are the responsibility of the Lancashire County Council through the Divisional Health Committee No. 13 on which this Council is represented.

SECTION I

VITAL STATISTICS

Population

The Registrar General's estimate of the resident population for the mid-year 1962 is 17,240 and the vital statistics in the report are based on this figure.

Births

The adjusted Birth Rate i.e. the figure arrived at if the age and sex composition of the population of the district was in the same proportion as the rest of England and Wales, is 17.2 per 1,000 population (the figure is 18.1 for England and Wales).

The adjusted Death Rate is 10.7 compared with 11.2 for England and Wales.

SECTION II

INFECTIOUS DISEASES

Other than cases of Tuberculosis the notification of infectious diseases for 1962 were limited to Measles 52, Scarlet Fever 2, and Diphtheria 1.

SECTION III

GENERAL HEALTH SERVICES

The provision of local health services are the responsibility of the Lancashire County Council through the Divisional Health Committee No. 13 on which this District is represented.

Public Health Department

Stubbylee Hall,

BACUP.

October, 1963.

To the Mayor, Aldermen and Burgesses
of the Borough of Bacup.

Mr. Mayor, Ladies and Gentlemen,

I have pleasure in submitting the report on the sanitary inspection and environmental conditions within the Borough during the year 1962.

The most important factor of the Department's work again proved to be the matter of housing conditions and the clearance of unfit dwellings, and the provision of suitable new housing accommodation, and although progress is being made in this direction as instanced by the clearance of houses in the Knowle Street, Rochdale Road, Flowers Street, Cross Street and Market Street Clearance Areas, much still remains to be done and efforts were made to speed up progress during the year.

Further schemes are already in hand in respect of the Todmorden Road, Heyworth Street, Moss Row, and Forest Street Clearance Areas, and several other properties are already under consideration, in an effort to secure the demolition of the unfit houses at a more rapid pace.

There was again no serious outbreak of food poisoning or infectious disease, and the department maintained a full service of 100% inspection of all meat produced within the town.

I take this opportunity of thanking the staff of the Health Department for their loyal and willing service, particularly during the early part of the year, and express my appreciation of the co-operation received from other departments of the Council, and the support and interest shown by the Chairman and members of the Health Committee throughout the year.

I am, Mr. Mayor, Ladies and Gentlemen,

Your obedient Servant,

R. HAWORTH,

Chief Public Health Inspector.

Public Health Department
Sanitation Hall,
BAGDAD.

October, 1932.

To the Mayor, Aldermen and Burgesses
of the Borough of Bagdad.

Mr. Mayor, Ladies and Gentlemen,

I have pleasure in submitting the report on the sanitary inspection and environmental conditions within the Borough during the year 1932.

The most important factor of the Department's work again proved to be the matter of housing conditions and the clearance of unfit dwellings, and the provision of suitable and housing accommodation, and although progress is being made in this direction as indicated by the clearance of houses in the Knowle Street, Rochdale Road, Victoria Street, Green Street and Market Street Clearance Areas, much still remains to be done and efforts were made to speed up progress during the year.

Further schemes are already in hand in respect of the Tottenham Road, Hayworth Street, Moss Row, and Forest Street Clearance Areas, and several other properties are already under consideration, in an effort to secure the demolition of the unfit houses at a more rapid pace.

There was again no serious outbreak of food poisoning or infectious disease, and the department maintained a full service of 100% inspection of all meat produced within the town.

I take this opportunity of thanking the staff of the Health Department for their loyal and willing service, particularly during the early part of the year, and express my appreciation of the co-operation received from other departments of the Council, and the support and interest shown by the Chairman and members of the Health Committee throughout the year.

I am, Mr. Mayor, Ladies and Gentlemen,

Your obedient servant,

E. HAWKINS,

Chief Public Health Inspector

SECTION IV

ENVIRONMENTAL HEALTH SERVICES

Social Conditions

Chief Occupations. The shoe and slipper trade and cotton weaving and spinning provide the chief industry in the town which is mainly industrial in character. There is some light engineering, stone quarrying and coal mining which also gives employment to a number of people in the district and in addition a number of mills which manufacture felted materials.

The country is hilly and there are many scattered hillfarms with small dairy herds.

(A) SANITARY INSPECTION OF AREA

Water Supply.

The main supply of water to the town is satisfactory, being provided by the Borough of Bacup Water Undertaking and a large percentage of the domestic properties enjoy a supply of water which is wholly sufficient and excellent in quality.

The whole of the water supplied by this undertaking is filtered and chlorinated and is collected from the upland surface gathering ground and stored in three main reservoirs at Cragg, Cowpe and Sheephouse.

Two samples of the town's water were taken during the year and submitted for bacteriological examination and two proved satisfactory.

Nine samples were submitted for chemical analysis and nine proved satisfactory.

The number of dwellinghouses supplied from the public mains is 6,567.

Rivers and Streams

The Mersey River Board is the controlling authority for the main river in the Borough and the Local Authority is responsible for the streams and the portion of the Irwell which joins on to the main river.

The River Irwell is used in connection with the local industries and widely used for trade effluents.

Public Cleansing

The household refuse collection is maintained on a weekly basis from all houses in the town, and approximately 7,000 dustbins are emptied weekly by the three freighters each manned by a driver and four loaders.

Refuse disposal is carried out by controlled tipping at the two tips at Sharneyford and Blackwood and the Council have in operation a salvage scheme.

Street cleansing is carried out under the supervision of the Borough Surveyor and gully emptying is done by modern mechanical means.

One hundred and four pail closets are emptied each week.

SECTION IV

ENVIRONMENTAL HEALTH SERVICES

Social Conditions

Chief Occupations. The shoe and millinery trade and cotton weaving and spinning provide the main industry in the town which is mainly industrial in character. There is some light engineering, stone quarrying and coal mining which also gives employment to a number of people in the district and in addition a number of mills and stone works fabricate materials.

The country is hilly and there are many scattered hill-farms with small dairy herds.

(A) SANITARY INSPECTION OF AREA

Water Supply.

The main supply of water to the town is satisfactory, being provided by the Borough of Deep Water Undertaking and a large percentage of the domestic properties enjoy a supply of water which is wholly satisfactory and excellent in quality.

The whole of the water supplied by this undertaking is filtered and chlorinated and is collected from the upland surface gathering ground and stored in three main reservoirs at Gress, Gorge and Ekebourne.

Two samples of the town's water were taken during the year and submitted for bacteriological examination and two proved satisfactory.

Nine samples were submitted for chemical analysis and nine proved satisfactory.

The number of dwellings supplied from the public mains is 6,567.

Rivers and Streams

The Haveray River Board is the controlling authority for the main river in the Borough and the local authority is responsible for the streams and the portion of the Iwell which joins on to the main river.

The River Iwell is used in connection with the local industries and is chiefly used for trade effluents.

Public Cleansing

The household refuse collection is maintained on a weekly basis from all houses in the town, and approximately 7,000 cartons are emptied weekly by the town's dustcarters each run by a driver and four loaders.

Refuse disposal is carried out by controlled tipping at the two tips at Brampton and Blackwood and the Council have in operation a salvage scheme.

Street cleansing is carried out under the supervision of the Borough Surveyor and daily sweeping is done by modern mechanical means.

One hundred and four public closets are emptied each week.

Closet Accommodation

The closet accommodation in the Borough consists mainly of fresh water closets, there being approximately 4,721 of these, and gradual abolition of the waste water closets is encouraged by the grants made by the Health Committee in respect of conversions. Details of the closets other than fresh water closets are given in Table IX, Appendix C.

Many of the back-to-back type houses have joint W.C. accommodation and this type of house would be greatly improved if separate indoor sanitary accommodation could be provided.

Eradication of Bed Bugs.

Hydrogen Cyanide is used in connection with the disinfection of household goods when transfers are made from infested property to Council houses, and others are treated with D.D.T. solution and spray.

These methods proved effective, particularly if a follow up spraying was performed and the advice given to tenants was acted upon.

Atmospheric Pollution

Little trouble was experienced during the year by atmospheric pollution from smoke.

Many of the local industries are using electrically driven machinery to a great extent and it would seem that this is already having its effect on the amount of atmospheric pollution by smoke from steam raising plants. Much still remains to be done with regard to the atmospheric pollution caused by domestic chimneys and smokeless fuels and improvement in design of domestic fireplaces, will no doubt aid progress in this direction.

Rodent Control

This work is carried out in accordance with the recommendations of the Ministry of Agriculture, Fisheries and Food and the Council's sewers were treated on two occasions.

In addition to this 20 business premises, 78 dwellinghouses and 1 local authority property, were treated.

Swimming Baths

The Council own and administer the Public Baths which are situated in the centre of the town.

The new modern filtration and chlorination plant which was installed in 1950 has led to greatly improved conditions from a public health point of view, and the public, no doubt, have now excellent conditions for bathing.

Closet Accommodation

The closet accommodation in the Borough consists mainly of fresh water closets, there being approximately 4,725 of these, and gradual abolition of the waste water closets is encouraged by the Grants made by the Health Committee in respect of conversions. Details of the closets other than fresh water closets are given in Table IX, Appendix C.

Many of the back-to-back type houses have joint W.C. accommodation and this type of house would be greatly improved if separate indoor sanitary accommodation could be provided.

Exhaustion of Gas Pipes.

Hydrogen Cyanide is used in connection with the disinfection of household goods when fumigations are made from infected property in Council houses, and others are treated with F.D.D. solution and spray.

These methods proved effective, particularly in a follow up spraying was performed and the advice given to tenants was noted upon.

Atmospheric Pollution

Little trouble was experienced during the year by atmospheric pollution from smoke.

Many of the local industries are using electrically driven machinery to a great extent and it would seem that this is already having the effect on the amount of atmospheric pollution by smoke from steam raising plants. Much still remains to be done with regard to the atmospheric pollution caused by domestic chimneys and household fires and improvements in design of domestic fireplaces, will no doubt aid progress in this direction.

Robust Control

This work is carried out in accordance with the recommendations of the Ministry of Agriculture, Fisheries and Food and the Council's agents were treated on two occasions.

In addition to this 20 business premises, 75 dwellings and 1 local authority property, were treated.

Sanitary Baths

The Council own and administer the Public Baths which are situated in the centre of the town.

The new modern filtration and chlorination plant which was installed in 1950 has led to greatly improved conditions from a public health point of view, and the public, no doubt, have now excellent conditions for bathing.

Factories

The sanitary accommodation in most of the factories within the district is reasonable in standard, but complaints are dealt with as the necessity arises.

Table X, Appendix C gives a summary of the inspections made and details of the results.

Sanitary Inspection of the Area

Many of the owners of small cottage property still complain bitterly that the rents received do not allow for the increased cost of building materials and labour, and difficulty is still experienced in keeping tenanted property in a reasonable state of repair.

The statement in Table VIII, Appendix C, shows the number and nature of the inspections made.

(B) HOUSING

The hilly nature of the district has led in the past to the building of many back-to-back, back-to-land and basement dwellings, and the prevalence of such a large proportion of these types of houses, which today, cannot generally speaking be regarded as of a satisfactory standard still remains a problem to be solved. This matter requires constant attention and whilst every endeavour is made to keep the old houses weatherproof and in a reasonable state of repair, the work done is often not sufficient to render the old houses in all respects fit for habitation. In addition, the lack of amenities in numerous back-to-back houses remains a matter with which the department is seriously concerned and in this regard every opportunity must be taken to encourage these amenities to be improved wherever possible.

The Council proceeded with the building of new houses, 70 being completed by the Local Authority and more houses will shortly be ready for occupation.

It is difficult to assess the extent of overcrowding in the Borough in the absence of a proper survey, but it is known that some overcrowding exists.

Table XI, Appendix C, gives details of the new houses provided and also the action taken with regard to unfit dwellinghouses.

Slum Clearance action continued to be taken and efforts were made to speed up the rate at which unfit dwellings were dealt with; and several schemes are already in hand and much more work of this nature is envisaged.

(C) INSPECTION AND SUPERVISION

Milk Supply

The responsibility for the supervision of farms and the production of milk having passed to the Ministry of Agriculture, Fisheries and Food, the main duty of the Local Authority was in connection with distributors of milk and the registration of milk distributors, dairies or milk shops.

The sanitary accommodation in most of the factories within the district is reasonable in standard, but complaints are heard with no less frequency of the insanitary conditions.

Table I, Appendix C, gives a summary of the inspection made and details of the results.

Sanitary Inspection of the Area

Many of the owners of small cottage property still complain bitterly that the rents received do not allow for the increased cost of building materials and labour, and difficulty is still experienced in keeping tenanted property in a reasonable state of repair.

The statement in Table VIII, Appendix C, shows the number and nature of the inspection made.

(B) HOUSING

The high nature of the standard has led in the past to the building of many back-to-back, back-to-land and basement dwellings, and the prevalence of such a large proportion of these types of houses, which today cannot generally speaking be regarded as of a satisfactory standard still remains a problem to be solved. This matter requires constant attention and while every endeavour is made to keep the old houses well repaired and in a reasonable state of repair, the work done is often not sufficient to render the old houses in all respects fit for habitation. In addition, the lack of facilities in numerous back-to-back houses renders a water supply to the department is seriously concerned and in this regard every opportunity must be taken to encourage those amenities to be improved whenever possible.

The Council proceeded with the building of new houses, no being completed by the local authority and new houses will shortly be ready for occupation.

It is difficult to assess the extent of overcrowding in the Borough in the absence of a proper survey, but it is known that some overcrowding exists.

Table XI, Appendix C, gives details of the new houses provided and also the action taken with regard to existing dwellings.

Since clearance action continued to be taken and efforts were made to speed up the rate at which unfit dwellings were dealt with, and several houses are already in hand and much more work of this nature is envisaged.

(C) HYGIENE AND RECREATION

Milk Supply

The responsibility for the supervision of farms and the production of milk having passed to the Ministry of Agriculture, Fisheries and Food, the main duty of the local authority was its cooperation with the Ministry of Health and the Department of Health in the control of milk supply.

Food Hygiene

Routine visits were made during the year to the premises in the Borough where ice cream is sold by retail only.

The bulk of the ice cream which is sold in the town is manufactured by persons who have premises outside the Borough, and little difficulty was experienced with this commodity. Much of the ice cream is now pre-packed.

Details of the food condemned and surrendered are given in Table XII, Appendix C.

Slaughterhouses

The Local Authority granted licences in respect of three slaughterhouses within the Borough during 1962 and the three slaughterhouses now appear to be operating satisfactorily.

Meat Inspection

The operation of the three slaughterhouses above-mentioned thrust a heavy burden on the Health Committee and the staff of the Health Department, as it is felt that 100% of the animals slaughtered should be inspected and in addition the Committee feel that this inspection must be carried out at the time of slaughter, in order to be effective.

Every endeavour, therefore, has been made to do this, and details of the animals slaughtered and the offals and meat condemned will be found in Table XIII.

(D) GENERAL

Petroleum Acts and (Carbide of Calcium) Order.

The licensing of petroleum stores is a duty carried out by the Health Committee and 44 licences are at present in operation for the storage of petroleum spirit and mixture.

One person is licensed to keep Carbide of Calcium.

Hackney Carriages and Driving licences

During the year 3 Hackney Carriage Licences were issued and 7 licences to drive Hackney Carriages.

Game Dealers Licences

One licence to deal in game was renewed and issued.

Old Metal Dealers

One licence was issued in respect of dealers in old metal.

Food Hygiene

Roasting vials were made during the year to the premises in the Borough where the cream is sold by retail only.

The bulk of the ice cream which is sold in the town is manufactured by persons who have premises outside the Borough, and little difficulty was experienced with this commodity. Much of the ice cream is now purchased.

Details of the food condemned and surrendered are given in Table XII, Appendix D.

Slaughterhouses

The Local Authority granted licences in respect of three slaughterhouses within the Borough during 1965 and the three slaughterhouses now appear to be operating satisfactorily.

Meat Inspection

The operation of the three slaughterhouses above-mentioned thrust a heavy burden on the Health Committee and the staff of the Health Department, as it is felt that 100% of the animals slaughtered should be inspected and in addition the Committee feel that this inspection must be carried out at the time of slaughter, in order to be effective.

Every endeavour, therefore, has been made to do this, and details of the animals slaughtered and the offals and meat condemned will be found in Table XIII.

(D) GENERAL

Petroleum sold and (outside of Calsonic) Order.

The licensing of petroleum stores is a duty carried out by the Health Committee and all licences are at present in operation for the storage of petroleum spirit and mixtures.

One person is licensed to keep Calsonic of Calsonic.

Motor Vehicle and Driving Licences

During the year 5 Motor Vehicle Licences were issued and 7 licences to drive Motor Vehicles.

Game Dealers Licences

One licence to deal in game was renewed and issued.

Old Metal Dealers

One licence was issued in respect of dealing in old metal.

19	(1) Number of dwelling houses in respect of which notices were served requiring repairs to be remedied
----	--

13	(2) Number of dwelling houses in which defects were remedied after the service of notices:-
----	---

0	(a) by owners
---	---------------

0	(b) by local authority in default of owners
---	---

C.	Proceedings under Section 16 and 17 of the Housing Act, 1957.	
	(1) Number of dwelling houses in respect of which Demolition Orders were made.	2
	(2) Number of dwelling houses demolished in pursuance of Demolition Orders	4
D.	Proceedings under Section 18 of the Housing Act, 1957.	
	(1) Number of tenement or underground rooms in respect of which Closing Orders were made.	5
	(2) Number of separate tenement or underground rooms in respect of which Closing Orders were determined.	0
4.	Housing Act, 1957, Part IV - Overcrowding :-	
	A. Number of new cases of overcrowding relieved during the year	0
	B. (1) Number of cases of overcrowding relieved during the year	0
	(2) Number of persons concerned in such cases (exact details of overcrowding - not known).	0
5.	Housing Act, 1949 :-	
	(1) Number of schemes submitted :-	
	(a) By private individuals	45
	(b) By Local Authority to the Ministry	0
	(2) Number of dwelling houses affected	45
	(1) Number of schemes finally approved	45
	(2) Number of dwelling houses affected	45
	(3) Number of additional separate dwellings provided	0

Proceedings under Section 15 and 17 of the Housing
Act, 1957.

(1) Number of dwelling houses in respect of which
Demolition Orders were made.

(2) Number of dwelling houses demolished in
pursuance of Demolition Orders.

Proceedings under Section 15 of the Housing Act, 1957.

(1) Number of tenements or sub-tenements in
respect of which Closing Orders were made.

(2) Number of separate tenements or sub-tenements
closed in respect of which Closing Orders were
made.

Housing Act, 1957, Part IV - Overcrowding :-

A. Number of new cases of overcrowding notified during the
year.

B. (1) Number of cases of overcrowding notified during
the year.

(2) Number of persons concerned in such cases (sex and
date of birth - not known).

Housing Act, 1957 :-

(1) Number of notices submitted :-

(a) By private individuals

(b) By local authority or the Ministry

(2) Number of dwelling houses affected

(1) Number of notices finally approved

(2) Number of dwelling houses affected

(3) Number of additional separate dwellings provided
