SECTION I

VITAL STATISTICS

Health Department,

Stubbylee Hall,

BACUP,

Lancashire.

Population

The Registrar General's estimate of the resident population for the mid-year 1964 is 16,890, and the vital statistics in the report are based on this figure.

September, 1965.

To the Mayor, Aldermen and Burgesses
of the Borough of Bacup

Mr. Mayor and Gentlemen,

In accordance with my statutory duty as your Medical Officer of Health, I have the honour to present the Annual Report for the year 1964.

The contents of the report have been compiled in accordance with the Ministry of Health Circular 1/65 dated 11th January, 1965.

The main Public Health problem of the Borough lies in the clearance of houses unfit for human habitation. The latter consist of back-to-back, back-to-land and cellar dwellings. During the year Official Representations were made in respect of 127 houses in Clearance Areas, and 1 in respect of individual unfit houses. In all, 53 houses were demolished, 1 Closing Order made, and 9 persons rehoused. Two further Clearance Schemes are in hand in Blackwood Road and Market Street, Bacup, which affect some 148 properties.

Improvement of substandard houses continues to be made, and 63 Improvement Grants were allowed.

Measles ... 189

Scarlet Fever ...

Whooping Cough ...

Purpurall Pyrexia ...

Dysentery ...

I have the honour to be,

Mr. Mayor and Gentlemen,

Your obedient servant,

A. NELSON PICKLES

SECTION II

Medical Officer of Health

GENERAL HEALTH SERVICES

The provision of Local Health Authority Services are the responsibility of the Lancashire County Council through the Divisional Health Committee No. 13, on which this Council is represented.

Health Department,

Stobhill Hall,

BACUP,

Lancashire.

September, 1965.

To the Mayor, Aldermen and Burgesses
of the Borough of Bacup

Mr. Mayor and Gentlemen,

In accordance with my statutory duty as your Medical Officer
of Health, I have the honour to present the Annual Report for the year
1964.

The contents of the report have been compiled in accordance
with the Ministry of Health Circular 1/65 dated 11th January, 1965.

The main Public Health problem of the Borough lies in the
clearance of houses with low human habitation. The latter consists of
back-to-back, back-to-lane and similar dwellings. During the year
Official Representations were made in respect of 15 houses in
Clearance Areas, and 1 in respect of individual units houses. In all,
55 houses were demolished, 1 Clearance Order made, and 9 persons rehoused.
Two further Clearance Schemes are in hand in Blackwood Road and Market
Street, Bacup, which affect some 148 properties.

Improvement of substandard houses continues to be made, and
63 Improvement Grants were allowed.

I have the honour to be,

Mr. Mayor and Gentlemen,

Your obedient servant,

A. NELSON PICKLES

Medical Officer of Health

APPENDIX A

SECTION I

VITAL STATISTICS AND CAUSES OF DEATH

VITAL STATISTICS

Population

SUMMARY OF STATISTICS - 1964

The Registrar General's estimate of the resident population for the mid-year 1964 is 16,890, and the vital statistics in the report are based on this figure.

Population (Census 1961)	17,285
Number of Inhabited Houses (1931)	5,364
Number of Inhabited Houses (1964)	6,270
Births Value	2,365,766
Rate represented by a penny rate	21,350

Births

The adjusted Birth Rate i.e., the figure arrived at if the age and sex constitution of the population of the district was in the same proportion as the rest of England and Wales, is 19.5 per 1,000 population (the figure is 16.3 for England and Wales).

The adjusted Death Rate is 13.0 compared with 11.3 for England and Wales.

SECTION II

INFECTIOUS DISEASES

Other than cases of Tuberculosis, the notification of infectious diseases for 1964 were limited to the following:-

Measles	...	189
Scarlet Fever	..	1
Whooping Cough	...	22
Puerperal Pyrexia	...	1
Dysentery	...	1

INFANT MORTALITY

Deaths of infants under one year of age:-

SECTION III

GENERAL HEALTH SERVICES

The provision of Local Health Authority Services are the responsibility of the Lancashire County Council through the Divisional Health Committee No. 13, on which this Council is represented.

Cardio-vascular Diseases	87	5.15
Cancer	36	2.13
Tuberculosis	1	.06
Bronchitis	8	.48
Other Respiratory Diseases	2	.12

NOTE: Figures in parentheses refer to the year 1963.

SECTION I

VITAL STATISTICS

Population

The Registrar General's estimate of the resident population for the mid-year 1961 is 16,890, and the vital statistics in the report are based on this figure.

Births

The adjusted Birth Rate 1.6, the figure arrived at if the age and sex composition of the population of the district was in the same proportion as the rest of England and Wales, is 19.5 per 1,000 population (the figure is 16.5 for England and Wales).

The adjusted Death Rate is 15.0 compared with 11.5 for England and Wales.

SECTION II

INFECTIOUS DISEASES

Other than cases of Tuberculosis, the notification of infectious diseases for 1961 were limited to the following:-

Measles	...	189
Scarlet Fever	...	1
Whooping Cough	...	22
Paratyphoid	...	1
Dysentery	...	1

SECTION III

GENERAL HEALTH SERVICES

The provision of Local Health Authority Services are the responsibility of the Lancashire County Council through the Divisional Health Committee No. 15, in which this Council is represented.

Public Health Department,

SECTION IV

Stubbylee Hall,

ENVIRONMENTAL HEALTH SERVICES
BACUP.

September, 1965.

Social Conditions:

To the Mayor, Aldermen and Burgesses
of the Borough of Bacup

Mr. Mayor and Gentlemen,

I have pleasure in submitting a report on the work of the Health Department and the environmental conditions within the Borough during the year 1964.

Slum Clearance again constituted the main effort made by the Department, with the full support of the Committee, and the clearance of unfit houses again received considerable attention in schemes being dealt with in Todmorden Road and the Underbank area, where a scheme of redevelopment is now well in hand, and considerable progress has been made in the demolition and re-treatment of the site in Todmorden Road. The Forest Street Clearance Area was also demolished and the site cleared, and a further scheme is in hand with regard to Market Street/Plantation Street area, and demolition of the next section should take place in the near future.

Considerable preparation work was done in respect of a further large scheme of demolition to be effected in the Market Street/Plantation Street area, and the initial stages of this scheme are now in hand. This appears to be a bold step forward which should lead to the demolition of one of the worst parts of the town which has long been an eye-sore, and which has required attention for some considerable time. The site upon which the houses stand cannot be redeveloped due to the steep nature of the hillside, but it is envisaged that the ultimate landscaping treatment will be of benefit to the town, insofar that it will provide a more pleasant and amenable access to the town centre.

There was again no serious outbreak of food poisoning or infectious disease during the year, but constant attention must be given to food premises in order to maintain a high standard of food hygiene. Recent outbreaks in other parts of the country have emphasised the need for constant care and attention to personal cleanliness in all matters relative to food handling, and matters of this nature cannot be too greatly emphasised.

The nature of the work in the Health Department is such that the full co-operation of all is necessary, and my thanks are again due to the Staff of the Health Department for their loyal and willing service, and I am grateful for the excellent co-operation received from other departments of the Council, and for the keen interest shown by the Chairman and Members of the Health Committee throughout the year.

I am, Mr. Mayor and Gentlemen,
Your obedient Servant,

Refuse disposal is carried out by controlled tipping at the two tips at Sharneyford and Blackwood. R. HAWORTH will have in operation a salvage scheme.

Chief Public Health Inspector

Street cleansing is carried out under the supervision of the Borough Surveyor, and gully emptying is done by modern mechanical means.

Public Health Department,

Stubblye Hall,

BACUP.

September, 1905.

To the Mayor, Aldermen and Burgesses
of the Borough of Bacup

Mr. Mayor and Gentlemen,

I have pleasure in submitting a report on the work of the
Health Department and the environmental conditions within the Borough
during the year 1905.

Some clearance again constituted the main effort made by the
Department, with the full support of the Committee, and the clearance of
the houses again received considerable attention in schemes being dealt
with in Todmorden Road and the Underbank area, where a scheme of
redevelopment is now well in hand, and considerable progress has been
made in the demolition and re-treatment of the site in Todmorden Road.
The Forest Street Clearance Area was also demolished and the site cleared,
and a further scheme is in hand with regard to Market Street/Plantation
Street area, and demolition of the next section should take place in the
near future.

Considerable preparation work was done in respect of a further
large scheme of demolition to be effected in the Market Street/Plantation
Street area, and the initial stages of this scheme are now in hand.
This appears to be a bold step forward which should lead to the demolition
of one of the worst parts of the town which has long been an eye-sore, and
which has required attention for some considerable time. The site upon
which the houses stand cannot be redeveloped due to the steep nature of
the hillside, but it is envisaged that the ultimate landscaping treatment
will be of benefit to the town, insofar that it will provide a more
pleasant and accessible access to the town centre.

There was again no serious outbreak of food poisoning or
infectious disease during the year, but constant attention must be given
to food premises in order to maintain a high standard of food hygiene.
Recent outbreaks in other parts of the country have emphasised the need
for constant care and attention to personal cleanliness in all matters
relative to food handling, and matters of this nature cannot be too greatly
emphasised.

The nature of the work in the Health Department is such that
the full co-operation of all is necessary, and my thanks are again due to
the Staff of the Health Department for their loyal and willing service,
and I am grateful for the excellent co-operation received from other
departments of the Council, and for the keen interest shown by the Chairman
and Members of the Health Committee throughout the year.

I am, Mr. Mayor and Gentlemen,

Yours obedient servant,

E. HAWORTH

Chief Public Health Inspector

SECTION IV

The closet accommodation in the Borough consists entirely of fresh water closets. There are 6,729 of these, and gradual abolition of the privies is being effected by the grants made by the Health Committee in respect of conversions. Details of the closets and water closets are given in Table IX, Appendix C.

ENVIRONMENTAL HEALTH SERVICES

Social Conditions:

Chief Occupations: The shoe and slipper trade and cotton spinning provide the chief industry in the town which is mainly industrial in character. There is some light engineering, stone quarrying and coal mining which also gives employment to a number of people in the district, and in addition a number of mills which manufacture felted materials.

The Council are making every effort to attract new industries, and this met with some success during the year, and extensions to new works are anticipated.

The country is hilly and there are many scattered hillfarms with small dairy herds.

(A) SANITARY INSPECTION OF AREA.

Water Supply:

The main supply of water to the town is satisfactory, being provided by the Bolton Corporation Water Undertaking, and a large percentage of the domestic properties enjoy a supply of water which is wholly sufficient and excellent in quality. The Bacup Corporation Water Undertaking was transferred to the Bolton Corporation by virtue of the Bolton Water Order on the 1st of April, 1963.

Sixty four samples of the town's water were taken by the Undertaking during the year from the distribution system, and submitted for bacteriological examination, and sixty one proved satisfactory.

Fifteen samples were also taken at the filter stations within the Borough, and all proved satisfactory.

Radon Control: The number of dwellinghouses supplied from the public mains is 6,489.

Rivers and Streams:

The Mersey River Board is the controlling authority for the main river in the Borough, and the Local Authority is responsible for the streams and the portion of the Irwell which joins on to the main river.

Swimming: The River Irwell is used in connection with the local industries and widely used for trade effluents.

Public Cleansing:

The household refuse collection is maintained on a weekly basis from all houses in the town, and approximately 7,000 dustbins are emptied weekly by the three freighters each manned by a driver and four loaders.

Refuse disposal is carried out by controlled tipping at the two tips at Sharneyford and Blackwood, and the Council have in operation a salvage scheme.

Street cleansing is carried out under the supervision of the Borough Surveyor, and gully emptying is done by modern mechanical means.

ENVIRONMENTAL HEALTH SERVICESSocial Conditions:

Chief Occupations: The shoe and slipper trade and cotton spinning provide the chief industry in the town which is mainly industrial in character. There is some light engineering, stone quarrying and coal mining which also gives employment to a number of people in the district, and in addition a number of mills which manufacture felted materials.

The Council are making every effort to attract new industries, and this has with some success during the year, and extensions to new works are anticipated.

The country is hilly and there are many scattered hill-farms with small dairy herds.

(A) SANITARY INSPECTION OF AREA.Water Supply:

The main supply of water to the town is satisfactory, being provided by the Bolton Corporation Water Undertaking, and a large percentage of the domestic properties enjoy a supply of water which is wholly sufficient and excellent in quality. The Bolton Corporation Water Undertaking was transferred to the Bolton Corporation by virtue of the Bolton Water Order on the 1st of April, 1955.

Sixty-four samples of the town's water were taken by the Undertaking during the year from the distribution system, and submitted for bacteriological examination, and sixty-one proved satisfactory.

Further samples were also taken at the filter stations within the Borough, and all proved satisfactory.

The number of dwellings supplied from the public mains is 6,489.

Rivers and Streams:

The Mersey River Board is the controlling authority for the main river in the Borough, and the Local Authority is responsible for the stream and the portion of the Irwell which joins on to the main river.

The River Irwell is used in connection with the local industries and widely used for trade effluents.

Public Cleansing:

The household refuse collection is maintained on a weekly basis from all houses in the town, and approximately 7,000 dustbins are emptied weekly by the three freighters maintained by a driver and four loaders.

Refuse disposal is carried out by controlled tipping at the two tips at Burnage and Blackwood, and the Council have in operation a refuse incinerator.

Street cleansing is carried out under the supervision of the Borough Surveyor, and gully emptying is done by modern mechanical means.

Closet Accommodation:

The closet accommodation in the Borough consists mainly of fresh water closets, there being approximately 4,729 of these, and gradual abolition of the waste water closets is encouraged by the grants made by the Health Committee in respect of conversions. Details of the closets other than fresh water closets are given in Table IX, Appendix C.

Many of the back-to-back type houses have joint W.C. accommodation, and this type of house would be greatly improved if separate indoor sanitary accommodation could be provided.

Eradication of Bed Bugs:

Hydrogen Cyanide is used in connection with the disinfection of household goods when transfers are made from infested property to Council houses, and others are treated with D.D.T. solution and spray.

These methods proved effective, particularly if a follow up spraying was performed and the advice given to tenants was acted upon.

Atmospheric Pollution:

Many of the local industries are now using modern methods of steam raising, and the fitting of oil fired furnaces to several local boiler plants has led to better conditions with regard to atmospheric pollution from industry, and in addition, several firms have installed mechanical stokers to good effect.

The problem of atmospheric pollution from domestic chimneys remains one which needs to be considered in the future, and no doubt efforts will be made to deal with the domestic smoke problem when the clearance of a large percentage of the older type of house has been achieved. Some difficulty in this field is being experienced due to the availability of suitable fuels for the domestic grate, but it is reported that such fuels may be in better supply in the near future.

Rodent Control:

This work is carried out in accordance with the recommendations of the Ministry of Agriculture, Fisheries and Food and the Council's sewers were treated on two occasions.

In addition to this, 19 business premises, 51 dwellinghouses and 6 local authority properties were treated.

Swimming Baths:

The Council own and administer the Public Baths which are situated in the centre of the town, and modern facilities are available, with continuous filtration and chlorination plant installed which gives excellent facilities from a public health point of view, and the facilities are widely used by the public.

Factories:

The sanitary accommodation in most of the factories within the district is reasonable in standard, but complaints are dealt with as the necessity arises.

Table X, Appendix C gives a summary of the inspections made and details of the results.

Closet Accommodation:

The closet accommodation in the Borough consists mainly of fresh water closets, there being approximately 4,750 of these, and gradual abolition of the waste closets is encouraged by the grants made by the Health Committee in respect of conversions. Details of the closets other than fresh water closets are given in Table IX, Appendix C.

Many of the back-to-back type houses have joint W.C. accommodation, and this type of house would be greatly improved if separate indoor sanitary accommodation could be provided.

Extermination of Bed Bugs:

Hydrogen Cyanide is used in connection with the disinfection of household goods when transfers are made from infested property to Council houses, and others are treated with D.D.T. solution and spray.

These methods proved effective, particularly if a follow up spraying was performed and the advice given to tenants was acted upon.

Atmospheric Pollution:

Many of the local industries are now using modern methods of steam raising, and the fitting of oil fired furnaces to several local boiler plants has led to better conditions with regard to atmospheric pollution from industry, and in addition, several firms have installed mechanical stokers to good effect.

The problem of atmospheric pollution from domestic chimneys remains one which needs to be considered in the future, and no doubt efforts will be made to deal with the domestic smoke problem when the clearance of a large percentage of the older type of house has been achieved. Some difficulty in this field is being experienced due to the availability of suitable fuels for the domestic grate, but it is reported that such fuels may be in better supply in the near future.

Rubbish Control:

This work is carried out in accordance with the recommendations of the Ministry of Agriculture, Fisheries and Food and the Council's scheme was revised on two occasions.

In addition to this, 19 business premises, 34 dwellings and 6 local authority properties were treated.

Swimming Baths:

The Council own and administer the Public Baths which are situated in the centre of the town, and modern facilities are available with continuous filtration and chlorination plant installed which gives excellent facilities from a public health point of view, and the facilities are widely used by the public.

Factories:

The sanitary accommodation in most of the factories within the district is reasonable in standard, but complaints are dealt with as the necessity arises.

Table X, Appendix C gives a summary of the inspections made and details of the results.

Sanitary Inspection of the Area:

It is clear that a large percentage of the cottage property within the town which is substantially built and capable of modernisation is very quickly becoming owner/occupied, and rented properties are either properties which are Council owned, or properties which are ultimately scheduled for demolition. The owners of the older type rented properties still complain with regard to the high cost of repairs, and the utmost difficulty is experienced in keeping such tenanted properties in a reasonable state of repair.

The statement in Table VIII, Appendix (C) shows the number and nature of the inspections made.

(B) HOUSING.

The hilly nature of the district has led in the past to the building of many back-to-back, back-to-land and basement dwellings, and the prevalence of such a large proportion of these types of houses, which today cannot, generally speaking, be regarded as of a satisfactory standard, still remains a problem to be solved. This matter requires constant attention, and whilst every endeavour is made to keep the old houses weatherproof and in a reasonable state of repair, the work done is often not sufficient to render the old houses in all respects fit for habitation. In addition, the lack of amenities in numerous back-to-back houses remains a matter with which the department is seriously concerned, and in this regard every opportunity must be taken to encourage these amenities to be improved wherever possible.

The Council's programme of new house building continued, 20 being completed by the Local Authority, and more houses will shortly be ready for occupation, and are in course of construction.

It is difficult to assess the extent of overcrowding in the Borough in the absence of a proper survey, but it is known that some overcrowding exists.

Table XI, Appendix C, gives details of the new houses provided, and also the action taken with regard to unfit dwellinghouses.

During the year the action taken with regard to Slum Clearance was considerably speeded up, and schemes were dealt with in the Underbank Area and Market Street Area totalling some 127 houses, whilst in addition to this, demolition work proceeded in the Todmorden Road area. Further large schemes are envisaged in the Blackwood Road and Market Street areas, and considerable work with reference to Slum Clearance action is programmed for the future, and must exercise the attention of the department for some considerable time to come, if areas are to be cleared which are capable of redevelopment.

(C) INSPECTION AND SUPERVISION.

Milk Supply:

The responsibility for the supervision of farms and the production of milk having passed to the Ministry of Agriculture, Fisheries and Food, the main duty of the Local Authority was in connection with distributors of milk and the registration of milk distributors, dairies or milk shops.

Sanitary Inspection of the Area:

It is clear that a large percentage of the cottage property within the town which is substantially built and capable of modernisation is very quickly becoming owner/occupied, and rented properties are either properties which are Council owned, or properties which are ultimately scheduled for demolition. The owners of the older type rented properties still complain with regard to the high cost of repairs, and the utmost difficulty is experienced in keeping such tenanted properties in a reasonable state of repair.

The statement in Table VIII, Appendix (C) shows the number and nature of the inspections made.

(b) HOUSING

The basic nature of the district has led in the past to the building of many back-to-back, back-to-land and basement dwellings, and the prevalence of such a large proportion of these types of houses, which today cannot generally speaking, be regarded as of a satisfactory standard, still remains a problem to be solved. This matter requires constant attention, and whilst every endeavour is made to keep the old houses well-maintained and in a reasonable state of repair, the work done is often not sufficient to render the old houses in all respects fit for habitation. In addition, the lack of amenities in numerous back-to-back houses remains a matter with which the department is seriously concerned, and in this regard every opportunity must be taken to encourage these amenities to be improved wherever possible.

The Council's programme of new house building continued, 20 being completed by the Local Authority, and more houses will shortly be ready for occupation, and are in course of construction.

It is difficult to assess the extent of overcrowding in the Borough in the absence of a proper survey, but it is known that some overcrowding exists.

Table XI, Appendix C, gives details of the new houses provided, and also the action taken with regard to unfit dwellings.

During the year the action taken with regard to Slum Clearance was considerably speeded up, and schemes were dealt with in the Underbank Area and Market Street Area totalling some 127 houses, whilst in addition to this, demolition work proceeded in the Tobacco Road area. Further large schemes are envisaged in the Blackwood Road and Market Street areas, and considerable work with reference to Slum Clearance action is planned for the future, and must exercise the attention of the department for some considerable time to come, if areas are to be cleared which are capable of redevelopment.

(c) INSPECTION AND SUPERVISION.

Milk Supply:

The responsibility for the supervision of farms and the production of milk having passed to the Ministry of Agriculture, Fisheries and Food, the main duty of the Local Authority was in connection with distribution of milk and the regulation of milk distributors, dairies or milk shops.

Food Hygiene:

Routine visits were made during the year to the premises in the Borough where ice cream is sold by retail only.

The bulk of the ice cream which is sold in the town is manufactured by persons who have premises outside the Borough, and little difficulty was experienced with this commodity. Much of the ice cream is now pre-packed.

Details of the food condemned and surrendered are given in Table XII, Appendix C.

Slaughterhouses:

The Local Authority granted licences in respect of three slaughterhouses within the Borough during 1964, and the three slaughterhouses are now in operation.

A prosecution was taken during 1964 relative to non-compliance with the Slaughterhouse Regulations.

Meat Inspection:

The operation of the three slaughterhouses above-mentioned was kept under strict supervision, and all the animals slaughtered there were inspected in accordance with the instructions of the Health Committee, who direct that at all times 100% inspection be carried out. Every endeavour, therefore, has been made to do this, and details of the animals slaughtered and meat condemned will be found in Table XIII.

(D) GENERAL.

Petroleum Acts and Carbide of Calcium Order:

The licensing of petroleum stores is a duty carried out by the Health Committee, and 41 licences are at present in operation for the storage of petroleum spirit and mixture.

Hackney Carriages and Driving Licences:

During the year 2 Hackney Carriage Licences were issued and 4 Licences to drive Hackney Carriages.

Game Dealers Licences:

One licence to deal in game was renewed and issued.

Old Metal Dealers:

One licence was issued in respect of dealers in old metal.

Food Hygiene:

Household visits were made during the year to the premises in the Borough where ice cream is sold by retail only.

The bulk of the ice cream which is sold in the town is manufactured by persons who have premises outside the Borough, and little difficulty was experienced with this commodity. Much of the ice cream is now pre-packed.

Details of the food examined and surrendered are given in Table XII, Appendix C.

Slaghterhouses:

The Local Authority granted licences in respect of three slaghterhouses within the Borough during 1964, and the three slaghterhouses are now in operation.

A prosecution was taken during 1964 relative to non-compliance with the Slaghterhouse Regulations.

Meat Inspection:

The operation of the three slaghterhouses above-mentioned was kept under strict supervision, and all the animals slaugltered there were inspected in accordance with the instructions of the Health Committee, who direct that at all times 100% inspection be carried out. Every endeavour therefore, has been made to do this, and details of the animals slaugltered and meat condemned will be found in Table XIII.

(D) GENERAL.

Petroleum Acts and Carbide of Calcium Order:

The licensing of petroleum stores is a duty carried out by the Health Committee, and all licences are at present in operation for the storage of petroleum spirit and mixture.

Hackney Carriages and Driving Licences:

During the year 2 Hackney Carriage Licences were issued and 4 Hackney Carriages.

Gas Dealer Licences:

One licence to deal in gas was renewed and issued.

Old Metal Dealer:

One licence was issued in respect of dealer in old metal.
