SECTION I
VITAL STATISTICS

Health Department,
Stubbylee Hall,
BACUP,

Population

The Registrar General's estimate of the resident population of Lancashire for the mid-year 1970 is 15,320, and the vital statistics for the year are based on this figure.

August, 1971.

To the Mayor, Aldermen and Burgesses
of the Borough of Bacup

Mr. Mayor, Ladies and Gentlemen,

In accordance with my statutory duty as your Medical Officer of Health, I have the honour to present the Annual Report for the year 1970.

The contents of the report have been compiled in accordance with the Ministry of Health Circular 1/71 dated January, 1971.

The Registrar General gives a figure of 16,220 as the estimated population, and other statistical figures are given in the report relative to the birth rate and death rate, and the incidence of mortality and infectious diseases.

The work in respect of slum clearance again proceeded throughout the year, and representations were made in respect of 8 Clearance Areas affecting some 115 dwellinghouses, and in addition one house was represented as being individually unfit, and the Council at present have a substantial slum clearance programme in hand which requires constant attention.

Ninety-four dwellinghouses were demolished during the year, and schemes are in progress for the demolition of many more unfit houses.

The improvement of sub-standard houses also continued, and 72 Improvement Grants were allowed during the year.

I have the honour to be,

Mr. Mayor, Ladies and Gentlemen,

Your obedient servant,

A. NELSON PICKLES

Medical Officer of Health

SECTION III
GENERAL HEALTH SERVICES

The provision of Local Health Authority Services are the responsibility of the Lancashire County Council through the Divisional Health Committee No. 73, in which this Council is represented.

Health Department,
Cotton Office Hall,
SACUP,
Lancashire,
August, 1977.

To the Mayor, Aldermen and Burgesses
of the Borough of Bacup

Mr. Mayor, Ladies and Gentlemen,

In accordance with my statutory duty as your Medical Officer
of Health, I have the honour to present the Annual Report for the
year 1976.

The contents of the report have been compiled in accordance
with the Ministry of Health Circular 7/75 dated January, 1975.

The Registrar General gives a figure of 88,250 as the
estimated population, and other statistical figures are given in the
report relative to the birth rate and death rate, and the incidence
of mortality and infectious diseases.

The work in respect of skin clearance again proceeded
throughout the year, and representations were made in respect of
5 Clearance Areas affecting some 175 dwellings, and in addition
one house was represented as being adversely affected, and the Council
at present have a substantial skin clearance programme in hand which
requires constant attention.

Ninety-four dwellings were demolished during the year,
and schemes are in progress for the demolition of many more dwell-
ings.

The improvement of sub-standard houses also continued, and
75 improvement grants were allowed during the year.

I have the honour to be,

Mr. Mayor, Ladies and Gentlemen,

Yours obedient servant,

A. NEWSON PICKLES

Medical Officer of Health

SECTION I

VITAL STATISTICS

Population

The Registrar General's estimate of the resident population for the mid-year 1970 is 16,220, and the vital statistics in the report are based on this figure.

Births

The adjusted Birth Rate, i.e., the figure arrived at if the age and sex constitution of the population of the district was in the same proportion as the rest of England and Wales, is 16.2 per 1,000 population (the figure is 16.0 for England and Wales).

The Adjusted Death Rate is 13.3 compared with 11.7 for England and Wales.

SECTION II

INFECTIOUS DISEASES

Other than cases of Tuberculosis, the notification of infectious diseases for 1970 were limited to the following:-

Measles	271
Whooping Cough	6
Scarlet Fever	2
Infective Jaundice	1
Dysentery	1

SECTION III

GENERAL HEALTH SERVICES

The provisions of Local Health Authority Services are the responsibility of the Lancashire County Council through the Divisional Health Committee No. 13, on which this Council is represented.

SECTION I VITAL STATISTICS

Population

The Registrar General's estimate of the resident population for the mid-year 1970 is 16,520, and the vital statistics in the report are based on this figure.

Births

The adjusted birth rate, i.e., the figure arrived at if the age and sex composition of the population of the district was in the same proportion as the rest of England and Wales, is 16.5 per 1,000 population (the figure is 16.0 for England and Wales).

The adjusted death rate is 13.5 compared with 11.7 for England and Wales.

SECTION II

INFECTIOUS DISEASES

Other than cases of Tuberculosis, the notification of infectious diseases for 1970 were limited to the following:-

Measles	...	477
Whooping Cough	...	6
Hepatitis	...	5
Intestinal Infection	...	1
Typhoid	...	1

SECTION III

GENERAL HEALTH SERVICES

The provision of Local Health Authority Services and the responsibility of the Lancashire County Council through the District Health Committee No. 15, in which this Council is represented.

APPENDIX A

VITAL STATISTICS AND CAUSES OF DEATH

TABLE I

Public Health Department,

Stubbylee Hall,

BACUP.

August, 1971.

To the Mayor, Aldermen and Burgesses
of the Borough of Bacup

Mr. Mayor, Ladies and Gentlemen,

I have pleasure in submitting the report on the work of the Health Department during the year 1970.

As the Committee are no doubt well aware, slum clearance again received priority in the department, and many schemes are still in hand for the demolition of unfit properties and the re-making of the resulting sites.

These schemes include the demolition of property in the Stacksteads area, and the making of the car park, and the demolition of properties in the Bowker Street Fullers Terrace area, and much preliminary work was done relative to the demolition of the properties situated at Lanehead and Camel Street, Bacup, and several other areas of the town.

Other schemes already in hand include property situated in Samuel Street, Bacup, Cobden Street, Britannia, Lord's Court, Bacup, Howorth Street, Bacup, and the South Street area, where re-development of the site is envisaged for housing purposes.

The importance of preventing further decline in the structural conditions of the property in the town is one which has also received attention, and many Improvement Grants were made, and much time spent advising owner/occupiers and others relative to the Grant Aid available for the improvement of properties. There appears to be little doubt that this work will now be speeded up as a result of the enhanced Grant Aid announced by the Ministry.

Schemes for the general improvement of areas are at the present time being seriously considered, and consultations have taken place between the officers of the Council and the officials of the Ministry of the Environment, and there is no doubt that there is ample scope for work of this nature.

May I express my thanks to the Chairman and Members of the Health Committee for their continued support throughout the year, and to the Officers of the Council for their co-operation, and to the Staff of the Health Department for their continued loyalty.

I am, Mr. Mayor, Ladies and Gentlemen,

R. HAWORTH

Chief Public Health Inspector

Public Health Department.

Sanitary Hall.

SACRY.

August, 1900.

To the Mayor, Aldermen and Burgesses
of the Borough of Salford.

Mr. Mayor, Ladies and Gentlemen,

I have pleasure in submitting the report on the work of the
Health Department during the year 1900.

In the Committee are no doubt well aware, also, that
again received priority in the department, and many schemes are still in
need for the demolition of unfit properties and the re-erecting of the
residential areas.

These schemes include the demolition of property in the
Hawthorn area, and the making of the new park, and the demolition
of property in the Bower Street Police Terrace area, and much
preliminary work was done relative to the demolition of the properties
situated at Jackson and Canal Street, Salford, and several other areas
of the town.

Other schemes already in hand include property situated at
Hawthorn Street, Salford, Jackson Street, Salford, and the
Bower Street area, and the Bower Street area, where re-erecting
of the site is envisaged for housing purposes.

The importance of preventing further decline in the
condition of the property in the town is one which has also received
attention, and many improvement orders were made, and much time spent
advising owners, and others relative to the grant and availability
for the improvement of properties. There appears to be little doubt
that work will now be speeded up as a result of the enhanced value
announced by the Ministry.

Schemes for the general improvement of areas are at the present
time being seriously considered, and consideration has been given to
the effects of the Council and the officials of the Ministry of the
Government, and there is no doubt that there is ample scope for work
of this nature.

My I express my thanks to the Council and Members of the
Health Committee for their continued support throughout the year, and
to the Officers of the Council for their co-operation, and to the staff of the
Health Department for their continued loyalty.

I am, Mr. Mayor, Ladies and Gentlemen,

S. SACRY.

Chief Public Health Inspector.

SECTION IV

ENVIRONMENTAL HEALTH SERVICES

Social Conditions:

Chief Occupations: The shoe and slipper trade provides the chief industry in the town, and there is also an extensive stone quarry within the district, and the combining of materials has also provided an additional industry which is growing.

There is some light engineering, and manufacture of electrical equipment, which gives employment to a number of people in the district, and in addition there are a number of mills which manufacture felted materials.

The Council are making every effort to attract new industries, and extensions to new works are anticipated.

The country is hilly, and there are many scattered hillfarms with small dairy herds.

(A) SANITARY INSPECTION OF AREA

Water Supply:

The water supplied to the Borough of Bacup by Bolton Corporation Water Undertaking was satisfactory both as regards quality and quantity.

Normally, samples of both raw and filtered water are regularly subjected to full bacteriological and chemical analysis. Special analyses are made as circumstances require.

During 1970, 147 samples of raw water taken from Cowpe and Sheephouse Pressure Filters were subjected to bacteriological examination and partial chemical analysis, and 3 were subjected to full chemical analysis. In addition, 183 samples of filtered and treated water, including 24 samples taken from the distribution system, received bacteriological examination and partial chemical analysis, and 3 received full chemical analysis. The results showed that the filtered and treated water was of excellent quality, B. Coli being absent in 97.3% of the potable water samples tested. All water is treated before passing into supply.

From tests made the water was shown to have no significant plumbo-solvent action. No special action was required to be taken in respect of any form of contamination. The average natural fluoride content of the water supplied to Bacup is 0.15 p.p.m.

The public water mains afforded a direct supply to a population of 16,220 living in Bacup. No supply was afforded to dwellinghouses by standpipe.

The following extensions and renewals of water mains were carried out in 1970:-

<u>Size of Main</u>	<u>Existing Property</u>	<u>New Houses</u>	<u>Renewals</u>
2" dia.	32 yds.	124 yds.	-
3" "	-	101 yds.	108 yds.

ENVIRONMENTAL HEALTH SERVICESLocal Conditions:

Local Occupations: The shoe and zipper trade provides the chief industry in the town, and there is also an extensive shoe repair within the district, and the combining of materials has also provided an additional industry which is growing.

There is some light engineering, and manufacture of electrical equipment, which gives employment to a number of people in the district, and in addition there are a number of mills which manufacture toilet materials.

The Council are making every effort to attract new industries, and extensions to new works are anticipated.

The country is hilly, and there are many scattered hill-farms with small dairy herds.

(A) ENVIRONMENTAL INSPECTION OF AREAWater Supply:

The water supplied to the Borough of Garsop by Bolton Corporation Water Undertaking was satisfactory both as regards quality and quantity.

Normally, samples of both raw and filtered water are regularly submitted for full bacteriological and chemical analysis. Special analyses are made as circumstances require.

During 1970, 197 samples of raw water taken from Garsop and Garsop Reservoir were subjected to bacteriological examination and partial chemical analysis, and 7 were subjected to full chemical analysis. In addition, 103 samples of filtered and treated water, including 25 samples taken from the distribution system, received bacteriological examination and partial chemical analysis, and 7 received full chemical analysis. The results showed that the filtered and treated water was of excellent quality, the Coli being absent in 97.9% of the potable water samples tested. All water is treated before reaching into supply.

From tests made the water was shown to have no significant phospho-molybdate action. No special action was required to be taken in respect of any form of contamination. The average natural fluoride content of the water supplied to Garsop is 0.75 p.p.m.

The public water mains attended a direct supply to a population of 18,250 living in Garsop. No supply was attended to dwellings by standpipes.

The following extensions and renewals of water mains were carried out in 1970:-

<u>Line of Main</u>	<u>Existing</u>	<u>New</u>	<u>Renewals</u>
2" dia.	35 yds.	150 yds.	-
1" "	-	101 yds.	108 yds.

Rivers and Streams:

The Mersy River Board is the controlling authority for the main river in the Borough, and the Local Authority is responsible for the streams and the portion of the Irwell which joins on to the main river.

The River Irwell is used in connection with the local industries and widely used for trade effluents.

Public Cleansing:

The household refuse collection is maintained on a weekly basis from all houses in the town, and approximately 7,000 dustbins are emptied weekly by the three freighters, each manned by a driver and four loaders.

Special facilities are also afforded by the Council in respect of bulky articles of household furniture and ancillary domestic articles and these are collected free on request.

Additional facilities are also made available to the public to dispose of their own domestic articles of a bulky nature on the Council's Tip at Blackwood, where refuse disposal is carried out by controlled tipping, and the Council have in operation a salvage scheme.

Street cleansing is carried out under the supervision of the Borough Surveyor, and gully emptying is done by modern mechanical means.

Closet Accommodation:

The closet accommodation in the Borough consists mainly of fresh water closets, there being approximately 4,748 of these, and gradual abolition of the waste water closets is encouraged by the grants made by the Health Committee in respect of conversions. Details of the closets other than fresh water closets are given in Table IX, Appendix C.

Many of the back-to-back houses have joint W.C. accommodation, and this type of house would be greatly improved if separate indoor sanitary accommodation could be provided.

Eradication of Bed Bugs:

In the very rare cases which are hardly ever found, Hydrogen Cyanide is used in connection with the disinfection of household goods when transfers are made from infested property to Council houses. Other cases are treated with D.D.T. solutions and sprays, and fumigations with Lindane and Dieldrin. Some Pyrethrum Powders are also used.

River and Stream

The River Board is the controlling authority for the main river in the Borough, and the Local Authority is responsible for the stream and the portion of the river which joins on to the main river.

The River itself is used in connection with the local industries and widely used for trade elements.

Public Cleansing

The household refuse collection is maintained on a weekly basis from all houses in the town, and approximately 7,000 households are emptied weekly by the three freighters, which are manned by a driver and four loaders.

Special facilities are also attended by the Council in respect of bulky articles of household furniture and similar domestic articles and these are collected free on request.

Additional facilities are also made available for the public to dispose of their own domestic refuse at a bulky refuse on the Council's Tip at Blackwood, where refuse disposal is carried out by controlled tipping, and the Council have in operation a refuse scheme.

Street cleansing is carried out under the supervision of the Borough Surveyor, and daily emptying is done by motor mechanical means.

Closet Accommodation

The closet accommodation in the Borough consists entirely of fresh water closets, there being approximately 4,700 of these, and gradual abolition of the water closets is encouraged by the grants made by the Health Committee in respect of conversions. Details of the closets other than fresh water closets are given in Table IX, Appendix C.

Many of the back-to-back houses have been converted to closet accommodation, and this type of house would be greatly improved if separate indoor sanitary accommodation could be provided.

Reduction of Bad Smells

In the very rare cases where the smell is very strong, Hydrogen Sulphide is used in connection with the disinfection of household goods when travellers are made from infected property to Council houses. Other gases are treated with D.D.T. solution and sprays, and disinfectants with lime and soda ash. Some Hydrogen Peroxide is also used.

Atmospheric Pollution:

The problem of domestic smoke remains one which needs attention, and the Council have given some consideration to this matter, although Bacup has not been classified as a "black" area.

Work in connection with the making of Smoke Control Areas has still not been undertaken, but it is anticipated that in the near future this work will have to receive very careful consideration, and whilst the clearance of unfit houses is receiving first priority, it becomes increasingly clear that the declaration of Smokeless Zones will have to be seriously considered in the near future.

Local industrialists and commercial premises still appear to favour oil-fired furnaces, and conversions to this fuel have taken place in several installations during 1970.

Rodent Control:

This work is carried out in accordance with the recommendations of the Ministry of Agriculture, Fisheries and Food, and the Council's sewers were continuously treated throughout the twelve month period with Fluoracetamide.

In addition to this, 65 business premises, 116 dwellinghouses and 17 local authority properties which were infested were treated.

Swimming Baths:

The Council own and administer the Public Baths which are situated in the centre of the town, and modern facilities are available, with continuous filtration and chlorination plant installed which gives excellent facilities from a public health point of view, and the facilities are widely used by the public.

The Sauna Bath has continued to be popular, and more modern amenities are envisaged with considerable improvements to the facilities to be offered at the Public Baths.

Factories:

The sanitary accommodation in most of the factories within the district is reasonable in standard, but complaints are dealt with as the necessity arises.

Table X, Appendix C, gives a summary of the inspections made and details of the results.

Sanitary Inspection of the Area:

Experience throughout the year has again shown that a large number of the dwellinghouse properties in the town which are not to be demolished are very quickly becoming almost wholly owner/occupied.

It appears from inspections made that the high cost of repairs to dwellinghouses is rapidly affecting the position with regard to the private ownership of houses which are to let, as the few owners of tenanted houses which are left in the town still complain that investment in properties to let proves uneconomic.

A statement in Table VIII, Appendix (C) shows the number and nature of the inspections made.

The problem of domestic smoke remains one which needs attention, and the Council have given some consideration to this matter, although it has not been classified as a "black" area.

Work in connection with the making of smoke control areas has still not been undertaken, but it is anticipated that in the future this work will have to receive very careful consideration, and whilst the clearance of built-up areas is receiving first priority, it becomes increasingly clear that the clearance of domestic houses will have to be seriously considered in the near future.

Local industrial and commercial premises still appear to favour oil-fired furnaces, and consideration is this fact have taken place in several installations during 1950.

Public Control

This work is carried out in accordance with the recommendations of the Ministry of Agriculture, Fisheries and Food, and the Council's efforts were accordingly directed throughout the twelve months period with this object in view.

In addition to this, 65 business premises, 750 dwellings and 17 local authority premises which were inspected were treated.

Swimming Baths

The Council has not undertaken the Public Baths which are situated in the centre of the town, and modern facilities are available with continuous filtration and chlorination plant installed which gives excellent facilities from a public health point of view, and the facilities are widely used by the public.

The Public Baths are continued to be popular, and the Council are engaged with considerable expenditure in the facilities to be offered at the Public Baths.

Inspection

The sanitary examination in 1950 of the town was a wide one and it is reasonable to assume, but unproven, that the results as the necessary action.

Table I, Appendix C, gives a summary of the results made and details of the results.

Sanitary Inspection of the Area

Examination throughout the year has shown that a large number of the dwellings are in the town which are not so well equipped and very badly equipped, and which are in need of attention.

It appears from inspection work that the high cost of repairs to dwellings is rapidly altering the position with regard to private ownership of houses which are in fact, on the low cost of rented houses which are left in the town still require that attention is given to let private ownership.

A statement in Table VIII, Appendix (C) shows the number and nature of the inspections made.

(B) HOUSING

For many years now, slum clearance and housing have received the attention of the Health Committee and the Health Department, as the hilly nature of the district led to the erection of many back-to-back houses and back-to-the-land houses, and there still remains a considerable problem to be solved, although the programme is proceeding apace.

The Council's Slum Clearance Programme is still considerable, and the demolition of properties leaves problems with regard to the re-making of sites, as in many cases development for building purposes is not possible.

During the year representations were made in respect of several areas, including Samuel Street, Cobden Street, Britannia, Howorth Street, and the South Street areas. Re-development of the South Street area is envisaged for housing purposes.

Many of the older type houses lack modern amenities, with which the Committee is seriously concerned, and every opportunity must be taken to encourage the provision of modern amenities where the condition of the property justifies a reasonable life, and every encouragement is given to prospective applicants for Grant Aid.

Table XI, Appendix C, gives details of the new houses provided and also the action taken with regard to unfit dwellinghouses.

(C) INSPECTION AND SUPERVISION

Offices, Shops and Railway Premises Act:

Routine visits were made to premises requiring inspection under this Act, and all the registered premises within the town have now received a visit and inspection, and all the contraventions found have in general received the attention of the owners.

The general standards found on inspections under this Act are fairly good, and the co-operation received from all the shopkeepers has been very satisfactory.

Milk Supply:

The responsibility for the supervision of farms and the production of milk having passed to the Ministry of Agriculture, Fisheries and Food, the main duty of the Local Authority was in connection with the distributors of milk and the registration of milk distributors, dairies or milk shops.

During 1970 there was one case of a positive culture test where Brucellosis was found in the milk supply, which was dealt with by serving a Pasteurisation Order requiring all milk to be pasteurised. Veterinary co-operation resulted in the removal of affected animals from the herd, and the subsequent withdrawal of the Notice.

For many years now, since slum clearance and housing have received the attention of the Health Committee and the Housing Department, as the result of the inquiry into the situation of many back-to-back houses and back-to-back houses, and there still remains a considerable problem to be solved, although the programme is progressing apace.

The Council's Housing Programme is still considerable, and the demolition of properties leaves problems with regard to the re-letting of houses, as in many cases development for building purposes is not possible.

During the year representations were made in respect of several areas, including General Street, Cobden Street, Britannia Street, and the South Street area. No development of the South Street area is envisaged for housing purposes.

Many of the older type houses have modern amenities, with which the Council is naturally concerned, and every opportunity must be taken to encourage the provision of modern amenities where the condition of the property justifies a reasonable life, and every encouragement is given to prospective applicants for Grants Aid.

Table XI, Appendix B, gives details of the new houses provided and also the action taken with regard to unfit dwellings.

(C) INSPECTION AND SUPERVISION

Offices, Shops and Railway Premises Act

Housing visits were made to premises requiring inspection under this Act, and all the registered premises within the town have now received a visit and inspection, and all the modifications have been in general received the attention of the Council.

The general standards found on inspection under this Act are fairly good, and the co-operation received from all the shopkeepers has been very satisfactory.

Milk Supply

The responsibility for the supervision of farms and the production of milk having passed to the Ministry of Agriculture, Fisheries and Food, the main duty of the Council is in connection with the distribution of milk and the regulation of milk standards, and the distribution of milk.

During 1955 there was one case of a positive culture found where Bacillus was found in the milk supply, which was dealt with by serving a Notification Order requiring all milk to be pasteurised. Necessary co-operation was given in the removal of infected animals from the herd, and the subsequent withdrawal of the milk.

Food Hygiene:

Routine visits were made during the year to the premises in the Borough where ice cream is sold by retail only.

The bulk of the ice cream which is sold in the town is manufactured by persons who have premises outside the Borough, and little difficulty was experienced with this commodity. Much of the ice cream is now pre-packed.

Details of the food condemned and surrendered are given in Table XIII, Appendix C.

Slaughterhouses:

The Local Authority granted renewal of licences in respect of three slaughterhouses within the Borough during 1970.

Meat Inspection:

The operation of the three slaughterhouses above-mentioned was kept under strict supervision, and all the animals slaughtered there were inspected in accordance with the instructions of the Health Committee, who direct that at all times 100% inspection be carried out. Every endeavour, therefore, has been made to do this, and details of the animals slaughtered and meat condemned will be found in Table XIV.

The regulations with regard to hygiene in slaughterhouses are strictly enforced, and constant supervision is maintained in all the slaughterhouses.

(D) GENERAL

Petroleum Acts and Carbide of Calcium Order:

The licensing of petroleum stores is a duty carried out by the Health Committee, and 40 licences are at present in operation for the storage of petroleum spirit and mixture.

Hackney Carriages and Driving Licences:

During the year 3 Hackney Carriage Licences were issued and 4 Licences to drive Hackney Carriages.

Old Metal Dealers:

One licence was issued in respect of dealers in old metal.

Food Hygiene:

Household visits were made during the year to the premises in the Borough where ice cream is sold by retail only.

The bulk of the ice cream which is sold in the town is manufactured by persons who have premises outside the Borough, and little difficulty was experienced with this commodity. Much of the ice cream is now pre-packed.

Details of the food consumed and manufactured are given in Table XIII, Appendix C.

Slaughterhouses:

The Local Authority granted renewal of licences in respect of three slaughterhouses within the Borough during 1930.

Meat Inspection:

The operation of the three slaughterhouses above-mentioned was kept under strict supervision, and all the animals slaughtered there were inspected in accordance with the instructions of the Health Committee, who direct that at all times H.M.S. inspection be carried out. Every endeavour, therefore, has been made to do this, and details of the animals slaughtered and meat examined will be found in Table XIV.

The regulations with regard to hygiene in slaughterhouses are strictly enforced, and constant supervision is maintained in all the slaughterhouses.

GENERAL

Petroleum Acts and Carriage of Explosives Orders:

The licensing of petroleum stores is a duty carried out by the Health Committee, and 40 licences are at present in operation for the storage of petroleum spirit and kerosene.

Hackney Carriages and Driving Licences:

During the year 5 Hackney Carriage licences were issued and 4 licences to drive Hackney Carriages.

Old Metal Dealers:

One licence was issued in respect of dealers in old metal.
