Urban District of Bedworth

# ANNUAL REPORT

OF

The Medical Officer of Health

#### URBAN DISTRICT OF BEDWORTH.

Public Health Department, Council Offices, BEDWORTH.

September, 1944.

To The Chairman and Members of the Public Health Committee.

Mr. Chairman, Lady and Gentlemen,

I have the honour to submit statistical report for 1943.

My term of office did not commence until the 1st January, 1944, and Dr. Webster, who had been your Medical Officer of Health for fifteen years, retired in September of the year under review. Dr. Coote, Assistant Medical Officer of Health for Nuneaton, became Medical Officer of Health for the Urban District from October until the end of the year.

No outstanding epidemics occurred during the year. The vital statistics compare favourably with the country as a whole. The death rate of 8.53 per 1,000 population and the infantile mortality rate of 49.89 per 1,000 live births are satisfactory figures in comparison with most of the other towns of a similar size. The birth rate for the Urban District was 21.03 which is high in comparison with previous years, the birth rate for the country as a whole being 16.5.

Within the Urban District there are some outstanding Sanitary defects which should be remedied at the earliest opportunity. There are 239 pail closets which to my mind are a nuisance within the meaning of the Public Health Acts. Of these pail closets 70 are situated within reasonable distance from existing sewers. The remaining 169 cannot be connected to the sewer at the present moment, but it is hoped that when the district is reviewed from the sewage disposal standpoint these will also be able to be converted to the water carriage system.

The District of Bulkington has no sewered area. There are, in Bulkington, 300 cesspools, 23 privy middens, and 430 pail closets. A comprehensive sewage disposal scheme would have to be brought into being for this area to conform to modern standards of Public Health. At the present time many of the cesspools have piped overflows into ditches alongside the Public Highway, which is a most unsatisfactory state of affairs.

The housing circumstances of the area leave much to be desired. Much overcrowding exists and much property will have to be dealt with under the Housing Acts on the termination of hostilities. The re-housing of our townsfolk is a measure of prime importance and one which, in my opinion, should be dealt with in the first instance by the erection of factory made houses, which can be erected in a very short space of time. At the same time as these factory made houses are being erected, permanent dwellings should be built in order that the temporary factory made houses can be done away with in a reasonable space of time. Much has been said against the factory made houses, but, in my opinion, it will take a considerable time to build permanent houses after hostilities cease, and the overcrowded families, newly married, and those who are living in unhygienic property would, I am certain, prefer a factory made house, even if it has some defects, than remain for a considerable time in the unsatisfactory conditions in which they are forced to live at the present time.

Various Public Health measures, which will have to be undertaken at the conclusion of hostilities, will, in my opinion, require additional staff. It will be impossible to adequately carry out the Housing programme with only one Sanitary Inspector in an area of the size of Bedworth, and I think the Committee should consider the appointment of an additional Sanitary Inspector in the near future.

It is never an easy matter taking over a new area, but my work during my short period as Medical Officer of Health has been greatly facilitated by the great help given to me by Mr. Deakin and Miss Leach of the Health Department. My colleagues in the other Departments—Mr. Armson and Mr. Blenkinsop—have been most helpful and I would like to record my appreciation.

To you, Mr. Chairman, and members of the Committee, I would like to extend my warm thanks for the sympathetic and understanding way you have always dealt with matters appertaining to the health of the District which I have brought before you.

I have the honour to remain,

Mr. Chairman Lady and Gentlemen,

Your obedient servant,

P. G. HORSBURGH,

Medical Officer of Health.

#### BEDWORTH URBAN DISTRICT COUNCIL.

#### PUBLIC HEALTH DEPARTMENT

#### Public Health Committee.

Chairman: Councillor E. W. RICHARDS.

Councillor A. BUTLER. Councillor H. SHARRATT.

Councillor S. L. MARSHALL. Councillor J. A. GRANT.

# GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA.

- Infectious Diseases.—The Council are in agreement with the Corporations of Coventry and Nuneaton to receive into their Isolation Hospitals cases of infectious disease occuring in the Urban District of Bedworth.
- Small-pox.—The Council are in agreement with the Corporation of Coventry to receive into their Pinley Small-pox Hospital cases of Small-pox occurring in the Urban District of Bedworth.
- **Tuberculosis.**—The King Edward Memorial Hospital, Hertford Hill, is provided by the Coventry and Warwickshire Joint Committee, and is available to patients residing in the Bedworth Urban District.
- Maternity.—No Hospital is provided, but private and urgent cases are taken into the Coventry and Warwickshire Hospital, Coventry, the Nuneaton E.M.S. Hospital, and the Nuneaton General Hospital.
- General.—The Bedworth Urban District is served by the Coventry and Warwickshire Hospital, Coventry.
- **Orthopaedic.**—Patients from the Bedworth Urban District can be sent for consultation and treatment to the Orthopaedic Clinic, "Dunsmore", Holyhead Road, Coventry.

#### Ambulance Facilities.

- **Infectious Diseases.**—Infectious disease patients are now removed to hospital by ambulances provided by the Coventry and Nuneaton Corporation hospitals.
- **Accident.**—The town motor ambulance is at present controlled by the County Council under Civil Defence arrangements.

#### LABORATORY WORK.

Specimens of sputum, throat and nasal discharge, etc., are forwarded to the University of Birmingham for examination, the result being communicated to the Medical Officer of Health and to the medical practitioner sending the specimen. Outfits for taking these specimens are supplied by the University Pathological Department. In urgent cases outfits can be supplied on application to the Medical Officer of Health.

#### CLINIC AND TREATMENT CENTRES.

Maternity and Child Welfare. The Maternity and Child Welfare Clinic is situated in Saunders Avenue, Bedworth. The work of this clinic is supervised by a voluntary committee and, in addition, services are provided by the County Council. A school clinic is also maintained at this centre by the County Council.

**Tuberculosis.** Patients attend dispensaries at Coventry and Nuneaton for treatment provided by the Coventry and Warwickshire Joint Committee for Tuberculosis.

Venereal Disease. Free treatment is provided by the County Council at the Coventry and Warwickshire Hospital, Coventry.

Professional Nursing in the Home.

- (a) General. One voluntary Nursing Association.
- (b) Infectious Diseases—Nil.

Midwives. There are 4 midwives practising in the Urban District, none of whom is subsidised by the Council.

#### CLINICS.

Service	Situation of Premises	Days Open	Authority Responsible
Maternity and Child Welfare: Welfare Centres	Child Welfare Centre Premises Saunders Avne. Bedworth.	Mondays and Thursdays, 2 to 4 p.m.	Warwickshire County Council
	Cricket Pavilion Bulkington.	Wednesdays, 2 to 4 p.m.	Ditto.
Ante-Natal Clinic	Child Welfare Centre Premises Saunders Avne. Bedworth.	Alternate Wednesdays, 10 a.m. to 2 p.m.	Ditto.
School Medical Service: Treatment and Inspection Clinic	Ditto. Ditto.	Mondays and Thursdays, 10 to 12 noon.	Ditto.
Eye Clinic	Ditto.	Fridays, 9.30 to 12 noon when arranged.	Ditto.

#### WATER CONSUMPTION.

The average daily consumption of water in the District during 1943 was 417,228 gallons, and the maximum consumption in any one day was 486,000 gallons.

The latest chemical and bacteriological analyses are as follows:—
