ANNUAL REPORT OF THE
MEDICAL OFFICER OF HEALTH.

Public Health Department,
Council Offices,
Bedworth.

To the Chairman and Members of the
Urban District Council.

Mr. Chairman, Mrs. Ward and Gentlemen,

I have the honour to present to you the Annual Report on the state of health of the inhabitants of the Urban District of Bedworth for the year 1965, together with the report of the Chief Public Health Inspector.

The mid year estimate obtained from the Registrar Generals Department gave the population of the Urban District for 1965 as 34,450. This showed a reduction on the figure for the previous year due to the transfer of Nunts Park and parts of Exhall to Coventry following the recommendation of the Boundary Commission. This transfer also resulted in the loss of 93 acres to the Borough.

During the year 734 live births were registered giving a birth rate of 18.96 which was above the National Average of 18.00.

The national increase, that is the excess of births over deaths was 323. As in previous years the causes of death did not adversely reflect the environmental circumstances of the district.

The biennial outbreak of measles occurred at the beginning of the year and some of the cases notified occurred at the close of the previous year. As a result of this the total notifications numbered 323 compared with 306 at the end of 1964.

Once again no cases of diphtheria or poliomyelitis occurred and there is no doubt that the high rate of immunity conferred by inoculation against these diseases is an important contributory factor.

Sporadic cases of food poisoning and dysentery occurred but no large outbreaks were no large outbreaks were notified. Each case was fully investigated and specimens were submitted to the Public Health Laboratory for bacteriological examination.

The standard of food hygiene in the food shops and catering establishments in the District in good and your Inspectors visit and inspect all premises at regular intervals. Similarly the hundred per cent inspection of food slaughtered in the District has been maintained and all slaughterhouses have been found to be in a satisfactory state.

ANNUAL REPORT OF THE
MEDICAL OFFICER OF HEALTH
The water supply to the district was satisfactory. Samples of mains water submitted by the North East Warwickshire Water Board and your Chief Public Health Inspector during the year were found to be bacteriologically satisfactory.

Sewage disposal is giving cause for concern. As mentioned previously the Bulkington works is overloaded and the contamination of the stream which receives the effluent gives rise to nuisance. The Bedworth disposal works is obsolescent and will have to be replaced in the next few years. Both these establishments drain into the Wem Brook which flows into the River Anker.

In view of the North East Warwickshire Water Boards intention to abstract water from the Anker in the early 1970's it is essential that the elimination of this pollution should be dealt with as a matter of urgency.

The standard of health and hygiene in the Urban District for 1964 was satisfactory and progress continues.

In conclusion I wish to thank the Chairman and members of the Public Health Committee for their interest and support. Appreciation must also be expressed to colleagues in the Public Health and other departments of the Council for their co-operation and assistance.

E. M. HUGHES.

Medical Officer of Health.

LABORATORY FACILITIES

The Public Health Laboratory situated at the Coventry and Warwick Hospital, Coventry, undertakes the bacteriological examination of samples of water, ice cream and food, also in the investigation of infectious diseases.

The services of the Analyst to the City of Coventry are also utilised for chemical analysis.

THE GENERAL PROVISIONS OF THE HEALTH SERVICE

The General Practitioner service is administered by the Warwickshire and Solihull Executive Council. There are several Medical Practitioners living in the district and others residing outside practise on the periphery.

There are no general hospital services directly available in the district but adequate out and in patient facilities are provided at the Nuneaton and Coventry Hospitals which are administered by No.20 Group Hospital Management Committee of the Birmingham Regional Hospital Board. Cases of infectious disease are admitted to Whitley Isolation Hospital, Coventry. Out patient clinics for tuberculosis are held at Riversley Park Clinic, Coton Road, Nuneaton.

Warwickshire County Council are responsible for the administration of the School Health Services and arrangements for Domiciliary Nursing and Midwifery Services, Domestic Helps, Vaccination and Immunisation, care of mothers and young children, Care and After Care and the Ambulance Service as laid down in Part III of the National Health Service Act, 1946.

With the exception of the Ambulance Service the day by day administration of these Services is under the control of the Area Medical Officer, Area Health Department, Council Offices, Bedworth.

The Ambulance Depot is adjacent to the Infant Welfare Clinic, Newtown Road, Bedworth.

TABLE 13

Existing arrangements for all the Clinic Services provided by the Warwickshire County Council within the District are shown below:-

SERVICE	SITUATION OF PREMISES	DAYS OPEN
Infant Welfare Centres (under 5 years)	Newtown Road, Bedworth.	Mondays and Thursdays 2.00.p.m. - 4.00.p.m. Wednesdays 10.00.a.m. - 12 noon.
	Bennetts Road North, Keresley.	Tuesdays 2.00.p.m. - 4.00.p.m.
	Chequers Street, Bulkington.	Tuesdays 10.00.a.m. - 12 noon
		Thursdays 2.00.p.m. - 4.00.p.m.
Ante-natal Clinic	Newtown Road, Bedworth.	Tuesdays 9.30.am. - 12 noon.
Mothercraft and Relaxation	Newtown Road, Bedworth.	Tuesdays & Wednesdays 2.00.p.m. - 4.00.p.m.
	Bennetts Road North, Keresley.	Wednesdays 2.00.p.m. - 4.00.p.m.
	Chequers Street, Bulkington.	Tuesdays 2.00.p.m. - 4.00.p.m.
Eye Clinic	Newtown Road, Bedworth.	By appointment
Dental Clinic	Nicholas Chamberlaine School.	Mondays, Wednesdays, Thursdays & Saturdays by appointment.
Speech therapy	Newtown Road, Bedworth.	By appointment

HOUSING ACT 1957 & PUBLIC HEALTH ACTS

DEFECTS REMEDIED AS THE RESULT OF STATUTORY NOTICES, LETTERS, ETC.

Dwelling Houses

Defective walls and ceilings repaired	7
Roofs repaired	6
Rainwater Pipes and Spouting repaired or new provided	9
Yard paving repaired	8
Windows renewed or repaired	8
Defective pointing repaired	5
Defective brickwork repaired or renewed	2
Damp-proof course provided	1

Drainage, etc.

Drainage cleared from obstruction	10
Defective drains re-laid	1
Sink waste pipes and gullies repaired	7

Closet Accommodation

Water closet pedestals repaired or renewed	2
Water closet cisterns repaired or renewed	3
Water closet seats repaired or renewed	1

SANITARY CIRCUMSTANCES OF THE AREA

WATER SUPPLY

The Water Supply of Bedworth is constant, and is obtained as follows:-

- (a) Two sources at the Newdigate Colliery, in the West Ward of the district.
 - (i) From an adit in the Frank Shaft, 270 ft. below ground surface.
 - (ii) From a 12 in. borehole, 220 ft. deep.
- (b) 20 in. Borehole, Bedworth Waterworks.
The borehole is 20 ins. in diameter and 275 ft. deep.
- (c) Exhall Deep Well.
The well is 9 ft. in diameter, and approximately 260 - 300 ft. deep.
- (d) Coventry Corporation.
This is used as a Supplementary supply, and is only drawn upon when necessary.
- (e) Birmingham.
This is used as a supplementary supply, being piped via Nuneaton.

All this water is pumped into a storage reservoir at the Waterworks. The reservoir has a storage capacity of 750,000 galls. The water is pumped from the reservoir and boosted direct to the town. The Water Tower is now only used for night duty.

As a result of the above it is considered that the Water Supply of the area has been reasonable satisfactory in quantity.

No. of samples of Town's water submitted for analysis:- 79

	Raw Water	Treated Water	Total
(a) Chemical	-	-	-
(b) Bacteriological	31	48	79
