Clerk:

Mrs. M. HOULT.

Pupil:

PHILLIP E. JAMES (Resigned 31.7.66.)

ANNUAL REPORT OF THE
MEDICAL OFFICER OF HEALTH.

Public Health Department
Council Offices,
Bedworth.

To the Chairman and Members of the
Urban District Council.

Mr. Chairman and Gentlemen,

I have pleasure in presenting to you the Annual Report on the state of health of the inhabitants of the Urban District of Bedworth for the year 1966, together with the report of the Chief Public Health Inspector.

The mid year estimate obtained from the Registrar General's Department gave the population of the Urban District for 1966 as 37,100 compared with 34,820 for the previous year.

During the year 814 live births were registered giving a birth rate of 19.5 which was higher than the national average of 17.7.

The natural increase, that is, the excess of births over deaths was 412. As in previous years the causes of death did not adversely reflect the environmental circumstances of the district.

The number of infant deaths, that is deaths occurring in the first year of life was 18 giving a mortality rate of 22.11. Although this rate is higher than the national average it should not give rise to undue alarm as the relatively small numbers involved over a period of one year are likely to give an exaggerated impression. A more accurate estimate can be obtained by a study of the trend over a period of years. If the above figures are compared with those of 20 years ago when the mortality rate was 54.3 it can be seen that there has been a vast improvement in infant care. Once again the causes of death were prematurity, congenital defects and other causes which in our present state of medical knowledge it is impossible to prevent.

It is gratifying to report that not a single death took place as the result of pregnancy, childbirth or abortion, which reflects the excellence of the maternity services provided by the Hospitals, General Practitioners and Local Authority Maternity Services.

The notifications of infectious diseases numbered 211 compared with 348 the previous year when there was a greater number of cases of measles. Only 6 cases of dysentery and food poisoning were notified which is an improvement on previous years.

LABORATORY FACILITIES

The Public Health Laboratory situated at the Coventry and Warwick Hospital, Coventry, undertakes the bacteriological examination of samples of water, ice cream and food, also in the investigation of infectious diseases.

The services of the Analyst to the City of Coventry are also utilised for chemical analysis.

THE GENERAL PROVISIONS OF THE HEALTH SERVICE

The General Practitioner service is administered by the Warwickshire and Solihull Executive Council. There are several Medical Practitioners living in the district and others residing outside practise on the periphery.

There are no general hospital services directly available in the district but adequate out and in patient facilities are provided at the Nuneaton and Coventry Hospitals which are administered by No.20 Group Hospital Management Committee of the Birmingham Regional Hospital Board. Cases of infectious disease are admitted to Whitley Isolation Hospital, Coventry. Out patient clinics for tuberculosis are held at Riversley Park Clinic, Coton Road, Nuneaton.

Warwickshire County Council are responsible for the administration of the School Health Services and arrangements for Domiciliary Nursing and Midwifery Services, Domestic Helps, Vaccination and Immunisation, care of mothers and young children, Care and After Care and the Ambulance Service as laid down in Part III of the National Health Service Act, 1946.

With the exception of the Ambulance Service the day by day administration of these Services is under the control of the Area Medical Officer, Area Health Department, Council Offices, Bedworth.

The Ambulance Depot is adjacent to the Infant Welfare Clinic, Newtown Road, Bedworth.

TABLE 13

Existing arrangements for all the Clinic Services provided by the Warwickshire County Council within the District are shown below:-

SERVICE	SITUATION OF PREMISES	DAYS OPEN
Infant Welfare Centres (under 5 years)	Newtown Road, Bedworth. Bennetts Road North, Keresley. Chequers Street, Bulkington.	Mondays and Thursdays 2.00.p.m. - 4.00.p.m. Wednesdays 10.00.a.m. - 12 noon. Tuesdays 2.00.p.m. - 4.00.p.m. Tuesdays 10.00.a.m. - 12 noon Thursdays 2.00.p.m. - 4.00.p.m.
Ante-natal Clinic	Newtown Road, Bedworth.	Tuesdays 9.30.a.m. - 12 noon.
Mothercraft and Relaxation	Newtown Road, Bedworth. Bennetts Road, North, Keresley. Chequers Street, Bulkington.	Tuesdays & Wednesdays 2.00.p.m. - 4.00.p.m. Wednesdays 2.00.p.m. - 4.00.p.m. Tuesdays 2.00.p.m. - 4.00.p.m.
Eye Clinic	Newtown Road, Bedworth.	By Appointment
Dental Clinic	Nicholas Chamberlaine School.	Mondays, Wednesdays, Thursdays & Saturdays by appointment
Speech Therapy	Newtown Road, Bedworth.	By appointment

HOUSING ACT, 1957 & PUBLIC HEALTH ACTS

DEFECTS REMEDIED AS THE RESULT OF STATUTORY NOTICES, LETTERS, ETC.

Dwelling Houses

Defective walls and ceilings repaired	5
Roofs repaired	4
Rainwater pipes and spouting repaired or new provided	4
Windows renewed or repaired	3
Defective brickwork repaired or renewed	2

Drainage, etc.

Drainage cleared from obstruction	9
Defective drains re-laid	2

Closet Accommodation

Water closet pedestals repaired or renewed	1

OFFENSIVE TRADES

There are no premises in the District where offensive trades are carried out.

CANAL BOATS

Occasional visits are paid to the docks and wharves.

PET ANIMALS ACT, 1951

Two licenses were granted. The premises are kept in a satisfactory condition.

ANIMAL BOARDING ESTABLISHMENTS ACT, 1963

There are no premises registered under this act.

OFFICES, SHOPS & RAILWAY PREMISES ACT, 1963

There are now 384 premises registered under the above act. The number of registered premises receiving a general inspection during the year 75.

TABLE 14

WATER SAMPLES

The following table is based on the Ministry of Health's Report - "The Bacteriological Examination of Water Supplies", which classified piped supplies as follows:-

	Coliform Count per 100 ml	Bact. Coli 1 Count per 100 ml*
Class 1 Excellent ..	0	0
Class 2 Satisfactory ..	0-3	0
Class 3 Suspicious ..	4-10	0
Class 4 Unsatisfactory ..	Greater than 10	0 or more

*The presence of Bact. Coli 1 immediately places the sample in Class 4.

SANITARY CIRCUMSTANCES OF THE AREA
WATER SUPPLY

The Water Supply of Bedworth is constant, and is obtained as follows:-

- (a) Two sources at the Newdigate Colliery, in the West Ward of the district.
 - (i) From an adit in the Frank Shaft, 270 ft. below ground surface.
 - (ii) From a 12 in. borehole, 220 ft. deep.
- (b) 20 in. Borehold, Bedworth Waterworks.
The borehole is 20 ins. in diameter and 275 ft. deep.
- (c) Exhall Deep Well.
The well is 9 ft. in diameter, and approximately 260 - 300 ft. deep.
- (d) Coventry Corporation.
This is used as a Supplementary supply, and is only drawn upon when necessary.
- (e) Birmingham.
This is used as a supplementary supply, being piped via Nuneaton.

All this water is pumped into a storage reservoir at the Waterworks. The reservoir has a storage capacity of 750,000 galls. The water is pumped from the reservoir and boosted direct to the town. The Water Tower is now only used for night duty.

As a result of the above it is considered that the Water Supply of the area has been reasonably satisfactory in quantity.

No. of samples pf Town's water submitted for analysis:- 82
