ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH

1966

To the Chairman and Members of the Belford Rural District Council

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present to you my Annual Report on the health and sanitary circumstances of the district during the year, 1966.

There are few changes in the vital statistics other than the customary year to year fluctuations, which are not significant.

The birth rate was slightly less than in 1965 and there was one infant death, whereas in the previous year there was none.

The overall death rate was also lower in 1966 than in the previous year and the established pattern for causes of death was followed. More than half the deaths were due to cardio vascular disease and vascular lesions of the central nervous system, and malignancy was the second largest group of causes.

Of the infectious diseases, there is little to report. There were 56 cases of measles which was a big increase upon the previous year and illustrates the well known two yearly cycle of this illness. There was a single case of pulmonary tuberculosis. This disease still smoulders on in small numbers, and although every precaution is taken in vigorously following up all contacts, it is likely to be some time before the disease is finally eradicated.

The immunisation and vaccination levels of the district are satisfactory. It is most important that these levels are maintained.

The Public Health Inspector and Surveyor, lists the sanitary circumstances of the district during the year.

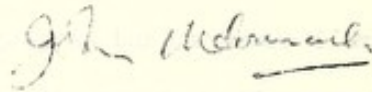

It is pleasing to note his favourable comments on the food hygiene standards in the district. There has been a very considerable improvement in the district within the last year or two and it is hoped that this good standard will be maintained.

Housing gives little cause for concern in the Belford Rural District. There is no slum problem and it may be stated that virtually all housing in the district is of a very good standard.

1966 was clouded by the death of Mr. Kirk, who had served the district for many years as Surveyor and Public Health Inspector. I would like here to add my tribute to the work that Mr. Kirk had done in the district. The rising standards of hygiene throughout the district were in no small measure, due to his efforts.

This will be my last Annual Report to the Council. I am leaving the district to take up another appointment, and I should like to express my sincere thanks to the members of the Council for their interest and support during the whole time I have been here. In particular, I would like to thank my colleagues on the Belford Rural District Council staff for their helpful co-operation. It is now six years since I came to the district and I will be leaving with the very happiest memories.

I am,
Mr. Chairman, Ladies and Gentlemen,
Your obedient servant,

Medical Officer of Health

GENERAL STATISTICS

The area of the district was 39,797 acres.

The number of inhabited houses was 2,141 and the number of new houses completed during the year was 23.

The rateable value was £165,555 and the sum represented by a penny rate was £643.

The estimated mid-year population was 4,820 and this figure was taken when calculating the birth and death rate.

Local Authority Premises.	20

MISCELLANEOUS.

Refuse Tips.	97
Sewage Works.	207
Sea Outfalls.	18

WATER SUPPLIES.

The Newcastle and Gateshead Water Company continue to maintain all the public supplies to the area satisfactorily so far as quantity is concerned.

The laying of a new 6" main feed to Beadnell from the Elford main has been temporarily halted at Annstead Bridge, due to the delay in the road widening scheme from Annstead to Beadnell. This delay is likely to be overcome in the early future and this supply together with the existing should prevent any complaint of shortage when the holiday development at Beadnell takes place.

The Belford supply has been the subject of some concern, due to its regular contamination and the difficulty of successful chlorination. At the end of the year the Council were considering the extension of the trunk main from Warenford to Belford in an endeavour to provide the village with a pure and wholesome supply.

Tabulated below is a statement of samples taken and results obtained of the public water supplies:-

Source	Total Samples taken	Excellent	Satisfactory	Unsatisfactory	No. of unsatisfactory samples with faecal coli
Belford Village	13	9		4	2
Hospital Springs	13	11		2	1
Paddy's	12	11		1	1
Brockdam	12	11		1	
Bamburgh	11	10		1	1
Total	61	52	-	9	5

So far as the private supplies are concerned, samples of water have been taken and the following results obtained. Where unsatisfactory samples are obtained the owners of the supply are advised to boil all water intended for drinking etc. before use, until a better result is obtained.

<u>No. of Samples</u>	<u>Excellent</u>	<u>Satisfactory</u>	<u>Suspicious</u>	<u>Unsatisfactory</u>
39	19	4	2	14

SEWERAGE.

At the end of the year, work was about to commence on the provision of a comminutor at the outfall at Beadnell. This machinery should prevent any complaint of pollution of the foreshore.

The Council agreed during the year to a major scheme for the treatment of sewage at Bamburgh incorporating a Disintegrator Station on the Dunes and a Pumping Station at The Wynding. At the end of the year we await the Ministry of Housing and Local Government inquiry.

The works at Belford continue to operate satisfactorily and apart from one incident during the August flooding, the effluent discharged to the Burn was well within the Rivers Board requirements.

PUBLIC CLEANSING.

The service operated reasonably satisfactorily during the year. Apart from peak periods little overtime was necessary on the collection of house refuse.

Trade refuse continues to be collected but during the year the Council agreed to alter the charges from a fixed sum per premise to a sliding scale dependent upon the quantity of refuse to be collected and time spent on its collection. This system of charging would appear to be a fairer method in so far that those producing most refuse pay the most.

The move to Embleton Tip took place in December and as yet it is too early to accurately assess the difference this will make. The Council's agreement to purchase a new, larger vehicle will compensate this move but this will be offset against the trend of an increase in the bulk of the refuse. I would take this opportunity to thank Mr. Staig for his co-operation in this matter.

The Tip at Belford Moor has been reasonably well maintained during the year. The picture at Bamburgh was not so bright due to the action of vandals setting fire to the tip from time to time.

PUBLIC CONVENIENCES.

The conveniences have been well maintained during the year, with less damage by vandals than previously, except at the Broad Road Sea Shelter. Due to its isolation this convenience is used by hooligans from outside the district as a base of operation for vandalism, with consequent damage to the convenience.

CAMPING AND CARAVANS.

All the sites were well used by tourists and holiday makers and the proprietors maintained a high standard of cleanliness. It was necessary on one occasion to bring a site owner's attention to uncleanness in sanitary accommodation but this apart, the co-operation between the site licencees and the Council has been of the highest order and I hope the co-operation and high standard will continue.

FOOD HYGIENE.

All food shops and catering establishments have been regularly inspected throughout the year. Most premises are of a high standard and leave little to be desired. The few remaining are improving and I hope for more improvements in that direction.

OFFICES, SHOPS AND RAILWAY PREMISES ACT, 1963.

All registered premises were inspected during the year and most complied with the requirements of the Act and Regulations made thereunder.

In the main, only minor legal infringements were found, these have all been remedied.

Below is a statement of visits made to premises to which the Act applies.

Class of Premise	No. Registered during year	Total Registered at year end	No. of Premises receiving general inspection during year
Offices	-	11	11
Retail Shops	2	37	37
Wholesale Shops	-	-	-
Catering Estab.	7	32	32
Fuel Storage Depots	-	-	-

Total no. of visits - 192

Total of Persons employed in premises to which the Act applies - 363

Total of Males " " " " " " " " - 83

Total of Females " " " " " " " " - 280

No. of premises for which exemption was sought during the year - 2

" " " " " " " granted " " " - 1

There were no prosecutions for offences under the Act.

Two accidents were reported during the year. One involved a bacon slicer, the other a fall from steps. No serious injury resulted from either accident.

FOOD INSPECTION.

The following foods were voluntarily surrendered and condemned for the reasons shown below:-

Commodity	Reason for Condemnation	Weight
Canned Meat	Tainted.	78 lbs.
Flour	Contamination by Flood Water.	24 lbs.
Sugar	"	1008 lbs.
Tea	"	6 lbs.
Assorted Biscuits	"	128 lbs.
Salt	"	36 lbs.
Jellies	"	8 lbs.
Cheese slices	"	36 pkts.
Assorted Cakes	"	8½ doz.
Breakfast Cereals	"	77 lbs.
Nescafe	"	9 lbs.
Lard	"	24 lbs.
Eggs	"	120 doz.

FOOD HYGIENE (GENERAL) REGULATIONS, 1960.

All the premises to which the Regulations apply were subject to inspection during the year.

A high standard of hygiene has been kept and it is pleasing to note that the premises in general conform with the requirements.

Minor infringements were dealt with at the time of inspection and it has not been found necessary to take any legal proceedings.

All catering establishments and hotels were carefully scrutinised during the summer season and even whilst working at full capacity the premises were maintained in the highest possible standard.

I look forward to a continuation of this standard of hygiene during the coming year.

Below is a table giving the breakdown of types of premises and the application of Regulations 16 and 19 to them.

Type of Premise	Number of Premises.	Number complying with Reg. 16	Number to which Reg. 19 applies.	Number complying with Reg. 19.
