## APPENDIX.

Special Tables, and Statistical Tables I., II., III., IV. and V.

To the Mayor, Aldermen, and Council of the County Borough of Birkenhead.

PUBLIC HEALTH DEPARTMENT,

TOWN HALL, BIRKENHEAD,

14th April, 1909.

#### GENTLEMEN,

I beg to submit to you my Seventeenth Annual Report to the Health Committee on the Sanitary Condition of Birkenhead, viz., that for the year 1908.

> I have the honour to be, Gentlemen, Your obedient servant, R. SYDNEY-MARSDEN, MEDICAL OFFICER OF HEALTH.

## COUNTY BOROUGH OF BIRKENHEAD

DURING 1908.

### SHORT SUMMARY.

\_\_\_\_\_

| Area in Acres 3,850, or a little more than 6 squ       | are miles. |
|--|------------|
| No. of Houses in the Borough, Dec. 31st                | 25,923     |
| No. of Houses Uninhabited on Dec. 31st                 | 1,700      |
| No. of Uninhabited Houses at time of Census            | 1,428      |
| Population (at Midsummer)                              | 119,692    |
| Rateable Value   | £655,861   |
| 1d. in the £ yields for General Purposes               | £2,580     |
| 1d. in £ yields for Sanitary purposes                  | £2,370     |
| Number of Persons per Acre (Density of Population)     | 31.0       |
| Number of Persons per House at time of Census          | 5.6        |
| Birth Rate per 1,000 living                            | 31.5       |

| Zymotic Death Rate per 1,000-living                    | 2 2        |
| Average Death Rate last 20 years                       | 18-4       |
| Deaths of Children under 1 year of age to 1,000 Births | 136        |
| Average Deaths under 1 year of age for 20 years        | 161        |
| Fercentage of Uncertified Deaths                       | 0.77       |
| Diarrhœal Death Rate                                   | 0.78       |
| Average Diarrhœal Death Rate for 20 years              | 0.89       |

#### THE SANITARY CONDITION

#### OF THE

#### COUNTY BOROUGH OF BIRKENHEAD

#### DURING 1908.

Report of the Medical Officer of Health to the

#### Health Committee.

In presenting my Seventeenth Annual Report, viz:--that for the year 1908, I am again able to congratulate the Committee on the continued healthiness of the Borough. The Death Rate of 16·1 per 1000, although not quite so low as in 1907 (15·4 the lowest recorded) was still a very low one for the West Coast, the slight increase of 0·7 being chiefly due to an increase in the Infantile Mortality. The Infantile Mortality in 1907 was only 110 per 1000 births, also the lowest recorded, and in my last Report I gave reasons why I thought this had occurred. In 1908 the Infantile Mortality rose to 136, but in spite of this it was considerably below the average of 157·5 for the last 20 years.

It has been my custom from year to year to refer in my Annual Report to such things of interest as have occurred during the period under review. The year 1908 was singularly devoid of anything which calls for special remark, but it is perhaps worth recording that the new Disinfecting House in Corporation Road, adjacent to the North End Refuse Destructor, was opened for use on the 19th May. The apparatus is one of Messrs. Goddard, Massey and Warners, and there are ample rooms for stores, in addition to sheds for keeping the ambulances and vans. A special room has been set aside and provided with a form of spray bath for disinfecting persons who apply to be disinfected under the provisions of the "Cleaning of Persons' Act," and its use has already been called into requisition.

In my last year's Report I called special attention to the dangers of house flies, and the desirability of removing such materials as provides them with breeding places as quickly as possible. In this connection I would again repeat that stable manure should not be allowed to remain stored in the neighbourhood of dwelling houses, at any rate during the warm summer months-for a longer period than seven to ten days. But here we are met with a considerable administrative difficulty. In most cases where only one horse is kept the amount of manure made in the time mentioned is not sufficient to make up a load, and consequently great difficulty is experienced in getting anyone to come and remove it, owing to the greatly added cost of cartage. If therefore the more frequent removal is to be carried out as a sanitary measure, it will be necessary for the Sanitary Authority to collect the manure from these smaller places and take it to some convenient Depôt from which it will pay farmers to fetch it in the larger quantities. This course I would personally recommend, but whether it can be reasonably carried out or not I must leave for the Committee's consideration. I consider, however, that the new Depôt for storing the manure from the street sweepings which has been constructed in Ivy Street ought to be abolishe !, as it is in my opinion a dangerous nuisance; the manure from this sip is never *entirely* cleaned away, but remains as a fit nidus for the breeding of flies, and in face of the recent scientific work showing the dangers of such storage, I feel it my duty to again call the attention of the Committee to the matter.

Whilst speaking of things which it is desirable to get rid of, I must once more refer to the subject of boulder paved streets and passages. I have remarked a large number of times on the danger attaching to this form of paving—the spaces between the boulders become filled with manure, and other forms of decomposing filth, which cannot be swept out properly and this constitutes a nidus for the growth of germs and a danger to the public health; there has been a marked improvement in the health of such streets as Henry Street and William Street since this form of paving was abolished, and I would most strongly urge upon the Council the desirability of having it removed from all back streets and passages in the Borough where it still exists.

#### DETAILED STATEMENT OF

#### THE WORK OF THE PUBLIC HEALTH DEPARTMENT DURING 1908.

Ordinary Sanitary Operations.—The ordinary sanitary operations of the Department have continued to receive unremitting attention. House-to-house inspections of the cottage property in the Borough have been regularly made. Gulleys and passage drains have been periodically cleansed, public fountains, &c., have been scoured and kept in order, and the systematic removal of ashpit refuse at stated intervals has been carefully superintended.

Summary of Nuisances, &c.—The summary of nuisances investigated and dealt with during 1908 is as follows :—

| Number of nuisances reported   | <br> | <br>6690 |
|--------------------------------|------|----------|
| Number of formal notices given | <br> | <br>2321 |

| Number abated after formal notice a    | nd wit  |      |      |
|--|---------|------|------|
| proceedings                            |         |      | 6690 |
| Number of cases in which proceedings   | were ta | aken |      |
| for ordinary nuisances                 |         |      | 0    |
| Number abated after proceedings        |         |      | 0    |
| House disinfecting notices             |         |      | 344  |
| Nuisances at houses let in lodgings    |         |      | 215  |
| Nuisances at common lodging houses     |         |      | 74   |
| Notices for cleansing of filthy houses |         |      | 4    |

A brief statement of the other measures taken in 1908 for correcting or getting rid of whatever appeared to be prejudicial to health is subjoined.

| Sanitary defects reported by the Inspectors and      |      |
|--|------|
| referred for the action of the Borough               |      |
| Surveyor   | 295  |
| Matters reported to Water Engineer                   | 170  |
| Houses or parts of houses specially disinfected by   |      |
| formalin or other disinfectants                      | 711  |
| Notice to whitewash and efficiently cleanse milk-    |      |
| houses, cowsheds and dairies, given and              |      |
| complied with  | 378  |
| Offensive privies ordered for conversion into water- |      |
| closets  | 28   |
| Parcels of infected bedding and clothes disinfected  |      |
| at the Disinfecting House                            | 510  |
| Parcels of infected or discarded bedding and         |      |
| clothes destroyed                                    | 438  |
| Library Books, collected and destroyed               | 52   |
| Carcases of dogs and cats &c. removed from pools     |      |
| or waste land and buried                             | 38   |
| Deposits of putrid fish and other objectionable      |      |
| refuse removed                                       | 2    |
|  |      |
| Total  | 2622 |

In addition to the above, the following work was done :---

| Number of excavations made for the purpose of | 0.4.0 |
|---|-------|
| testing the condition of house drains         | 248   |
| Number of smoke tests applied to drains of    |       |
| premises reconstructed under the              |       |
| supervision of this Department                | 206   |
| Number of water tests applied to drains       | 323   |
| Number of smoke tests applied to the drains   |       |
| of new buildings, in conjunction with         |       |
| the Borough Surveyor's Department             | 555   |

It will be seen from the above that the work of the Department continues to increase, this is in part due to new Acts of Parliament, to the ever-increasing population and consequent greater crowding, and also on account of the more thorough manner in which examinations are now made. The latter tends to the advantage of the public, both as regards health and comfort, and every effort is made to keep down public or private nuisances dangerous to the community.

District Inspections.—The following is a statement of the work done by the District Inspectors of Nuisances and the Disinfecting Inspector during 1908.

|                                     | and R | nber of Visits<br>evisits made to<br>itary Property. |
|-------------------------------------|-------|--|
| District I.—Inspector Fitzgerald    |       | 6211   |
| ,, II.— ,, Lee                      |       | 4035   |
| ,, III.— ,, H. T. Taylor            |       | 4527   |
| ,, IV ,, W. H. Tilston              |       | 6134   |
| Disinfecting Inspector Isaac Taylor |       | 4183   |
| Total                               |       | 25090  |

Smoke Nuisances.—Observations were taken of the smoke emitted from the factory and other chimneys of the Borough during the year 1908. Seven notices were served for the abatement of nuisance.

#### Inspection of Common Lodging Houses and Houses let in Lodgings.

The following is a statement of the work performed during the year 1908 by the Inspector of Common Lodging Houses and Houses let in Lodgings, viz:—

|      | REGISTERE      | d C | OMMON | LODGING | Hou | SES. |      |
|------|----------------|-----|-------|---------|-----|------|------|
| Day  | Inspections    |     |       |         |     |      | 4206 |
| Nigl | ht Inspections |     |       |         |     |      | 304  |

The total number of registered lodging houses is 15.

REGISTERED HOUSES LET IN LODGINGS.

| Day Inspections   | <br> | <br> | <br>3405 |
|-------------------|------|------|----------|
| Night Inspections | <br> | <br> | <br>171  |

The total number of houses let in lodgings on the register at the end of 1908 was 640.

#### FACTORY AND WORKSHOP ACTS, 1878 to 1907.

In connection with the carrying out of the provisions of these Acts, the following is a statement of the work done by the Inspector during the year 1908, viz:—

1225 visits have been made to workshops.

- 486 visits have been made to bakehouses.
- 64 visits have been made to workplaces.
- 107 visits have been made to homeworkers premises.
  - 37 workshops, including 7 bakehouses, have been placed on the register during the year, making a total of 419 up to the end of 1908, of which 60 are bakehouses and 35 are confectioners' shops.
  - 45 workshops have been closed.
  - 21 workshops have been transferred to more suitable premises.
- 163 nuisances in connection with workshops have been reported and abated.
  - 24 notices have been served for the abatement of nuisance arising out of defective drainage, and 2 for inefficient ventilation.

- 39 notices to cleanse and limewash the workshops have been served and complied with.
- 184 occupiers of workshops have limewashed their premises under inspection, but without waiting for the formal notice.
  - 1 case of overcrowding has been reported during the year.
  - 4 workshops have been provided with w.c. accommodation, where none previously existed.
- 28 failures to affix abstract of the Factory and Workshops Act (s. 133).

Lists of out-workers have been carefully kept, and notices in the form prescribed by the Secretary of State, as given in my Report for 1892 (pp. 57 and 58), have been served when necessary.

Laundries.—272 visits were made during the year to the 57 laundries at present on the register.

Bakehouses.—The duties involved in carrying out the provisions of the Acts relating to the sanitary condition of bakehouses have been put under a special Inspector, and during the year 486 visits have been made to bakehouses.

There has been a very great improvement secured by this systematic inspection.

#### "Shop Hours Acts, 1892 and 1895."

In carrying out the provisions of these Acts the Inspector has paid 643 visits to different shops, and the occupiers' names and addresses have been placed upon a register specially kept for the purpose, together with the date of his visits.

#### Seats for Shop Assistants Act, 1899.

[62 and 63 Vict., ch. 21.]

78 premises have been visited under this Act, and 193 visits made during the year ending 1908.

#### SHOP HOURS ACT, 1904.

CLOSING ORDER WITH RESPECT TO HAIRDRESSERS.

In connection with this Order, 1097 visits have been made to see that the provisions of the Act are enforced.

#### CLEANSING OF PERSONS ACT, 1897.

Provision for the cleansing of persons under this Act has now been made at the Disinfecting Station.

#### The Midwives Act, 1902.

In connection with the carrying out of the provisions of this Act, a great deal of work was done during the year: not only in visiting the homes of midwives, but in interviewing them in connection with their work and explaining the provisions of the Act and the rules laid down for their guidance by the Central Midwives Board.

During the year 1908 some 56 midwives had entered their names on the local register as practising in the borough, being 7 more than in 1907, but names are constantly being added to the rol and there is reason to believe that this number will be considerably added to. Of the above 56, two of them subsequently left the district, and their names have been removed from the register accordingly.

Notices were received from midwives of 28 still births (7 male 16 female, and 5 not classed) having occurred; and 49 cases were notified, in which medical aid had been called in.

During the year I paid some 48 visits of inspection to midwives, and made a series of enquiries in one case of alleged neglect which, however, did not prove to justify further action being taken, beyond seriously warning the woman for the future.

Infectious Disease (Prevention) Act, 1890.

A number of Library books were collected and destroyed from houses where there had been infectious disease.

#### Seizure and Destruction of Unwholesome Meat, Fish, and Vegetables.

The Meat and Food Inspector has furnished the following particulars of meat, &c., unit for human food, seized and destroyed during 1908.

The total weight of the meat destroyed amounted to 170,700 lbs, but of this a large proportion was voluntarily surrendered by the butchers, they having called the Inspector's attention to it. As in all recent years, a considerable proportion of the meat taken was on premises in connection with the Foreign Animals Wharf, Woodside. The total number of oxen killed at Woodside and inspected by us during 1908 was 171, 57, and 9 sheep; and 95 oxen and 113 sheep were killed at Wallasey Stage and 189 sheep at No. 4 Shed, Wallasey, within our jurisdiction. At the Abattoirs in New Chester Road there were killed 1275 beasts, 6061 sheep, 4860 lambs, 614 calves, and 4119 pigs; a total at the Abattoirs of 16,929.

In addition to the above 1997-lbs of fruit and 4480-lbs vegetables, 110-lbs of rabbits were seized and destroyed as unfit for food.

#### Tuberculosis.

The following is a Statement of the number of cases dealt with during the year.

#### Proceedings taken under the "Sale of Food and Drugs Acts, 1875 to 1899."

The Chief Inspector (Mr. William Dawson) gives the following summary of proceedings taken under these Acts during 1908.

The total number of samples taken during the year was 217, viz.—Milk 96, Butter 47, Lard 16, Cheese 11, Beer 9, Pepper 9, Sweets 6, Scotch Whisky 5, Cream 4, Malt Vinegar 3, Brandy 2, Gin 2, Irish Whisky 2, Coffee 1, Lamson Jam 1, Plum Jam 1, Strawberry Jam 1, Tarragona Port Wine 1. Out of the above, 7 samples of Milk, 5 of Butter, and 1 of Malt Vinegar, were reported adulterated, and proceedings were taken in the case of 6 samples of Milk, 5 of Butter, and 1 of Malt Vinegar, the particulars of which are as follows, viz.—

#### Contagious Diseases (Animals) Act, 1886.

The Milkhouses.—The regulation of dairies, cowsheds, and milk-shops, and the supervision of milk-sellers, has had systematic attention for a number of years. Special care is taken that the ventilation, lighting, cleansing, draining, and water supply of premises used for milk-trade are thoroughly efficient. The register of milk-sellers is revised week by week. The total number of milk-shops is 190, in addition there are 12 cowsheds, and 59 farmers resident outside the Borough, registered to purvey milk inside the Borough.

Twice every year notice is sent to all the milk-sellers requiring that the walls and ceilings of every room in the occupation of Registered Milk-sellers, used for storage or sale of milk, shall be lime-washed, that is to say, in March and September; but if the walls are painted, then they must be washed and thoroughly cleansed twice every year, in March and September.

#### Meteorological Results.

The noteworthy features of the meteorology of the year are given in the following tabular statement, which has kindly been prepared by W. E. Plummer, Esq., M.A., F R.A.S, Director of the Observatory, Bidston Hill, Birkenhead, who also furnishes particulars weekly of the daily observations taken under his directions, from which Table IV in the appendix is compiled.

|                     | 1908 |    | Mean<br>Tempera-<br>ture | Mean<br>Barometer | Rainfall<br>1 ft. above<br>ground |

Mean Barometer for the whole year=29.984 inches. Mean Barometer for the past 40 years=29.922 inches. Total amount of rainfall at Bidston. 1908=28.902 inches. Number of wet days in the year 1908=190 days. Average rainfall for 40 years=28.600 inches

**Barometer.**—The mean barometer of 1908 (29.984 inches) was higher than last year and 0.062 higher than the average mean of the last 40 years. Detailed particulars respecting the barometric pressure, temperature, rainfall, wind, humidity of the air and the proportion of cloud to clear sky &c., will be found in Table IV.

Rainfall—The rainfall of 1908, 28.902 inches, was higher than last year and 0.302 inches higher than the average of the previous forty years.

| 1902  | 25*566  | 200                               | 1908  | 28*902  | 190                              |

Average rainfall for 40 years=25'600 inches. The figures for the years 1867 to 1899 are given in my Report for 1904.

#### Greenwich.

The Annual Rainfall at Greenwich was given in my past Reports as follows, viz.—

The figures for 1841-1885 will be found in my Annual Report for 1903, page 22, and from 1886-1907 in my Report for 1907, page 21.

For the relative mortality of different portions of the year, see under Births and Deaths.

#### PREVALENCE OF ZYMOTIC SICKNESS DURING 1908.

Notification of Cases of Dangerous Infectious Diseases.—The Infectious Disease Notification Act, 1889, requires householders and medical men in attendance to notify cases of dangerous infectious diseases to the Sanitary Authority, and gives facilities for supplementing the statement of the mortality from zymotic diseases with a statement of cases of sickness due to some of the chief zymotic diseases, month by month, as they were reported. The diseases which require to be notified to the Authority as "dangerous infectious diseases" are—

| Small-pox        | (       | Typhus        |
|------------------|---------|---------------|
| Scarlatina       |         | Typhoid       |
| Diphtheria       | Fevers  | Continued     |
| Membranous Croup |         | Relapsing     |
| Erysipelas       | Puerper | al Septicæmia |
|                  | Cholera |               |

The cases notified appear in the following return, showing that 777 cases were notified during the year, being 2176 less than the number notified last year; the non-notification of measles accounts for a very large proportion of these.

The notification of Measles was discontinued after 7th August, 1907.

The following Table gives the number of Notifications of Dangerous Infectious Diseases in each month of the year.

| 1908  | Smallpox                                | Measles | Scarlatina   | Diphtheria  | Typhus<br>Féver | Typhoid<br>Fever   | Puerperal<br>Fever.  | Fever                                   | Cholera | Mem.<br>Croup  | Erysipelas  | TOTAL   |

The statement is as follows :---

The figures for the years 1882-1905 will be found at page 25 in my report for 1905, and for 1896-98 in last year's report.

#### VITAL AND MORTAL STATISTICS FOR THE YEAR.

Area.—The Borough has an area of 3850 acres, or a little more than six square miles.

**Population.**—The population as shown by the Census taken in England and Wales on April 1st, 1901, was 110,915, being 11,058 in excess of the number enumerated in the census taken on April 6th, 1891.

The number of persons living at Midsummer, 1908, as estimated by the usual methol, was 119,692, and on this estimate I have based the following statistics.

The total number of houses in the Borough at the time of the 1901 census was 21,172, and the number built since that time up to 31st December 1903 was 5062, and the number demolished in the same period was 311, a net gain of 4751, giving a total for the Borough at end of the year 25,923. But there are a number of houses in different parts of the town which, though not demolished, have been converted from dwelling houses into factories. stores or other workshops; of these I have no return and can only guess at their number, which I estimate will be between 200 and 300.

The number of new houses built during the eleven years, 1891-1901, was 2911, for which information I am indebted to the Borough Surveyor. The number of houses demolished during the same period being 493.

#### Number of New Houses erected in the Borough since last Census.

| April 1st | to December 31st, 190 | 01    | <br>311  |
|-----------|-----------------------|-------|----------|
| January   | 1st to December 31st, | 1902  | <br>646  |
| ,,        | "                     | 1903  | <br>897  |
| ,,        | ,,                    | 1904  | <br>643  |
| ,,        | ,,                    | 1905  | <br>848  |
| ,,        | ,,                    | 1906  | <br>472  |
| ,,        | "                     | 1907  | <br>685  |
| ,,        | "                     | 1908  | <br>560  |
|           |                       | Total | <br>5062 |

The number of houses demolished since taking of Census to end of 1907 was 259, and 52 were taken down during 1908, a total of 311. The number of new houses erected from January 1st to 30th June 1908 was 244.

Taking the total number of houses in the Borough as given above viz. 25,923, and allowing 1,710 as uninhabited, this figure being taken from the Chief Constable's return, (there were 1,428 uninhabited at the time of the Census), then we have 24,213 inhabited houses in the Borough on the 31st December, 1908--if we multiply this by 5.6 the number of persons per house at the time of the Census, then the population of the Borough at the end of the year ought to be 135,592, or about 15,900 more than the number estimated by the usual method of arithmetical progression employed by the Registrar General. Of course, if this is correct then our birth and death rates would be very considerably lower than those shown, which as stated above are calculated on the ordinary estimate. In my last Annual Report a curious but obvious mistake was made in some unexplainable manner in the corresponding paragraph to this.

The following table gives the revised estimated population of the Borough for the ten years 1901-1910, provided the rate of increase during the decade 1891-1901 be maintained.

| Year. | Census<br>Population. | Midsummer<br>Population. | Year. | Census<br>Population. | Midsummer<br>Population. |
|-------|-----------------------|--------------------------|-------|-----------------------|--------------------------|
| 1901  | 110915                | 111204                   | 1906  | 116895                | 117203                   |
| 1902  | 112086                | 112382                   | 1907  | 118129                | 118441                   |
| 1903  | 113270                | 113569                   | 1908  | 119377                | 119692                   |
| 1904  | 114465                | 114767                   | 1909  | 120637                | 120955                   |
| 1905  | 115674                | 115979                   | 1910  | 121910                | 122232                   |

The figures for 1891-1900 are given in my report for 1907, page 25.

Births and Deaths in Birkenhead.—During the year 1908 the returns of the local registrars recorded 3775 births and 1929 deaths in the Borough of Birkenhead. The natural increase in the population in 1908 was therefore 1846. Of the births 1914 were males and 1861 were females; of the deaths 958 were males and 971 were females.

Further particulars as to the births and deaths in the Borough registered in each quarter of the year, and in each township are given in the subjoined table. Those occurring in Union Workhouse are entered separately.

| BIRTHS  | 1st   | Qr.                                | 2nd Qr.                    |   | 3rd Qr.                           |                                 | 4th Qr.                           |                                 | 1908                                   |                                      | Total                                 |

The next table shews the revised estimated population of Birkenhead, the density of population and the number of births, deaths and zymotic deaths, and also the birth and death-rates deducible from these figures for the years 1899 to 1908. The figures for the years 1878 to 1898 were given in my report for the latter year.

Table showing Natural and Estimated Increase of Population &c., 1902 to 1908.

The figures for 1891 to 1901 are given in my report for 1907, page 27.

The proportion of Deaths of Infants under One year to the Births registered.—The proportion in Birkenhead Borough in 1908 was equal to 136 per 1000. In the thirty-six great cities and boroughs in England and Wales, amongst which Birkenhead is classed, the average proportion of deaths under one year to births registered in 1908 was 132. It varied greatly in the different towns, ranging from 200 in Burnley to 77 in Leyton. In Liverpool it was 141, Wallasey 102, Bootle 147 and Stockport 168.

Birth-rates and Death-rates in thirty-seven great towns in England.—In order that the birth-rates and death-rates of the Borough of Birkenhead in 1908 may be compared with the corresponding rates of the most populous cities and boroughs in England, the following table has been compiled from the Registrar General's Quarterly Returns of Births, Deaths, and causes of death in London and the other great towns, 1908. The table gives the estimated population of the thirty-six large towns at Midsummer 1908. The birth-rates and death-rates are for the fifty-two weeks ending December 31st. For comparative purposes these figures are interesting as they are all calculated on the same basis. They are of course unrevised returns. (See Table on page 30.)

Tabular Statements.—In the appendix to this Report are tabular statements of the year's mortality within the Borough, classified according to the diseases, ages, and localities, a weekly register of deaths and of meteorological results, together with a return of deaths in the Birkenhead Union Hospital and Workhouse, &c.

Table I. shows the deaths registered in the whole Borough during 1908, arranged with reference to the age at which death occurred in each case. They are disposed in four sub-tablesthe deaths in the townships of Birkenhead and Claughton in the first, deaths in Tranmere (exclusive of the Union premises) and Oxton in the second, the deaths in the incorporated portion of Higher Bebington in the third, and the deaths in the Union Hospital and Workhouse in the fourth. The deaths of infants are entered up in three columns-those under one year, those of one year and under two years, and those turned two years and under five. Then follow the deaths of children and young persons, those turned five years and under twenty; and of adults those turned twenty and under forty, and those turned forty and under sixty. In the last two columns are the deaths of old people, those turned sixty and under eighty, and those of eighty and upwards. Reference to this table will show that, of the gross local mortality for 1908, the deaths of infants under one

Thirty-six Great Towns-Population, Births, Deaths, &c., for the Year 1908. As estimated from the Registrar General's weekly returns and unrevised (for comparison only).

year of age accounted for 516, those over one year but under five years of age 258, children and young persons 103, adults 533, old people sixty years of age and upwards 509.

The relative proportion of deaths in 1908 among the infants, children and young persons, adults and old people, to the whole number of deaths, in certain sub-divisions of the borough, in the premises controlled by the Guardians of the Poor, and in the entire incorporated area, is readily shown in tabular form, thus :—

| Percentage of<br>Deaths at   | Under        |      |      |      |      |      |       | Agel         | betwe | en           |                     |              |                                 |              |                              | 85<br>years     |

In this respect the local mortality compares favourably with the mortality in most great cities and boroughs. The percentages taken out for Bebington have little significance, the number of deaths being so small.

Table II. is the weekly register of deaths in the Borough of Birkenhead for 1908. The deaths are entered as in Table I., into four sub-tables, representing Birkenhead and Claughton, Tranmere, Oxton and Bebington, and the Union Hospital and Workhouse. Table III. is a summary of the weekly register of deaths. Table IV. is a Weekly Condensed Register of Meteorological Results. Table V. is a street register of deaths.

The Classification of Death Causes.—The causes of death, as they appear in Tables I. and II. in the appendix, are systematically classified according to the principles laid down by the late Dr. W. Farr, the nosology being that adopted by the Registrar-General until within the last few years, which experience has shown to be well suited for statistical purposes. The death causes are arranged under classes and orders, the latter corresponding to the families of Natural History. Genera, or what in diseases would be varieties, are not distinguished. All death causes are thus conveniently classified under 116 heads some of which, however, include diseases very distinct from one another.

At the beginning of Table I. are the totals of deaths from all causes, and on the next line the totals of deaths from specified causes. The deaths which it is necessary to refer to unspecified causes are not only those ascribed, in legal phraseology, to "visitation of God" or "natural causes," but also those which, with almost equal vagueness, are classified as due to "tumour," "coma," &c. The deaths from specified causes are then divided into five classes. Class I. (the zymotic) embraces all diseases, either epidemic, endemic, or contagious, which are induced by some specific body, or by want of, or by the bad quality of food. The diseases coming under Class II. (constitutional or cachectic) appear to be due to a bad habit of body, and possibly may sometimes be hereditary. Class III takes in diseases the effects of which are manifest in disturbing or obliterating the function of particular organs or systems. Class IV. includes the conditions tending to produce death, which are the incidental results of the formative, reproductive, and nutritive processes. Class V. groups together all deaths which are the evident and direct result of physical or chemical forces.

Deaths from Zymotic Diseases.—The deaths from zymotic diseases include 79 by what have been termed the chief zymotics (certain diseases belonging to the miasmatic order), viz., smallpox 1, chicken-pox 1, measles 44, scarlatina 6, diphtheria 8, membranous croup 5, fevers 11, and puerperal septicæmia 3. The remaining 188 were entered to what have been called minor zymotics (diseases less prevalent, less fatal, or less obviously zymotic in character), viz., whooping cough 60, erysipelas 4, influenza 25, diarrhœa 94, syphilis 3, and other zymotic diseases 2.

#### Relative Fatality of Chief Zymotic Diseases.

The following table shows at a glance the relative fatality of the chief zymotic diseases for the year on the corrected estimate of population.

|                   | Year.  |                          | 1890<br>1800<br>1801<br>1902<br>1905<br>1905<br>1905<br>1907<br>1905<br>1905<br>1908<br>1908<br>1908<br>1908<br>1908<br>1908<br>1908   |

Inquests.—The number of inquests held during 1908 was 156, thus 8.2 per cent. of the sum of the deaths in the Borough formed the subject of official enquiries. Out of the 156 inquests held, 7 were upon the bodies of infants whose deaths were due to being overlain.

Deaths not Certified.—Not all the death causes which are classified represent diseases or symptoms observed and certified by medical men in attendance during the last illness, or verdicts following official investigation. A significant proportion of the death causes are entered in the register on the doubtful testimony of deceased persons' relatives or friends, or fellow lodgers. The registrars have, therefore, been required to mark in the returns furnished, every death not certified by a registered practitioner, or made the subject of a coroner's inquest. In 1908, out of the 1,929 deaths registered, 15 were marked "not certified," that is 0.77 per cent. The causes of the deaths were entered in accordance with the statements of persons giving information to the registrars as follows:—

| Heart Disease    |          |         |      | 6     |
|------------------|----------|---------|------|-------|
|                  |          |         | <br> |       |
| Rheumatism       |          |         | <br> | <br>2 |
| Epilepsy         |          |         | <br> | <br>1 |
| Bronchitis       |          |         | <br> | <br>1 |
| Congenital Speci | fic Dise | ease    | <br> | <br>1 |
| Enteritis        |          |         | <br> | <br>1 |
| Paralysis        |          |         | <br> | <br>1 |
| Pneumonia        |          | · • • • | <br> | <br>1 |
| Dropsy           |          |         | <br> | <br>1 |

though how such conclusions were arrived at does not appear. In my opinion such deaths cught not to be registered without a Coroner's certificate.

The proportion of uncertified deaths to the sum of the deaths was as already stated, 0.77 per cent. as compared with 0.54 per cent. in 1907.

Deaths classified according to Localities.—Tables I., II., III, and IV., in the appendix, having been fully discussed, are followed by Table V., in which the deaths registered during 1908 are classified according to the localities in which they occurred. Opposite each street or place is the number of deaths from all causes and from zymotic diseases, registered as occurring in that street or place during the year. As it was felt that particulars of the number of deaths from all causes and zymotic diseases in each ward would prove interesting, and as the Street Register does not afford this information, the Table here submitted has been drawn up.

Illegitimacy.—Statistics relating to illegitimacy are important, not merely on account of the bearing which such a subject has upon the social life of the community, but also with a view ultimately of showing to some extent the influence which illegitimacy exerts upon the "chances of life" of infants, as it is well known that the death-rate of illegitimate children is considerably greater than that of those born in wedlock. I have thought it desirable, therefore, to continue these statistics in this report, as the subject is one of some interest.

The following table gives the total number of legitimate and illegitimate births, with the rates per 1000 of births and per 1000 living, and statistics relative to the deaths of such children under one year of age.

## HOUSING OF THE WORKING CLASSES ACT, 1890.

Under the provisions of this Act during the year 1907, I made the following representations under Part II. of the Act respecting the condition of certain houses, which premises were in a very insanitary condition.

The representations were duly considered and approved by the Health Committee who gave instructions for the recommendation to be carried out. The areas dealt with are as follows:—

4th February, 1908.—17 and 19 Queen's Place, Tranmere. 31st March, 1908.—53 Abbey Street. 7th July, 1908.—Certain Houses situate on land situate off the south side of Holm Lane, and numbered 3, 4, 5 and 6.

All the above houses have been repaired and rendered fit for human habitation.

7th July, 1908. Certain Houses situate on the south side of Holm Lane, and numbered 2 off, and 14, 16, 18, 20 and 22. These houses have all been closed and pulled down.

#### MATRON:

MISS EMILY YEOMANS.

There has been no addition to the number of beds in the hospital during the year, nor has there been any change in the number of the Staff.

The total number of patients treated in the hospital during the year (January 1st to December 31st) was 339; of these, 314 were admitted during the year, and 25 remained in hospital from 1907. Out of those admitted 13 died, giving a death-rate of 4.1per cent, a very low percentage.

| Total   |  | 161  | 178   | 149                               | 172  | 10                  | 4  |

The following table gives a summary of the cases treated in the hospital during the year 1908, along with the results obtained.

The smallpox hospital, containing 44 beds, stands in its own ground, and is provide1 with a separate administration block, washhouse, mortuary &c., and is entirely distinct from the other hospital.

The following are the statistics regarding

### The Smallpox Hospital, 1908.
