BISHOP AUCKLAND

URBAN DISTRICT COUNCIL

REPORT

OF THE

MEDICAL OFFICER

OF

HEALTH

FOR

1971

Printed by Lintons, Church Street, Crook.

BISHOP AUCKLAND URBAN DISTRICT COUNCIL

Chairman of Council: COUNCILLOR W. RUDDOCK.

Chairman of Health Committee: COUNCILLOR D. J. HEBDEN.

Councillors:

W. V. Archer. P. Armstrong, T.D. C. Bell. J. T. Bryan. J. Callaghan, c.c. H. F. Clements. T. Conlon. V. O. Cooper. G. R. Cosgrove, J.P. F. Dawson. S. Dent. M. Dodds.

O. Douthwaite. J. L. Flynn. F. W. Forster. J. Gordon, c.c. D. R. Harburn, c.c. H. M. Harrison (Mrs.) M. Hurst (Mrs.) H. Hutchinson. G. S. Liddell. J. J. Makinson. R. Powell.

E. W. Robinson. T. Robson. T. Scorer. S. Snowball. D. R. Harburn, c.c. G. W. Steadman, c.c. M. E. C. Harburn (Mrs.) H. Stephenson, J.P., F.I.O.B. W. H. Walker. W. Wilson. C. Wood. G. A. York.

Clerk of the Council: J. R. PASSEY, LL.B., L.A.M.T.P.I.

Health Department Staff

Medical Officer of Health-

ELAINE M. OSBORNE, M.B., CH.B., D.P.H., D.C.H., D.R.C.O.G., M.F.C.M. Also Medical Officer of Health for the Urban District Council of Shildon, the Rural District Council of Darlington, and Principal Senior Medical Officer for Durham County Council.

Chief Public Health Inspector-

R. SNOWDON, D.P.A. (LOND.), D.M.A., M.INST.P.C., M.A.P.H.I., F.R.S.H., DIP. (HONS.) R.I.P.H.H., DIP. S.A.A. Qualified Public Health Inspector, Meat and Other Foods Inspector, Smoke Inspector and Shops Act Inspector.

Deputy Chief Public Health Inspector-

R. BARRASS, T.D., M.A.P.H.I., DIP. R.I.P.H.H. Qualified Public Health Inspector and Meat and Other Foods Inspector.

District Public Health Inspectors-

P. J. NAYLOR, Qualified Public Health Inspector and Meat and Other Foods Inspector. E. YOUNG, M.A.P.H.I., Qualified Public Health Inspector, Meat and Other Foods Inspector and Smoke Inspector.

Office-

T. K. CROSBY, Clerk, deceased 12.9.71.
G. B. RICHARDSON, Clerk, from 1.12.71.
Miss DORREEN ROCHE, Shorthand Typist, resigned 28.2.71. Miss VERA THOMPSON, Shorthand Typist, from 1.3.71.

ANNUAL REPORT FOR 1971

Mr. Chairman, Ladies and Gentlemen,

I have pleasure in presenting to you the Annual Report on the health and sanitary conditions of your district for 1971.

The birth rate continues to fall, being 15.4 this year, compared with 15.7 in 1970. The percentage of illegitimate births remains at 8% which is the same as the national rate.

The death rate this year increased from 12.5 to 13.8, 107 of these being in the 65—74 age group and 183 being 75 and over.

The number of cancer deaths rose to 90. This includes 17 cases of carcinoma of the lung (12 men and 5 women) compared with 12 men and 3 women last year, and 5 cases of leukaemia (2 last year). Cancer of the intestine also rose this year from 8 to 15.

Deaths from ischaemic heart disease continue to rise in females, being 54 this year compared with 46 last year, but in males they decreased to 58 from 68 the previous year.

Whilst deaths from motor vehicle accidents remained at two; it is pleasing to report that deaths from all other accidents decreased from 10 to 6. Two of these were under 12 months and the rest 75 years and over, which demonstrates even on these small numbers, the vunerable extremes of life.

Last year we had a very low infantile mortality rate, but this year there were unfortunately 11 deaths under 1 year giving a rate of 22 (National Rate 18). Four of these babies died in the first week of life, two from prematurity and two from congenital abnormalities. Of the remaining seven, three died of congenital abnormalities, two of pneumonia and two were accidental deaths. These two cases of accidental death, one at three months and one at five months were both certified as being due to asphyxia from inhalation of vomit. This condition may well be due to an acute infection of the upper respiratory tract and not necessarily to parental neglect as was once assumed to be the case. It is a subject on which research is still being carried out.

There were no maternal deaths during the year.

This year new notifications of tuberculosis decreased to 8 from 15. 466 children were given B.C.G. vaccination against tuberculosis following Heaf testing during the first year in Secondary School.

The Mass Miniature Radiography Unit spent four days in Bishop Auckland during the year when a total of 709 people were X-rayed. No cases of tuberculosis were discovered, but six abnormalities were discovered necessitating referral to the chest clinic.

Notifications of infectious diseases (excluding tuberculosis and food poisoning) decreased to 89 this year from 344, largely due to a fall in the number of cases of measles from 263 to 12. It seems as if the effects of our measles vaccination programme are at last reaping results.

Three cases of Salmonella food poisoning were notified this year. This was in a family who had returned from holiday in Scotland where the son had been in hospital suffering from food poisoning and was still positive on returning home. Both parents had positive stools but were symptom free. The infection soon cleared and there were no further cases.

In spite of the increased number of injections given against it this year, the number of cases of whooping cough increased from 55 to 66. This reflects a slight increase throughout the country as a whole. Luckily, in the majority of cases the disease was mild and without the characteristic "whoop". In Bishop Auckland it did not necessitate the admission of any child to hospital.

Routine influenza vaccination of all staff and workmen was carried out in the Autumn, 112 doses being given.

The Meals-on-Wheels Service continues to supply 36 meals to old people twice a week. Due to shortage of helpers the W.R.V.S. were unable to extend the town service as had been hoped, but this may be remedied next year.

The Red Cross runs the "Meals from Neighbours" service for us in the villages around, and also in the town area when urgent cases arise. 1,056 meals were cooked by helpful neighbours this year compared with 492 last year.

The Red Cross also run an over-70 Tea Club catering for 48 persons once a week, there is still a waiting list of 48.

During the year 519 treatments were given in the town chiropody clinic which is run by the Red Cross and a voluntary chiropodist. 317 treatments were given in the St. Helens clinic staffed by a County chiropodist and run by the wardens of the bungalow schemes there.

We are very grateful to the voluntary organisations for their assistance in running these services.

Our own domiciliary chiropody service continues to run to capacity. During the year nine pensioners who are house bound received treatment every 8 weeks, 4 of these being over 90. There are 5 cases on the waiting list.

Christmas parcels were again distributed by the Old People's Welfare Committee assisted by various local voluntary organisations. They also carried out regular visiting throughout the year.

During the year 466 people received the services of a homehelp, an increase of 18 over last year.

An anti-smoking clinic was held during the year run by the County Health Education Department for the Bishop Auckland and Shildon area. Despite wide publicity only 16 people attended. They appeared very enthusiastic at clinic sessions but so far no follow up has been arranged to discover if they have lapsed again into this dangerous habit.

173 houses were built by the Council, 93 by private enterprise and 10 houses and 1 flat were converted from other premises making a total of 277 compared with 216 in 1970.

The number of swimmers in the baths fell to 183,884 this year (277,720 in 1970). Repeated sampling of the water showed no contamination.

In giving my report I should like to thank the Council for all their help and my staff for their efficient hard work during the year.

Area and Social Conditions.

The area of the district is 9,336 acres. The estimated population in mid-1971 was 33,320 a decrease of 1,040 on the previous year's estimate.

The rateable value at the end of 1971 was £1,171,679 and the product of a penny rate was £10,540.

The number of houses according to the Council's rate book was, at the end of 1971, 11,576 plus 59 public houses.

Vital Statistics.

In the following extracts from the vital statistics of the district, the corrected figures as supplied by the Registrar General have been used and the rates quoted are based on the abovementioned estimated population.

| Live Births | Total | Mal | es | Females | 209/ |
|----------------------------|------------|--------|----|-----------|-------|
| Legitimate Illegitimate | 465 43 | 24 | | 222 18 | |
| TOTAL | 508 | 26 | 8 | 240 | |
| Comparability Factors- | -Births | | | | 1.01 |
| | Deaths | | | | 1.10 |
| Standard Birth Rate for | or the Dis | strict | | | 15.40 |
| Standard Rate for Eng | land and | Wales | | | 16.00 |

Births.

The total number of live and still births was:

521; 274 Males; 247 Females.

Illegitimate live births total 45; 26 Males; 19 Females. Illegitimate live births as a percentage of total live births = 8 per cent. England and Wales 8 per cent.

Still Births.

| Still Births | Total | Males | Females |
|-------------------------|-------|-------|---------|
| Legitimate Illegitimate | 11 2 | 5 | 6 |
| TOTAL | 13 | 6 | 7 |

Rate per 1,000 total live and still births ... 25
Rate for England and Wales ... 12
Total live and still births 521, 274 Males 247 F

Total live and still births 521; 274 Males; 247 Females. Infant deaths (deaths under 1 year) 11; 6 Males; 5 Females.

Infant Mortality Rates.

| Total infant deaths per 1,000 total live births | 22 |
|---|-----|
| For England and Wales per 1,000 total live births | 18 |
| Legitimate infant deaths per 1,000 legitimate live births | 24 |
| For England and Wales per 1,000 legitimate live births | 17 |
| Illegitimate infant deaths per 1,000 illegitimate live births | Nil |
| For England and Wales per 1,000 illegitimate live births | 24 |
| Neo-Natal Mortality Rate. | |
| Deaths under 4 weeks per 1,000 total live births | 12 |
| England and Wales | 12 |
| | |
| Early Neo-Natal Mortality Rate. | |
| Deaths under 1 week per 1,000 total live births | 8 |
| England and Wales | 10 |
| Perinatal Mortality Rate. | |
| Still births and deaths under 1 week combined per | |
| 1,000 live and still births | 33 |
| England and Wales | 22 |

Deaths.

After correction for outwardly and inwardly transferable deaths a total of 417 (191 males and 226 females) deaths of residents was recorded during the year, giving a standard death rate of 13.8 per 1,000 of the estimated population. The death rate for England and Wales as a whole in 1971 was 11.6.

The following table gives the number of deaths recorded from the various causes during the year.

| Causes of Death | Males | Females | Total |
|--|-------|-----------|----------------------------|
| Tuberculosis of Respiratory System (2) Malignant Neoplasm, | | 1 | 1 |

| Pneumoconiosis | | 1 |
| Normal on investigation | | 1 |
| | | 6 |

WATER

The Durham County Water Board took 48 samples of water during the year for bacteriological examination, all were satisfactory. The Board supplies 11,862 houses directly from the mains, the average number of persons per house being 2.81, no house being supplied from a standpipe. No case of contamination occurred in the district and the supply was satisfactory in quantity, and quality was maintained. So far as is known, no houses are without a piped water supply.

Chlorination is carried out after all mains repairs and bacteriological tests are made until a satisfactory result is obtained.

Only natural fluoride is present in the water and varies from 0.10 p.p.m. to 0.65 p.p.m.

SEWAGE DISPOSAL

Sewage and sludge treatment continued to be dealt with satisfactorily and normally within the required river authority standard.

SEWERAGE

The sewerage system continues to work satisfactorily.

SPECIAL HEALTH SERVICES

1. PREVENTIVE SERVICES.

(a) Immunisation against Diphtheria.

The following children were immunised during the year in their homes, doctors' surgeries, County clinics or schools.

- 493 children received primary full courses of immunisation treatment.
- 531 children received "booster" doses, either singly or in combination.

(b) Whooping Cough.

404 children were vaccinated against Whooping Cough either singly or in combination. 98 "booster" doses were administered.

(c) Smallpox Vaccination.

182 primary vaccinations and 20 re-vaccinations were carried out during the year. This fall on last year is because the Department of Health has recommended that routine primary vaccination in the second year should cease because of the danger of complications.

(d) Poliomyelitis Vaccination.

The number of vaccinations carried out during the year was as follows:—

545 primaries. 502 boosters.

(e) B.C.G. Vaccinations.

605 children were Heaf tested.

39 children were positive.

471 children were negative, and

466 children were vaccinated.

These figures apply to children attending schools in the Bishop Auckland Urban District.

Of the five children who were not vaccinated one was suffering from a rash, two from Eczema, one was ill and one was postponed till next year.

(f) Tetanus Vaccinations.

The number of vaccinations given to persons under 16 years of age was as follows:—

533 primaries.

576 boosters.

(g) Measles.

396 children were vaccinated.

(h) Rubella.

216 girls were vaccinated in their fourteenth year.

2. HOME HELP SERVICE.

MEAT INSPECTION REGULATIONS, 1963

All slaughtered animals were examined in the manner prescribed by the Regulations, and the carcases of those found to be fit for human consumption were stamped by the inspecting officer.

The charges imposed brought an income of £85.84.

The income from meat inspection since the Regulations came into force is £3,945.00.

ICE CREAM

During the year thirty-seven samples were taken and graded for purity. The gradings are shown in comparison with previous years.

| | 1961 | 1962 | 1963 | 1964 | 1965 | 1966 | 1967 | 1968 | 1969 | 1970 | 1971 | Total |

CONVERSIONS TO WATER CARRIAGE SYSTEM

There were no conversions of ash closets to water carriage in 1971. At the end of the year—the numbers of the various sanitary conveniences in the Urban District were as follows:

Water Closets 13,689
Ash Closets 131

Since 1954, 2,131 conversions have been carried out.

CHIEF PUBLIC HEALTH INSPECTOR'S REPORT ON PUBLIC CLEANSING

Working Parties are formed to apply concentrated thought, study and experience to a particular problem. They are usually composed of representatives of interested bodies and experts in the subject under study. Facts, opinions and knowledge are synthesized in order to arrive at logical conclusions culminating in recommendations.

In 1971 the Report of the Working Party on Refuse Disposal was published—after four years preparation. This Report, full of facts and figures, produced one pearl of wisdom by stating that there is no universal solution to the problem of refuse disposal—there is no single best method.

Almost all shades of opinion about refuse disposal are confirmed, and we are left to assume that our opinions and methods are the best.

Nevertheless, some very useful recommendations were made, and it is to be hoped that these will be implemented sooner than many in the 1967 Report on Refuse Storage and Collection—which are still awaiting legislation.

For those responsible for the provision and maintenance of public conveniences the damage by vandals is a constant worry, as in many instances conveniences are sited in out of the way places.

Well-lit toilets in positions where they can easily be seen make the destructive work of these social outcasts very difficult.

We can all wonder if the people who dump cars and rubbish indiscriminately in the hedgerows and on open spaces consider that they have committed an act of vandalism. Probably not, and many guilty ones will certainly be "highly reputable" people. But it really is amazing how some will transport various items by car to some deserted spot especially to dump them, when many local authorities, like our own, make available a free collection service, and all that is required is a request by telephone, letter or personal visit to the Department. Perhaps the ever increasing number of requests for this service may indicate a faint glimmer of hope that one day this form of pollution will discontinue.

House and Trade Refuse Collections.

During the year the paper sack method of storage and collection was again extended at the rate of 500 to existing Council houses, and a unit to each new one occupied.

By the end of the year there were 2,178 sack holders in use.

Ash closets continue to diminish in numbers. Although there were no conversions to water carriage system in 1971, the number of ash closets was reduced by 51 to 131, this being due entirely to the demolition of unfit houses.

By 31st December, we were collecting weekly refuse from 12,233 dustbins; removing 2,178 paper sacks and cleansing 131 ash closets. In addition to this, was all the extra refuse that is put into boxes and placed next to the bin at the majority of premises. Also, it is now estimated that approximately 12% of domestic dwellings use two or more bins.

The collections from commercial and industrial premises vary from daily to once weekly.

The trade refuse charges, which are obligatory, were increased in 1971, the first time since 1962.

Collection, by way of Trade Refuse Agreement, now costs £1.50 per bin per half year.

Casual Collections, are charged for on a Labour/Vehicle Time basis, now at £2 per hour for two men with one vehicle.

Civic Amenities Act.

The number of special collections of bulk waste such as furniture, beds, pianos, garden refuse, rubble, etc., continue to increase.

In 1968 there were 192 collections. This increased to 283 in 1969, and 509 in 1970.

In 1971 the number of collections was 716.

The number of abandoned cars that have been removed by Contractors engaged by the Department since the Act came into force was by the end of 1971—146.

Refuse Disposal.

The discussions relating to the Council's decision to investigate disposal by incineration stopped in 1971 due to the local government reorganisation proposals. After 1974 disposals of refuse will be a function of the New County Council.

All refuse is currently disposed of at the Council's tip at Gurney Valley. It is now estimated that there will be Tipping Capacity available only for the next three to four years.

Salvage.

Despite one of the highest sickness rates for ten years, in this section the recovery, baling and sale of waste paper and fibreboard was almost double 1970, and the best since 1965.

In 1971, 91 tons 14 cwts. 2 qtrs. of fireboard and 27 tons 10 cwts. 3 qtrs. of mixed papers, a total of 119 tons 5 cwt. 1 qtr. were despatched to Board Mills.

An Annual Report, apart from being a soul searching exercise to improve ends by improved means, is also an opportunity to express my appreciation of the Council's resolve to improve the Service; and of the efforts each year by Health Department staff, Supervisor, Mechanics and Refuse Collectors which result in maintaining a regular and efficient service to householders, commerce and industry.
