BOSTON PORT HEALTH AUTHORITY.

ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH.

YEAR ENDED 31st DECEMBER, 1966.

To : The Mayor, Aldermen and Burgesses
of the Borough of Boston,

being the Boston Port Health Authority, as constituted
by the Boston Port Orders, 1933 and 1939.

Mr. Mayor, Ladies and Gentlemen,

I have much pleasure in presenting to the Council the Annual Report of the Port Medical Officer of the Boston Port Health Authority for the year ended 31st December, 1966, in accordance with Regulation 12 (4) of the Public Health (Port Health District) Regulations, 1959. The Report has been prepared in accordance with the instructions laid down in Form Port 20 issued by the Ministry of Health.

During the year there was a decrease in the total number of ships entering the Port, 1,358 compared with 1,660 in 1965, a reduction of 302, with a corresponding decrease in the total tonnage to 318,622 from the 1965 total of 372,473. The number of ships inspected amounted to 101. One man was examined on board ship on arrival by the Port Medical Officer. He had been treated in hospital in Russia for a stomach complaint and the Master of the ship requested that he be seen prior to being repatriated to Greece.

No cases of notifiable infectious disease occurred in the Port during the year and no ships reported that there had been any infectious disease on board during the voyage.

The principal ports from which ships arrived remained very much the same as in previous years as indeed did imports and exports.

During the year 23 Deratting Exemption Certificates were issued. 5 notices in respect of nuisances were served and they were all complied with prior to the ships sailing.

There were 87 inward passengers and 66 outward.

I should like to express my usual thanks to the Port Health Inspectors and clerical staff, Officers of H.M. Customs & Waterguard, the Port Manager and his staff, and all others connected with the Port for their assistance during 1966.

I am,

Mr. Mayor, Ladies and Gentlemen,

Your obedient Servant,

G. HIRD.

Port Medical Officer of Health.

Public Health Department,
6, Bridge Street,
BOSTON. Lincs.

March, 1967.

There have been no cases of Malaria occurring on any arriving ship.

SECTION XI - Measures taken against ships infected with or suspected for plague.

No "infected" or "suspected" ships entered the port during 1966.

SECTION XII - Measures against rodents in ships from foreign ports.

1. Procedure for inspection of ships for rats.

All ships from "infected ports" are searched for evidence of rats (excreta, gnawings, runs, etc.) and traps are set for confirmation of findings. Similar precautions are taken if the crew or stevedores report indications of rats on other ships or if routine inspections reveal suspicious circumstances.

2. Arrangements for the bacteriological or pathological examination of rodents, with special reference to rodent plague, including the number of rodents sent for examination during the year.

Bodies of rodents are sent for routine examination for plague to the Public Health Laboratory, St. Anne's Road, Lincoln, but during 1966 no bodies were recovered from ships using the port.

3. Arrangements in the district for deratting ships, the methods used, and, if done by a commercial contractor, the name of the contractor.

Boston is not a designated approved port and there are no standing arrangements for the deratting of ships.

4. Progress in the rat-proofing of ships.

Any work found to be necessary is carried out under the supervision of the Chief Port Health Inspector.
