Brentwood Urban District Council

MEMBERS OF COUNCIL

Chairman: Councillor A. E. Hammond, J.P. Vice-Chairman: Councillor W. S. Venner.

Councillors:

Mrs. E. A. F. Banwell.

W. F. R. Boardman.

H. E. Brownett.

A. V. Cave. F. Collins.

H. J. Farrow.

R. Garstang.

J. F. Hough, M.A.

G. A. Joslin.

A. L. Kennedy.

W. E. Lane.

Mrs. M. A. Masefield (Vice-Chairman of the Health Committee). G. A. D. McTurk.

T. H. Scrivener.

W. G. Stevens.

W. P. Tabor.

J. D. Tritton.

J. T. West, J.P. (Chairman of the Health Committee).

R. H. Willard.

S. A. Wilson.

S. J. Wingrave.

M. Wynne.

PUBLIC HEALTH STAFF.

MEDICAL OFFICER OF HEALTH (Part Time):

B. Fraser Beatson, M.R.C.S., L.R.C.P., D.P.H., D.T.M. & H. (late Indian Medical Service and R.A.F. Medical Service).

BACTERIOLOGIST AND ANALYST:

E. V. Suckling, M.B., B.S., D.P.H., The Counties Public Health Laboratories, 91 Queen Victoria Street, London, E.C.4.

SENIOR SANITARY INSPECTOR:

F. G. Spencer, M.R.San.I., Sanitary Inspector, Meat and Food Inspector, and Smoke Inspector, Royal Sanitary Institute.

ADDITIONAL SANITARY INSPECTOR:

E. Badcock, M.R.San.I., Sanitary Inspector and Meat and Food Inspector, Royal Sanitary Institute.

CLERKS AND SHORTHAND TYPISTS:

N. F. Webber.

E. Williams (resigned September, 1939).

Miss P. E Wenden.

Miss D. H. Fraser.

BRENTWOOD URBAN DISTRICT COUNCIL.

Annual Report of the Medical Officer of Health for the Year 1939.

Mr. Chairman, Ladies and Gentlemen,

I beg to present my Annual Report for the year 1939, which has been drawn up as directed by the Minister of Health in the abridged form suitable for war-time conditions.

The outbreak of hostilities with Germany at the beginning of September brought a large amount of additional work in connection with Casualty Services and the Evacuation Scheme, and at the same time during the last four months of the year the normal duties of the Department were considerably dislocated.

Although such additional work is to form no part of this Report, it is nevertheless intimately bound up with the usual activities of the Department. I would therefore draw attention to the devotion to duty of the Sanitary Inspectors in connection with Evacuation and Billeting during the early weeks of the war, matters of real concern to the health of the District.

The clerical staff has also done excellent work. The introduction of ladies into the Public Health Department, a war-time innovation, has proved eminently satisfactory.

I am indebted to the Council for its continuing support and to my colleagues in other Departments for their collaboration throughout the year.

I have the honour to be

Your obedient Servant,

B. FRASER BEATSON,
Medical Officer of Health.

Public Health Department,
Council Offices,
Ingrave Road,
Brentwood.

SECTION A.

STATISTICS AND SOCIAL CONDITIONS OF THE AREA.

Area in Acres				18,166
Estimated Resident Population				
(for estimating Birth Rates)				27,840
(for estimating Death and Infe	ectious	Disease	Rates)	28,570

SECTION B.

GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA.

Laboratory Facilities.

The usual facilities were provided by the Counties Public Health Laboratory, Queen Victoria Street, London, E.C., where the following specimens were examined:—

Diphtheria	 	 176
Sputa	 ·	 449
Typhoid	 	 3
General	 	 9
	Total	 637

Shortly after the beginning of the war an Emergency Public Health Laboratory was set up by the Medical Research Council, in consultation with the Ministry of Health, situated in Brentwood School, only a few minutes walk from this Department's Office. It has proved most useful. The saving of time in obtaining quick reports on specimens is obvious.

Midwives.

There are eight midwives practicing in the area, of whom six are district nurse midwives and two are independent.

Nursing Homes.

The number of registered nursing homes is four.

Ambulance Facilities.

The Council's 20 h.p. Austin Motor Ambulance purchased in 1938, has given good service. It is used for accidents and for general medical, surgical and obstetric cases. The number of patients carried during 1939 was 426.

The potential facilities of the District were of course increased by the allocation of 15 improvised ambulances for Civil Defence purposes. Many of these vehicles proved unsatisfactory and at the time of writing this report have been superseded by others.

Cases of infectious disease are removed either by the Motor Ambulance belonging to the Billericay Isolation Hospital or by Motor Ambulances provided by the L.C.C.

The service for peace time work as a whole has been adequate,

Nursing in the Home.

There are no changes to record.

Treatment Centres and Clinics.

The Essex County Council, being the Local Authority for Education, Maternity and Child Welfare and Tuberculosis, provides a number of Clinics in the District.

These have generally continued to function normally throughout the year, although certain alterations of hours of sessions to meet the inconvenience of the "black-out" and other difficulties were necessary during the last quarter.

The following is a list of Clinics provided, for the first nine months of the year:—

(a) At the Combined Treatment Centre, Queen's Road, Brentwood.

Monday morning ... Ante-natal Clinic.

Monday afternoon ... Children's Dental Filling Clinic

Monday afternoon, 5.00 p.m. Tuberculosis Dispensary

Tuesday morning ... (i) Ante-natal Clinic

(ii) Orthopædic After-treatment Clinic

Tuesday afternoon ... Children's Dental Filling Clinic

Wednesday morning ... Minor Ailments Clinic Wednesday afternoon ... Infant Welfare Clinic

Thursday morning ... Children's Dental Extraction Clinic

2nd and 4th Thursday after-

Eye Clinic

1st and 3rd Friday mornings Mothers'

Mothers' and Toddlers' Dental Extraction Clinic

2nd and 4th Friday afternoons Women's Welfare Centre

(b) At the Parochial Hall, Warley.

1st and 3rd Friday afternoons Infant Welfare Clinic

(c) At the Church Hall, Gt. Warley Street.

3rd Thursday afternoons ... Infant Weighing Centre

(d) At the Bentley Village Club.

2nd and 4th Thursday afternoons ... Infant Weighing Centre

(e) At the Parish Hall, Hutton.

1st and 3rd Wednesday afternoons ... Infant Welfare Clinic

Following the outbreak of war a number of alterations in times and places of meeting had to be made. As such revised list has been more than once subject to alteration it is not intended to give any further particulars in this report.

Mr. B. Whitchurch Howell, F.R.C.S., the County Orthopædic Surgeon makes a quarterly visit to Brentwood to see all new orthopædic cases and to review those undergoing treatment.

The services of an Ear, Nose and Throat Specialist and of a Skin Specialist are available at Oldchurch Hospital, Romford, where children can be sent for advice and treatment.

Hospitals.

The Brentwood District Hospital, a voluntary institution, continues to deal with the normal medical and surgical cases occurring in the area.

Provision for casualties has been made by the conversion of the new Reception Block at Warley Mental Hospital, under the name Warley Woods Hospital, and by the erection of a hutted unit at Highwood Hospital, a London County Council Institution.

Infectious Diseases are treated under the arrangements of the South East Essex Joint Hospital Board at their Hospital in Billericay, with the exception of cases occurring in the several institutions belonging to the London County Council, which are removed direct to the Authority's own Isolation Hospitals.

There has been no case of Smallpox notified in Brentwood for a number of years.

SECTION C.

SANITARY CIRCUMSTANCES OF THE AREA.

Water Supply.

During the year 25 samples of water were taken and submitted for bacteriological and/or chemical analysis with the following results:—

- 17 samples taken from public supplies. All samples satisfactory, but in one case a raised bacterial count caused a check sample to be taken.
- 3 samples taken from shallow wells. One satisfactory, one pumbo-solvent; one not of high standard of bacterial purity.
- 5 samples taken from swimming pools; four satisfactory, one unsatisfactory.

Closet Accommodation.

The following is a summary as far as can be ascertained of the various types of sanitary conveniences existing in the Urban District:—

Water Closets				6,487
Pail and Chemica	l Closets			1,675
Conversions to W	Vater Clo	sets during	the year	1

Disinfested		 9	Disinfested		 4

The methods of destruction were similar to those mentioned in the Annual Report for 1938.

Hydrogen Cyanide has not been used in any case during the year.

SECTION D. HOUSING.

Clearance Areas.

The Crown Street Area comprising 5 houses and a shop was demolished and the site cleared.

Individual Unfit Houses.

Official Representations for 3 houses for demolition were made.

During the year demolition orders were made respecting 5 houses.

The following properties were demolished in pursuance of demolition orders:—

> 1 and 2 Honeysuckle Cottages, Priests Lane. 1 and 2 Old Dog Cottages, Herongate.

The four cottages referred to in the Annual Report for 1938 in respect of which an undertaking was given were made fit for habitation in accordance with the Council's specification.

Inspection of Dwelling-houses during the Year:— (1) (a) Total number of dwelling-houses inspected for housing defects (under Public Health or Housing 233 (b) Number of inspections made for the purpose ... 859 (2) (a) Number of dwelling-houses (included under subhead (1) above) which were inspected and recorded under the Housing Consolidated Regu-21 lations, 1925 and 1932 ... (b) Number of inspections made for the purpose ... 76 Number of dwelling-houses found to be in a state (3) so dangerous or injurious to health as to be unfit for human habitation 15 Number of dwelling-houses (exclusive of those (4) referred under the preceding sub-head) found not to be in all respects reasonably fit for human 41 habitation Remedy of Defects during the Year without Service of Formal Notices :-Number of defective dwelling-houses rendered fit in consequence of informal action by the Local 36 Authority or their officers ... 3. SECTION E.

INSPECTION AND SUPERVISION OF FOOD.

Milk Supply.

During the year 139 samples of milk were obtained from producers and retail purveyors and submitted to the Counties Public Health Laboratories, in order to test the purity of the milk produced and sold in the District.

Summary of Samples taken:—	
Number of samples taken from dairy farms at time of production	54 15 41
(a) From pasteurising establishment	16 13
(b) During distribution	
	139
Number of Producers on Register	43
Number of Cowsheds	80
Number of Cows (approx.)	1,350
Number of inspections of Dairy Farms	110
Number of Accredited Producers	32
Number of Retail Purveyors with premises in the Urban	
District	18
Number of Retail Purveyors with premises outside the	
Urban District	11
Number of shops retailing bottled milk only	9
Number of inspections of dairies and milk shops	43
Accredited Producers.	
Number of samples taken	50
28 samples satisfied both tests.	
16 samples failed both tests.	
5 samples failed the Methylene Blue Reduction satisfied the Coliform Test.	Test but
1 sample failed the Coliform Test but satisfied the	
Methylene Blue Reduction Test.	

Pasteurised Milk.

Number of samples taken 29
28 samples satisfied the Bacteriological and/or

Phosphates Test.

1 sample failed the Bacteriological Test having a count of 106,000 per ml.

Tuberculin Tested Milk.

One sample of Tuberculin Tested Milk produced outside the Urban District and sampled on arrival at a receiving depôt failed the Methylene Blue Reduction and Coliform Tests.

Ungraded Milk.

18 samples taken from dairy farms at time of production were submitted for Bacteriological examination as follows:—

14 samples satisfactory.4 samples unsatisfactory.

41 samples obtained from retailers during distribution were submitted for Bacteriological examination with the following results:—

29 samples satisfactory.12 samples unsatisfactory.

Licences for Special Designations.

The following licences were granted for the sale of designated milk:—

Tuberculin Tested—8 Pasteurised—5

Two of the above-mentioned "Pasteurised" licences include pasteurising establishments.

The names and addresses of persons licensed to sell designated milks within the Urban District are as follows:—

Tuberculin Tested.

Foleys Dairies, 143 High Street, Brentwood. Clemoes, J. L., Hatch Farm, Brentwood. Cowling, T. W., 161 Woodman Road, Brentwood. Davey, G. & Son, 16 High Street, Brentwood.

Denny, F. S., 61 Ongar Road, Brentwood. Frost, B. W., 76 High Street, Brentwood.

London Co-operative Society Ltd., 48 High Street, Brentwood. Pannett, G., Fairview Dairy, Hutton,

Pasteurised.

Barratt, R. F., Park Farm, Herongate.
Davey, G. & Son, 16 High Street, Brentwood.
Frost, B. W., 76 High Street, Brentwood.
Grays Co-operative Society Ltd., Bridge Road, Grays.
London Co-operative Society Ltd., 48 High Street, Brentwood.

Accredited Milk-Producers Licences.

The following producers have been registered for the production of Accredited milk under the Milk (Special Designations) Orders:—

Allison, J. M., Fouchers Farm, Herongate. Battson, F., Tooks Farm, Gt. Warley. Batstone, E., Stonyhills Farm, Gt., Warley. Barratt, R. F., Park Farm, Herongate. Bird, C. H., Nuttys Farm, Childerditch. Bloomfield, H., Hill Farm, Childerditch, Brett, S. (Exors. of), Clapgate Farm, Little Warley. Calderwood, H., Creaseys Farm, Hutton, Clemoes, J. Totals		176	171	5

Milk:—One sample contained 2% added water.
One sample contained 1% added water.

Vinegar:—One sample was genuine but found to be infested with vinegar eels.

Ammoniated Tincture of Quinine Tablets:—One sample was found to be slightly deficient of the stated amount of Ammonia.

Seidlitz Powder:—One sample was found to be deficient to the extent of one half of its proper quantity of tartaric acid and was furthermore in bad condition.

Each of these cases were followed up. The stocks of Seidlitz Powders and Ammoniated Tincture of Quinine (both old stocks) were all withdrawn by the Manufacturers. The sample of Vinegar was found to have been taken from a barrel which had been in the shopkeeper's stock for about 2 years and was the last pint in the barrel. The shopkeeper undertook not to purchase such a large quantity in the future and to stock only such an amount as he could sell in a reasonable time.

A satisfactory explanation was received from the dairyman as to the presence of added water in his milk, and this on being verified was found to be true, and a remedy applied which would prevent a recurrence.

No court proceedings were necessary.

SECTION F.

PREVALENCE OF, AND CONTROL OVER, INFECTIOUS AND OTHER DISEASES.

Despite the influx of population occasioned by the Government Evacuation Scheme, there was no appreciable increase in the incidence of infectious disease over the preceding year's figures. Of the two diseases made generally notifiable in the latter part of the year, Whooping Cough yielded only four cases and there was no recorded case of true Measles during the period covered by the new Regulations.

Diphtheria Immunisation.

In addition to the usual service of free immunisation against Diphtheria for Elementary School children and their younger brothers and sisters, the problem of immunising evacuated children had to be dealt with during the last quarter. I am very much indebted to the Medical Officers of Health of Evacuation Areas for their collaboration in trying to obtain the necessary consents from parents. Unfortunately the response in those areas was most disappointing and though many evacuees had been immunised previously there is no doubt that very many more were denied the safeguard against this dangerous disease by their parents.

The material used for immunisation was, as in preious years, Toxoid Antitoxin Floccules.

While every effort will continue to be made in this District to carry out immunisation there is the risk, as pointed out in my Report for 1936, of increasing the Carrier population while only a proportion of consents to treatment is obtained.

Comparison with Diphtheria Incidence in previous years :-

Year.		Cases	Notified.
1935	 ***	 	34
1936	 	 	33
1937	 ***	 	75
1938	 	 	19
1939	 	 	28

Year 1939. Immunisation Against Diphtheria.

	Completed.	Incomplete
Under school age	27	15
School children	108	4
	135	19

Owing to the delay in obtaining consents the actual innoculation of evacuees could only be commenced in the year under review in very few cases.

Issue of Diphtheria Antitoxin.

For the treatment of suspected or actual cases of Diphtheria, a free issue of Diphtheria Antitoxin was made to General Practitioners, as follows:—

March	 	60,000	units
April	 	50,000	units
May	 	50,000	units
June	 	50,000	units
October	 	60,000	units

The following table shows the amounts of antitoxin which were required in previous years:—

Year.		τ	Jnits issued.
1935	 		70,000
1936	 		70,000
1937			280,000
1938	 		120,000
1939	 		270,000

Sanitary Conveniences-Licensed Premises.

Following the survey of the conveniences attached to Licensed premises referred to in the Annual Report for 1938, improvements have been made at many of the premises as follows:—

New conveniences have been erected at 3 premises.

Alterations to the structure and entrance to provide effective screening have been carried out at 14 premises.

The urinals at 14 premises have been provided with flushing apparatus.

In several instances additional water closet accommodation has been provided.

Further improvements to other premises are in progress.
