## MEMBERS OF COUNCIL

**Chairman :** Councillor E. G. Stone, J.P.

**Vice-Chairman :** Councillor H. J. Farrow.

### Councillors :

Mrs. E. A. F. Banwell.	W. E. Lane.
W. F. R. Boardman.	T. N. Lavender.
H. E. Brownett.	Mrs. M. A. Masefield (Chairman of the Health Committee).
A. V. Cave.	G. A. D. McTurk.
F. Collins.	T. H. Scrivener.
H. N. Fuller (Vice-Chairman of the Health Committee).	W. G. Stevens, J.P.
R. Garstang.	W. P. Tabor.
R. R. Hilton.	W. S. Venner.
J. F. Hough, M.A.	R. H. Willard.
G. A. Joslin.	S. A. Wilson.
H. J. Kirby.	S. J. Wingrave.

## PUBLIC HEALTH STAFF.

### MEDICAL OFFICER OF HEALTH (Part Time) :

B. Fraser Beatson, M.R.C.S., L.R.C.P., D.P.H., D.T.M. & H.  
(late Indian Medical Service and R.A.F. Medical Service).

### BACTERIOLOGIST AND ANALYST :

E. V. Suckling, M.B., B.S., D.P.H.,  
The Counties Public Health Laboratories,  
Gidea Park, Essex.

### SENIOR SANITARY INSPECTOR :

F. G. Spencer, M.R.San.I., Sanitary Inspector, Meat and Food  
Inspector, and Smoke Inspector, Royal Sanitary Institute.

### ADDITIONAL SANITARY INSPECTOR :

E. Badcock, M.R.San.I., Sanitary Inspector and Meat and Food  
Inspector, Royal Sanitary Institute (resigned March, 1942),  
(now vacant).

### CLERKS AND SHORTHAND TYPISTS :

Miss P. E. B. Wenden (resigned April, 1942).  
Miss R. E. M. Bailey (appointed April, 1942).

---

Miss D. Clarke (resigned March, 1942).  
Miss V. L. Ledden (appointed March, 1942).

*Annual Report of the Medical Officer of Health  
for the year 1942.*

---

Mr. Chairman, Ladies and Gentlemen,

I beg to present my Annual Report for the year 1942, which again follows the restricted lines of previous years.

Despite the continuing difficulties and hazards of War, the health of the district has been maintained at a satisfactory level. The incidence of notifiable disease has been remarkably low.

During the year under review the Department lost the services of Mr. E. Badcock, Additional Sanitary Inspector, who obtained an appointment under another Authority after 6½ years of excellent service in Brentwood.

On the clerical side, Miss P. E. B. Wenden, who had ably held the post of Chief Clerk since the outbreak of War, left the service of the Council on transfer as a Mobile V.A.D. Officer.

To the Senior Sanitary Inspector (who as usual has helped with the compilation of this Report) I am indebted for another year of painstaking work.

I have also to record with pleasure that Brentwood was twice visited in an official capacity by the Minister of Health (Mr. Ernest Brown, M.P.), when he performed ceremonies at the London Hospital Annexe and at "Childhaven," thereby giving an unique opportunity for personal contact with local Officials.

I am,

Your obedient Servant,

B. FRASER BEATSON,

Medical Officer of Health.

**SECTION B.****SANITARY CIRCUMSTANCES OF THE AREA.****Water Supply.**

During the year 1942, 39 samples of water were taken and submitted for bacteriological and for chemical analysis with the following results :—

- 24 samples from public supplies, these were satisfactory.
- 8 samples from wells, all of which proved to be unsatisfactory.
- 2 samples from a spring showed evidence of contamination and were unsatisfactory.
- 5 samples were taken from swimming baths. Two of these relating to private baths were found to be unsatisfactory.

**Sanitary Inspection of the Area.**

Percentage of the num- ber inspected affected with Tuberculosis	12.60	57.59	—	—	19.38

## SECTION E.

PREVALENCE OF, AND CONTROL OVER, INFECTIOUS  
AND OTHER DISEASES.**Diphtheria.**

It is pleasing to record that there have been very few cases of *Diphtheria notified* during the year, and that only one case has ended fatally. The total figure falls one short of the previous record established in 1938.

Every effort has been made to increase the number of children protected from this deadly disease by immunisation. Wireless broadcasts by the B.B.C., a personal letter from the Minister of Health to parents, posters, etc., all had their effect in driving into the minds of the population the need for this simple and painless inoculation of children as soon after the age of one year as possible.

The number of immunisations of children (882) carried out at the Combined Treatment Centre constitutes a record for any year since the inauguration of the scheme in 1936.

The immunisation material used was Alum Precipitated Toxoid, supplied gratis by the Ministry of Health.

The figures of immunisations carried out at the Combined Treatment Centre (kindly lent by the courtesy of the County Medical Officer) are as follows:—

	Complete.	Incomplete.	Total.
Children (ages 1 year to 15 years) ....	622	260	
Adults ....	14	—	
	<hr/>	<hr/>	
	636	260	896
	<hr/>	<hr/>	<hr/>

The majority of children incompletely immunised were due for their second inoculation early in 1943. Only a small proportion was the result of failure to attend.

In addition a number of immunisations were carried out by Medical Practitioners privately.

**Measles.**

Following an epidemic in 1941, not a single case of Measles was notified during 1942 until the end of May.

During the second half of the year there was a mild seasonal incidence, 68% of the cases occurring in Hutton Residential Schools.

A supply of Immune Globulin was again available in the Department for free issue to Medical Practitioners requiring it for use in poor families.

**Whooping Cough.**

This disease also showed a marked diminution from the previous year's figures.

**Dysentery.**

There was a fall in the incidence of Dysentery, two-thirds of the cases occurring at Warley Mental Hospital.

Two-thirds of the infections were due to *B. Sonne*—the remainder to *B. Flexner*.

**Other Notifiable Diseases.**

No cases of the following were recorded :—

Small Pox, Typhoid, Paratyphoid, Acute Encephalitis Lethargica, Acute Polioencephalitis, Ophthalmia Neonatorum.

**Scabies.**

A number of cases of Scabies among school children were treated at the Combined Treatment Centre under County Council arrangements, but among the adult population no serious incidence was reported from any source.

**Tuberculosis and Venereal Disease.**

The services for these diseases are administered by the County Council.

ANALYSIS OF NOTIFIABLE DISEASES UNDER AGE GROUPS.

Disease.	Age Groups.											Totals.	
	Under 1	1-2	2-3	3-4	4-5	5-10	10-15	15-20	20-35	35-45	45-65		65 and over
