URBAN DISTRICT OF BRENTWOOD

MEMBERS OF THE COUNCIL as at

31st DECEMBER, 1972

Chairman: R.W. Sibley

Vice-Chairman: G.H. Thorne

Mrs. A. Bloomfield	
W.T. Brocklebank	
R.G. Chapman	
M.C. Copsey	
C.G. Covell	(1)
Mrs. A.L. Cozens	(1)
G.C. Green	
Mrs. E.E. Harrison	
Mrs. M. Hutton	
J.A. Isgrove	
G.A. Jennings	(3)
D.C. Jones	
E.A. Mather	(1)
D. Minns	
K.A. Munro	(1)
E.W. Nicholson	
J.A. Parkhouse	
J.W.E. Reddell	
F.W.C. Salway	(1)
J.A. Sanderson	
D.P. Scofield	(1)
D.F. Shiels	(1)
R. Simmons	
N.R. Thain	
Mrs. P.D. Tyrer	(1)
A.E. Walker	(1)
Mrs. J.I. Watson	(2)
L.B. Wickes	(1)

- (1) Member of the Health and Sewerage Committee;  
(2) Chairman of the Health and Sewerage Committee;  
(3) Vice-Chairman of the Health and Sewerage Committee.

-----

PUBLIC HEALTH DEPARTMENT

STAFF - 1972

MEDICAL OFFICER OF HEALTH

Dr. James Gorman, M.B., Ch.B., D.P.H., F.R.S.H.,

DEPUTY MEDICAL OFFICER OF HEALTH

Dr. T.D. Blott, B.Sc., M.B., B.S., D.P.H., Barrister at Law.

CHIEF PUBLIC HEALTH INSPECTOR

Mr. P.T. Shelton, M.A.P.H.I., M.R.S.H., A.R.I.C.S.,  
Public Health Inspector, Meat and Food Inspector, Royal Society of  
Health's Certificate in Sanitary Science as applied to Buildings  
and Public Works, Professional Associate Royal Institution of  
Chartered Surveyors.

DEPUTY CHIEF PUBLIC HEALTH INSPECTOR

Mr. E.A. Sheppard, M.A.P.H.I., C.R.San.I., Public Health Inspector,  
Meat and Food Inspector, Royal Society of Health's Certificate in  
Sanitary Science as applied to Buildings and Public Works.

SENIOR DISTRICT PUBLIC HEALTH INSPECTOR

Mr. G.D. John, M.A.P.H.I., C.R.San.I., Public Health Inspector, Meat  
and Food Inspector, Royal Society of Health's Diploma for Smoke Inspectors.

DISTRICT PUBLIC HEALTH INSPECTORS

Mr. M.A. Jackson, Public Health Inspectors' Certificate for the P.H.I.E.B.,  
Royal Society of Health's Diploma for Inspection of Meat and Other Foods.

ext: 519

Health Department,  
Council Offices,  
Ingrave Road,  
BRENTWOOD, Essex.

To the Chairman and Members of the  
Urban District Council of Brentwood

Mr. Chairman, Ladies and Gentlemen,

This Annual Report for 1972 - which I beg to present - represents the end of another era in the Community Health Service since the forthcoming reorganisation will doubtless demand quite a different form of work presentation.

The new service with its management training emphasis, its multi-disciplinary team approach and a virtually new vocabulary will, however, still have to deal with basically the same human and environmental problems and through the agency of the same persons who administer the present system. Changing the name of a post may stimulate but is unlikely to change its holder. A Medical Officer of Health who becomes a Community Physician or a General Practitioner who is referred to as a physician of primary care contact will acquire a new image but not a new personality. The integration of all the component parts of the new service depends so much on communication and will ultimately depend as much on will as skill. It is easy for a highly developed service to become vulnerable to its own complexities and for its emphasis to orient to the professional and clinical at the expense of the personal. Computers will doubtless enable, for example, statistics to be analysed and utilised to great advantage. It is a pity that as time passes forms and returns initially valuable tend on occasion to be valued more for their presence than for their content. Although the future of the Medical Officer of Health still seems undefined if not in some cases uncertain everyone will wish the new service well.

I must, once again, pay tribute to the contribution of the Public Health Inspectors in the field of environmental health. They have been increasingly aware of the hazards of noise, pollution and the like as well as demanding improved standards of food handling and distribution. In this field some medical officers have tended to subordinate the claims of the environmental to the personal services and have in so doing failed to maintain their standing in a field where they have much to contribute. Public Health Inspectors likewise will continue to require medical advice notably in the bacteriological implications of food handling and infectious disease.

Although Industrial Medicine does not come strictly within the scope of this Report the environment in its widest sense is so involved by industry that apart from a clinical approach a closer integration of all the services involved is essential if the public good is to be safeguarded.

I acknowledge with thanks the consideration which you have accorded to me during the year, and I must express my particular thanks to Mr. Shelton and his staff, to Miss Turff and to Mrs. Clark with whom it has been a pleasure to work.

I am,

Mr. Chairman, Ladies and Gentlemen,

Your obedient servant,

(3)

JAMES GORMAN.

## URBAN DISTRICT OF BRENTWOOD

BRENTWOOD - a residential area - is in the heart of the Metropolitan Green Belt. The Urban District has an area of 18,269 acres and the number of residents has increased in post-war years from 27,730 (1946) to the present figure of 58,620 (Estimated Mid-year home population).

The town centre is 400 feet above sea level and commands views of a pleasant, well wooded countryside. Large areas of parklands and other open spaces have been acquired for use by the public. Many of the woodland areas have been protected from unrestricted felling and there is, in the residential areas, an air of spaciousness which is enhanced by a wealth of forest and decorative trees.

The Urban District of Brentwood was constituted an Urban Authority in April, 1899, and consisted of the old Parish of Brentwood, having an area of 354 acres, and a population, according to the Census of 1901, of 4,932.

It is interesting to note, however, that the inhabitants of Brentwood in 1801 totalled 1,007. In fifty years the population increased by 1,198 showing a figure of 2,205 in 1851. Between the years of 1851 to 1901, there was a further increase of 2,727. Therefore, in a period of 100 years the population had only increased by 3,925.

The Census taken in the following years show a gradual rise in the population of Brentwood, from 1901 - 4,932; to the Census of 1911 - 6,923; to the Census of 1919 - 6,288; to the Census of 1921 - 6,910; and to the Census of 1931 - 7,208. This shows an increase of 2,276 in a period of 30 years.

When Brentwood's boundaries were extended in 1934, this naturally increased the population, and the estimated resident population for that year was 21,435. In this period of 30 years from 1934 to 1964, the population had increased by 32,795 as compared with the previous thirty years of only 2,276. The Census for 1961 - 49,242 as against the previous Census for 1951 - 29,897, shows an increase of 19,345 in ten years, but from 1961 to 1971 the increase was only 8,734.

I give below details of the New Brentwood District Council No: 9 :-

<u>Comprising :</u>	<u>1971 Census Population</u>	<u>Area (Acres)</u>
Brentwood Urban District	57,976	18,269
Chelmsford R.D. (parishes of Ingatestone & Fryerning and Mountnessing)	6,253	6,696

Neonatal Mortality Rate	11	12	12	12
Early Neonatal Mortality Rate	10	11	10	10
Perinatal Mortality Rate	21	19	22	22

#### Vital Statistics:

The Birth, Infant Mortality and Death Rates do not call for especial comment.

The specific causes of death remain remarkably constant.

I comment later in the Report on the changing picture shown by looking at the statistics from the beginning of the century until now. A major argument for producing these Annual Reports is in fact the information they make available for later scrutiny.

DEATHS BY CAUSE - 1972

.B. Erysipelas and Pneumonia are no longer notifiable diseases.

The Birth Rate in the first twenty years was high - it fell appreciably in 1927 - 1938 and the corrected figure was above the current average in the late fifties and sixties.

The Death Rate in general did not show the wide fluctuations one might have anticipated.

The Infant Mortality Rate is truly revealing and shows the extraordinary progress made in reducing such deaths.

In the first ten years of the century it varied from 61 - 131, in the next ten years from 25 - 111. It then dropped progressively so that in the sixties it was between 10 and 20.

It should be noted that various rates have from time to time been adjusted by various factors to encourage a national comparison validity.

In the Infectious Disease field Diphtheria was a commonplace notably from 1935 - 1939 and in 1941 (when there was 107 cases). After 1948 it virtually disappeared. Typhoid Fever perhaps surprisingly never achieved a high attack rate even early in the century. Smallpox showed one case in 1902.

The Tuberculosis figures are incomplete for an earlier period and will not therefore be discussed.

Measles and Whooping Cough which reached <sup>high</sup> proportions from time to time have now declined one anticipates permanently.

Poliomyelitis had its worst years in 1949; 1953;(10 cases) and 1955;(16 cases), and is now completely dormant.

It is something of a paradox that the better the public are informed the more apprehensive do they become. The mass media have and carry out their considerable responsibility for keeping the public informed of happenings in this field and in times of serious outbreak one often has acquired news more quickly through the national press than through more official channels. But - and there is a but - it is extremely important that informing should not be synonymous with alarming. This is in essence a public relations problem. Individual cases of say typhoid tend to crop up without apparent cause but in isolation are no great source of worry if their investigation is painstaking and the position is kept under close surveillance. If health education and press and television coverage could succeed in securing a proper perspective in such a case real progress would have been made.

-----

In addition to the above two other cases were reported as follows:-

Tuberculosis (Other forms) 1 female aged 49 years  
Dysentery 1 female aged 6 years

The year showed a sharp decrease in the number of Dysentery cases and in Whooping Cough, whilst Measles cases increased. None of these diseases now represents a major hazard.

OTHER ORGANISATIONS AND SERVICESBrentwood Tuberculosis and Chest Care Association:

The following report has been received from the Hon:Secretary of this Association - Mrs. Theresa Clark - for which my thanks are due :-

The Brentwood T.B. and Chest Care Association are pleased to report another year during which they have been able to help many people in the Brentwood area suffering from various chest illnesses. Milk, eggs and other forms of nourishment, continue to be the main type of assistance requested and given. In view of the shortage of money, no holidays were provided, and possibly due to the mildness of the winter, no coal was asked for.

As in previous years, money continued to be the main worry and the Committee undertook several money-making projects. The proceeds from these, together with a generous grant of £150.00 from the Brentwood Urban District Council, enabled commitments to be met. Unfortunately, the cost of providing assistance continued to rise and during 1972 expenditure on milk, eggs and other nourishment amounted to £508.39 out of a total expenditure for the year of £515.94.

Early in the year, a meeting of all Essex Care Committees was arranged in order to consider the future of such Committees following the cessation of the Essex County Council grant. The meeting was well attended and there was an excellent exchange of views. The conclusions reached were :-

- (1) that no objection was felt to a liaison with the Essex County Council providing that such liaison did not slow up the assistance given or mean the institution of a "means test";
- (2) the Committees were fulfilling a need which still existed even after all available statutory sources had been tapped. The help was available immediately and supplemented what was often a totally inadequate grant from Social Security departments.

Since the above meeting, the Area Social Work Organiser of the Essex County Council had attended one of the Association meetings.

Welfare Services - Voluntary Organisations:

The under-mentioned organisations received grants from the Brentwood Urban District Council during 1972 :-

Meals-on-Wheels Service	£1,630.00
Citizens Advice Bureau	£1,165.00
Holidays for the Old Folk	500.00
Marriage Guidance Council	400.00
British Red Cross Association	300.00
Brentwood Home Safety Committee	250.00
Brentwood T.B. and Chest Care Association	150.00
Hutton Free Church - Luncheon Club	130.00
Radiant Club for the Blind	90.00
Hutton Community Association - Luncheon Club	70.00
Brentwood & District Mental Health Association	50.00

Brentwood Home Safety Committee  
Hon:Secretary's Report for 1972

The big event of the year was the Home Safety Week from the 18th to the 23rd September, 1972. All Home Safety Committees within the areas of Brentwood, Basildon, Braintree, Witham, Chelmsford, South East Essex, Southend and Thurrock took part and organised Competitions for Adults and Children, with the co-operation of the local newspapers.

In Brentwood we arranged a display on Shenfield Common for the Monday evening, September 18th, when the following events took place:-

- (a) Police Dog handling by the Essex and Southend Joint Constabulary;
- (b) Static Fire appliances by the Essex County Fire Brigade;
- (c) Brentwood Division of St.John's Ambulance Brigade demonstrating the 'Kiss of Life' with an ambulance for inspection by the public and a bandaging demonstration;
- (d) the sending up of several hundred balloons marking our 'Home Safety Week' with prizes for the Sender and the Finder of the balloons which travelled the farthest distance. Two balloons reached the coast of France and prizes were awarded to Roger Buot and Reillon Thierry. Other balloons arrived in parts of Kent, Westhove and Bournemouth. I feel sure that many more balloons would have reached the coast of France had the weather been kinder, as it was, it had rained all day and the evening was cold, dull and a very high wind. Nevertheless, it was a successful evening and those who visited Shenfield Common that evening were most impressed by the Police dogs.

Other Activities:

During the year we organised a Scrapbook Competition and collages for the younger children attending our local schools, and prizes were awarded to those children which had produced the best 'Home Safety' scrapbooks and collages.

We did not forget the elderly residents of Brentwood. Leaflets were purchased from RoSPA on 'Safety in Retirement' which were distributed to all Old Folks' Clubs and booklets entitled 'Keeping Fit in Retirement' issued by the National Dairy Council were also given to the elderly.

8,000 Home Safety Serviettes were purchased from RoSPA for children attending the Infant/Primary Schools in the area and 8,000 Calendars for 1973 were provided for the older children.

We continued with the poster display on the platforms at Shenfield and Brentwood Stations. Forty-eight posters were purchased from RoSPA, a different one for each month of the year, and these are placed on the UP and DOWN platforms at these local stations. This is quite an expensive item, but most worthwhile!

On behalf of the Committee may I express our very grateful thanks to the Brentwood Urban District Council for their financial support, and to the Essex County Council for their grant. The supply of posters and leaflets which we purchase from RoSPA and supply to the local schools, clinics etc., are costly, in fact we spent £123.79p. on this type of publicity. We also like to advertise in the 'Argus' and 'Brentwood Gazette' from time to time - both these newspapers are most co-operative and provide a very satisfactory feature on 'Safety in the Home'.

To all members of the committee I would like to say 'thank-you' for your continued loyalty and support during another year.

Evelyn P. Turff

Hon:Secretary

### WATER SUPPLY

I have received the following report from the Chief Engineer of the Essex Water Company :-

- (a) 1. The water supply of the whole of the area has been satisfactory in quality and quantity.
2. No action has been necessary in respect of any form of contamination.
3. The number of dwelling houses supplied as at the 31st December, 1972, was 19,418, and the population as at the 30th June, 1972, as obtained from the Registrar General, was 58,620. We are unable to state the number of houses supplied by standpipe, but the total is quite insignificant.
- \*\* 4. We do not make frequent fluorine determinations but on the basis of past results, the fluorine content of the supplies is put at 0.25 p.p.m.
- (b) 1. Bacteriological and Chemical examinations are made of the raw water, of the water in its various stages of treatment and the water going into supply. A total exceeding 10,000 chemical, bacteriological and biological examinations have been made and all water going into supply was wholesome. In addition samples were examined for radioactivity. Analyses have also been made of samples obtained from consumers taps in the various parts of the Company's district, including that of your Council, and all proved to be satisfactory. Radioactivity level is negligible.
2. The water is not plumbo-solvent.
- \*\* Recent estimates suggest the fluorine content ranges from 0.15 to 0.4.p.p.m.

### LAUNDRY SERVICE FOR THE INCONTINENT

Under the provisions of the Public Health Act, 1936, Section 84, this free service is provided for those patients who are incontinent, and whose linen is unsuitable for sending to a commercial laundry.

The service is carried out twice weekly on Monday and Thursday mornings. Each patient is given a number and all articles sent must be marked with that number. A nylon bag is also provided together with a book for the patient to enter all articles sent. The book is in triplicate so that the top copy is given to the hospital receiving the bag, the second copy is retained in this department and the book kept by the patient.

During the year twenty-two new patients were added to our list. There were four deaths and twelve patients were admitted to either Hospital or a Home in the district. 5,242 articles of clothing were put through the washing machines at one of our local hospitals.

-----

## SEWERAGE and SEWAGE DISPOSAL

I have received the following report from Mr. P.C. Emes, Engineer, Surveyor and Planning Officer, giving list of drainage schemes and their progress during 1972 :-

" Since the last report, work has commenced on the redrainage of Horndon Village, which scheme is estimated to cost approximately £390,000 and, at the time of writing this, the scheme is well ahead of schedule.

During the course of the year, several reports have been made to the Health and Sewerage Committee and to the Finance and General Purposes Committee on major schemes of redrainage which are necessary within the Urban District. The Council has given the scheme for Shenfield Central Area Surface Water Drainage the highest priority and all available staff resources are being concentrated on the design of this scheme, which it is hoped will start towards the end of 1973.

The Council decided to make the Brentwood Central Area Surface Water Drainage Scheme their second priority and design works will commence on this scheme as soon as the staff have completed the first priority scheme.

In respect of the Western Area Drainage Scheme, the Council have intimated that this major scheme will not start for a considerable time due to lack of resources but have agreed to certain interim works being carried out, subject to the necessary loan sanctions being obtained. These are as follows:-

- (a) Green Lane Pumping Station and Associated Rising Main;
- (b) Weald Road/St.Charles Road - The laying of a section of sewer to relieve conditions in this vicinity;
- (c) Construction of the Weald Sewer Pumping Station.

During June 1973, the Council were giving consideration to the possibility of carrying out certain works of surface water drainage to relieve flooding which arises (a) on the Bishops Hall Estate, (b) at Wash Road/Oakbank and (c) in the Doddinghurst Road area.

There remain areas within the Urban District, particularly at Coxtie Green Road and Warley where main drainage should be provided as a matter of urgency as soon as the necessary funds can be made available.

Other sewerage and sewage disposal schemes which will require attention and should be considered in early programmes of the Council include :-

- (a) Whitby Avenue Pumping Station - Relaying of Rising Main;
- (b) Provision of Inlet Works and Storm Tanks at East Horndon S.D.W.
- (c) Provision of additional filters and tertiary treatment plant at Shenfield and Hutton S.D.W.

During 1972, it was possible to complete the relaying of a length of foul sewer in Middle Road and a surface water sewer was provided in Church Lane, Hutton, to relieve local flooding. "

THE COUNTY AMBULANCE SERVICE

Dr. J.A.C. Franklin, the County Medical Officer of Health, has kindly provided the following information relating to the operation of the County Ambulance Service in the Brentwood Urban District during 1972. I have been asked to indicate that the service is centrally administered and is the responsibility of the County Council, and this I gladly do.

Dual Purpose Vehicles	2
Sitting Case Vehicles	4
Total Mileage	134,083
Stretcher Cases conveyed	1,996
Other Cases conveyed	21,225
Total Cases conveyed	23,221
Emergency Cases	1,528

-----

NATIONAL BLOOD TRANSFUSION SERVICE

I have received the following report from the Director of the North-East Metropolitan Regional Blood Transfusion Centre in Brentwood :-

"In 1972 blood donor sessions for the Brentwood panel were again held in St.Thomas's Parish Hall, Eastfield Road; the Territorial Army Drill Hall, Chestnut Grove; and St.Mary's Parish Hall, Hutton Road, Shenfield. Two sessions were also held at the Village Hall in West Horndon.

The attendance of blood donors at the 24 sessions held at the above Centres during 1972 were 2,366. Members of the W.R.V.S. Brentwood continued to give valuable help at the sessions in Brentwood and Shenfield and a team of voluntary helpers assisted at West Horndon.

We again received good support from local industrial firms in the Brentwood U.D.C. area at which 981 donors attended sessions."

-----

## VACCINATION and IMMUNISATION

The following information on the number of people given various protective immunisation during the year has been received from the Mid-Essex Area Office at Chelmsford.

<u>Primary Courses carried out by :-</u>	<u>G.P's</u>	<u>County Staff</u>	<u>Totals:</u>

Midwives' Clinic	Monday afternoons (1st, 2nd & 4th)
Relaxation Classes	Tuesday mornings - 10-12 noon.
Child Health Clinic, with Doctor	Tuesday afternoons 2-4 p.m.
School Clinic	Wednesday mornings (2nd & 4th)
Child Health Clinic	Wednesday afternoons 2-4 p.m.
Ophthalmic Clinic - by appointment	1st Wednesday & 4th Friday mornings.
Audiometry Sessions	Thursday mornings (2nd in month)
Cervical cytology - by appointment	Thursday afternoons (1st & 3rd in mth.)
Dental Clinic	By appointment only.

<u>Meeting Place</u>	<u>Day and Time</u>
Ingrave Clinic (Doctor in attendance) held at St. Nicholas Hall, Ingrave.	Monday afternoons (2nd & 4th in the month)
South Weald Clinic held at - 85, London Road, Brentwood.	Tuesday afternoons (2nd & 4th in the month)
Keys Hall, Eagle Way, Warley. (opp: Ford's Office)	Tuesday afternoons (3rd in the month)
Bentley Clinic (Doctor in attendance) held at the Bishops Hall Park Recreation Centre, Doddinghurst Road. Brentwood.	Tuesday afternoons - Immunisation (4th in the month) Every Thursday P.M. - Child Health Clinic.
West Horndon Clinic (Doctor in attendance) held at the Village Hall, Thorndon Avenue.	Thursday afternoons (2nd & 4th in the month)

# HOME HELP SERVICE FOR BRENTWOOD AREA

I have received the following report from the Area Social Work Organiser - Mr. D.L. Glen - of the County Council's Social Services Department. These statistics refer to the Home Help Service in the Brentwood area for 1972.

Staff: 85 Part-time Home Helps.

Total Cases helped: 1,644

<u>Aged 65 years and over:</u>	<u>Maternity:</u>	<u>Chronic Sick (under 65 yrs)</u>	<u>Short term Help:</u>
1,480	26	81	57

Home Help Organisers: 1 Full-time  
1 Part-time

Domiciliary Visits 3,553

Other Visits 1,776 Total: 5,329

Weekly average of cases receiving help - approx: 400

Mrs. S.M. McKenzie, who has been the full-time Home Help Organiser for the past six years, retired at the end of April, 1972. Her place has been taken by Mrs. E. Whiting who has been upgraded from the position of part-time Home Help Organiser.

## FAMILY PLANNING ASSOCIATION - Sessions

Brentwood F.P.A. Clinic, 39, Queens Road, Brentwood.	<u>Wednesday</u> 7.0 p.m. - 8.30 p.m.	Phone Brentwood 1863 during session hours.

Total	<u>11,927 lbs</u>

Total amount of unsound food condemned during 1972 = 5 tons 6 cwts  
& 55 lbs.

## FOOD PREMISES

The number of inspections of food premises was about the same level as in 1971. Over half of these were the licensed Slaughterhouse at Little Warley and thus the number of visits to food premises generally was fewer than one would like, however, it is hoped that, with slightly augmented staff, it will be possible to increase the number of food visits for 1973. Generally the standard of food premises in the Urban District can be considered satisfactory - perhaps even somewhat above national average, but a great deal of work is required before saying that all premises are up to the desired standard. Numerous complaints reach this department about the sale of articles in respect of which there has obviously been bad stock rotation, and most of these are dealt with informally.

### FOOD HYGIENE (GENERAL) REGULATIONS, 1960

Type of Premises:	Number in district according to records	Number complying with Reg: 16.	Number of which Reg: 19 applies	Fitted to comply with Reg: 19.

## MILK SUPPLIES

### Bacteriological Sampling:

A total of forty-nine bacteriological samples of milk was taken, all of which were satisfactory.

## ICE-CREAM SAMPLES

### Bacteriological Sampling:

A total of fifty-one samples of ice-cream was taken. Forty-four of these were Grade 1, four Grade 2, and three Grade 3. None were graded 4 - the lowest grade, so once again the general standard could be regarded as satisfactory.

## OTHER FOOD

### Bacteriological Sampling:

No organised bacteriological sampling programme was carried out, but 1,009 samples of frozen meals were taken from Ford's Frozen Food Depot at Warley. Only seven of these were unsatisfactory.

## POULTRY INSPECTION

There are no poultry processing premises in the area of the Urban District Council.

## FOOD & DRUGS ACT, 1955 - FOOD SAMPLING

A total of 186 formal and informal samples were taken. Details of unsatisfactory samples are set out below :-

Almonds	affected by insects;
Bread	contained discoloured dough;
Bread	contained piece of fibre board;
Banbury Cake	contained cigarette tip;
Corned beef	mouldy condition;
Cornish pasty	mouldy condition;
Fruit pie	contained particles of dirt;
Luncheon meat	contained piece of tin;
Meat pie	contained silicious matter;
Meat (beef)	contained particles of aluminium;
Meats (various)	tainted with unidentifiable smell;
Milk	deficient in fat;
Milk	paint in bottle;
Milk	musty taste;
Pappadorms	insect infested;
Sausage meat	meat content low;
Scone	contained a nail;
Pork pie	mouldy condition.

Where necessary details of the unsatisfactory samples were reported to Committee, but no proceedings were taken in any case. It is found that, whilst people will register their complaints with the department, they are normally reluctant to consider giving evidence should proceedings be contemplated.

However, we are not particularly prosecution minded and the complaints are invariably investigated fully and steps taken to prevent, so far as possible, any recurrences.

## SWIMMING BATH SAMPLES

Results of Samples taken during 1972, were as follows:-

<u>Baths:</u>	<u>Samples taken:</u>	<u>Satisfactory:</u>	<u>Unsatisfactory:</u>
Brentwood U.D.C. Bath	11	10	1
Brentwood Grammar School	2	2	-
Brentwood County High School	7	7	-
Shenfield Technical School	11	11	-
Ursuline Convent	12	12	-
Pilgrims Hatch Junior School	7	6	1
Hutton Poplars	12	12	-
Brentwood Preparatory School	5	4	1
West Horndon Primary School	4	3	1
St. Peter's Primary, Sth. Weald	11	8	3
Hartswood Paddling Pool	5	5	-

## CLEAN AIR ACTS, 1956/1968

During the year 254 visits were made under the Acts and 384 smoke observations were made.

Numerous applications for chimney heights were approved. No further Smoke Control Orders were made during 1972, but the number of houses using solid fuel continues to decrease proportionately and there is no doubt that this has made a significant contribution to the cause of Clean Air in the district. Many pollution problems remain with us, but as the battle for Clean Air is perhaps slowly being won, or at least contained - "what say the struggle naught availeth?" - the fight against noise will surely take its place, and on this I comment later.

## NOISE ABATEMENT

Twenty-seven complaints about noise, emanating from twenty-one different sources, were investigated. Some measure of success was achieved in most cases, but this is, of course, subjective to a large extent, and there is little doubt that the public are now far more noise conscious than they used to be.

Noise is growing. Noise must be reduced, the cost will be great, the cost of complacency will be disastrous. Long overdue, but now to hand, is the Circular relating to Noise and Town Planning. The planners, in their eagerness to get on with the job, may well discount the need for detailed investigation in relation to noise problems, because this will undoubtedly cause delays in decision making and even some degree of frustration, but once buildings are up and roads constructed they come into use and the noisy child may well land on the doorstep of the Local Authority. In such cases fully preventative measures are more than justified.

NOISE ABATEMENT  
(continued)

Compensation for noise nuisance is pure nonsense. Heaven help us if the dimly lit microscope of "cost benefit analysis" is applied to this problem! Spend the money, and the time first to reduce the noise to the lowest possible acceptable level. That is the only way to tackle the growing menace of noise intrusion in our daily lives.

REFUSE DISPOSAL

The method of disposal continued to be tipping at the Council's Tip in Coxtie Green Road, Brentwood.

The promised pulverisation plant has now been installed and the long term public health benefits of this should be appreciable.

No great difficulties were experienced with infestation problems and regular visits were made by the Department's Pest Control Operator.

OVERCROWDING

Fifty-three visits were made in connection with cases of overcrowding brought to the notice of the department during the year. The Council's Housing Department were informed where appropriate. No formal action was taken in respect of any case.

COMMON LODGING HOUSES

There are no common lodging houses in the Urban District of Brentwood.

VISITS BY DISINFESTATION & RODENT OPERATIVE

Laundry Service for the Incontinent (number of calls to patients)	1,325
Rat Destruction	1,915
Disinfestation	78
Pond Treatment (Mosquito control)	71
Drain Testing	14
Assisting Public Health Inspectors	41
Conveyance of Welfare Foods	-
Rat Destruction at Refuse Tip	17
Rat Destruction at Sewage Works	49
Total:	<u>3,510</u>

# MEAT INSPECTION

Operations at the Slaughterhouse at Hall Lane, Little Warley, continued as usual. Two Authorised Meat Inspectors are now employed full time. It was found necessary to remind the Proprietors several times of their obligations to comply with the various Regulations relating to the control and disposal of unsound meat etc., but overall a good standard of hygiene and, I am confident, of inspection was achieved.

The percentage of meat condemned was somewhat, but not significantly, higher than in 1971. I am, once again, happy to record my appreciation of the assistance received from the Veterinary Officers of the Ministry of Agriculture, Fisheries and Food.

Details of Inspections are as under - January to December, 1972 : -

	Cattle excluding Cows:		Sheep and Lambs:		Pigs:
	Cows:	Calves:			
Number killed	1985	326	22	3511	47526
Number Inspected	1985	326	22	3511	47526
<u>All Diseases except T.B. and Cysticerci</u>					
Whole carcasses condemned:	2	11	3	2	131
Carcasses of which some part or organ was condemned:	566	174	5	303	7842
Percentage of the number inspected affected with disease other than T.B. or Cysticerci	30.1%	56.7%	36.4%	8.7%	16.8%
<u>Tuberculosis ONLY:</u>					
Carcasses of which some part or organ was condemned:	2	-	-	-	1244
Percentage of the number inspected affected with T.B.	0.087%	-	-	-	2.6%
<u>Cysticercosis ONLY:</u>					
Carcasses of which some part or organ was condemned:	35	1	-	3	-
Carcasses submitted to treatment by refrigeration	2	-	-	-	-

Total number of animals slaughtered = 53,370

Total weight of Meat condemned = 91,586 lbs

The following is a copy of the Annual Report made to the Department of Employment:-

Inspection Arrangements: There has been no change in the district's arrangements during the year.

Inspections: Whilst the number of general inspections was down on the previous year's figures, the number of visits made for a specific reason increased considerably.

Registration of Premises: Some success was achieved in obtaining OSR.1. forms from some of the more recalcitrant firms. The total of registered premises in consequence shows a small increase over the previous year's figures, but broadly speaking the total numbers employed remains much the same.

Accidents: 14 non-fatal accidents, all of a relatively minor nature, were reported to this office. They were distributed fairly evenly amongst the categories. Of the 14, 11 occurred in retail shops, 2 in offices and 1 in a canteen. Only one this year occurred in conjunction with machinery - a butcher using a band-saw had his hand cut when the saw caught the bone in the joint he was cutting, spinning it and his hand into the blade. All accidents were investigated - none involved the use of electricity.

Lifts & Hoists

Regulations: Five contraventions of these regulations were reported by Examining Engineers. All were remedied within the time stipulated by the Engineers.

Exemptions: Only one exemption in respect of overcrowding was current and this will expire during 1973.

Prosecutions: No proceedings were instituted during the year.

Contraventions: Some four-hundred contraventions discovered by the Inspectors were dealt with informally, often in conjunction with Food Hygiene (General) Regulations. The main categories involved were offences concerning sanitary conveniences, washing facilities, provision of first aid equipment, maintenance of adequate working temperatures and ventilation.

## HOUSING

Housing matters again took up much of the time of the Public Health Inspectors. Eight houses were demolished during 1972 as a result of formal action and thirteen houses were closed. Forty-nine houses were made fit as a result of formal or informal action, these being in addition to those houses improved with the aid of grants. The Department wages continual warfare with certain owners and, regretably, certain agents, who buy old run down properties and who neglect to do repairs, hoping that Closing Orders will be made, vacant possession thus obtained, and the property sold at a very substantial profit.

There are a small number of houses let in multiple occupation and these present many problems, which leaves one unconvinced that the well meaning but ponderous legislation which deals with this aspect of housing can ever be made to work in face of the fact that so many 'casuals' seem to accept this kind of accommodation as their natural habitat. Access for purposes of inspection is always difficult, the landlords invariably want the highest possible return for the lowest possible expenditure and again can hardly be described as being over blessed with altruism.

The department continues to deal with Improvement Grants and much useful work was done during the course of the year to bring a number of houses up to modern standards. Since a certain amount of money is available "for free" co-operation from owners in this respect of housing is somewhat more forthcoming.

All of which leads to the conclusion that housing, the economy and the frailties of human nature are inevitably and inexorably related and that the Public Health Inspector needs must continue to live up to his motto "Amicus Humani Generis".

### HOUSING STATISTICS

#### Slum Clearance and Repair

Houses in clearance areas and unfit houses elsewhere:-

(a) Houses demolished during the year:

In clearance areas	.....	.....	Nil
Not in clearance areas (as a result of formal or informal procedure under Section 17 (1) Housing Act, 1957.)	.....	.....	8
Number of separate dwellings contained therein	.....	.....	11

(b) Unfit houses closed during the year:

Under Section 16 (4), 17 (1) and 35 (1) Housing Acts, 1957 & Section 26, Housing Act, 1961.....	13
Number of separate dwellings contained therein	13

(c) Unfit houses made fit and houses in which defects were remedied:

(a) after informal action by Local Authority	.....	32
(b) after formal notice under Section 9 (1) and 16 (1) Housing Act, 1957 :- (i) by owner	...	Nil
(ii) by Local Authority		Nil
after formal notice under Public Health Acts	...	6
after determination of Closing Orders		6
(c) Other houses in which defects were remedied	...	5

THE ADMINISTRATION OF THE FACTORIES ACT, 1961

INSPECTIONS for the purpose of provisions as to health (including inspections made by Public Health Inspectors)

Premises:	No: on Register	Number of Inspections	Written Notices	Number of:- Occupiers prosecuted
